POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Brakeman; Compressor operator; Deck hand; Engineer oiler; Generator operator; Heavy duty repairman helper; Pump operator; Signalman; Switchman

Group 2: Concrete mixer, Skip type; Conveyor; Fireman; Generator, pump or compressor, (2-5 inclusive) portel units - over 5 units, .10c per hour for each additional unit up to nine units; Hydrostatic pump; Oiler crusher (asphalt or concrete plant); Plant operator, generator, pump or compressor; Skiploader - wheel type up to 3/4 yd. without attachment; Tar pot fireman; Temporary heating plant operator; Trenching machine oiler; Truck crane oiler

Group 3: A-Frame or Winch Truck; Chainman; Elevator (inside); Equipment greaser (rack); Ford Farguson (with dragtype attachments); Power concrete curing machine; Power concrete saw; Power-driven jumbo form setter; Ross carrier (jobsite); Stationary pipe wrapping and cleaning machine

Group 4: Asphalt Plant Fireman; Boring machine; Boxman or mixerman (asphalt or concrete); Chip spreading machine; Concrete pump (small portable); Bridge type unloader and turntable; Dinky locomotive or motorman (up to and including 10 tons); Equipment greaser (grease truck); Helicopter hoist operator; Highline cableway signalman; Hydra-hammer-aero stomper; Power sweeper; Roller (compacting); Screed (asphalt or concrete); Rodman; Trenching machine (up to 6 ft.)

Group 5: Asphalt Plant Engineer; Concrete batch plant operator - (oiler or journeyman-trainee required); Backhoe (up to and including 3/4 yds.); Bit sharpener; Concrete joint machine operator (canal and similar type); Concrete planer; Derrickman (oilfield type); Deck engine operator; Drilling machine (including water wells); Forklift (under 5 ton capacity); Hydrographic seeder machine (straw, pulp or seed); Machine tool; Maginnis internal full slab vibrator; Mechanical berm, curb or gutter (concrete or asphalt); Mechanical finisher operator (concrete Clery - Johnson-Bidwell or similar): Pavement breaker (truck mounted, oiler) road oil mixing machine; Roller operator (asphalt or finish); Rubber tired earth moving equipment, (single engine, up to and including 25 yds. struck); Self-propelled tar pipelining machine operator; Slip form pump (power driven hydraulic lifting device for concrete forms); Tugger hoist (1 drum); Tunnel locomotive operator (over 10 and up to and including 30 tons); Stinger crane (Austin-Western or similar type); Skiploader operator (crawler and wheel type over 3/4 yd. and up to and including 1 1/2 yds.); Tractor operator, Bulldozer, Tamper, Scraper (single engine, up to 100 h.p. flywheel and similar types, up to and including D-5 and similar types.)

POWER EQUIPMENT OPERATORS CONT'D:
(Except Piledriving and Steel Erection)

GROUP 6: Asphalt or concrete spreader (tamping or finishing); Asphalt paving machine (Barber Green or similar type - 2 screedman required); BHL Lima Road Factor, Wagner Factor or similar; Bridge crane operator; Cast in place pipe laying machine operator; Combination mixer and compressor (gunite work); Concrete pump (truck mounted)(oiler required); Concrete mixer operator-paving; Crane operator (up to and including 25 tons capacity); Crushing plant operator; Elevating grader; Forklift (over 5 tons); Grade checker; Gradall operator; Grouting machine; Heading shield; Heavy duty repairman; Hoist operator (Chicago boom and similar type); Kolman belt loader and similar type; LeTourneau blob compactor or similar type; Lift sleb machine (Vagtborg and similar types); Lift mobile operator; Loader operator (Athey, Euclid, Sierra and similar type; Material hoist; Mucking machine (1/4 yd. - rubber-tired, rail or track type); Pneumatic concrete placing machine (Hackley-Presswell or similar type); Pneumatic heading shield (tunnel); Pumpcrete gun; Rotary drill (excl. caisson type); Rubber-tired earth moving equipment, (single engine-Caterpillar, Euclid, Athey, Wagon, and similar types with any and all attachments over 25 yds. and up to and incl. 50 cu. yds. struck); Rubber-tired scraper (self-loading-paddle wheel type); Skiploader (crawler and wheel type over 1-1/2 yds., up to and incl. 6-1/2 yds.); Surface heaters and planer; Rubber-tired earth moving equipment, multiple engine, (up to and incl. 25 yds. struck); Trenching machine (over 6 ft. depth capacity, manufacturers rating); Tower crane; Tractor compressor drill combination; Tractor (any type larger than D-5-100 flywheel h.p. and over or similar) (Bulldozer, tamper, scraper, and push tractor, single engine); Tractor (boom attachments); Traveling pipe wrapping, cleaning and bending machine; Tunnel locomotive (over 30 tons); Shovel, Backhoe, Dragline, Clamshell (over 3/4 yds. and up to 5 cu.yds. M.R.C.

GROUP 7: Crane - over 25 tons up to and including 100 tons; Derrick barge; Dual drum mixer; Monorail locomotive (Diesel, gas or electric); Motor patrol - blade (single engine); Multiple engine tractor (Euclid and similar type, except Quad 9 cat); Rubber- tired earth moving equipment, single engine over fifty (50) yds. struck; Rubber-tired earth moving equipment (multiple engine, Euclid, Caterpillar and similar)(over 25 yds. and up to 50 cu. yds. struck); Tractor loader (crawler and wheel type over 6-1/2 yds.); Tower crane repairman; Shovel, Backhoe, Dragline, Clamshell (over 5 cu. yds.; M.R.C.; Woods mixer and similar pugmill equipment; Heavy duty repairman - welder combination

GROUP8: Auto grader operator; Automatic slip form; Crane-over 100 tons; Hoist, Stiff legs, guy derricks or similar types (capable of hoisting 100 tons or more); Mass excavator; Mechanical finishing machine; Motor patrol (multi-engine); Pipe mobile machine; Rubber-tired earth moving equipment (Multiple engine, Euclid, Caterpillar and similar type over 50 cu. yds. struck); Rubber-tired scraper (Push-pull)(.50c per hour additional to base rate); Tandem equipment operators (2 units only); Tandem Tractor Op. (Quad 9 or similar type); Tunnel mole boring machine operator-

XUM 47 22 RAM 75193V

POWER EQUIPMENT OPERATORS (cont'd)
(Except Piledriving and Steel Erection)

GROUP 9: Canal liner; Canal trimmer, Helicopter pilot; Highline cableway; Rubber-tired self-loading scraper (paddle wheel-Auger type self-loading - 2 or more units); Wheel excavator (over 750 cu. yds.); Remote controlled earth moving equipment operator ($1.00 per hour additional)

TRUCK DRIVERS

Group 1: Warehouseman and Teamster

Group 2: Drivers of Vehicles or Combination of vehicles of 2 axles (incl. all vehicles less than six tons); Traffic control pilot car, excluding moving heavy equipment permit load

Group 3: Truck mounted power broom

Group 4: Drivers of Vehicles or Combinacion of vehicles of 3 axles; Water truck, 2 axles

Group 5: Bootman, Cement distributor; Fuel truck; Driver of road oil spreader truck

Group 6: Transit-mix, under 3 yds.; Dumpcrete, less than 6 1/2 yds.

Group 7: Water Truck, 3 or more axles; Truck repairman helper

Group 8: Truck Greaser and Tiremen (50c per hour additional when working on tire sizes above 24 inch in wheel diameter); Pipeline and utility working truck driver, incl. winch truck, but not limited to trucks applicable to pipeline and utility work, where a composite crew is used

Group 9: Transit-mix, 3 yds. or more; Dumpcrete, 6 1/2 yds. and over

Group 10: Drivers or Vehicles or combination of vehicles of 4 or more axles

Group 11: A-Frame or Swedish Crane, or similar type of equipment; Fork lift; Ross carrier (Hwy)

Group 12: All Off-Highway Equipment within Teamsters Jurisdiction (off highway combination of vehicles or equipment with multiple power sources, $1.00 per hour additional); Truck repairman

Group 13: Truck Repairman - Welder

SUPERSEDEAS DECISION

STATE: California

COUNTIES: Imperial, Kern, Los Angeles, Orange, Riverside, San Bernardino, San Luis Obispo, Santa Barbara and Ventura

DECISION NO.: AQ-1095

DATE: Date of Publication

Supersedes Decision No. AQ-1065 dated December 14, 1973, in 38 FR 34589.

DESCRIPTION OF WORK: Residential Construction consisting of single family homes and garden type apartments up to and including 4 stories.

(Except Piledriving and Steel Erection)

Group 1: Birkeman; Compressor operator; Deck hand, Engineer oiler; Generator operator; Heavy duty repairman helper; Pump operator; Signalman, Switchman

Group 2: Concrete mixer, Skip type; Conveyor; Fireman; Generator, pump or compressor (2-5 inclusive) portal units - over 5 units, .10c per hour for each unit up to nine units; Hydrostatic pump; Oiler crusher (support to concrete plant); Plant operator, generator, pump or compressor; Skiploader - wheel type up to 3/4 yd. without attachment; Tar pot fireman; Temporary heating plant operator; Trenching machine oiler; Truck crane oiler

Group 3: A-Frame or Winch Truck; Chainman; Elevator (inside); Equipment greaser (rack), Ford Ferguson (with dragtype attachments); Power concrete curing machine; Power concrete saw; Power-driven jumbo form setter; Ross carrier (jobsite); Stationary pipe wrapping and cleaning machine

Group 4: Asphalt Plant Fireman; Boring machine; Boxman or mixerman (asphalt or concrete); Chip spreading machine; Concrete pump (small portable); Bridge type unloader and turntable; Dinky locomotive or motorman (up to and including 10 tons); Equipment greaser (grease truck); Helicopter hoist operator; Highline cableway signalman; Hydra-hammer-aero stomper; Power sweeper; Roller (compacting); Screed (asphalt or concrete); Rodman; Trenching machine (up to 6 ft.)

Group 5: Asphalt Plant Engineer; Concrete batch plant operator - (oiler or journeyman-trainee required); Backhoe (up to and including 3/4 yds.); Bit sharpener; Concrete joint machine operator (canal and similar type); Concrete planer; Derrickman (oilfield type); Deck engine operator; Drilling machine (including water wells); Forklift (under 5 ton capacity); Hydrographic seeder machine (straw, pulp or seed); Machine tool; Magianis internal full slab vibrator; Mechanical berm, curb or gutter (concrete or asphalt); Mechanical finisher operator (concrete Clary - Johnson-Bidwell or similar); Pavement breaker (truck mounted, oiler) road oil mixing machine; Roller operator (asphalt or finish); Rubber tired earth moving equipment, (single engine, up to and including 25 yds. struck); Self-propelled tar pipelining machine operator; Slip form pump (power driven hydraulic lifting device for concrete forms); Tugger hoist (1 drum); Tunnel locomotive operator (over 10 and up to and including 30 tons); Stinger crane (Austin-Western or similar type); Skiploader operator (crawler and wheel type over 3/4 yd. and up to and including 1 1/2 yds.); Tractor operator, Buildozer, Tamper, Scraper (single engine, up to 100 h.p. flywheel and similar types, up to and including D-5 and similar types.)

POWER EQUIPMENT OPERATORS CONT'D:
(Except Piledriving and Steel Erection)

GROUP 6: Asphalt or concrete spreader (tamping or finishing); Asphalt paving machine (Barber Green or similar type - 2 screedman required); BHT, Lima Road Factor, Wagner Factor or similar; Bridge crane operator; Cast in place pipe laying machine operator; Combination mixer and compressor (gunite work); Concrete pump (truck mounted)(oiler required); Concrete mixer operator-paving; Crane operator (up to and including 25 tons capacity); Crushing plant operator; Elevating grader; Forklift (over 5 tons); Grade checker; Gradall operator; Grouting machine; Heading shield; Heavy duty repairman; Hoist operator (Chicago boom and similar type); Kolman belt loader and similar type; LeTourneau blob compactor or similar type; Lift slab machine (Vagtborg and similar types); Lift mobile operator; Loader operator (Athey, Euclid, Sierra and similar type; Material hoist; Mucking machine (1/4 yd. - rubber-tired, rail or track type); Pneumatic concrete placing machine (Mackley-Presswell or similar type); Pneumatic heading shield (tunnel); Pumpcrete gun; Rotary drill (excl. caisson type); Rubber-tired earth moving equipment, (single engine-Caterpillar, Euclid, Athey, Wagon, and similar types with any and all attachments over 25 yds. and up to and incl. 50 cu. yds. struck); Rubber-tired scraper (self-loading-paddle wheel type); Skiploader (crawler and wheel type over 1-1/2 yds., up to and incl. 6-1/2 yds.); Surface heaters and planer; Rubber-tired earth moving equipment, multiple engine, (up to and incl. 25 yds. struck); Trenching machine (over 6 ft. depth capacity, manufacturers rating); Tower crane; Tractor compressor drill combination; Tractor (any type larger than D-5-100 flywheel h.p. and over or similar) (Bulldozer, tamper, scraper, and push tractor, single engine); Tractor (boom attachments); Traveling pipe wrapping, cleaning and bending machine; Tunnel locomotive (over 30 tons); Shovel, Backhoe, Dragline, Clamshell (over 3/4 yds. and up to 5 cu.yds. M.R.C.

GROUP 7: Crane - over 25 tons up to and including 100 tons; Derrick barge; Dual drum mixer; Monorail locomotive (Diesel, gas or electric); Motor patrol - blade (single engine); Multiple engine tractor (Euclid and similar type, except Quad 9 cat); Rubber- tired earth moving equipment, single engine over fifty (50) yds. struck; Rubber-tired earth moving equipment (multiple engine, Euclid, Caterpillar and similar)(over 25 yds. and up to 50 cu. yds. struck); Tractor loader (crawler and wheel type over 6-1/2 yds.); Tower crane repairman; Shovel, Backhoe, Dragline, Clamshell (over 5 cu. yds.; M.R.C.; Woods mixer and similar pugmill equipment; Heavy duty repairman - welder combination

GROUP8: Auto grader operator; Automatic slip form; Crane-over 100 tons; Hoist, Stiff legs, guy derricks or similar types (capable of hoisting 100 tons or more); Mass excavator; Mechanical finishing machine; Motor patrol (multi-engine); Pipe mobile machine; Rubber-tired earth moving equipment (Multiple engine, Euclid; Caterpillar and similar type over 50 cu. yds. struck); Rubber-tired scraper (Push-pull)(.50c per hour additional to base rate); Tandem equipment operators (2 units only); Tandem Tractor Op. (Quad 9 or similar type); Tunnel mole boring machine operator

POWER EQUIPMENT OPERATORS (cont'd)
(Except Piledriving and Steel Erection)

GROUP 9: Canal liner; Canal trimmer; Helicopter pilot; Highline cableway; Rubber-tired self-loading scraper (paddle wheel-Auger type self-loading - 2 or more units); Wheel excavator (over 750 cu. yds.); Remote controlled earth moving equipment operator ($1.00 per hour additional)

XUM 47 22 RAM 25193 V

TRUCK DRIVERS

Group 1: Warehouseman and Teamster

Group 2: Drivers of Vehicles or Combination of vehicles of 2 axles (incl. all vehicles less than six tons); Traffic control pilot car, excluding moving heavy equipment permit load

Group 3: Truck mounted power broom

Group 4: Drivers of Vehicles or Combination of vehicles of 3 axles; Water truck, 2 axles

Group 5: Bootman; Cement distributer; Fuel truck; Driver of road oil spreader truck

Group 6: Transit-mix, under 3 yds.; Dumpcrete, less than 6 1/2 yds.

Group 7: Water Truck, 3 or more axles; Truck repairman helper

Group 8: Truck Greaser and Tiremen (50¢ per hour additional when working on tire sizes above 24 inch in wheel diameter); Pipeline and utility working truck driver, incl. winch truck, but not limited to trucks applicable to pipeline and utility work, where a composite crew is used

Group 9: Transit-mix, 3 yds. or more; Dumpcrete, 6 1/2 yds. and over

Group 10: Drivers of Vehicles or combination of vehicles of 4 or more axles

Group 11: A-Frame or Swadish Crane, or similar type off equipment; Fork lift; Ross carrier (Hwy)

Group 12: All Off-Highway Equipment within Teamsters Jurisdiction (off highway combination of vehicles or equipment with multiple power sources, $1.00 per hour additional); Truck repairman

Group 13: Truck Repairman - Welder

PAID HOLIDAYS: (Where Applicable)
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E- Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. Employer contributes 4% of basic hourly rate for 5 years or more of service or 2% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

b. Holidays: A through F.

c. Holidays: A through F, plus Washington's Birthday, Good Friday and Christmas Eve, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regularly scheduled work days immediately preceding and following the holiday.

d. Holidays: 9 Paid Holidays, A through F; Washington's Birthday and Good Friday, plus one (1) floating holiday per year provided the employee has been employed for a period of ten (10) working days prior to the holiday and works the scheduled work days immediately preceding and following the holiday.

e. Two (2) paid holidays: C and D providing the employee works the day before and the day after the holiday.

f. Holidays: B,C,D, plus Good Friday provided the employee has been employed 14 consecutive days immediately prior to the holiday.

g. Paid Holidays: A through F plus Good Friday.

h. Paid Holidays: C through E.

i. Paid Holidays: C, D and E.

Pages 11063–11161

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FEDERAL REGISTER—Office of the Federal Register guidelines for agencies planning to submit previously printed or large amounts of material for publication 11150

ECONOMIC STABILIZATION—

CLC ruling on natural gas producers' exemption from public utility rates 11074

CLC special rule regarding aerospace tandem pay adjustments 11072

CLC exempts certain unconcentrated machinery industries from Phase IV price and pay regulations; effective 3–20–74 11070

CLC exempts ferroalloys from Phase IV price regulations; effective 3–21–74 11069

ENVIRONMENT—

EPA proposes air and water pollution grant regulations; comments by 4–24–74 11099

EPA proposes recall of vehicles which fail to meet pollution standards; comments by 5–24–74 11103

EPA requests information on feasibility of certain emission levels 11134

PESTICIDES—EPA exemption from tolerance requirements; effective 3–25–74 11080

CIGARETTES—FTC lists tar and nicotine content of 128 domestic varieties 11148

NEW ANIMAL DRUGS—FDA withdrawal of approval of application; effective 3–25–74 11127

TOMATO JUICE—FDA proposes to permit addition of vitamin C; comments by 4–24–74 11095

OATS—USDA loan and purchase rates, premiums, discounts, and storage deductions for 1974 crop 11076

YELLOWFIN TUNA—Commerce Department proposes 1974 program for eastern Pacific fisheries; comments by 4–4–74 11089

IMPORTED CHEESE—USDA changes criteria for establishing certain quotas; effective 4–1–74 11074

(Continued inside)

REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

FAA—RF devices; equipment authorization 5912; 2–15–74

FCC—Temporary Exemption from motor vehice safety standards, required data and procedures for processing petitions 5489; 2–13–74

FDA—Thermally processed low-acid foods packaged in hermetically sealed containers; personnel training. 7782; 2–28–74

USDA/AMS—Imported onions; minimum grade and size requirements. 8911; 3–7–74

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HIGHLIGHTS—Continued

SMALL BUSINESS ASSISTANCE—SBA proposal concerning firms operating in areas of substantial unemployment; comments by 4–9–74 11121

MOBILE HOMES—HUD allows loans for units placed on sites leased from a municipality or other subdivision of a State; effective 4–22–74 11080

SAVINGS AND LOANS—FHLBB increases liquidity requirements; effective 6–1–74 11080

ANTIDUMPING—Treasury Department withholds appraisement on non-powered hand tools from Japan; comments by 4–24–74 11122

MEETINGS—
NIH: Division of Research Grants, 47 study sections, April meetings 11127
CAB: American Society of Travel Agents, Inc., 4–5–74 11133
Transportation Association of America, 4–3–74 11133
USDA: Advisory Committee on Foreign Animal and Poultry Diseases, 4–2–74 11124
HEW: Social Security Administration, Advisory Committee on Medicare Administration, Contracting, and Subcontracting, 3–29 and 4–5–74 11128
National Institute of Education, National Council on Educational Research, 4–1–74 11128
Navy Department: U.S. Naval Academy Academic Advisory Board, 4–1–74 11122
Veterans Administration: Advisory Committee on Cemeteries and Memorials, 4–3 and 4–4–74 11150
National Endowment for the Humanities: Public Programs Panel (2 documents), 4–1, 4–2, 4–4, and 4–5–74 11149
Committee for the Implementation of Textile Agreements: Management-Labor Advisory Committee, 4–3–74 11133
FEO: Emergency Advisory Committee for Natural Gas, Subcommittee on LP-Gas Supply and Demand, 3–26–74 11135
CLC: Food Industry Wage and Salary Committee, 3–24–74 11150

Contents

AGRICULTURAL MARKETING SERVICE

Rules and Regulations

Milk in the northern Louisiana marketing area; order suspending certain provisions 11075

Navel and Valencia oranges grown in Arizona and designated part of California, limitation of handling (2 documents) 11074

Proposed Rules

Milk in the Appalachian marketing area; recommended decision and opportunity to file written exceptions 11088

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Labor

Section 213.3315 is amended to show that one position of Special Assistant to the Associate Assistant Secretary for National Programs and one position of Special Assistant to the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration, are excepted under Schedule C.

Effective on March 25, 1974, § 213.3315 (a) (37) and (38) are added as set out below.

§ 213.3315 Department of Labor.

(a) *Office of the Secretary*

• • • • •

(37) One Special Assistant to the Associate Assistant Secretary for National Programs, Occupational Safety and Health Administration.

(38) One Special Assistant to the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration.

• • • • •

(5 U.S.C. secs. 3301, 3302; E.O. 10577; 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74–6793 Filed 3–22–74;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Labor

Section 213.3315 is amended to show that the title of one position of Secretary (Stenography), excepted under Schedule C, is changed to Office Management Assistant, excepted under Schedule C.

Effective on March 25, 1974, § 213.3315 (a) (3) is amended and (a) (39) is added as set out below.

§ 213.3315 Department of Labor.

(a) *Office of the Secretary.*

• • • • •

(3) One Private Secretary to each Assistant Secretary of Labor, who is appointed by the President except the Assistant Secretary for Occupational Safety and Health.

• • • • •

(39) One Office Management Assistant to the Assistant Secretary for Occupational Safety and Health.

• • • • •

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74–6792 Filed 3–22–74;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare

Section 213.3316 is amended to show that one position of Confidential Assistant to the Secretary is re-established under Schedule C.

Effective on March 25, 1974, § 213.3316 (a) (2) is amended as set forth below.

§ 213.3316 Department of Health, Education, and Welfare.

(a) *Office of the Secretary.* • • •

(2) Two Confidential Assistants to the Secretary.

• • • • •

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74–6791 Filed 3–22–74;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

Section 213.3384 is amended to reflect the following organizational redesignation: from Office of Assistant Secretary for Community Planning and Management, and Office of the Assistant Secretary for Community Development to Office of the Assistant Secretary for Community Planning and Development.

Effective on March 25, 1974, § 213.3384 (d) is amended and (e) is revoked as set out below.

§ 213.3384 Department of Housing and Urban Development.

• • • • •

(d) *Office of the Assistant Secretary for Community Planning and Development.* • • •

(3) Four Special Assistants to the Assistant Secretary.

• • • • •

(11) Deputy Assistant Secretary for Community Development.

(e) [Revoked]

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74–6790 Filed 3–22–74;8:45 am]

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

PART 150—PHASE IV PRICE REGULATIONS

Ferroalloy Metals Exemption

The purpose of this amendment is to expand the exemption for nonferrous metals (§ 150.54(v)) under the Phase IV price regulations to include ferroalloy metals. Prior to this amendment, the exemption in § 150.54(v) specifically excluded ferroalloys.

This exemption is necessary to assure an adequate domestic supply of ferroalloy metals. A two-tiered pricing structure has developed which has encouraged an increase in exports of some domestically produced metals where the export price was significantly higher than the domestic price. This exemption will allow domestic prices to rise to levels which more closely parallel world price levels. The exemption should reduce the incentive to export and may encourage a return to normal domestic supply patterns.

A substantial segment of the ferroalloy industry was previously already exempt from Phase IV price controls following the January 25, 1974 action exempting prices charged for steel products listed in SIC Group No. 331 by manufacturers of those steel products who derive less than $50 million in annual sales and revenues from those steel products (§ 150.54(cc)). Ferroalloys are included among the items listed in Group 331. This amendment will grant an exemption to the ferroalloy metal producers who were not affected by the earlier steel exemption.

This exemption is also related to the exemption of ferrous scrap and ferrous alloy scrap (§ 150.54(p)) issued February 15, 1974. Ferrous scrap and ferrous alloy scrap are used in the production of certain ferroalloy metals. In addition, ferroalloy metals and ferrous alloy scrap metals are used in the production of iron and steel. This exemption will put these related materials in the same exempt status.

The ferroalloy industry is relatively small, with annual sales and revenues in 1973 estimated to be $400 million. The products of the industry make up a small percentage of the cost of most steel items.

V 39 I 58 MAR 25 74 XUM

Thus the direct impact of this exemption on steel prices should be minimal. Exemption should ease supply problems for certain ferroalloy items and steel items made from ferroalloy materials.

The amendment to § 150.54(v) removes language which provided that the nonferrous metals exemption did not apply to ferroalloys. Language is added to make clear that the exemption now applies to ferroalloys and to make more specific the definition of the term "ferroalloys" used in the section. Under this amendment, "ferroalloys" means metals listed in the Tariff Schedules of the United States (19 U.S.C. 1202) in Schedule 6, Part 2, Subpart B, paragraphs 2 (d) and (e). The most important metals listed in paragraph 2(e) include the ferroalloys of manganese, silicon, chromium and tungsten. Ferronickel, listed in paragraph 2(d), is already exempt and continues to be so. Because of its close relationship to the ferroalloys listed in paragraph 2(e) it has been included in the definition of "ferroalloys" used in the exemption. Although ferronickel continues to be exempt, specific references to the metal have been deleted from the regulation.

Metals not listed in the referenced headnote paragraphs of the Tariff Schedules are not affected by this amendment and remain under Phase IV price controls. These metals include all forms of pig iron, spiegeleisen, wrought iron, steel and alloy iron or steel.

Under § 150.11(e) and 150.161(b), a firm with revenues from the sale of exempt items remains subject to the profit margin constraints and reporting provisions of the Phase IV program unless in its most recent fiscal year it derived both less than $50 million in annual sales and revenues from the sale or lease of nonexempt items and 90% or more of its annual sales and revenues from the sale of exempt items or exempt sales.

As with all exemptions from Phase IV controls, firms subject to this amendment remain subject to review for compliance with appropriate regulations in effect prior to these exemptions. A firm affected by this amendment will be held responsible for its pre-exemption compliance under all phases of the Economic Stabilization Program. A firm affected by this exemption alleged to be in violation of stabilization rules in effect prior to this exemption is subject to the same compliance actions as a non-exempt firm. These compliance actions include investigations, issuance of notices of probable violation, issuance of remedial orders requiring rollbacks or refunds, and possible penalty of $2,500 for each stabilization violation.

The Council retains the authority to reestablish price controls in these industries if price behavior is inconsistent with the goals of the Economic Stabilization Program. The Council also has the authority, under § 150.162, to require firms to file special or separate reports setting forth information relating to the Economic Stabilization Program in addition to any other reports which may be required under the Phase IV controls program.

Because the purpose of these amendments is to grant an immediate exemption from the Phase IV price regulations, the Council finds that publication in accordance with normal rulemaking procedure is impracticable and that good cause exists for making this amendment effective in less than 30 days. Interested persons may submit written comments regarding this amendment. Communications should be addressed to the Office of the General Counsel, Cost of Living Council, 2000 M Street, N.W., Washington, D.C. 20508.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92–210, 85 Stat. 743; Pub. L. 93–28, 87 Stat. 27; E.O. 11695, 38 FR 1743; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing, Part 150 of Title 6 of the Code of Federal Regulations is amended as set forth herein, effective March 21, 1974.

Issued in Washington, D.C., on March 21, 1974.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

In 6 CFR Part 150, § 150.54(v) is amended to read as follows:

§ 150.54 Certain price adjustments.

• • • • •

(v) *Nonferrous metals (except aluminum and copper) and ferroalloys.* Prices charged for the nonferrous metal content of ores, tailings, and secondary (scrap) metals; for nonferrous metal waste products, by-products, residues and basic shapes, derived from the milling, smelting and refining of ores and nonferrous metals; and for ferroalloys are exempt except as hereinafter specified in this paragraph. This paragraph does not apply to:

(1) Gold, silver, copper or aluminum, except aluminum scrap; or

(2) Any nonferrous metal waste product, by-product, residue or basic shape whose raw material content by value is greater than 50% copper or aluminum, separately or in combination, whether from primary or secondary materials.

The products exempted are generally those listed in Group Nos. 103, 106 and 109 and Industry Nos. 3313, 3332, 3333, 3339, and 3341 and ferroalloys listed in Industry No. 3312 of the Standard Industrial Classification Manual, 1972 Edition. For purposes of this paragraph, "ferroalloys" means the metals described in Schedule 6, Part 2, Subpart B, paragraphs 2(d), and (e) of the Tariff schedules of the United States (19 U.S.C. 1202).

• • • • •

[FR Doc.74-6956 Filed 3-21-74;4:57 pm]

PART 150—PHASE IV PRICE REGULATIONS

PART 152—PHASE IV PAY REGULATIONS

Exemption of Unconcentrated Machinery Industries

The purpose of this amendment is to exempt prices charged by manufacturers for machinery in certain unconcentrated industries and to add a parallel exemption in the pay regulations. The items exempt are described in the Standard Industrial Classification Manual, 1967 Edition, under the following Industry Numbers:

3535 (Conveyors and Conveying Equipment).
3541 (Machine Tools, Metal Cutting Types).
3542 (Machine Tools, Metal Forming Types).
3544 (Special Dies and Tools, Die Sets, Jigs and Fixtures).
3545 (Machine Tool Accessories and Measuring Devices).
3551 (Food Products Machinery).
3559 (Special Industry Machinery, Not Elsewhere Classified).
3561 (Pumps, Air and Gas Compressors, and Pumping Equipment).
3564 (Blowers and Exhaust and Ventilation Fans).
3565 (Industrial Patterns).
3566 (Mechanical Power Transmission Equipment, Except Ball and Roller Bearings).
3569 (General Industrial Machinery and Equipment, Not Elsewhere Classified).
3585 (Air Conditioning Equipment and Commercial and Industrial Refrigeration Machinery and Equipment).
3589 (Service Industry Machines, Not Elsewhere Classified).
3599 (Miscellaneous Machinery, Except Electrical).
3642 (Lighting Fixtures).
3644 (Noncurrent-Carrying Wiring Devices).
3662 (Radio and Television Transmitting, Signaling and Detection Equipment and Apparatus).
3679 (Electronic Components and Accessories, Not Elsewhere Classified).
3699 (Electrical Machinery, Equipment and Supplies, Not Elsewhere Classified).

There are three reasons for exempting machinery in these industries from the Phase IV price regulations. First, future price increases in these industries are expected to be constrained because of their competitive nature. Shipments in these industries are dispersed among a relatively large number of individual firms and in no instance does a single firm produce more than 10 percent of the industry's output. Second, since August 1971, no industry in this group has had an annual rate of price change above 4.7 percent. Finally, decontrol will lessen the possibility that companies in these industries will increase exports, which result in domestic shortages.

In developing the list of items, the sale of which is exempt under this amendment, the Council relied on the SIC Manual Code system. Only the sale by the manufacturer of the specific items listed under the Industrial Numbers cited is exempt. Other items which may be generically similar but are not listed do not come within the scope of this amendment. Furthermore, for purposes of this amendment the 1967 edition of the SIC Manual is used.

Under §§ 150.11(e) and 150.161(b), a firm with revenues in its most recent fiscal year from the sale of exempt items remains subject to the profit margin constraints and reporting provisions of the Phase IV program unless it derived both less than $50 million in annual sales or revenues from the sale or lease of nonexempt items and 90 percent or more of its sales and revenues from the sale of exempt items or exempt sales.

As a complementary action to the exemption from price controls, the Council has also exempted pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in an unconcentrated machinery manufacturing industry. The exemption is set forth in new § 152.39e. "Establishment in an unconcentrated machinery manufacturing industry" is defined as an establishment classified in the Standard Industrial Classification Manual, 1967 edition, under Industry Number 3535 (Conveyors and Conveying Equipment), 3541 (Machine Tools, Metal Cutting Types), 3542 (Machine Tools, Metal Forming Tapes), 3544 (Special Dies and Tools, Die Sets, Jigs and Fixtures), 3545 (Machine Tool Accessories and Measuring Devices), 3551 (Food Products Machinery), 3559 (Special Industry Machinery, Not Elsewhere Classified), 3561 (Pumps, Air and Gas Compressors, and Pumping Equipment), 3564 (Blowers and Exhaust and Ventilation Fans), 3565 (Industrial Patterns), 3566 (Mechanical Power Transmission Equipment, Except Ball and Roller Bearings), 3569 (General Industrial Machinery and Equipment, Not Elsewhere Classified), 3585 (Air Conditioning Equipment and Commercial and Industrial Refrigeration Machinery and Equipment), 3589 (Service Industry Machines, Not Elsewhere Classified), 3599 (Miscellaneous Machinery, Except Electrical), 3642 (Lighting Fixtures), 3644 (Noncurrent-Carrying Wiring Devices), 3662 (Radio and Television Transmitting, Signaling and Detection Equipment and Apparatus), 3679 (Electronic Components and Accessories, Not Elsewhere Classified), or 3699 (Electrical Machinery, Equipment, and Supplies, Not Elsewhere Classified), and primarily engaged in the manufacture of any products classified under such Industry Numbers. The exemption is inapplicable to any such employee who receives an item of incentive compensation, or who is a member of an executive control group. The exemption is also inapplicable to any such employee whose duties and responsibilities are not of a type exclusively performed in or related to an unconcentrated machinery manufacturing industry and whose pay adjustments are historically related to the pay adjustments of employees performing such duties outside the industry and are not related to the pay adjustments of other employees that are within this or another exempted industry. The exemption is further inapplicable to employees who are part of an appropriate employee unit where 25 percent or more of the members of such unit are not engaged on a regular and continuing basis in the operation of an establishment engaged in activities exempted under Subpart D. In addition, the exemption is inapplicable to any appropriate employee unit subject to a Decision and Order of the Council for the period covered by such Decision and Order. In cases of uncertainty of application, inquiries concerning the scope or coverage of the pay exemption should be addressed to the Administrator, Office of Wage Stabilization, P.O. Box 672, Washington, D.C. 20044.

As with all exemptions from Phase IV controls, firms subject to this amendment remain subject to review for compliance with appropriate regulations in effect prior to this exemption. A firm affected by this amendment will be held responsible for its pre-exemption compliance under all phases of the Economic Stabilization Program. A firm affected by this exemption alleged to be in violation of stabilization rules in effect prior to this exemption is subject to the same compliance actions as a non-exempt firm. These compliance actions include investigations, issuance of notices of probable violation, issuance of remedial orders requiring rollbacks or refunds, and possible penalty of $2,500 for each stabilization violation.

The Council retains the authority to reestablish price and wage controls over any of the industries exempt by these amendments if price or wage behavior is inconsistent with the policies of the Economic Stabilization Program. The Council also has the power, under §§ 150.162 and 152.6, to require firms to file special or separate reports setting forth information relating to the Economic Stabilization Program in addition to any other reports which may be required under the Phase IV controls program.

Because the purpose of these amendments is to grant an immediate exemption from the Phase IV price and pay regulations, the Council finds that publication in accordance with normal rule making procedure is impracticable and that good cause exists for making these amendments effective in less than 30 days. Interested persons may submit written comments regarding these amendments. Communications should be addressed to the Office of the General Counsel, Cost of Living Council, 2000 M Street, NW., Washington, D.C. 20508.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92–210, 85 Stat. 743; Pub. L. 93–28, 87 Stat. 27; E.O. 11695, 38 FR 1473; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing, Parts 150 and 152 of Title 6 of the Code of Federal Regulations are amended as set forth herein, effective March 20, 1974.

Issued in Washington, D.C., on March 20, 1974.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

1. In 6 CFR Part 150, § 150.58 is amended to add a new paragraph (d) to read as follows:

§ 150.58 Certain price adjustments.

• • • • •

(d) *Unconcentrated machinery industries.* The prices which manufacturers of the following products charge for those products are exempt: products listed in the Standard Industrial Classification Manual, 1967 edition, under Industry Numbers 3535, 3541, 3542, 3544, 3545, 3551, 3559, 3561, 3564, 3565, 3566, 3569, 3585, 3589, 3599, 3642, 3644, 3662, 3679, and 3699.

2. In 6 CFR Part 152, Subpart D is amended by adding thereto a new § 152.39e to read as follows:

§ 152.39e Unconcentrated machinery manufacturing industries.

(a) *Exemption.* Pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in an unconcentrated machinery manufacturing industry or in support of such operation are exempt from and not limited by the provisions of this title.

(b) *Establishment in an unconcentrated machinery manufacturing industry.* For purposes of this section, "Establishment in an unconcentrated machinery manufacturing industry" means an establishment classified in the Standard Industrial Classification Manual, 1967 edition, under Industry Number 3535 (Conveyors and Conveying Equipment), 3541 (Machine Tools, Metal Cutting Types), 3542 (Machine Tools, Metal Forming Types), 3544 (Special Dies and Tools, Die Sets, Jigs and Fixtures), 3545 (Machine Tool Accessories and Measuring Devices), 3551 (Food Products Machinery), 3559 (Special Industry Machinery, Not Elsewhere Classified), 3561 (Pumps, Air and Gas Compressors, and Pumping Equipment), 3564 (Blowers and Exhaust and Ventilation Fans), 3565 (Industrial Patterns), 3566 (Mechanical Power Transmission Equipment, Except Ball and Roller Bearings), 3569 (General Industrial Machinery and Equipment, Not Elsewhere Classified), 3585 (Air Conditioning Equipment and Commercial and Industrial Refrigeration Machinery and Equipment), 3589 (Service Industry Machines, Not Elsewhere Classified), 3599 (Miscellaneous Machinery, Except Electrical), 3642 (Lighting Fixtures), 3644 (Noncurrent-Carrying Wiring Devices), 3662 (Radio and Television Transmitting, Signaling and Detection Equipment and Apparatus), 3679 (Electronic Components and Accessories, Not Elsewhere Classified), or 3699 (Electrical Machinery, Equipment, and Supplies, Not Elsewhere Classified), and primarily engaged in the manufacture of any products classified under such Industry Numbers.

(c) *Covered employees.* For purposes of this section, an employee is considered to be engaged on a regular and continuing basis in the operation of an establishment in an unconcentrated machinery manufacturing industry or in support of such operation only if such employee is employed at an establishment in an unconcentrated machinery manufacturing industry and only if such employee is employed by the firm which operates such establishment.

(d) *Limitation.* The exemption provided in paragraph (a) of this section shall not be applicable to—

(1) Pay adjustments with respect to an appropriate employee unit which is subject to a Decision and Order of the Council for the period covered by such Decision and Order.

V 39158
MAR 25 74
XUM

(2) An employee who receives an item of incentive compensation subject to the provisions of § 152.124, 152.125, or 152.126.

(3) An employee who is a member of an executive control group (determined pursuant to § 152.130).

(4) Employees whose occupational duties and responsibilities are of a type not exclusively performed in or related to an unconcentrated machinery manufacturing industry and whose pay adjustments are—

(i) Historically related to the pay adjustments of employees performing such duties outside an unconcentrated machinery manufacturing industry; and

(ii) Not related to pay adjustments of another unit of employees engaged on a regular and continuing basis in the operation of an establishment exempted under this subpart, or in the operation of an establishment in an unconcentrated machinery manufacturing industry or in support of such operation within the meaning of paragraph (c) of this section.

(5) Employees who are members of an appropriate employee unit if 25 percent or more of the employees who are members of such unit are not engaged on a regular and continuing basis in the operation of an establishment engaged in activities exempted under this subpart.

(e) *Effective date.* The exemption provided in this section shall be applicable to pay adjustments with respect to work performed on and after March 20, 1974.

[FR Doc.74-6957 Filed 3-21-74;4:58 pm]

PART 152—COST OF LIVING COUNCIL, PHASE IV PAY REGULATIONS

Aerospace Tandem Pay Adjustments; Special Rule

On January 13, 1972, the Pay Board adopted a Resolution reducing from 51 cents to 34 cents an hour (except for one case involving 51 cents to 35 cents an hour) proposed wage increases scheduled in contracts between certain employers in the Aerospace Industry and collective bargaining agents representing certain employees in that industry. These collective bargaining agreements were regarded as "leader" or front-runner agreements. They set the pace for pay increases scheduled for other employees in the same industry which included both employees under contract and employees not covered by a contract.

After deciding on the leader contracts, the Pay Board processed several hundred cases involving "follower" appropriate employee units (AEU's) of aerospace employees. In order to prevent gross inequities and disruption of established historical wage relationships, the Pay Board's decisions on follower units either approved scheduled increases equal to the increases approved for the leader units or cut back scheduled increases to the amounts approved for the leader units. In some cases the Pay Board approved percentage increases for follower AEU's that were equal to the percentage increase 34 cents (35 cents) per hour would have represented in a leader AEU. In still other cases the Pay Board approved cents per hour increases or percentages for follower units that were "tandem to a tandem" (a follower of a follower of a leader) in the Aerospace Industry.

On June 21, 1973, the Temporary Emergency Court of Appeals of the United States in the case of Boldt v. UAW and IAM (482 F. 2d 985), affirmed a Decision of the United States District Court for the District of Columbia and directed the Cost of Living Council in its capacity as successor to the Pay Board to reconsider the Pay Board Resolution of January 13, 1972 as it affected certain AEU's involved in the litigation. Pursuant to the Court's order, on December 12, 1973, the Council issued a new series of decisions and orders applicable to all AEU's (not just those covered by the litigation) involved as leaders in the January 13, 1972 Resolution of the Pay Board. These subsequent decisions by the Council permitted payment of the 17 cents (16 cents) per hour cut back by the Pay Board to be made under certain prescribed "definitions and procedures."

Upon request for reconsideration, the Council on February 15, 1974 affirmed, with slight modification, the December 12, 1973 decisions and orders. The modifications were made in certain leader decisions to make uniform among all leader units the method of computing the allowable payment of amounts previously cut back.

The purpose of the special rule set forth below is to provide guidance and establish conditions for the payment of comparable amounts to employees in AEU's that follow the leader units involved in the Aerospace Decisions. The special rule is included as an appendix to subpart B of Part 152. Generally, the rule provides that an employer and the collective bargaining representative of employees, if any, may jointly certify to the Council that a follower unit is entitled to receive payment of amounts comparable to the amounts payable under the leader Aerospace Decisions. After expiration of a 30-day period following certification in the manner prescribed in the rule, an employer may assume approval by the Council to make payments unless the Council within that period notifies the employer that payments have been approved or that payments should not be made.

The special rule provides "definitions and procedures" that are comparable to those made part of the leader Aerospace Decisions. These include provisions relating to the determination of "eligible employees," the method of computation, and schedule of payments. If an employer and union do not jointly certify, and a party at interest believes payments should be made, provision has been made for that party to request a determination from the Council. All submissions, whether certifications or requests for determination, are required to be submitted in duplicate to the Office of Wage Stabilization, P.O. Box 672, Washington, D.C. 20044.

Because the purpose of this special rule is to provide immediate guidance and procedures for making retroactive payments pursuant to a decision of the Council, the Council finds that publication in accordance with normal rule making procedure is impracticable and that good cause exists for making this special rule effective in less than 30 days.

(Economic Stabilization Act of 1970, as amended, Public Law 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 FR 1473; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing, Part 152 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective March 21, 1974.

Issued in Washington, D.C., on March 21, 1974.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

In 6 CFR Part 152, subpart B is amended by adding an appendix thereto which reads as follows:

APPENDIX

SPECIAL RULE FOR AEROSPACE TANDEM PAY ADJUSTMENTS

1. *Scope.* This special rule is applicable only to certain pay adjustments affecting a follower appropriate employee unit (AEU) that has an established historical wage relationship to the pay adjustments in a leader AEU in the Aerospace Industry. Generally, an AEU eligible to apply this rule must have an established historical wage relationship to an AEU covered by the Aerospace Decisions of the Pay Board and Cost of Living Council. This rule applies to AEU's subject to collective bargaining agreements and to AEU's covered by pay practices. In the case of AEU's subject to collective bargaining agreements, the amounts payable under this rule must relate to services performed for the employer in the first year of a follower contract which is tandem to a leader contract covered by the Aerospace Decisions. In the case of AEU's not covered by a collective bargaining agreement, the amounts payable under this rule with respect to a follower unit must relate to services performed for the employer during the period of time (established as part of the historical wage relationship) that is comparable to the period with respect to which amounts are payable under the Aerospace Decisions (or this rule) for services performed by a leader unit. This rule shall not apply to any follower unit unless such follower unit was the subject of a decision and order of the Pay Board which approved or reduced a proposed increase in recognition of an established wage relationship to a leader unit in the Aerospace Industry.

2. *Leader units.* The Aerospace Decisions affecting leader units were issued by the Pay Board (as a Resolution) on January 13, 1972 and by the Council on December 12, 1973 and February 15, 1974. These decisions affected the following employers and union locals:

a. The Boeing Company and IAMAW Lodges 70, 751, and 2061.

b. Lockheed Aircraft Corporation and IAMAW Lodges 151, 166, 508, 709, 727, 843, 843-A, 1027, 1323, 1589, 2217, 2225, 2226, 2227, 2228, 2229, 2230, 2260, 2279, 2311, 2314, and 2386.

c. LTV Aerospace Corporation and UAW Local 848.

d. McDonnell Douglas Corporation and IAMAW Lodges 720 and 1578.

e. McDonnell Douglas Corporation and UAW Locals 148 and 1093.

f. Rockwell International and UAW Locals 887, 927, 1334, and 1519.

3. *Definitions and procedures.* Any payments made under this special rule shall be subject to the following definitions and procedures:

a. The term "eligible employees" means—

(1) Employees who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice) and who were on the active payroll of the employer on December 12, 1973.

(2) Employees who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice) and who during or subsequent to that year retired under a Company Pension Plan.

(3) Employees who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice) and who during or subsequent to that year were placed on approved leave of absence and were on leave of absence on December 12, 1973.

(4) Employees who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice) and who during or subsequent to that year were laid off for lack of work, have recall rights, and were not on the active payroll on December 12, 1973.

(5) Employees who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice) and who during or subsequent to that year entered the military service and were not active employees on December 12, 1973 as a result of such military service.

(6) The estates of deceased eligible employees, including retirees, who worked during the first year covered by the follower contract (or comparable period in the case of a pay practice).

b. The term "eligible employees" shall not include employees who voluntarily left the employer's employment or were discharged for cause after the beginning of the first year covered by the follower contract (or comparable period in the case of a pay practice) and prior to December 13, 1973, unless such employee was subsequently reemployed during such first year (in which case he shall be considered eligible for payment only with respect to the period worked subsequent to such reemployment within such first year).

c. Eligible employees who voluntarily leave the employer's employment or are discharged for cause after December 12, 1973, shall not become ineligible by reason thereof, but shall remain eligible to receive payments as provided in this special rule.

d. Unless otherwise specified by the Council and except as provided in paragraph 3.e. below, amounts due each eligible employee shall be paid in not fewer than four equal payments, in a manner agreed upon by the employer and collective bargaining representative, if any. The fourth payment shall be made in December, 1974.

e. Payment of money due an eligible employee shall not be made in a single lump sum payment, except that a lump sum payment may be made where payment is to the estate of a deceased eligible employee or where the total payment due an eligible employee is less than 75 dollars.

f. The employer shall notify each eligible employee not on the active payroll on December 12, 1973 of the amount he is entitled to receive under the terms of this special rule, by addressing a letter sent via regular mail to his last address of record with the employer. The letter shall inform the employee that he must assert in writing his claim for such amount, and that such claim must be received by the employer not later than 45 calendar days after the date of such notice. In lieu of the foregoing notification requirement, an employer may elect to send to each such eligible employee a check for the amount due under paragraph 3.d. or 3.e. by regular mail to the last address of record with the employer. However, any checks returned shall not be destroyed until the expiration of 45 calendar days after the date of such mailing. Any employee eligible for payment who was notified as required in this paragraph and who does not file a written claim within the 45 day period shall be deemed ineligible for payment under the provisions of this rule.

g. The employer shall publish once in its house organ notice of these terms under which an employee may receive an additional payment for services performed during the first year covered by the follower contract (or comparable period in the case of a pay practice).

h. Each union representing eligible employees shall likewise cause to be published in its publication, if any, a notice similar to that referred to in paragraph 3.g. of this rule.

i. The amount of payment to each eligible employee covered by a tandem collective bargaining agreement shall not exceed an amount computed by multiplying the number of hours which were actually worked by 17 cents (16 cents in the case of AEU's that follow LTV Aerospace Corporation and UAW Local 848). However, to the extent that such hours actually worked were considered as overtime hours under a collective bargaining agreement, the overtime premium payment as provided for in such collective bargaining agreement may be applied to the 17 cents (16 cents) computation (e.g., if such hours were paid for at one and one-half times the employee's regular rate, such hours may be multiplied by 25.5 cents (24 cents) rather than 17 cents (16 cents)). The computation set forth in the two preceding sentences shall include only those hours which were actually worked and shall not include hours which were paid for but not worked such as vacations, holidays, and sick and injury pay. Employees who did not work during the first year of the follower contract are not entitled to any payment of the amount of the proposed adjustment which is in excess of 34 cents (35) cents per hour under this rule. In any case in which a Pay Board decision and order applicable to the first year of a follower contract permitted, in lieu of disallowance, a portion of the 17 cents (16 cents), or percentage representing such amount, to be applied to qualified benefits for the follower AEU, the amount paid under this special rule shall not exceed the difference between such 17 cents (16 cents) (or percentage representing such amount) and the amount (or percentage) previously allowed by the Pay Board to be allocated to qualified benefits. In no case shall an amount (or percentage representing such amount) computed under this rule exceed the amount (or percentage) originally agreed to by the parties with respect to work performed in the first year of the follower contract.

j. In the case of payments to eligible employees in follower AEU's not covered by a collective bargaining agreement (including employees paid on a random or variable timing basis, e.g., pursuant to a merit plan), the aggregate payment (or percentage representing such payment) to such eligible employees shall be computed in such a manner as to be equivalent to the amount which preserves or maintains the established historical relationship between the follower unit and the leader unit traditionally followed.

4. *Certifications.* An employer and collective bargaining representative, if any, proposing to implement pay adjustments pursuant to this rule may determine that employees in an AEU are eligible to receive payments equivalent to those received by eligible employees covered by the Aerospace Decisions. Before implementing any pay adjustments, however, the employer and collective bargaining representative, if any, shall jointly file with the Council a certified statement attesting that such employees are eligible to receive payments under this rule. Such certification shall specify that the follower AEU has an established historical relationship to a specified leader AEU covered by the Aerospace Decisions (or in certain situations, such as a "tandem to a tandem," to a leader unit which itself is a follower of a leader unit covered by the Aerospace Decisions). Such certification shall also specify that the follower AEU was covered by a decision and order of the Pay Board which approved or reduced a proposed increase in recognition of an established wage relationship to a leader unit in the Aerospace Industry. In addition, such certification shall be accompanied by a copy of the follower collective bargaining agreement, if any, and include information with respect to the total number of hours worked, number of eligible employees, and total amounts proposed to be paid. The Council shall review each certified statement to determine whether the conditions for payment have been met. If the submission is incomplete, or if the Council for any other reason determines that payment under this rule should be suspended or withheld, the Council shall notify the employer and collective bargaining representative, if any, of the reasons for withholding payment at this time and shall treat the submission as a request for determination in the manner prescribed in paragraph 5. No payment under this rule shall be made until the expiration of 30 calendar days after the date certification has been received by the Council, unless the Council notifies the employer, in writing, that earlier payment may be made. If the Council has not within that period notified the employer and union, if any, to refrain from making payment, such proposed payments shall be deemed to be approved by the Council. Every certification must be accompanied by a copy of the decision and order of the Pay Board with respect to the AEU covered by such certification and shall include the name, address, and telephone number of each person signing such certification.

5. *Requests for determination.* If an employer and the union representing employees do not jointly certify in the manner prescribed in paragraph 4, either party may request a determination by the Council whether a particular AEU may receive the payments authorized under this rule. The Council will review the submission and make an appropriate determination. However, the Council will not process a request for determination unless the request includes a certification that a copy of the request was served upon all parties at interest. No payment under the rule shall be made following the submission of a request for determination under this paragraph until the Council specifically authorizes the employer, in writing, that payments may be made.

6. *Filing procedures.* Every joint certification or request for determination shall be submitted in duplicate and shall be sent to the Office of Wage Stabilization, P.O. Box 672, Washington, D.C. 20044. Each submis-

V 39 158 MAR 25 74 XUM

sion and the envelope containing such submission shall be clearly designated in capital letters as AEROSPACE TANDEM CERTIFICATION or AEROSPACE TANDEM REQUEST FOR DETERMINATION, as appropriate.

7. *Effective date.* This rule shall be effective on and after March 21, 1974.

[APPENDIX; RULINGS]

[Phase IV Price Ruling 1974-4]

Public Utility Rate Exemption—Natural Gas Producers

Facts. Firm N produces natural gas. During Phases II and III Firm N was subject to the price control regulations which applied to public utilities.

The Phase IV price regulations, 6 CFR 150.56, provide an exemption for the rate increases for commodities or services provided by a public utility. Phase IV Price Ruling 1973-6 explained that the exemption in § 150.56 is applicable to certain activities classified in Division E of the Standard Industrial Classification Manual, 1972 edition. The only activities related to natural gas production which appear in Division E are mixed natural and "manufactured" gas production, "manufactured" gas production, and combined gas-electric service (listed in Group Nos. 492 and 493). Natural gas production is listed in Division B of the Standard Industrial Classification Manual.

Issue. Are the rates charged by N within the purview of the public utilities exemption of 6 CFR 150.56?

Ruling. Yes. Natural gas producers were subject to the public utility regulations of Phase II and Phase III and are subject to State and Federal public utilities regulations. Firms engaged in transmission of natural gas, distribution of natural gas and sale of natural gas service to consumers are classified within Division E. of the SIC Manual, and rates charged by these firms are exempt from Phase IV price controls as utility rates.

It was not the intention of the Council in exempting rate increases by public utilities under § 150.56, as interpreted by Phase IV Price Ruling 1973-6, to treat natural gas production in a manner inconsistent with its treatment as a public utility under Phases II and III or to make a distinction between natural gas production and its distribution and sale to consumers for purposes of Phase IV exemptions. Nor did the Council intend to distinguish between production of "manufactured" or "mixed" gas and the production of natural gas. Rate increases charged by natural gas producers are therefore exempt under Phase IV by operation of 6 CFR 150.56.

To the extent that Phase IV Price Ruling 1973-6 is inconsistent herewith, this ruling prevails.

ANDREW T. H. MUNROE,
General Counsel,
Cost of Living Council.

MARCH 20, 1974.

[FR Doc.74-6920 Filed 3-21-74;2:49 pm]

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 6—IMPORT QUOTAS AND FEES

Subpart—Section 22 Import Quotas

PRICE DETERMINATION FOR CERTAIN CHEESE

The subpart, section 22 Import Quotas, is amended to change the price, determined by the Secretary of Agriculture in accordance with headnote 3(a)(v) of Part 3 of the Appendix to the Tariff Schedules of the United States, which is used as a basis for establishing import restrictions under section 22 on certain cheese. The change from 72 to 78 cents per pound is required since one of the factors used in determining such price (the Commodity Credit Corporation purchase price for Cheddar Cheese under the milk price support program) will be increased as of April 1, 1974.

The subpart, section 22 Import Quotas, of Part 6, Subtitle A of Title 7, is amended as follows:

1. Section 6.16, under the heading "Price Determination for Certain Quotas", is revised to read as follows:

§ 6.16 Price determination.

The price referred to in items 950.10B through 950.10E of Part 3 of the Appendix to the Tariff Schedules, determined by the Secretary of Agriculture in accordance with headnote 3(a)(v) of said Part 3, is 78 cents per pound. This price shall continue in effect until changed by amendment of this section.

2. Group V of Appendix 1, under the heading "Licensing Regulations," is amended by changing the description appearing immediately below "Group V" to read as follows:

Cheese described below, if shipped otherwise than in pursuance to a purchase, or if having a purchase price under 78 cents per pound.

The foregoing amendment shall be effective April 1, 1974. In accordance with headnote 3(a)(v) of Part 3 of the Appendix to the Tariff Schedules of the United States, the change in price effected by this amendment will not make the import restrictions contained in items 950.10B through 950.10E of part 3 of the Appendix to the Tariff Schedules of the United States applicable to cheese having a purchase price of 72 or more cents per pound if such cheese had been exported to the United States on a through bill of lading or had been placed in bonded warehouse on or before March 25, 1974. Since the action taken herewith involves foreign affairs functions of the United States, this amendment falls within the foreign affairs exception to the notice and effective date provisions of 5 U.S.C. 553.

(Sec. 3, 62 Stat. 1248, as amended, 7 U.S.C. 624; Part 3 of the Appendix to the Tariff Schedules of the United States, 19 U.S.C. 1202)

Issued at Washington, D.C., this 20th day of March 1974.

EARL L. BUTZ,
Secretary.

[FR Doc.74-6818 Filed 3-22-74;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period March 22-28, 1974. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907. The quantity of Navel oranges so fixed was arrived at after consideration of the total available supply of Navel oranges, the quantity currently available for market, the fresh market demand for Navel oranges, Navel orange prices, and the relationship of season average returns to the parity price for Navel oranges.

§ 907.617 Navel Orange Regulation 317.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Navel oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Navel orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Navel oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Navel oranges is unsettled. Prices f.o.b. averaged $3.36 a carton on a reported sales volume of 1,569 carlots last week, compared with an average f.o.b. price of $3.43 per carton and sales of 1,301 carlots a week earlier. Track and rolling supplies at 790 cars were up 31 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Navel oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation for regulation together with its supporting information has been submitted by the committee, however, the Secretary has modified the recommendation to provide for the shipment of a greater quantity of Navel oranges, retaining the same effective date, and such information is being disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on March 19, 1974.

(b) *Order.* (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which may be handled during the period March 22, 1974 through March 28, 1974 are hereby fixed as follows:

(i) District 1: 1,395,000 cartons;

(ii) District 2: 155,000 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 21, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.74-6909 Filed 3-21-74;12:26 pm]

[Valencia Orange Regulation 456]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period March 22-28, 1974. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

§ 908.756 Valencia Orange Regulation 456.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Aricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee reports that prices f.o.b. averaged $2.74 per carton on a reported sales volume of 64 carlots last week, compared with an average f.o.b. price of $3.15 per carton and sales of 67 carlots a week earlier.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulations; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on March 19, 1974.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period March 22, 1974, through March 28, 1974, are hereby fixed as follows:

(i) District 1: Unlimited;

(ii) District 2: Unlimited;

(iii) District 3: 75,000 cartons."

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 21, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 96]

PART 1096—MILK IN THE NORTHERN LOUISIANA MARKETING AREA

Order Suspending Certain Provisions

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Northern Louisiana marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (39 FR 7592) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and

V 39 158 MAR 25 74 XUM

arguments thereon. None was filed in opposition to the proposed suspension.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the months of April through July 1974 the following provisions of the order do not tend to effectuate the declared policy of the Act.

All of the language in § 1096.51(b) except the following:

(b) *Class II milk price.* The Class II milk price shall be the basic formula price computed pursuant to § 1096.50. • • •

STATEMENT OF CONSIDERATION

This suspension will result in establishing the Minnesota-Wisconsin manufacturing milk price as the Class II price under the order. The Class II price is now the lesser of the Minnesota-Wisconsin price or a butter-powder (nonfat dry milk) formula price.

The suspension was requested by cooperative associations representing a majority of the producers in the market. As contended by these producer groups, the butter-powder formula price, which in recent months has been the applicable Class II price under the order, does not reflect the actual value of Class II milk in the Northern Louisiana market. Reserve supplies of milk are being disposed of at a value generally equivalent to the Minnesota-Wisconsin price.

In the Department's decisions issued February 19, 1974 (39 FR 8202, 8452, 8712, 9012), it was concluded that the Minnesota-Wisconsin price should be adopted as the surplus price in 39 markets, including the Northern Louisiana market. Final action on the 39-market proceedings is still pending. In this circumstance, the butter-powder formula price should be suspended from the Class II price formula until the amendment procedure can be completed.

Moreover, the suspension will make the State and Federal regulations applicable in the Northern Louisiana market more uniform with respect to the pricing of surplus milk. On December 1, 1974, the Louisiana State Milk Commission, under the State's pricing regulations, began pricing surplus milk at the Minnesota-Wisconsin price.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. None was filed in opposition to the proposed suspension. Moreover, it carries out the intent of the final decisions issued by the Department on February 19, 1974, in which it was concluded that the Minnesota-Wisconsin price should be adopted as the surplus price in 39 markets, including this market.

Therefore, good cause exists for making this order effective April 1, 1974.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of April through July 1974.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: April 1, 1974.

Signed at Washington, D.C., on March 20, 1974.

J. PHIL CAMPBELL,
Under Secretary.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Reg., 1974-Crop Oats Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1974-Crop Oats Loan and Purchase Program

On August 29, 1973, the U.S. Department of Agriculture announced loan rates for 1974-crop oats based on a national average of 54 cents per bushel. Support rates, at the county level for 1974-crop oats, reflect adjustments necessary to improve the loan rate relationship with historical cash oat prices received by farmers. Support rates, as established, reflect the previously announced national average loan rate unchanged from the 1973 crop. Therefore, it is found and determined that compliance with the notice of proposed rulemaking procedure would be impracticable and contrary to the public interest.

The General Regulations Governing Price Support for 1970 and Subsequent Crops, published at 35 FR 7363 and 7781 and any amendments thereto and the 1970 and Subsequent Crops Oats Loan and Purchase Regulations, published at 35 FR 8340 and any amendments to such regulations are further supplemented for the 1974 crops of oats. The material previously appearing in these §§ 1421.270 through 1421.274 shall remain in full force and effect as to the crops to which it is applicable.

Sec.
1421.270 Purpose.
1421.271 Availability.
1421.272 Maturity of loans.
1421.273 Deduction of storage charges.
1421.274 Loan and purchase rates.

AUTHORITY: Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 105, 401, 63 Stat. 1051, as amended; 15 U.S.C. 714c; 7 U.S.C. 1421, 1441.

§ 1421.270 Purpose.

This supplement contains additional program provisions which, together with the provisions of the General Regulations Governing Price Support for the 1970 and Subsequent Crops, the 1970 and Subsequent Crops Oats Loan and Purchase Program Regulations, and any amendments thereto, apply to loans on and purchases of the 1974 crop of oats.

§ 1421.271 Availability.

A producer desiring to participate in the program through loans must request a loan on his 1974-crop of eligible oats on or before April 30, 1975, in Alaska, Idaho, Michigan, Minnesota, Montana, North Dakota, Oregon, South Dakota, Washington, Wisconsin, and Wyoming, and by March 31, 1975, in all other States. To sell eligible oats to CCC, a producer must execute and deliver to the appropriate county ASCS office a purchase agreement (Form CCC–614), indicating the approximate quantity of 1974-crop oats he will sell to CCC, on or before May 31, 1975, in the States named in this section and on or before April 30, 1975, in all other States.

§ 1421.272 Maturity of loans.

Unless demand is made earlier, loans on oats stored in Alaska, Idaho, Michigan, Minnesota, Montana, North Dakota, Oregon, South Dakota, Washington, Wisconsin, and Wyoming, mature on May 31, 1975, and loans on oats stored in all other States mature on April 30, 1975.

§ 1421.273 Deduction of storage charges.

Subject to the provisions of § 1421.252, the following schedules of deductions shall apply to oats stored in an approved warehouse operating under the uniform storage agreement.

Maturity date April 31, 1975	Deduction (cents per bushel)	Maturity date May 31, 1975
(1)		1
Prior to May 21, 1974	12	Prior to June 21, 1974.
May 21 to June 19, 1974	11	Jan. 21 to July 20, 1974
June 20 to July 19, 1974	10	July 21 to Aug. 19, 1974.
July 20 to Aug. 18, 1974	9	Aug. 20 to Sept. 18, 1974.
Aug. 19 to Sept. 17, 1974	8	Sept. 19 to Oct. 18, 1974.
Sept. 18 to Oct. 17, 1974	7	Oct. 19 to Nov. 17, 1974.
Oct. 18 to Nov. 16, 1974	6	Nov. 18 to Dec. 17, 1974.
Nov. 17 to Dec. 16, 1974	5	Dec. 18, 1974, to Jan 16, 1975.
Dec. 17, 1974, to Jan. 15, 1975	4	Jan. 17 to Feb. 15, 1975.
Jan. 16 to Feb. 14, 1975	3	Feb. 16 to Mar. 17, 1975.
Feb. 15 to Mar. 16, 1975	2	Mar. 18 to Apr. 16, 1975.
Mar. 17 to Apr. 30, 1975	1	Apr. 17 to May 31, 1975.

[1] Dates storage charges start, all dates inclusive.

§ 1421.274 Loan and purchase rates.

(a) *Basic loan and purchase rates.* County loan and purchase rates for oats and the schedule of premiums and discounts are shown below. The term "county" as used in this subpart with reference to the State of Alaska shall mean "marketing area". Marketing areas in Alaska shall be the areas established under the State small grain incentive program. Farm-stored loans will be made at the basic rate for the county where the grain is stored, adjusted only for the weed control discount where applicable. The loan and purchase rate for warehouse-stored oats loans shall be the basic rate for the county where the oats are stored, adjusted by the premiums and discounts shown in this section. Notwithstanding § 1421.23(c) settlement for oats delivered from other than approved warehouse-storage shall be based (1) on the basic rate for the county in which the producer's customary delivery point is located, and (2) on the quality and quantity delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose. The basic rate applies to oats grading U.S. No. 3, having moisture not in excess of 14 percent.

oats, such as (but not limited to) low test weight, foreign material, heat damage, percent of sound cultivated oats, wild oats, moisture, sour, stones, musty, ergoty, weevily, smutty, and bleached. Such discounts will be established not later than the time delivery of oats to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately 1 month prior to the loan maturity date.

Effective date: March 25, 1974.

Signed at Washington, D.C., on March 18, 1974.

GLENN A. WEIR,
Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc.74-6814 Filed 3-22-74;8:45 am]

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 74-205]

PART 523—MEMBERS OF BANKS

Amendment Relating to Liquidity

MARCH 19, 1974.

The Federal Home Loan Bank Board considers it desirable to amend § 523.11 of the regulations for the Federal Home Loan Bank System (12 CFR 523.11) for the purposes of increasing the overall liquidity requirement of each Federal Home Loan Bank member from 5½ percent to 6½ percent of its liquidity base and of increasing each member's short-term liquidity requirement from 1½ percent to 2½ percent of such base. Accordingly, the Federal Home Loan Bank Board hereby amends said § 523.11 by revising paragraph (a) thereof, to read as follows, effective June 1, 1974:

§ 523.11 Liquidity requirements.

(a) *General.* For each calendar month, each member, other than a mutual savings bank as to which there is in effect the election provided for in paragraph (e) of this section, shall maintain an average daily balance of liquid assets in an amount not less than 6½ percent of the average daily balance of the member's liquidity base during the preceding calendar month, except as otherwise provided in paragraphs (b) and (d) of this section. For each calendar month, each member, other than a mutual savings bank or an insurance company, shall maintain an average daily balance of short-term liquid assets in an amount not less than 2½ percent of the average daily balance of the member's liquidity base during the preceding calendar month, except as otherwise provided in paragraphs (b) and (d) of this section.

* * * * *

Since affording notice and public procedure on the above amendment would delay it from becoming effective for a period of time and since the Board determines that the institutions affected by such amendment should be given as much lead-in time as possible to comply with liquidity requirements which are higher than present liquidity requirements, the Board hereby finds that notice and public procedure as to such amendment are impracticable and contrary to the public interest under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b).

(Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended, sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425a, 1437. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48, Comp., p. 1071)

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLIARD, JR.,
Assistant Secretary.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER [FEDERAL HOUSING ADMINISTRATION]

SUBCHAPTER B—MORTGAGE AND LOAN INSURANCE PROGRAMS UNDER NATIONAL HOUSING ACT

[Docket No. R-74-244]

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

Site Location

On December 13, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 34330), stating that the Department of Housing and Urban Development was considering an amendment to Part 201 of Title 24, Subchapter B, "Mobile Home Loans," that would permit mobile homes to be sold to purchasers utilizing FHA insured loans to be placed on sites leased from a municipality or other political subdivision of a state.

Interested persons were given 30 days in which to submit written comments or suggestions. One comment was received. The commenter stated that it strongly supported adoption of the amendment. The proposed amendment is hereby adopted without change.

Accordingly, § 201.525 is amended to read as follows:

§ 201.525 Mobile home location standards.

(a) *In general.* The mobile home shall be placed in a mobile home park approved by the Commissioner, on a site owned by the borrowers which meets certain requirements prescribed by the Commissioner, or on a site leased from a municipality or other political subdivision, where the leased site otherwise meets the requirements of paragraph (c) of this section.

(Sec. 7(d), 79 Stat. 670 (42 U.S.C. 3535(d)); Sec. 2, 48 Stat. 1246, (12 U.S.C. 1703).)

Effective date. This amendment is effective on April 22, 1974.

SHELDON B. LUBAR,
Assistant Secretary for Housing Production and Mortgage Credit.

Taxpayer Identifying Numbers

Correction

In FR Doc. 74-6046 appearing at page 9946 in the issue for Friday, March 15, 1974, the following changes should be made in § 1.6109-1.

1. In paragraph (a) the first sentence should read, *"Information to be furnished after April 15, 1974".*

2. In paragraph (b) the first sentence should read, *"Information to be furnished before April 16, 1974".*

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Tetrahydrofurfuryl Alcohol; Exemption From Tolerance

In response to a petition (PP 2E1198) submitted by The Quaker Oats Co., Merchandise Mart Plaza, Chicago, IL 60654, a notice was published by the Environmental Protection Agency in the FEDERAL REGISTER of February 4, 1974 (39 FR 4487), proposing establishment of an exemption from the requirement of a tolerance for residues of tetrahydrofurfuryl alcohol in or on raw agricultural commodities when used as an inert solvent or cosolvent in pesticide formulation applied to growing crops only. No comments or requests for referral to an advisory committee were received.

It is concluded that the proposal should be adopted.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.1001 is amended by alphabetically inserting a new item in the table in paragraph (d), as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(d) * * *

Inert ingredients	Limits	Uses
* * *	* * *	* * *
Tetrahydrofurfuryl alcohol		Solvent, cosolvent.
* * *	* * *	* * *

Any person who will be adversely affected by the foregoing order may at any time on or before April 24, 1974, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th & M Streets, SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on March 25, 1974.

(Sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e))

Dated: March 20, 1974.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.74-6849 Filed 3-22-74;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 3—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 3-1—GENERAL

PART 3-26—CONTRACT MODIFICATIONS

Novation and Change of Name Agreements

Chapter 3 of 41 CFR is amended as set forth below. Subpart 3-1.51 is being deleted because the Federal Procurement Regulations have issued a regulation on the same subject, Novation and Change of Name Agreements. A new subpart 3-26.4 is being added to set forth internal procedures relative to the processing of such agreements.

It is the general policy of the DHEW to allow time for interested parties to participate in the rule making process. However, the amendments herein concern administrative matters. Therefore, the public rule making process is deemed unnecessary in this instance.

1. Subpart 3-1.51 is hereby deleted in its entirety.

2. The following is added as the table of contents of Part 3-26, Contract Modifications.

Subpart 3-26.4—Novation and Change of Name Agreements

Sec.
3-26.404 Processing novation and change of name agreements.

3. The following is added as § 3-26.404 *Processing novation and change of name agreements.*

§ 3-26.404 Processing novation and change of name agreements.

(a) Any Health, Education, and Welfare procuring activity upon being notified of a successor in interest to, or change of name of, one of its contractors, shall promptly report such information by letter to the Director of Procurement Policy and Regulations Development, OGPM, OASAM.

(b) To avoid duplication of effort on the part of HEW activities in preparing and executing agreements to recognize a change of name or successor in interest, only one supplemental agreement will be prepared to effect necessary changes for all contracts between HEW and the contractor involved. The Director of Procurement Policy and Regulations Development will, in each case, designate the activity responsible for taking all necessary and appropriate action with respect to either recognizing or not recognizing a successor in interest, or recognizing a change of name, including without limitation the following:

(1) Obtain from the contractor a list of the affected contracts, the names and addresses of the activities responsible for these contracts, and the required documentary evidence.

(2) Draft and execute a supplemental agreement to one of the contracts affected but covering all applicable outstanding and incomplete contracts affected by the transfer of assets or change of name.

A supplemental agreement number need not be obtained for contracts other than for the one under which the supplemental agreement is written. Each supplemental agreement will contain a list of the contracts affected and, for distribution purposes, the names and addresses of the activities having contracts subject to the supplemental agreement.

(c) The agreement and supporting documents shall be reviewed for legal sufficiency by Legal Counsel.

(d) After execution of the supplemental agreement, the designated activity shall:

(1) Forward an authenticated copy of the supplemental agreement to the Director of Procurement Policy and Regulations Development.

(2) Advise each of the affected activities, by letter, of the consummation of the supplemental agreement and request that an administrative change be issued for each affected contract. (A copy of the supplemental agreement should be enclosed.)

(e) For each such affected contract, the contracting officer shall prepare an administrative change acknowledging the change of name or successor in interest. The administrative change will receive the same distribution as the affected contract. The administrative change will indicate the nature of the transaction, the result attained, and will cite the number of the contract with which the original relevant documents and supplemental agreement are filed.

(5 U.S.C. 301; 40 U.S.C. 486(c))

Effective date. These amendments become effective March 25, 1974.

Dated: March 19, 1974.

THOMAS S. MCFEE,
Acting Deputy Assistant Secretary for Administration and Management.

[FR Doc.74-6787 Filed 3-22-74;8:45 am]

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Amendment E-139]

PART 101-32—GOVERNMENT-WIDE AUTOMATED DATA MANAGEMENT SERVICES

Computer Performance Evaluation and ADP Simulation

This amendment clarifies the procedure by which Federal agencies obtain ADP simulation and computer performance evaluation services from the Federal Computer Performance Evaluation and Simulation Center.

Section 101-32.1403 is amended to read as follows:

§ 101-32.1403 Procedure for obtaining ADP simulation and computer performance evaluation services from the Federal Computer Performance Evaluation and Simulation Center.

(a) Agencies requiring ADP simulation, computer performance evaluation assistance, hardware performance monitors, software performance monitoring packages, or other computer performance evaluation products or services shall contact the Center. The mailing address is: Department of the Air Force, Federal Computer Performance Evaluation and Simulation Center (FEDSIM), Washington, DC 20330.

* * * * * *

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective March 25, 1974.

Dated: March 15, 1974.

ARTHUR F. SAMPSON,
Administrator of General Services.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19876; FCC 74-269]

PART 73—RADIO BROADCAST SERVICES

FM Station in Wichita Falls, Tex.; Table of Assignments

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations. (Wichita Falls, Texas).

1. This proceeding, begun by notice of proposed rule making issued November 20, 1973 (38 FR 32951) involves the deletion of FM Channel 236 at Wichita Falls, Texas. The only comment in support of the proposed deletion was filed by

V 39 158 MAR 25 74 XUM

KAMC–Radio, Inc., licensee of Station KAMC(FM), Arlington, Texas. No comments in opposition were filed.

2. As set forth in the notice, Wichita Falls has four FM assignments. One is on Channel 225 for which an application for construction permit is pending; Station KLUR(FM) operates on Channel 260; and Station KNTO(FM) which is currently operating on Channel 236 but has been granted a construction permit to operate on Channel 277. Station KAMC(FM), Arlington, Texas, operating on Channel 235, is short-spaced to Channel 236 at Wichita Falls. Because of the short-spacing, Station KAMC(FM) is restricted under our rule to facilities not to exceed 50 kW in ERP. The proposed deletion of Channel 236 which cannot be fully utilized at Wichita Falls would remove the restrictions and permit KAMC (FM) to operate with maximum facilities as proposed in its tendered application on Channel 235.

3. Because of the short spacing problem outlined above, we find the deletion of the channel to be in the public interest and the proposal set forth in the Notice is hereby adopted. However, Station KNTO–FM will be permitted to continue operation on Channel 236 under a special temporary authorization until it receives program test authority to operate on Channel 277.

4. In view of the foregoing and pursuant to authority in sections 4(i), 5(d)(1), 303 and 307(b) of the Communications Act of 1934, as amended, *it is ordered*, That effective April 29, 1974, the FM Table of Assignments (§ 73.202(b) of the rules) is amended to read with respect to the city listed below as follows:

City	*Channel No.*
Wichita Falls, Tex	225, 260, 277

5. *It is further ordered*, That special temporary authority is conferred to Station KNTO–FM to continue operation on Channel 236 with its presently licensed facility pending receipt and Commission action on FCC Forms 302 for license to cover construction permit (BPH–8307) which authorized the construction of changed facilities on Channel 277.

6. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 13, 1974.

Released: March 18, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74–6794 Filed 3–22–74;8:45 am]

[Docket No. 19877; FCC 74–268]

PART 73—RADIO BROADCAST SERVICES

FM Stations in Maine and New Hampshire; Table of Assignments

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations. (Sanford, Maine; Rochester, New Hampshire.)

1. This proceeding, begun by notice of proposed rule making issued November 29, 1973, proposes a substitution of FM Channel 244A (now assigned to Sanford, Maine) to Rochester, New Hampshire, for FM Channel 280A and also would substitute Channel 221A for Channel 244A at Sanford. Two comments were filed in response to the notice: one comment by J. Sherwood, Inc., applicant for a new FM broadcast station at Rochester and the other comment was by Southern Maine Broadcasting Corporation, licensee of Radio Station WSME, Sanford, Maine, who has on file an application for an FM station at Sanford on Channel 244A.

2. The Sherwood comments were in complete support of the proposed substitution of channels because it would correct a short spacing problem preventing the construction of an FM station at Rochester. Southern Maine's comment neither supports or opposes the substitution of channels, and states that it will amend its pending application on Channel 244A to specify Channel 221A after the effective date of this Report and Order.

3. Sherwood asks that expedited action be taken in this matter because Rochester is an industrial community and a new FM station would provide residents with greater media coverage on the issues of importance to the area. We have considered the comments of the party in the light of the proposals set forth in the Notice and find that the assignments proposed to be in the public interest and they are hereby adopted.

4. In view of the foregoing and pursuant to authority in sections 4(i), 5(d)(1), 303 and 307(b) of the Communications Act of 1934, as amended, *it is ordered*, That effective April 29, 1974, the FM Table of Assignments (§ 73.202(b) of the rules) is amended to read with respect to the cities listed below:

City	*Channel No.*
Sanford, Maine	221A
Rochester, N.H	244A

5. *It is further ordered*, That this proceeding is TERMINATED.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 13, 1974.

Released: March 18, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74–6795 Filed 3–22–74; 8:45 am]

[FCC 74–255]

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED STATIONS

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Issuance of Ship Station Licenses

In the matter of amendment of §§ 81.361 and 83.360 of the FCC rules and regulations.

1. By this order, it is intended to delete certain obsolete rule requirements regarding issuance of ship station licenses in order to bring the rules into conformity with current Commission licensing policy and practice and to expedite ship station application and licensing procedures.

2. Specifically, the "showing" requirements of §§ 81.361(b)(1) and 83.360(b)(1) are hereby deleted. This order also deletes the provisions of § 83.360(b)(3) which normally limits a grant of frequencies to one from each band.

3. These requirements are holdovers from past practices of the Commission stating specific frequencies on ship station licenses and of requiring a showing of need prior to authorizing use of frequencies below 27.5 MHz. Current Commission policy and practice favors a "flexible" ship station license which emphasizes the most versatile and wide use of frequencies while encouraging their use in conformity with the rules. Requiring such showings and listing specific frequencies no longer serves a useful purpose.

4. Because these deletions are editorial in nature, intended to reflect current license processing practices and because they eliminate restrictions hitherto applied, the prior notice, procedure and effective date provisions of 5 U.S.C. 553, do not apply. Authority for this amendment appears in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

5. In view of the above, *it is ordered*, That the rule amendments set forth below shall be adopted effective March 27, 1974.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: March 13, 1974.

Released: March 18, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

1. Section 81.361(b)(1) is deleted and designated as reserved.

2. Section 83.360(b)(1) and (3) is deleted and designated as reserved.

[FR Doc.74–6797 Filed 3–22–74;8:45 am]

[Docket No. 19881; FCC 74–256]

PART 87—AVIATION SERVICES

Abbreviated Method of Aircraft Identification

In the matter of amendment of § 87.115 of the Commission's rules to provide an abbreviated method of aircraft identification during organized flying activity of short duration.

1. A notice of proposed rule making in the above-captioned matter was released on November 30, 1973 (38 FR 33618). No comments or reply comments in response to that notice have been received.

2. Accordingly, for the reasons set forth in the notice of proposed rule making, the amendment § 87.115 of the rules, as originally proposed, appears warranted.

3. In view of the above, IT IS ORDERED, pursuant to the authority contained in Sections 4(i) and 303(r) of the sion's rules is amended as set Communications Act of 1934, as amended, That effective April 29, 1974. Part 87 of the Commission's rules is amended as set forth below.

4. *It is further ordered*, That the proceeding in Docket No. 19881 is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: March 13, 1974.

Released: March 18, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Part 87 of 47 CFR Chapter 1 of Title 47 is amended as follows:

Section 87.115(e)(1)(iii) is amended to read as follows:

§ 87.115 Station identification.

• • • • •

(e) • • •

(1) • • •

(iii) An aircraft identification approved in advance by the Commission after coordination with the FAA for use by aircraft stations participating in an organized flying activity of short duration. The Commission shall be advised in advance of each event of the registration marking (N number) of each participating aircraft.

NOTE: Approval of the identification method permitted in subdivision (iii) will be expedited when the requesting organization coordinates with FAA Headquarters, Washington, D.C., prior to submitting the request to the Commission.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 73–SW–74; Amdt. 39–1801]

PART 39—AIRWORTHINESS DIRECTIVES

Bell Model 47 Series Helicopters

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring disassembly and internal inspection of certain control tubes for internal corrosion within 100 hours and thereafter at 1200 hour intervals on Bell Model 47 Series helicopters was published in 39 FR 1362. The proposal would also require replacement of corroded tubes, protection of the tube internal surfaces and sealing of the tube assembly to preclude corrosion. The proposal would also require submittal of reports to assess the magnitude of tube corrosion and to determine the necessity for mandatory inspections on vertical control tubes of other helicopter makes and models.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Responses to the proposal were received from four operators and from Bell Helicopter Company. Bell Helicopter Company recommended revisions to provide agreement with Service Bulletin No. 47–11–73–1. They recommended initial compliance at the next 1200 hour overhaul period and recommended a 50 hour periodic, external inspection of the tubes until the internal inspection was accomplished.

In addition, Bell recommended the tube assemblies be sealed as specified in the service bulletin to assure an air and water tight seal of the tubes. They also stated that the Model 47 maintenance manuals will include specific instructions for internal refinishing of tubes when the rod end bearings are replaced and they believe the proposed 1200 hour repetitive inspection will not be necessary when the tubes are properly processed when the rod end bearings are replaced.

One operator commented that the repetitive inspection should be scheduled on calendar time and based on their experience a 15 year inspection interval is more realistic. They have conducted the visual inspections specified in Service Bulletin 47–11–73–1 on sixteen year old equipment that has been operated in different environments and had negative findings.

One operator recommended that all control tubes be subject to the inspections, based on their inspection results. They stated proper sealing of the tubes should eliminate the 1200 hour repetitive inspection, but further stated a three to five year interval should be adequate if a repetitive inspection is still necessary.

One other operator recommended a daily visual inspection of the control tubes until the internal inspections were conducted at the next 600 hour or 1200 hour inspection period. They also recommended that the A.D. require proper sealing of the control tubes each time a rod end is replaced.

Another operator recommended a fifty hour visual inspection with a 1200 hour periodic inspection, because they found slight corrosion in control tubes that were used on Model 47G–5 helicopters that average 500 hours each year during aerial application of chemicals. The operator also provided a brief summary of their procedure used to seal the tubes.

The agency has given due consideration to all of the comments received but concludes that the rule should be adopted as proposed, except that the tube assembly sealing requirements will be more specific. The agency comments relating to the industry responses are discussed below. The agency now believes just the application of zinc chromate primer on the tube and rod end during riveting will not insure an air and water tight seal of the assembly. As recommended by Bell, the A.D. will be changed to require sealing as specified in Bell's Service Bulletin using Proseal 890–B2 or as specified in an FAA approved equivalent sealing procedure.

The agency proposed to require submittal of reports when corroded tubes were found to assess the extent or magnitude of tube corrosion and to determine the necessity for continued mandatory inspections of the Model 47 control tubes and for imposing mandatory inspections on vertical control tubes of other helicopter makes and models. No objections to this reporting proposal were received. The agency will review these inspection results and experience to alter or delete the A.D. inspection interval, and to substitute a calendar period for the 1200 hour repetitive inspection. However, at this time the 1200 hour inspection interval will be adopted as proposed.

The initial inspection of the Model 47 fleet to be conducted within 100 hours time in service after the effective date of the A.D., will be adopted as proposed. The recommendations to defer the initial inspection to the next 600 hour or 1200 hour heavy inspection of each helicopter would not obtain a timely survey of the entire Model 47 fleet and would not provide operators with helicopters near those inspections a suitable interval to accomplish the A.D. inspection. In addition, operators could not, in all cases, substantiate the interval since a previous inspection and would be subject to an immediate A.D. inspection.

The agency does not believe an external visual inspection to detect severe internal corrosion of a vertical control tube is sufficiently reliable; therefore, a daily or 50 hour periodic external visual inspection will not be adopted. Horizontal control tubes should not be subject to uniform reduction in cross sectional area due to internal corrosion such as was experienced by a vertical tube and internal corrosion of horizontal tubes has not been a significant airworthiness problem. Thus, only vertical control tubes will be subject to mandatory inspections.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BELL: Applies to all cyclic and collective main rotor control tube assemblies installed within a 30 degree angle of the vertical axis on Model 47 series helicopters, certificated in all categories.

Compliance required within the next 100 hours time in service after the effective date of this A.D., unless already accomplished, and thereafter at intervals not to exceed 1200 hours time in service from the last inspection.

To detect corrosion and prevent possible failure of the control tube assemblies, accomplish the following inspection.

(a) Remove the control tube assemblies from the helicopter and remove the rod end bearing and insert or clevis at each end of the tube assembly and clean the inside of the tube.

(b) Inspect each control tube for internal corrosion using a light and borescope or equivalent inspection means.

(c) Remove corroded control tubes from service prior to further flight and submit a

V 39 158 MAR 25 74 XUM

report of finding a corroded tube to Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, FAA, P.O. Box 1689, Fort Worth, Texas 76101. The control tube assembly part number, degree of corrosion found and total time in service should be included in the report. FAA Form 8330-2 may be used for this report. (Reporting approved by the Bureau of the Budget under BOB No. 04-R0174.)

(d) Reinstall serviceable rod end bearings and inserts or clevis in the uncorroded and serviceable tubes using acceptable techniques, methods and practices as specified below.

(1) Tubes with double drilled rivet holes, sharp nicks or scratches and internal corrosion are considered unserviceable.

(2) Tubes must have internal corrosion protection using zinc chromate primer, hot linseed oil or other equivalent corrosion inhibitor. The tube ends must be sealed, air and water tight, as specified in Paragraphs 4 and 5, Part II, Bell Helicopter Company Service Bulletin No. 47-11-73-1, Rev. A, dated December 6, 1973 or later approved revision or as specified in an equivalent FAA approved procedure when the insert, rod end bearing or clevis and rivets are installed.

(e) Install control tube assemblies on the helicopter and check the controls rigging and check tracking of the main rotor blades in accordance with pertinent Model 47 maintenance and overhaul information manual.

(f) The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the Service Manager, Bell Helicopter Company, P.O. Box 482, Fort Worth, Texas 76101. These documents may also be examined at the Office of the Regional Counsel, Southwest Region, FAA, 4400 Blue Mound Road, Fort Worth, Texas, and at FAA Headquarters, 800 Independence Avenue, S.W., Washington, D.C. A historical file on this A.D. which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Texas.

(Bell Helicopter Company Service Bulletin No. 47-11-73-1, Rev. A, dated 12-11-73 pertains to this subject.)

This amendment becomes effective April 22, 1974.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Texas on March 11, 1974.

HENRY L. NEWMAN,
Director, Southwest Region.

The incorporation by reference provisions in this document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.74-6761 Filed 3-22-74;8:45 am]

[Airworthiness Docket No. 74-WE-6-AD; Amdt. 39-1802]

PART 39—AIRWORTHINESS DIRECTIVES

Hughes Model 369A, 369H, 369HE, 369HS, and 369HM Helicopters

Pursuant to the authority delegated to me by the Administrator (31 FR 13697), an airworthiness directive was adopted on February 22, 1974, and made effective immediately by airmail letter dated February 25, 1974 as to all known United States operators of Hughes Model 369A, 369H, 369HE, 369HS and 369HM Helicopters, equipped with aluminum tail rotor blade P/N 369A1613-3, certificated in all categories. The directive requires, before further flight, unless already accomplished, and upon any installation or replacement of aluminum tail rotor blade P/N 369A1613-3, an inspection of the tail rotor assembly to verify that the rotor blades P/N 369A1613-3 serial numbers 0001 through 0156 are not mated with blade serial numbers 0157 and subsequent. The AD also requires replacement of mismatched tail rotor blade(s) before further flight.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the airworthiness directive effective immediately as to all known U.S. operators of Hughes Model 369A, 369H, 369HE, 369HS and 369HM Helicopters, certificated in all categories by airmail letter dated February 25, 1974. These conditions still exist and the airworthiness directive is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Pursuant to the authority of the Federal Aviation Act of 1958, delegated to me by the Administrator, the following airworthiness directive applicable to operators of Hughes Model 369A, 369H, 369HE, 369HS and 369HM Helicopters, equipped with aluminum tail rotor blade P/N 369A1613-3, certificated in all categories is effective immediately upon receipt of this air mail letter. Before further flight, unless already accomplished, and upon any installation or replacement of aluminum tail rotor blade P/N 369A1613-3, inspect the tail rotor assembly to verify that the rotor blade P/N 369A1613-3 serial numbers 0001 through 0156 are not mated with blade serial numbers 0157 and subsequent. Replace mismatched tail rotor blade(s) before further flight. Note AD inspection in Aircraft Maintenance Records. Forthcoming Service Bulletin, No. HN-65 covers the same subject.

This amendment is effective March 26, 1974 for all persons except those to whom it was made effective by airmail letter, dated February 25, 1974, which contained this amendment.

Issued in Los Angeles, California on March 11, 1974.

ROBERT O. BLANCHARD,
Acting Director,
FAA Western Region.

[Airspace Docket No. 73-SO-67]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On November 2, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 30276), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Laurel, Miss., transition area.

Interested persons were afforded an opportunity to participate in the rule making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 23, 1974, as hereinafter set forth.

In § 71.181 (39 FR 440), the Laurel, Miss., transition area is amended as follows:

"• • • long. 89°10'20" W.)• • •" is deleted and "• • • long. 89°10'20" W.); within 3 miles each side of the 315° bearing from Tallahala RBN (lat. 31°41'16" N., long. 89°11'26" W.), extending from the 7-mile radius area to 8.5 miles northwest of the RBN • • •" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in East Point, Ga., on March 14, 1974.

DUANE W. FREER,
Acting Director, Southern Region.

[Airspace Docket No. 74-SO-31]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Florence, S.C., control zone and transition area.

The Florence control zone is described in § 71.171 (39 FR 354) and the Florence transition area is described in § 71.181 (39 FR 440). In the descriptions, reference is made to "Florence Municipal Airport." The name of the airport has been changed to "Florence City-County Airport" and it is necessary to alter the descriptions to reflect this change. Since this amendment is editorial in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective immediately, as hereinafter set forth.

In § 71.171 (39 FR 354) and § 71.181 (39 FR 440), the Florence, S.C., control zone and transition area are amended as follows:

"• • • Florence Municipal Airport • • •" is deleted and "Florence City-County Airport • • •" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in East Point, Ga., on March 13, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

[Airspace Docket No. 73-WA-4]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Terminal Control Area and Alteration of Control Zone at Detroit, Mich.

On December 10, 1973, a notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER (38 FR 33994) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate a Group II Terminal Control Area (TCA) for Detroit, Mich.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. Seven comments were received.

The Air Transport Association and the Board of Wayne County Road Commissioners (operators of Detroit Metropolitan Wayne County Airport) endorsed the establishment of the Detroit TCA as proposed. Two commentors concurred in the need for a TCA, however, they made certain recommendations regarding the airspace configuration. The other three commentors objected to the proposal.

The objections were based on the belief that the establishment of a TCA at Detroit was not justified; the energy crisis would provide a reduction in aircraft operations; the TCA would be unduly restrictive because of transponder equipment requirements after January 1, 1975, and that this requirement would effectively eliminate Detroit Metropolitan Wayne County Airport as the primary point of entry for many private aircraft entering the U.S. from Canada; and private aircraft are charged an overtime fee for Customs personnel when landing at other airports of entry in the Detroit area, thus imposing an additional financial hardship on private aviation.

The issue concerning the establishment of a Group II TCA at Detroit was contained in notice 69-41, published in the FEDERAL REGISTER on September 30, 1969 (34 FR 15252), and notice 69-41B, published in the FEDERAL REGISTER on March 13, 1970 (35 FR 4519), which delineated the locations of the 22 hub areas where Group I and Group II TCAs were proposed.

A review of aircraft operations at Detroit Metropolitan Wayne County Airport indicates there has been very little change in aircraft operations. It should be noted, however, that Group II TCAs are not based on the number of operations, but on passenger enplanements. A monitor of the activities at the proposed TCA areas has determined that Detroit still warrants the establishment of a Group II TCA. As a result of such a monitor, Cincinnati was deleted as a proposed Group II TCA location, because it failed to maintain the status of a large hub.

The requirements for the improved transponder equipment have been under development for many years. Regulatory proposals issued in 1965, 1969, and 1972 discussed the requirement for this equipment within the National Airspace System. Numerous members of the aviation community responded to these various proposals with constructive suggestions concerning the problem and many of their suggestions were reflected in the final regulation. There are many reasons for requiring altitude reporting transponders. This equipment eliminates much of the conversation that would otherwise be required between pilot and controller on busy voice communication frequencies. It also furnishes vital altitude information to controllers in situations where the pilot is not in radio communication with the ground system. In effect, with the use of automatic altitude reporting transponder equipment, the present two-dimensional radar becomes three-dimensional. The result of this is a more efficient and safer air traffic control system.

Regarding the availability of Customs services, this service is available at Detroit City Airport from 8 a.m. to 5 p.m. Monday through Friday on a call-up basis at no cost to the user. This service can be obtained by prior arrangement or by a telephone request after arrival. At other than the above hours, there is a charge for this service.

Comments about the TCA configuration included recommendations that the floor of the TCA airspace along the Detroit River be raised to 3,000 feet AGL; the floor of Area C should be raised to at least 3,500 feet MSL to provide more VFR altitudes beneath the TCA floor for aircraft transiting these areas and to avoid the radio towers in the Farmington area; Area D is too large and the area to the southwest should be bounded by U.S. Highway 23, a natural VFR landmark; and the area overlying the Mettetal and National Airports should be raised to 3,000 feet MSL. A possible safety hazard could exist in the vicinity of the Salem VORTAC with aircraft flying around the edge of the TCA between 3,000 feet and 8,000 feet MSL.

The Canadian Ministry of Transport has decided to raise the 2,300-foot floor altitudes of the Canadian airspace over the Detroit River to 3,000 feet MSL. Additionally, the top of the Windsor Positive Control Zone will be raised to 3,000 feet MSL to join the overlying TCA airspace. The Canadian Ministry of Transport has designated airspace over Canadian territory which is compatible with the Detroit TCA and is described as follows:

Area E

That airspace extending upward from 3,000 feet MSL to and including 8,000 feet MSL bounded on the west and northwest by the United States/Canadian Border; on the northeast by the Windsor VOR 320° radial; on the southeast by the Windsor VOR 217° radial.

V 39 I 58 MAR 25 74 XUM

The suggestion to limit the southwest boundary of the 5,000-foot area to U.S. Highway 23 is not practical for the following reasons: The Milan Intersection, located on the western boundary of the TCA is a transitional fix used for the sequencing of arriving aircraft to the Detroit Metropolitan Wayne County Airport and must be located at its present position; the TCA configuration should include this intersection in order to provide the protection of the TCA to arriving aircraft.

The two comments on the desirability of raising the altitude of the 2,300-foot floor to at least 2,800 feet MSL in the airspace overlying the Mettetal and National Airports and the airspace lying southwest of the Detroit Control Zone to allow for additional movement of VFR traffic and a suggestion to raise the floor of the 3,000-foot area to 3,500 feet MSL is not practical because of the following reasons: The TCA floor altitudes are designed specifically to contain jet aircraft departing from the Detroit Wayne County Airport and any change in floor altitudes would mean that jet aircraft would drop out of this protected airspace. The radio towers in the Farmington area are located on the outer edge of the 3,000-foot area that adjoins the 5,000-foot area. It is felt that there is sufficient airspace to safely avoid these towers.

Although some increase of activity over the Salem VORTAC is possible, the use of this VORTAC for defining TCA boundaries in this area should be of benefit to a pilot correlating his position in respect to the TCA.

The FAA has determined that there is no longer a need for the east extension of the 2,300-foot area and it is hereby eliminated.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended effective 0901 G.m.t., May 23, 1974, as hereinafter set forth.

1. In § 71.171 (39 FR 354) the Detroit, Mich. (Metropolitan Wayne County Airport), Control Zone is amended by deleting the coordinates "Latitude 42°13'-05" N., Longitude 83°21'00" W." and substituting the coordinates "Latitude 42°13'07" N., Longitude 83°20'55" W." therefor.

2. Section 71.401(b) (39 F.R. 636), is amended by adding the Detroit, Mich., Terminal Control Area reading as follows:

DETROIT, MICH., TERMINAL CONTROL AREA

Primary Airport. Detroit Metropolitan Wayne County Airport (Lat. 42°13'07" N., Long. 83°20'55" W.)

Boundaries—Area A. That airspace extending upward from the surface to and including 8,000 feet MSL within the Detroit, Mich. (Metropolitan Wayne County Airport), Control Zone.

Area B. That airspace extending upward from 2,300 feet MSL to and including 8,000 feet MSL within a ten-mile radius of Detroit Metropolitan Wayne County Airport excluding Area "A" previously described, that airspace east of the United States/Canadian Border, and the Detroit, Mich. (Willow Run Airport), Control Zone.

Area C. That airspace extending upward from 3,000 feet MSL to and including 8,000 feet MSL within a sixteen-mile radius of Detroit Metropolitan Wayne County Airport, excluding Areas A and B previously described, that airspace within a three-mile radius arc of the Salem VORTAC, west of the Salem VORTAC 197° radial, and east of the United States/Canadian Border.

Area D. That airspace extending upward from 5,000 feet MSL to and including 8,000 feet MSL south of Detroit Metropolitan Wayne County Airport, bounded on the north by a sixteen-mile radius arc of the Detroit Metropolitan Wayne County Airport, on the east by the United States/Canadian Border, on the south by a twenty-five mile radius arc of the Detroit Metropolitan Wayne County Airport, on the west by the Salem VORTAC 197° radial and the Waterville VORTAC 353° radial; and an area north of Detroit Metropolitan Wayne County Airport bounded on the south by a sixteen-mile radius arc of Detroit Metropolitan Wayne County Airport, on the northwest by the Salem 052° radial, on the northeast by the Windsor VOR 320° radial and on the southeast by the United States/Canadian Border.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, D.C., on March 15, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74-6746 Filed 3-22-74;8:45 am]

[Reg. Docket No. 13577; Amdt 95-244]

PART 95—IFR ALTITUDES

Miscellaneous Amendments

The purpose of this amendment to Part 95 of the Federal Aviation Regulations is to make changes in the IFR altitudes at which all aircraft shall be flown over a specified route or portion thereof. These altitudes, when used in conjunction with the current changeover points for the routes or portions thereof, also assure navigational coverage that is adequate and free of frequency interference for that route or portion thereof.

As a situation exists which demands immediate action in the interest of safety, I find that compliance with the notice and procedure provisions of the Administrative Procedure Act is impracticable and that good cause exists for making this amendment effective within less than 30 days from publication.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (24 FR 5662), Part 95 of The Federal Aviation Regulations is amended, effective April 25, 1974 as follows:

1. By amending Subpart C as follows:

Section 95.101 *Amber Federal airway 1* is amended to read in part:

From; To; and MEA

Yakutat, Alaska, LFR; Cape Yakataga INT, Alaska; 2,000.
Cape Yakataga INT, Alaska; East Cordova INT, Alaska; 5,000.

Section 95.625 *Blue Federal airway 25* is amended to read in part:

Glenallen, Alaska, LF/RBN; *Big Delta, Alaska, LFR; 12,000. *9,200—MCA Big Delta LFR, S-bound.

Section 95.5000 *High altitude RNAV routes:*

From/to; total distance; changeover point *distance from geographic location; track angle; MEA and MAA*

J-861R is amended to read in part:

El Paso, Tex., VORTAC, Wycox, Ariz., W/P; 184.2; 80; El Paso; 269/089 to COP, 267/087 to Wycox; 18,000; 45,000.
Wycox, Ariz., W/P, Elope, Ariz., W/P; 93.2; 46.6; Wycox; 272/092 to COP, 269/089 to Elope; 18,000; 45,000.

Section 95.5500 *High altitude RNAV routes:*

J907R is amended to read in part:

Organ, N. Mex., W/P, Wycox, Ariz., W/P; 150.9; 75.4; Organ; 261/081 to COP, 261/081 to Wycox; 18,000; 45,000.
Wycox, Ariz., W/P, Elope, Ariz., W/P; 93.2; 46.6; Wycox; 272/092 to COP, 269/089 to Elope; 18,000; 45,000.

J935R is amended to read in part:

Wycox, Ariz., W/P, Jewel, N. Mex., W/P; 113; 56.5; Wycox; 030/210 to COP, 029/209 to Jewel; 18,000; 45,000.

Section 95.6002 *VOR Federal airway 2* is amended to read in part:

FROM; to; MEA

Helena, Mont., VOR, via N. alter.; *Watson INT, Mont., Via N. alter.; 10,000. *10,500—MCA Watson INT, E-bound.

Section 95.6006 *VOR Federal airway 6* is amended to read in part:

Waterville, Ohio, VOR, via S. alter.; Cleveland, Ohio, VOR, via S. alter.; 2,700.

Section 95.6013 *VOR Federal airway 13* is amended by adding:

McAllen, Tex., VOR; Harlingen, Tex., VOR; 1,600.
Harlingen, Tex., VOR; Raymondville INT, Tex.; *1,600. *1,300—MOCA.
Raymondville INT, Tex.; Armstrong INT, Tex.; *4,000. *1,300—MOCA.
Armstrong INT, Tex.; Solon INT, Tex.; *4,000. *1,100—MOCA.
Solon INT, Tex.; Pogo INT, Tex.; *1,600. *1,100—MOCA.
Pogo INT, Tex.; Corpus Christi, Tex., VOR; *1,600. *1,500—MOCA.
Harlingen, Tex., VOR, via W. alter.; Fox INT, Tex., via W. alter.; *1,600. *1,300—MOCA.
Fox INT, Tex., via W. alter.; Norias INT, Tex., via W. alter.; *2,000. *1,300—MOCA.
Norias INT, Tex., via W. alter.; Jerry INT, Tex., via W. alter.; *4,000. *1,300—MOCA.
Jerry INT, Tex., via W. alter.; Corpus Christi, Tex., VOR, via W. alter.; *1,600. *1,500—MOCA.

Section 95.6014 *VOR Federal airway 14* is amended to read in part:

Findlay, Ohio, VOR; Cleveland, Ohio, VOR; 2,700.

Section 95.6017 *VOR Federal airway 17* is amended by adding:

Brownsville, Tex., VOR; Harlingen, Tex., VOR; 1,500.
Harlingen, Tex., VOR; McAllen, Tex., VOR; 1,600.

Section 95.6020 *VOR Federal airway 20* is amended to delete:

McAllen, Tex., VOR, via S. alter.; Harlingen, Tex., VOR, via S. alter.; 1,600.
Harlingen, Tex., VOR, via S. alter.; Raymond-

ville INT, Tex., via S. alter.; *1,600. *1,300—MOCA.
Raymondville INT, Tex., via S. alter.; Armstrong INT, Tex., via S. alter.; *4,000. *1,300—MOCA.

Section 95.6020 *VOR Federal airway 20* is amended to read in part:

McAllen, Tex., VOR; Lasara INT, Tex.; 1,600.
Lasara INT, Tex.; Norias INT, Tex.; *4,000. *1,300—MOCA.
Norias INT, Tex.; Solon INT, Tex.; *4,000. *1,100—MOCA.
Solon INT, Tex.; Pogo INT, Tex.; *1,600. *1,100—MOCA.
Pogo INT, Tex.; Corpus Christi, Tex., VOR; *1,600. *1,500—MOCA.

Section 95.6035 *VOR Federal airway 35* is amended to read in part:

Eddy INT, Fla.; Cross City, Fla., VOR; *2,000. *1,400—MOCA.
*Crayfish INT, Fla., via W. alter.; Cross City, Fla., VOR, via W. alter.; **5,000. *4,000—MRA. **1,400—MOCA.

Section 95.6047 *VOR Federal airway 47* is amended to read in part:

Findlay, Ohio, VOR; Waterville, Ohio, VOR; 2,500.

Section 95.6053 *VOR Federal airway 53* is amended to delete:

Peotone, Ill., VOR; City INT, Ill.; *2,600. *2,300—MOCA.

Section 95.6074 *VOR Federal airway 74* is amended to read in part:

Little Rock, Ark., VOR; via N. alter.; Pine Bluff, Ark., VOR, via N. alter.; 2,000. *1,600—MOCA.

Section 95.6078 *VOR Federal airway 78* is amended to read in part:

Eau Claire, Wis., VOR; *Westboro INT, Wis.; **3,700. *3,700—MRA. **3,000—MOCA.
Westboro INT, Wis.; Rhinelander, Wis., VOR; *3,700. *3,000—MOCA.

Section 95.6097 *VOR Federal airway 97* is amended to read in part:

Tallahassee, Fla., VOR; Albany, Ga., VOR; 2,000.
City INT, Ill.; Peotone, Ill., VOR; *2,600. *2,300—MOCA.

Section 95.6128 *VOR Federal airway 128* is amended to delete:

Section 95.6133 *VOR Federal airway 133* is amended to read in part:

Mansfield, Ohio, VOR; U.S. Canadian Border; 3,000.

Section 95.6144 *VOR Federal airway 144* is amended to delete:

City INT, Ill.; Peotone, Ill., VOR; *2,600. *2,300—MOCA.

Section 95.6163 *VOR Federal airway 163* is amended to delete:

Brownsville, Tex., VOR; via W. alter.; Harlingen, Tex., VOR, via W. alter.; 1,500.
Harlingen, Tex., VOR; via W. alter.; Raymondville INT, Tex., via W. alter.; *1,600. *1,300—MOCA.
Raymondville INT, Tex., via W. alter.; Armstrong INT, Tex., via W. alter.; *4,000. *1,300—MOCA.

Section 95.6163 *VOR Federal airway 163* is amended by adding:

Brownsville, Tex., VOR; via W. alter.; Madre INT, Tex., via W. alter.; 1,500.
Madre INT, Tex., via W. alter.; Raymondville INT, Tex., via W. alter.; *1,600. *1,300—MOCA.
Raymondville INT, Tex., via W. alter.; Jerry INT, Tex., via W. alter.; *4,000. *1,300—MOCA.
Jerry INT, Tex., via W. alter.; Corpus Christi, Tex., VOR, via W. alter.; *1,600. *1,500—MOCA.

Section 95.6163 *VOR Federal airway 163* is amended to read in part:

Brownsville, Tex., VOR; Mansfield INT, Tex.; *1,500. *1,300—MOCA.
Mansfield INT, Tex.; Armstrong INT, Tex.; *4,000. *1,300—MOCA.
Armstrong INT, Tex.; Solon INT, Tex.; *4,000. *1,100—MOCA.
Solon INT, Tex.; Pogo INT, Tex.; *1,600. *1,100—MOCA.
Pogo INT, Tex.; Corpus Christi, Tex., VOR; *1,600. *1,500—MOCA.

Section 95.6177 *VOR Federal airway 177* is amended to read in part:

Wausau, Wis., VOR; *Westboro INT, Wis.; 3,600. *3,700—MRA.
Westboro INT, Wis.; Union INT, Wis.; *6,000. *2,800—MOCA.

Section 95.6232 *VOR Federal airway 232* is amended to delete:

Harbor View INT, Ohio; Sandusky, Ohio, VOR; 2,600.
Sandusky, Ohio, VOR; Crib INT, Ohio; *3,000. *2,100—MOCA.

Section 95.6435 *VOR Federal airway 435* is amended to read:

Rosewood, Ohio, VOR; Int. 042 M rad Rosewood VOR and 255 M rad Cleveland VOR; *3,500. *2,700—MOCA.
Int. 042 M rad Rosewood VOR and 255 M rad Cleveland VOR; Cleveland, Ohio, VOR; 2,700.

Section 95.6493 *VOR Federal airway 493* is amended to read in part:

Waterville, Ohio, VOR; Carleton, Mich., VOR; 2,400.

(Secs. 307 and 1110 of the Federal Aviation Act of 1958 (49 U.S.C. 1348, 1510).)

Issued in Washington, D.C. on March 13, 1974.

JAMES M. VINES,
Chief, Aircraft Programs Division.

[FR Doc.74-6209 Filed 3-22-74;8:45 am]

[Docket No. 12040; Amdt. No. 103-21]

PART 103—TRANSPORTATION OF DANGEROUS ARTICLES AND MAGNETIC MATERIALS

Reporting Certain Dangerous Article Incidents

The purpose of this amendment to Part 103 of the Federal Aviation Regulations is to permit certificate holders under Parts 121, 127, and 135 of the Federal Aviation Regulations an option regarding the place to which they may report certain incidents involving dangerous articles.

This amendment is based on a notice of proposed rule making (Notice No. 73-17) published in the FEDERAL REGISTER on June 7, 1973 (38 FR 14963). Interested persons have been afforded an opportunity to participate in the making of this amendment and due consideration has been given to the comments received in response to that notice. This amendment and the reasons therefor are the same as those contained in notice 73-17.

Of the three comments received in response to the Notice, only one opposed the rule change based on the belief that the nearest FAA facility should be notified immediately of any unintentional release of hazardous materials to insure that appropriate immediate requirements are implemented. As was noted in notice 73-17, however, it appears that, in some instances, the objective of immediate notification may be more effectively achieved if certificate holders under Parts 121, 127, and 135 are permitted to report to the FAA District Office holding the carrier's operating certificate and charged with the overall inspection of the certificate holder's operations. Accordingly, § 103.28 is amended herein to permit certificate holders under Parts 121, 127, and 135 such an option.

This amendment is issued under the authority of sections 313(a) and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a) and 1421), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, § 103.28 of the Federal Aviation Regulations is amended, effective April 22, 1974, to read as follows:

§ 103.28 Reporting certain dangerous article incidents.

(a) Each carrier that transports dangerous articles shall report to the nearest ACDO, FSDO, GADO, or other FAA facility, except that in lieu of reporting to the nearest of those facilities a certificate holder under Part 121, 127, or 135 of this chapter may report to the FAA District Office holding the carrier's operating certificate and charged with overall inspection of its operations, by telephone at the earliest practicable moment after each incident that occurs during the course of transportation (including loading, unloading or temporary storage) in which as a direct result of any dangerous article—

• • • • •

Issued in Washington, D.C., on March 14, 1974.

ALEXANDER P. BUTTERFIELD,
Administrator.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Part 3300]

OUTER CONTINENTAL SHELF LEASING; GENERAL

Proposed Hard Mineral Leasing Regulations; Time Extension for Comments

The time within which written comments on the proposed rulemaking to provide regulations to permit the proper development of deposits on the outer continental shelf of all minerals other than oil and gas, sulphur and salt, which are treated in the present 43 CFR Part 3300, which was published in the FEDERAL REGISTER, Vol. 39, No. 23, February 1, 1974, is hereby extended from March 15, 1974, to April 15, 1974.

At the request of interested parties, the time period for submission of comments on these proposed regulations has been extended to give the general public additional opportunity for review. Accordingly, interested parties may submit written comments, suggestions, or objections with respect to the proposed regulations to the Director (210), Bureau of Land Management, Washington, D.C. 20240 until April 15, 1974.

JACK O. HORTON,
Assistant Secretary of the Interior.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1011]

[Docket No. AO-251-A16]

MILK IN THE APPALACHIAN MARKETING AREA

Notice of Recommended Decision and Opportunity To File Written Exceptions

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Appalachian marketing area.

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C., 20250, on or before April 4, 1974. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Bristol, Virginia, on February 8, 1974, pursuant to notice thereof which was issued February 4, 1974 (39 FR 4483).

The material issues on the record of the hearing relate to:

1. The Class II milk price.
2. Need for emergency action.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Class II price.* The Class II price should be the Minnesota-Wisconsin (M-W) price for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as announced by the Department for the month.

The present Class II price, which averaged $5.57 in 1973, is the average of the prices paid for ungraded milk at specified local manufacturing plants in March-August and, in other months, the higher of that average price or a butter-powder formula price. The local plant pay price and the order's butter-powder formula price for 1973 averaged $5.24 and $6.00, respectively. The 1973 M-W price averaged $6.30. The 1973 differences between these various prices are consistent with those that have prevailed for a number of years. (The prices referred to throughout this discussion are for a hundredweight of milk containing 3.5 percent butterfat.)

A cooperative representing all but one of the producers on the market proposed that the Class II price be the lower of the M-W price or a butter-powder formula price, with a proviso that the Class II price be not less than the M-W price minus 20 cents. The butter-powder formula proposed by the cooperative is presently used as a snubber price in conjunction with the M-W price in a number of other orders. Such formula price is 23 cents more than that resulting from the butter-powder formula now provided in the order. There was no opposition to changing the present basis for pricing Class II milk.

The Class II pricing provisions of the order, essentially unchanged since inception of the order in 1954, do not appropriately reflect the value of milk for manufacturing use in the market. Of the 10 specified local manufacturing plants, the pay prices for ungraded milk of which are used as a Class II price determinant, three are no longer in operation. The remaining plants receive both can and bulk tank ungraded milk from dairy farmers. Each plant's reported pay price used in computing the Class II price is a simple average of its pay price for can and bulk tank milk. The pay prices for can milk are from $1.25 to $1.40 below pay prices for bulk tank milk. Currently, the pay prices at these plants for bulk tank milk are 10 to 15 cents more than the M-W price.

The proponent cooperative sells the milk of member producers in excess of its buying handlers' needs to local manufacturing plants at a price 25 to 50 cents above the M-W price. Apart from its Grade A operations, the cooperative purchases ungraded milk from local dairy farmers for manufacturing uses. The cooperative's pay price for this milk currently is 15 cents more than the M-W price.

A substantial part of the Class II milk pooled under the order is utilized in the higher-valued Class II outlets, such as cottage cheese and ice cream mix. Production, however, is not adequate on a year-round basis to supply fully handlers' needs for these uses. Handlers commonly utilize nonfat dry milk to produce cottage cheese when local milk is not available. Their costs for nonfat solids from this source are significantly greater than would be the case for solids in milk purchased at the order Class II price.

Proponent cooperative is the primary supplier of all handlers under the order. The milk made available to handlers for Class II uses by the cooperative is priced at the M-W price plus a stated differential.

The spokesman for the proponent cooperative stated that the Class II price should reflect the competitive value of milk for manufacturing uses and should be appropriately aligned with the prices in orders regulating handlers with which Appalachian handlers have substantial competition. He cited particularly the competition of Appalachian order handlers with handlers under the Ohio Valley and the Middle Atlantic orders. However, on cross examination he could not substantiate any significant competition between regulated Appalachian and Middle Atlantic order handlers.

The competition with Ohio Valley handlers, related by proponent, is specifically with regard to cottage cheese sales. While proponent spokesman noted that the Ohio Valley lowest class price (Class III) is the lesser of the M-W price or a butter-powder formula, milk used to produce cottage cheese (Class II) under that order is priced at the M-W price plus 10 cents.

Notwithstanding proponent's position, the Appalachian order sales and the production areas overlap those of the nearby Knoxville order substantially more than any other order. The Class II price under the Knoxville order is the M-W price, which is here adopted for the Appalachian order.

Since more than half the manufacturing grade milk in the United States is produced in Minnesota and Wisconsin, tht M-W manufacturing milk price series reflects the value of manufacturing milk nationwide. This price series reflects a price level determined by open competition among unregulated manufacturing plants for the available milk supply and the finished products are sold competitively on a national market.

The M-W price is used in most orders as a basis for pricing milk in the lowest price class. Indicative of this is the decision issued February 19, 1974 (39 FR 8452, et al.) that adopts the M-W price as the lowest class (Class III) price in 32 orders. Official notice is taken of that decision. The same decision adopts a price 10 cents above the M-W price as the price for Class II milk, which includes milk used to produce higher-valued manufactured milk products such as cottage cheese and ice cream mix.

The cooperative's proposal (utilizing a butter-powder formula in conjunction with the M-W price to determine the Class II price) could result in a Class II price as much as 20 cents below the M-W price. The testimony presented at the hearing, however, provided no justification for a Class II price at this time less than the M-W price. The cooperative is able to market all milk in excess of its buying handlers' Class I needs at a price equal to or above the M-W price. Moreover, milk for Class II uses is not available to regulated handlers from the cooperative or from alternative sources of supply at less than the M-W price. Additionally, the value of milk for manufacturing purposes locally, as indicated by the prices paid for both Grade A and ungraded milk in bulk by local manufacturing plants, is above the level of the M-W price. Under these circumstances, it is concluded that the M-W pay price should be established as the appropriate means for pricing milk for other than Class I use under the Appalachian order.

2. *Need for emergency action.* The notice of hearing provided for evidence to be taken to determine whether emergency marketing conditions exist that would warrant omission of a recommended decision on the proposal to change the Class II pricing provisions. At the hearing, proponent recognized a need for prompt action on the proposal, but stated that marketing conditions did not require emergency action. Moreover, no testimony was presented at the hearing to justify omission of the recommended decision and the opportunity to file exceptions thereto. The proposal for taking emergency action is therefor denied.

RULINGS ON PROPOSED FINDINGS AND CONCLUSIONS

A brief and proposed findings and conclusions were filed on behalf of an interested party. This brief, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by the interested party are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

GENERAL FINDINGS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

RECOMMENDED MARKETING AGREEMENT AND ORDER AMENDING THE ORDER

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Appalachian marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

In § 1011.51, paragraph (b) is revised as follows:

§ 1011.51 Class prices.

* * * * * *

(b) *Class II milk price.* The Class II milk price shall be the basic formula price for the month.

Signed at Washington, D.C., on March 20, 1974.

JOHN C. BLUM,
Deputy Administrator, Regulatory Programs.

National Oceanic and Atmospheric Administration

[50 CFR Part 280]

YELLOWFIN TUNA

Eastern Pacific Fisheries

The resolution adopted by the Inter-American Tropical Tuna Commission for 1974 recommends to continue in 1974 the experimental fishing program in effect since 1969.

The Commission's resolution for 1974, as in 1973 allows vessels of less than 400 short tons, carrying capacity to fish for yellowfin tuna within the regulatory area during the closed season under such restrictions as may be necessary to limit the catch of yellowfin by such vessels to 6,000 tons during 1974. Regarding this allotment, the National Marine Fisheries Service recommends that the 1974 allotments to small seiners and bait and jig boats remain the same as in 1973, namely:

(1) Purse seiners of 400 short tons carrying capacity or less: 4,400 short tons.

(2) Bait and jig boats: 2,300 short tons.

The yellowfin tuna incidental catch limitation for each vessel category is recommended as follows:

V 39 158 MAR 25 74 XUM

(1) Purse seiners of 301–400 short tons carrying capacity: 40 percent by round weight of each vessel's total catch: *Provided*, That vessels which are on a fishing voyage longer than 70 days may land 20 percent by round weight of each vessel's established short ton carrying capacity.

(2) Purse seiners of 300 short tons carrying capacity or less: 60 percent by round weight of each vessel's total catch: *Provided*, That vessels which are on a fishing voyage longer than 50 days may land 25 percent by round weight of each vessel's established short ton carrying capacity.

(3) Bait and jig boats: 50 percent by round weight of each vessel's established short ton carrying capacity.

The total allotment for 1974 is 6,700 short tons. The additional 700 tons allotted to the vessels under 400 short tons carrying capacity is expected to be available from the unused portion of the overall country 15 percent incidental catch.

Experience gained since the last publication of amendment to the yellowfin tuna regulations on March 6, 1973, indicates a need for further amendments to the regulations to make them more effective in implementing the yellowfin conservation measures recommended by the Commission.

The proposed changes and their rationale are presented below:

(1) Section 280.7(1). A new section to be added as follows:

> Any vessel sighted inside the regulatory area while reporting its position as outside the area shall return to port for inspection or to a U.S. port for unloading within ten days after receipt by the owner of the vessel or his agent of a certified letter from the Regional Director advising him of such sighting.

This section is necessary to insure that an equitable and prompt determination may be made as to whether criminal or civil penalties shall be invoked and the case may be expeditiously processed. Failure to return to port as required, would subject the master and the catch to the criminal and civil penalties provided in the Act, as appropriate in the circumstances.

(2) In the interest of clarity, it is proposed that the mathematical formulas used to determine the amount of yellowfin tuna, that may legally be landed by a vessel subject to one of the incidental catch rates be added to the regulations. This amendment in no way changes the incidental catch rates.

We therefore propose to add at the end of §§ 280.7(b)(1) and 280.(j), and immediately before the last sentences in §§ 280.7(b)(2), 280.7(b)(3), and 280.7(b)(4)(ii): "Legal yellowfin tuna=$^{15}/_{85}$ times mingled species catch.)"

Add immediately before proviso to § 280.7(b)(2): "(Legal Yellowfin tuna =40/60 times mingled species catch.)"

Add immediately before proviso to § 280.7(b)(2): "(Legal yellowfin tuna =60/40 times mingled species catch.)"

(3) Present regulations that implement conservation measures on the taking and transporting of yellowfin tuna require recordkeeping and written reports from masters or other persons in charge of a tuna vessel. The National Marine Fisheries Service has determined that a similar requirement should be imposed on cargo vessels that transship from another country to the United States tuna taken in the Eastern Tropical Pacific.

Therefore, it is our intent to amend § 280.9 to require, before obtaining permission from the U.S. Customs to unload round tuna, information regarding the source of such cargo and to state the penalty if such information is not provided.

Section 280.9 is amended by adding new paragraphs (f), (g), and (h) as set forth below.

Because numerous amendments to the original 1962 Yellowfin Tuna regulations have taken place since the last complete reprinting on March 4, 1972 we are herewith reprinting the entire regulations. Other than the above substantial changes, any changes are editorial.

Before final adoption of amendments, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Regional Director, Southwest Region, National Marine Fisheries Service, 400 South Ferry Street, Terminal Island, CA 90731, on or before April 4, 1974. Interested persons will be afforded an opportunity to comment on the proposed amendments at a public hearing to be held in the United Portuguese Club, 2818 Addison Street, San Diego, CA, beginning at 9:30 a.m., April 2, 1974. Any person who intends to testify at this hearing is requested to furnish in writing, prior to the hearing, his name and the name of the organization he represents, if any, to the Regional Director.

The proposed amendments are issued under the authority contained in subsection (c) of Section 6 of the Tuna Conventions Act of 1950, as amended (16 U.S.C. 955(c)), as modified by Reorganization Plan No. 4, effective October 3, 1970 (35 FR 15627).

Issued at Washington, D.C., and dated March 25, 1974.

JACK W. GEHRINGER,
Acting Director, National Marine Fisheries Service.

Part 280 of 50 CFR is revised as set forth below:

PART 280—YELLOWFIN TUNA

Sec.
280.1 Definitions.
280.2 Basis and purpose.
280.3 Catch limits.
280.4 Open season.
280.5 Closed season.
280.6 Open season restrictions applicable to fishing vessels.
280.7 Closed season restrictions applicable to fishing vessels.
280.8 Emergency action by Service Director.
280.9 Restrictions applicable to cargo vessels.
280.10 Restrictions applicable to purchasers.
280.11 Recordkeeping and written reports.
280.12 Persons and vessels exempted.

280.14 State officers designated as enforcement agents.

AUTHORITY: The provisions of this Part 280 issued under 64 Stat. 777, as amended, 16 U.S.C. 951, as modified by Reorganization Plan No. 4, effective Oct. 3, 1970 (35 FR 15627).

§ 280.1 Definitions.

For the purposes of this part, the following terms shall be understood to mean:

(a) *United States.* All areas under the sovereignty of the United States, the Trust Territory of the Pacific Islands, and the Canal Zone.

(b) *Convention.* The Convention for the Establishment of an Inter-American Tropical Tuna Commission, signed at Washington, D.C., May 31, 1949, by the United States of America and the Republic of Costa Rica (1 U.S.T. 230).

(c) *Commission.* The Inter-American Tropical Tuna Commission established pursuant to the Convention.

(d) *Director of investigations.* The Director of Investigations, Inter-American Tropical Tuna Commission, La Jolla, California.

(e) *Service director.* The Director of the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

(f) *Regional director.* The Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California, telephone number, area code, 213, 548–2575.

(g) *Regulatory area.* All waters of the eastern Pacific Ocean bounded by the mainland of the Americas and the following lines: Beginning at a point on the mainland where the parallel of 40° north latitude intersects the coast; thence due west to the meridian of 125° west longitude; thence due south to the parallel of 20° north latitude; thence due east to the meridian of 120° west longitude; thence due south to the parallel of 5° north latitude; thence due east to the meridian of 110° west longitude; thence due south to the parallel of 10° south latitude; thence due east to the meridian of 90° west longitude; thence due south to the parallel of 30° south latitude; thence due east to a point on the mainland where the parallel of 30° south latitude intersects the coast. Except that for 1974 only, the area encompassed by a line drawn starting at 110° west longitude and 3° north latitude extending east along 3° north latitude to 95° west longitude; thence south along 95° west longitude to 3° south latitude; thence east along 3° south latitude to 90° west longitude; thence south along 90° west longitude to 10°south latitude; thence west along 10° south latitude to 110° west longitude; thence north along 110° west longitude to 3° north latitude shall be excluded from the regulatory area to encourage exploratory fishing.

(h) *Yellowfin tuna.* No other fishes except the species *Thunnus albacores.*

(i) *Mingled species.* (1) Any species of billfish or shark.

(2) No other species of the family Scombridae except: Skipjack (*Euthynnus pelamis*), bigeye (*Thunnus obesus*), bluefin (*Thunnus thynnus*), albacore (*Thunnus alalunga*), or bonito (*Sarda chiliensis*).

(j) *Fishing vessel.* All watercraft subject to the jurisdiction of the United States which are used for catching or processing fish, except purse seine skiffs.

(k) *Fishing voyage.* The period between the date a fishing vessel departs from any port to carry out fishing operations and the date such vessel unloads any of its catch or the date such vessel returns to any port for the express purpose of receiving an inspection by a designated agent of the National Marine Fisheries Service.

(l) *Cargo vessel.* All watercraft which are used for transporting fish or fish products, except fishing vessels.

(m) *Person.* Individual, association, corporation, or partnership subject to the jurisdiction of the United States.

(n) *Open season.* The time during which yellowfin tuna may lawfully be captured without limitation by any fishing vessel operating within the regulatory area.

(o) *Closed season.* The time during which yellowfin tuna may not be captured in the regulatory area, except in limited quantities as an incident to fishing for species with which yellowfin may be mingled.

§ 280.2 Basis and purpose.

(a) At a special meeting held at Long Beach, Calif., on September 14, 1961, the Commission recommended to the Governments of Costa Rica, Ecuador, Panama, and the United States of America, parties to the Convention, that they take joint action to limit the annual catch of yellowfin tuna from the eastern Pacific Ocean by fishermen of all nations during the calendar year 1962. This recommendation was made pursuant to paragraph 5 of Article II of the Convention on the basis of scientific investigations conducted by the Commission over a period of time dating from 1951. The most recent years of this period were marked by a substantial increase in fishing effort directed toward the yellowfin tuna stocks, resulting in a rate of exploitation of these stocks greater than that at which the maximum sustainable yield may be obtained. The Commission's recommendation for joint action by the parties to regulate the yellowfin tuna fishery has as its objective the restoration of these stocks to a level of abundance which will permit maximum sustainable catch and the maintenance of the stocks in that condition in the future.

(b) At each annual meeting held since 1962, the Commission affirmed its conclusions regarding the need for regulating the yellowfin tuna fishery in the eastern Pacific Ocean and at each meeting recommended to the parties to the Convention that they take joint action to:

(1) Establish a prescribed tonnage limit on the total catch of yellowfin tuna by the fishermen of all nations during each calendar year from an area of the eastern Pacific Ocean defined by the Commission;

(2) Establish open and closed seasons for yellowfin tuna under prescribed conditions;

(3) Permit the landing of an incidental catch by weight of yellowfin tuna when landed with one or more of the following fishes usually caught mingled with yellowfin tuna, that are taken on fishing trip begun after the close of the yellowfin tuna fishing season: Skipjack tuna, bigeye tuna, bluefin tuna, albacore tuna, bonito, the billfishes, and the sharks; and

(4) Obtain from governments not parties to the Convention, but having vessels which operate in the fishery, cooperation in effecting the recommended conservation measures.

(c) The regulations in this part are designed to implement the Commission's recommendations for the conservation of yellowfin tuna so far as they affect vessels and persons subject to the jurisdiction of the United States.

§ 280.3 Catch limits.

The annual limitation on the quantity of yellowfin tuna permitted to be taken from the regulatory area by the fishing vessels of all nations participating in the fishery will be fixed and determined on the basis of recommendations made by the Commission pursuant to paragraph 5 of Article II of the Convention. Upon approval by the Secretary of State and the Secretary of Commerce of the recommended catch limit, announcement of the catch limit thus established shall be made by the Service Director through publication of a suitable notice in the FEDERAL REGISTER. The Service Director, in like manner, shall announce any revision or modification of an approved annual catch limit which may subsequently enter into force.

§ 280.4 Open season.

The open season for yellowfin tuna fishing shall begin annually at 0001 hours on the first day of January and terminate at 0001 hours on a date to be announced as provided in § 280.5. Time in hours shall refer to local time in the area affected.

§ 280.5 Closed season.

Pursuant to authority granted by the Commission, the Director of Investigations will determine the date on which he deemed that the yellowfin fishing season should close and will promptly notify the Service Director of such date. The Service Director shall then announce the season closure date thus established by publication of a notice in the FEDERAL REGISTER. The closure date so announced shall be final except that if it shall at any time become evident to the Director of Investigations that the closure date initially determined had been affected by changed circumstances, he may substitute another date which shall be announced by the Service Director in like manner as provided for the date originally determined.

§ 280.6 Open season restrictions applicable to fishing vessels.

(a) During the open yellowfin tuna season, every fishing vessel operating within the regulatory area shall transmit once each calendar week a message between 0900 and 2400 hours local California time. The message shall be transmitted directly to the Director of Investigations through the shore representative of the fishing vessel and shall state: the name of the reporting vessel and the tonnage by species of fish aboard. The above reporting procedure shall go into effect on a date to be announced by the Service Director through publication of a notice in the FEDERAL REGISTER.

(b) During the open yellowfin tuna season, every fishing vessel operating in the Pacific Ocean, but outside the regulatory area, shall transmit daily a message between 0800 and 1000 hours local California time. This requirement will also apply, for 1974 only, to every fishing vessel operating in the area described in the second sentence of paragraph (g) of Section 280.1. The message shall be transmitted directly to Coast Guard Radio San Francisco (NMC) on frequency 16,565.0, 12,421.0, or 8,281.2 KHz and shall state: "This message is being transmitted in compliance with the U.S. eastern tropical Pacific yellowfin tuna regulations, and confirms that the vessel (name of reporting vessel) is fishing in the Pacific Ocean, but outside the regulatory area as of this date (give date)."

§ 280.7 Closed season restrictions applicable to fishing vessels.

Except as otherwise provided in this section, after notice has been published in the FEDERAL REGISTER announcing closure of the yellowfin season, it shall be unlawful for any person or fishing vessel to land yellowfin tuna captured from within the regulatory area in any port or place until the season reopens on the following January 1.

(a) Any fishing vessel which has departed port to engage in tuna fishing, prior to the date of closure of the yellowfin season, may continue to capture yellowfin tuna within the regulatory area without restriction until the fishing voyage has been completed.

(1) In addition, for 1974 only, any fishing vessel which is in port at the closure and has either (i) completed a voyage in the regulatory area during the 1974 open season or (ii) completed a voyage in the regulatory area during 1973 will be allowed one additional unrestricted fishing voyage provided that departure is made within 30 days thereafter.

(2) For the purpose of the above, departure refers to the date a vessel leaves port prepared to carry out fishing operations. A stopover at a single intermediate port, not exceeding 48 hours, may, however, be made to meet deficiencies in outfitting, supplying, fueling, provisioning or manning needs for a fishing voyage. Remaining in excess of 48 hours shall constitute a new fishing voyage cor-

V 39158
MAR 25 74
XUM

responding to the delayed departure date.

(b) Any fishing vessel which departs port on a fishing voyage after closure of the yellowfin season, except as provided in paragraph (a) of this section, may land yellowfin tuna captured from within the regulatory area in limited quantities as provided in subparagraphs (1) to (3) of this paragraph as an incident to fishing for species with which yellowfin may be mingled. The Service Director may, however, through publication of a notice in the FEDERAL REGISTER adjust the incidental catch limitations to assure that the special allotments designated for vessels of 400 short tons carrying capacity or less are not underutilized and the 15 percent overall incidental catch for the entire tuna fleet is not exceeded. Any quantity of yellowfin tuna landed in excess of the limitations provided in (b)(1) to (b)(3) of this section shall be subject to seizure and forfeiture pursuant to the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–961).

(1) Purse seiners over 400 short tons carrying capacity may land in any port or place yellowfin tuna captured from within the regulatory area as an incident to fishing for species with which yellowfin may be mingled, but in no event shall any such vessel be permitted to land yellowfin tuna in excess of 15 percent by round weight of its total catch (legal yellowfin tuna=$\frac{15}{85}$ times mingled species catch).

(2) Purse seiners of 400 short tons carrying capacity or less may land in any U.S. port yellowfin tuna captured from within the regulatory area as an incident to fishing for species with which yellowfin may be mingled, but in no event shall any such vessel be permitted to land yellowfin tuna in excess of 40 percent by round weight of its total catch (legal yellowfin tuna = 40/60 times mingled species catch): *Provided however*, That any vessel of 301–400 short tons carrying capacity which is on a fishing voyage longer than 70 days may land 20 percent yellowfin tuna by round weight of its established short ton carrying capacity. Nor shall any purse seiner of 300 short tons carrying capacity or less be permitted to land yellowfin tuna in excess of 60 percent by round weight of its total catch (legal yellowfin tuna= 60/40 times mingled species catch): *Provided however*, That any such vessel that is at sea longer than 50 days may land 25 percent yellowfin tuna by round weight of its established short ton carrying capacity. That local wet fish seiners may accumulate the 60 percent allowance by weight for the separate period from the date of closure of the yellowfin fishing season until the end of that month, and for each separate period consisting of one calendar month thereafter provided such vessels have not landed any yellowfin tuna during the open season and make deliveries only on a daily basis. When the catch of yellowfin tuna by purse seiners of 400 short tons carrying capacity or less reaches 4,400 short tons, the amount of yellowfin tuna which any such vessel may lawfully land will revert to 15 percent by round weight of its total catch. After a date to be announced through publication of a notice in the FEDERAL REGISTER by the Service Director, any vessel departing on a fishing voyage shall be subject to this reversion limitation of 15 percent.

(3) Bait and jig boats may land in any U.S. port yellowfin tuna captured from within the regulatory area, but in no event shall any such vessel be permitted to land yellowfin tuna in excess of 50 percent by round weight of its short ton carrying capacity once established in accordance with subparagraph (4) of this paragraph. When the catch of yellowfin tuna by bait and jig boats collectively reached 2,300 short tons, the amount of yellowfin tuna which any such vessel may lawfully land will revert to 15 percent by round weight of its total catch. After a date to be announced through publication of a notice in the FEDERAL REGISTER by the Service Director, any vessel departing on a fishing voyage shall be subject to this reversion limitation of 15 percent.

(4) The short ton capacity of vessels will be determined from tables prepared by the Commission which relate carrying capacity to registered tonnages and from official unloading records available to the National Marine Fisheries Service.

(i) Managing Owners of purse seine vessels of 400 short tons carrying capacity or less will be notified by registered mail that their vessel is in this category and is subject to the provisions of paragraph (b)(2) of this section.

(ii) Except as provided below for bait and jig boats, managing owners not receiving notification by registered mail can assume that their vessel is over 400 short tons carrying capacity and is subject to the provisions of (b)(1) of this section.

(iii) To qualify for the bait and jig boat yellowfin allocation, managing owners of such vessels shall supply the Regional Director documentation concerning the gross and net tonnage of their vessels together with records of prior unloadings. This information will be used by the Regional Director to establish the short ton carrying capacity of each vessel. Failure to comply shall result in each such vessel being limited to 15 percent yellowtail tuna by round weight of its total catch. This 15 percent limitation shall remain in effect until the aforesaid documentation is furnished by the vessel's managing owner.

(5) The tonnage limitations specified in (b)(2) and (3) of this section may be adjusted upward or downward. Any such adjustment will be based upon the estimated use of the incidental catch allowances, and shall be apportioned as determined by the Service Director. Announcement of such adjustment shall be made by publication of a notice in the FEDERAL REGISTER by the Service Director.

(c) Any fishing vessel operating within the regulatory area which began its fishing voyage during the closed season and is restricted to the catch limitations as provided in paragraph (b) of this section shall be subject to such limitation regardless of its arrival date in port. In addition, any vessel so restricted which discharges some but not all of its catch, shall be subject to the same restrictions upon completion of its next fishing voyage.

(1) Any fishing vessel having incidentally caught yellowfin tuna aboard may, however, begin fishing on January 1 for yellowfin tuna without restriction, provided such vessels are made available for inspection during the period December 27 through December 31. A request for the designation of an inspection port shall be made to the Regional Director on or before December 23. Upon notification by the Regional Director of the availability of an inspection port, each vessel shall proceed to such port for inspection by a designated agent of the National Marine Fisheries Service. Official seals will be affixed to wells containing incidentally caught yellowfin tuna and the same will be noted in the vessel's log. Fish in the wells at the time of inspection shall be subject to the incidental catch limitations as set forth in paragraph (b) of this section, regardless of the date of unloading. In addition, the Regional Director shall be notified not less than 48 hours in advance of the date and place of any unloadings from inspected vessels. Upon arrival at point of sale or delivery, the official seals will be removed by a designated agent of the National Marine Fisheries Service. Inspected vessels shall not be allowed to leave port to resume fishing activities until 0001 hours, January 1.

(2) Any vessel failing to file the reports and to follow the procedures of this paragraph, tampering with or removing an official seal or altering the vessel's log, shall be restricted to the incidental catch limitations set forth in paragraph (b) of this section for its entire fishing voyage.

(d) Any fishing vessel electing to fish exclusively in the Pacific Ocean, but outside the regulatory area, shall report to the Regional Director, within 48 hours before leaving port, giving name of the reporting vessel and the port of departure; within 24 hours before leaving the regulatory area, giving the latitude of departure and the approximate time of departure; and within 24 hours before returning to the regulatory area, giving the latitude of reentry, the approximate time of reentry and the tonnage by species of fish aboard. For 1974 only, the area described in the second sentence of paragraph (g) of Section 280.1 is considered to be outside the regulatory area.

(1) In addition, every fishing vessel operating in the Pacific Ocean, but outside the regulatory area, shall transmit daily a message between 0800 and 1000 hours local California time. This message shall be transmitted directly to Coast Guard Radio San Francisco (NMC) on frequency 16,565.0, 12,421.0, or 8,281.2 KHz and shall state: "This message is being transmitted in compliance with the U.S. eastern tropical Pacific yellowfin tuna regulations, and confirms that the vessel (name of reporting vessel) is fishing in the Pacific Ocean but outside the regulatory area as of this date (give date)." Any vessel failing to receive acknowledgement from Coast Guard San Francisco, must transmit the same message on the following day. Should the vessel fail to receive acknowledgement within three consecutive days, the vessel's radio equipment shall be considered inoperative and the vessel shall return directly to port without delay to unload or to receive an inspection by a designated agent of the National Marine Fisheries Service.

(2) Any vessel failing to file the reports and to follow the procedures of this paragraph, shall be restricted to the incidental catch limitations set forth in paragraph (b) of this section for its entire fishing voyage.

(e) Any fishing vessel electing to fish exclusively in the Pacific Ocean, but outside the regulatory area, shall proceed without delay to waters outside the regulatory area and upon reentering the regulatory area shall proceed directly to port without delay.

(1) If a vessel must, however, make an emergency port call, it shall proceed directly to port without delay and shall notify the Regional Director, not less than 48 hours prior to arrival, giving the name of the port to be entered. If the vessel elects to resume fishing outside the regulatory area, it must follow the procedures required in paragraph (d) of this section and shall proceed without delay directly to waters outside the regulatory area.

(2) Any vessel failing to file the reports and to follow the procedures of this paragraph shall be restricted to the incidental catch limitations set forth in paragraph (b) of this section for its entire fishing voyage.

(f) Any fishing vessel which on the same voyage operates within and outside the regulatory area shall be subject to the incidental catch limitations as set forth in paragraph (b) of this section, unless such vessel is made available for inspection as provided in this paragraph.

(1) Any fishing vessel electing to change fishing areas, without having that portion of its catch taken outside the regulatory area restricted to such incidental catch limitations, shall request inspection services from the Regional Director. Vessels within the regulatory area shall report not less than 48 hours prior to electing to leave the area, stating their intention and requesting the designation of an inspection port. Vessels outside the area shall report within 24 hours before returning to the regulatory area, stating their intention, requesting the designation of an inspection port, and giving the latitude of reentry, the approximate time of reentry and the tonnage by species of fish aboard. Upon notification by the Regional Director of the availability of an inspection port, each vessel shall proceed directly without delay to such port inspection by a designated agent of the National Marine Fisheries Service. Official seals will be affixed to wells containing fish captured within or outside the regulatory area, as appropriate, and the same will be noted in the vessel's log. Upon arrival at point of sale or delivery, the official seals will be removed by a designated agent of the National Marine Fisheries Service.

(2) Any vessel failing to file the reports and to follow the procedures of this paragraph, tampering with or removing an official seal or altering the vessel's log shall be restricted to the incidental catch limitations set forth in paragraph (b) of this section for its entire fishing voyage.

(g) All fishing vessels, except vessels proceeding directly to Puerto Rico or to any other U.S. port for unloading, shall notify the Regional Director not less than 48 hours prior to leaving the regulatory area via the Panama Canal. In addition, all fishing vessels, except vessels without fish aboard, shall notify the Regional Director not less than 48 hours prior to entering the regulatory area via the Panama Canal. Each report shall include the name of the reporting vessel, the tonnage by species of fish aboard and whether the fish were caught in or outside the regulatory area in Pacific waters or from Atlantic waters. Any vessel failing to file the reports and to follow the procedures of this paragraph, shall be restricted to the incidental catch limitations set forth in paragraph (b) of this section for its entire fishing voyage, regardless of its arrival date in port.

(h) All fishing vessels shall notify the Regional Director not less than 48 hours prior to any sale or delivery in a foreign country, of fish caught in the Pacific Ocean from within or outside the regulatory area. Such reports shall include the tonnage by species unloaded and whether such fish were caught in or out of the regulatory area.

(i) All fishing vessels shall notify the Regional Director not less than 48 hours prior to transferring fish caught in the Pacific Ocean from within or outside the regulatory area to another vessel for the purpose of transshipment. Such reports shall include the date and place of unloading, name and destination of the oncarrying vessel, tonnage by species of fish transferred and whether the transferred fish were caught in or outside the regulatory area.

(j) All fishing vessels that are permanently based in a foreign country, which elect to participate in the allocation provisions for vessels of 400 tons carrying capacity of less shall (1) unload in a U.S. port after each voyage begun during the closed season, or

(2) transship all fish taken on such voyages to a U.S. port in accordance with paragraphs (i) of this section. Any vessel failing to follow the procedures of this paragraph, shall be limited to an incidental rate of yellowfin tuna not to exceed 15 percent by round weight of its total catch (legal yellowfin tuna=$\frac{15}{85}$ times mingled species catch).

(k) All reports required in paragraphs (d) to (i) of this section, except messages transmitted directly to Coast Guard Radio San Francisco, shall be telephoned to area code 714, telephone number, 233–5511. Such reports, which must be delivered within the time limits specified, may be made by prepaid commercial radio message or relayed through the shore representative of the reporting vessel.

(l) Any vessel sighted inside the regulatory area while reporting its position as outside the regulatory area shall return to port for inspection or to a U.S. port for unloading within ten days after receipt by the owner of the vessel or his agent of a certified letter from the Regional Director advising him of such sighting.

§ 280.8 Emergency action by service director.

If during the closed yellowfin season, the Service Director finds that the provisions relating to the fishing outside the regulatory area are inadequate to insure that the recommendations of the Commission are met, he shall announce such findings through publication of a notice in the FEDERAL REGISTER and immediately thereafter:

(a) Every fishing vessel at sea, having yellowfin tuna aboard in excess of the incidental catch limitations as provided in § 280.7(b) which is claimed to have been captured outside the regulatory area, but in the Pacific Ocean, shall return directly without delay to its home port or port of departure to unload or to receive an inspection by a designated agent of the National Marine Fisheries Service. Any vessel failing to comply with the above requirements, shall be restricted to the incidental catch limitations set forth in § 280.7(b) for its entire fishing voyage.

(b) Any fishing vessel which has operated in the regulatory area at any time during the calendar year and which departs on any fishing voyage within the Pacific Ocean after the notice described in this section is published in the FEDERAL REGISTER, shall be restricted to the incidental catch limitations as provided in § 280.7(b).

§ 280.9 Restrictions applicable to cargo vessels.

(a) Any fishing vessel shall be deemed to have completed a fishing voyage whenever any part of its catch is transferred to a cargo vessel in conformity with the requirements of this section.

(b) In keeping with the provisions of 46 U.S.C. 251, no foreign-flag vessel, whether documented as cargo vessel or otherwise, is permitted to land in port of the United States any fish or fish products taken on board such vessel on the high seas.

(c) The transfer of fish from a fishing vessel to a cargo vessel while in a foreign country or in waters over which each country has recognized jurisdiction is subject to the applicable laws and regulations of such foreign country.

(d) During the closed yellowfin tuna season, no fishing vessel shall transfer on the high seas any part of its catch to a cargo vessel documented under the laws of the United States and no such cargo vessel shall receive, possess, or bring to any place in the United States, fish taken on board on the high seas from a fishing vessel unless the cargo vessel shall hold

V 39 N 58 MAR 25 74 XUM

a permit issued in conformity with paragraph (e) of this section.

(e) Upon written application made to him, the Regional Director may issue a permit authorizing a cargo vessel documented under the laws of the United States to receive, possess, transport to the United States, fish transferred from fishing vessels on the high seas during the closed yellowfin tuna season. Such permit may authorize the possession and transportation of yellowfin tuna by a cargo vessel without regard to the quantities of fish received, but it shall contain restrictions as the Regional Director shall determine to be necessary to achieve compliance with the regulations in this part and the objectives of the yellowfin tuna conservation program.

(f) Any cargo vessel seeking permission to land in a port of the United States a cargo of round tuna shall be required to provide to the nearest Customs Office as a prerequisite to obtaining such permission from Customs the following informations with respect to such cargo:

(1) Name, official number, and flag of each fishing vessel that transferred tuna either directly or indirectly through loading at port facilities, and whose tuna is aboard the cargo vessel at the time it seeks the aforesaid permission.

(2) Date of transfer or loading.

(3) Location of transfer or loading; and

(4) Certification from the master of each such fishing vessel that transferred such tuna setting forth the tonnage of tuna by species caught inside the regulatory area, tonnage by species of tuna caught outside the regulatory area, and as to each category, the dates of harvesting.

(g) Any cargo vessel failing to provide the information required in paragraph (f) of this section shall be denied the privilege of unloading its cargo of tuna in a port of the United States.

(h) Any person who knowingly unloads or permits to unload tuna from a cargo vessel in violation of paragraph (f) of this section or any person who knowingly provides false information in violation of paragraph (f) of this section shall, as well as the cargo of tuna, be subject to the penalties provided for in the Act.

§ 280.10 Restrictions applicable to purchasers.

(a) Except as provided in paragraphs (b) and (d) of this section, it shall be unlawful for any person knowingly to receive, purchase, sell, offer for sale, import, export, or have in custody, possession, or control any yellowfin tuna taken or retained by a fishing vessel in violation of the regulations in this part.

(b) In view of the perishable nature of yellowfin tuna when not processed otherwise than by chilling or freezing, and person authorized to enforce the regulations in this part may cause to be sold, and any person may purchase, for not less than its reasonable market value such quantities of perishable yellowfin tuna as may be seized and forfeited pursuant to the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–956).

(c) The proceeds of any sale made pursuant to paragraph (v) of this section after deducting the reasonable costs of the sale, if any, shall be remitted by the purchaser to the Regional Director for deposit and retention in the Suspense Account of the National Marine Fisheries Service (Account No. 14X6875 (17)) pending judgment of the court or other disposition of the case.

(d) If a duly constituted official acting under authority and in behalf of a State of the United States, of the Commonwealth of Puerto Rico, or of American Samoa seized any yellowfin tuna under the applicable laws or regulations of such government, such yellowfin tuna may be forfeited and sold or otherwise disposed of pursuant to such laws or regulations. Any yellowfin tuna so seized by an official of State, the Commonwealth of Puerto Rico or American Samoa shall not be seized by an officer or employee of the Federal Government unless it is voluntarily turned over to him to be processed against under applicable Federal laws or regulations.

§ 280.11 Recordkeeping and written reports.

(a) The master or other person in charge of a tuna vessel or such person as may be authorized in writing to serve as the agent of either of such persons shall throughout the open and closed yellowfin tuna fishing seasons:

(1) Keep an accurate log of all operations conducted from the vessel entering therein for each day the date, noon position (stated in latitude and longitude or in relation to known physical features), and the tonnage of fish aboard by species. The record and bridge log maintained at the request of the Commission shall be sufficient to comply with this paragraph provided the items of information specified herein are fully and accurately entered in such log.

(2) Furnish on form obtainable from the Regional Director, following the sale or delivery of a catch of fish made by such vessel, a report, certified to be correct as to facts within the knowledge of the reporting individual giving the name and official number of the fishing vessel, the dates of beginning and ending of the fishing voyage, the port of departure, and a listing separately by species of the round weight quantities (pounds or short tons) of fish sold or delivered. At the option of the vessel master or other person in charge, a copy of the fish ticket, weightout slip, settlement sheet, or similar record issued by the fish dealer or his agent may, however, be used for reporting purposes in lieu of the form obtainable from the Regional Director, if such alternate record is similarly certified and contains all items of information required by this paragraph. In addition, any vessel landing its catch in California and reporting by means of a copy of the California fish ticket, the California Fish and Game boat number may be indicated in lieu of the vessel's official number. Such sale and delivery reports shall be delivered or mailed to the Regional Director within 72 hours after weightout has been completed.

(b) Any person authorized to carry out enforcement activities under the regulations in this part and any person authorized by the Commission shall have power, without warrant or other process to inspect, at any reasonable time, log books, catch reports, statistical records, or other reports as required by the regulations in this part to be made, kept or furnished.

§ 280.12 Persons and vessels exempted.

Nothing contained in § 280.2 to § 280.11 shall apply to:

(a) Any person or vessel authorized by the Commission, the Service Director, or any State of the United States to engage in fishing for research purposes.

(b) Any person or vessel engaged in sport fishing for personnel use.

§ 280.13 National Oceanic and Atmospheric Administration Employees designated as enforcement agents.

Any employee of the National Oceanic and Atmospheric Administration duly appointed and authorized to enforce Federal laws and regulations administered by the National Oceanic and Atmospheric Administration is authorized and empowered to carry out enforcement activities under the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–961).

§ 280.14 State Officers designated as enforcement agents.

Any officer or employee of a State of the United States, of the Commonwealth of Puerto Rico or of American Samoa who has duly designated by the Service Director or his delegate with the consent of the Government concerned, is authorized to function as a Federal law enforcement agent and to carry out enforcement activities under the Tuna Conventions Act of 1950, as amended (16 U.S.C. 951–961).

CANNED PLUMS

Proposed Amendment to Standard of Identity and Establishment of Standards of Quality and Fill of Container; Correction

In FR Doc. 74–1510 appearing at page 2377 in the issue for Monday, January 21, 1974, paragraph (c)(1)(ii) was inadvertently dropped from § 27.45 on page 2382.

As corrected, § 27.45(c)(1) reads as follows:

§ 27.45 Canned plums; identity; label statement of optional ingredients.

* * * * * *

(c) *Packing media.* (1) The optional packing media referred to in paragraph (a) of this section which may be used as such, or to which any one or any combination of two or more safe and suitable nutritive carbohydrate sweetner(s) may be added, are:

(i) Water;

(ii) Fruit juice(s) and water; and

(iii) Fruit juice(s).

[21 CFR Part 53]

TOMATO JUICE

Proposal To Amend Standard of Identity

Notice is given that the Del Monte Corp., 215 Fremont St., P.O. Box 3575, San Francisco, CA 94119, has filed a petition proposing to amend the standard of identity for tomato juice (21 CFR 53.1) to provide for the addition of ascorbic acid (vitamin C) in such quantity that the total vitamin C content in each 6 fluid ounces of the finished food amounts to 100 percent of the U.S. Recommended Daily Allowance (U.S. RDA) for vitamin C. The petitioner also proposes that use of the vitamin be declared on the label by one of the following statements: "added vitamin C", "with added vitamin C", or "fortified with vitamin C", and that the label bear nutritional information in accorance with the requirements promulgated in 21 CFR Part 1.

Grounds given by the petitioner in support of the proposed amendment are:

1. Tomato juice is frequently consumed as a morning or breakfast beverage.

2. When consumed at breakfast time, it replaces or is a substitute for citrus juices, pineapple juice or other fruit beverages containing a significantly higher amount of vitamin C, either occurring naturally or added to the juice or beverage.

3. Tomato juice contains a natural but limited amount of vitamin C. However, because the amount of the nutrient is limited, those persons who prefer tomato juice, rather than other fruit juices of higher vitamin C content, are not able to substitute tomato juice as an equally good source of vitamin C.

4. Having a fortified tomato juice available at the level proposed will benefit consumers in the following ways:

a. Providing a wider choice of juices, which fulfill the U.S. RDA for vitamin C and which have significantly different organoleptic characteristics, will aid in assuring that each member of a consumer's family, though having different preferences, can more readily obtain the optimum amount of vitamin C each day.

b. It is common practice for consumers to rely heavily on beverages served at breakfast as a major source of vitamin C. Most of these juices do provide 100 percent of the U.S. RDA for vitamin C. Data on tomato juice consumption rate and pattern reveal that over half of all tomato juice is consumed at breakfast. Therefore, it is in the best interest of consumers to have tomato juice available that also provides 100 percent of the U.S. RDA for vitamin C.

c. For those consumers wishing to control their caloric intake, vitamin C-fortified tomato juice will be particularly advantageous because it contains only about one-half the caloric content of other popular juices now available which supply 100 percent of the U.S. RDA for vitamin C.

Therefore, the Del Monte Corporation petition proposes to amend Part 53 by revising § 53.1 to read as follows:

§ 53.1 Tomato juice; identity; label statement of optional ingredients.

(a) Tomato juice is the unconcentrated liquid extracted from mature tomatoes of red or reddish varieties, with or without scalding followed by draining. In the extraction of such liquid, heat may be applied by any method which does not add water thereto. Such liquid is strained free from skins, seeds, and other coarse or hard substances, but carries finely divided insoluble solids from the flesh of the tomato. Such liquid may be homogenized, and may be seasoned with salt. Such liquid may contain added ascorbic acid (vitamin C) in a quantity such that the total vitamin C in each 6 fluid ounce serving of the finished food amounts to 100 percent of the U.S. Recommended Daily Allowance (U.S. RDA) for vitamin C. This level of ascorbic acid will be deemed to have been met if a reasonable overage of ascorbic acid, within limits of good manufacturing practice, is present to insure that the required level of ascorbic acid is maintained throughout the expected shelf life of the food under customary conditions of distribution. When sealed in a container it is so processed by heat, before or after sealing, as to prevent spoilage.

(b) When vitamin C is added as provided in paragraph (a) of this section, it shall be designated on the label as "added vitamin C", or "with added vitamin C" or "fortified with vitamin C". Further, the label shall bear such additional information in accordance with the requirements promulgated in 21 CFR Part 1 as applicable.

The petitioner's proposal is interpreted as requiring that when vitamin C is added the statement "added vitamin C", or "with added vitamin C," or "fortified with vitamin C" shall appear on the principal display panel accompanying the name of the food. The Commissioner proposes that the only requirements for declaring added vitamin C be the applicable sections of Part 1 of this chapter including § 1.17. The Commissioner's proposal would not preclude a manufacturer from placing a factual and nonmisleading statement concerning added vitamin C on the principal display panel.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs, 401, 701(e), 52 Stat. 1046, as amended, 70 Stat. 919; 21 U.S.C. 341, 371 (e)) and under authority delegated to him (21 CFR 2.120), the Commissioner of Food and Drugs proposes to amend Part 53 by revising § 53.1 to read as follows:

§ 53.1 Tomato juice; identity; label statement of optional ingredients.

(a) Tomato juice is the unconcentrated liquid extracted from mature tomatoes of red or reddish varieties, with or without scalding followed by draining. In the extraction of such liquid, heat may be applied by any method which does not add water thereto. Such liquid is strained free from skins, seeds, and other coarse or hard substances, but carries finely divided insoluble solids from the flesh of the tomato. Such liquid may be homogenized, and may be seasoned with salt. Such liquid may contain added ascorbic acid (vitamin C) in a quantity such that the total vitamin C in each 6 fluid ounce serving of the finished food amounts to 100 percent of the U.S. Recommended Daily Allowance (U.S. RDA) for vitamin C. This level of ascorbic acid will be deemed to have been met if a reasonable overage of ascorbic acid, within limits of good manufacturing practice, is present to insure that the required level of ascorbic acid is maintained throughout the expected shelf life of the food under customary conditions of distribution. When sealed in a container it is so processed by heat, before or after sealing, as to prevent spoilage.

(b) Each of the optional ingredients used shall be declared on the label as required by the applicable sections of Part 1 of this chapter.

Interested persons may on or before April 24, 1974, file with the Hearing Clerk, Food and Drug Administration, Room 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: March 18, 1974.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

DEPARTMENT OF TRANSPORTATION

United States Coast Guard

[33 CFR Part 117]

[CGD 74 48]

MYSTIC RIVER, MASS.

Drawbridge Operation Regulations

At the request of the Metropolitan District Commission, Boston, Massachusetts, the Coast Guard is considering amending the regulations for the Wellington Bridge across the Mystic River, between Somerville and Medford to allow the draw to remain closed to the passage of vessels. Present regulations require the draw to open for large vessels during certain periods of each day and for all vessels at other times. The draw has been opened on rare occasions and the entire bridge is scheduled to be replaced within the next few years.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander, First Coast Guard District (oan), 150 Causeway Street, Boston, Massachusetts 02114. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, First Coast Guard District.

The Commander, First Coast Guard District, will forward any comments re-

V 39158 MAR 25 74 XUM

ceived before April 30, 1974, with his recommendations to the Chief, Office of Marine Environment and Systems, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that 33 CFR Part 117, be amended by adding a new subparagraph (3) to paragraph (g) of § 117.75 to read as follows:

§ 117.75 **Boston Harbor, Mass., and adjacent waters; bridges.**

• • • • •

(g) *Mystic River—Bridges from mouth to and including Boston and Maine Railroad bridge between Somerville and Medford.*

• • • • •

(3) *Wellington Bridge between Somerville and Medford.* The draw need not open for the passage of vessels, and paragraphs (b) to (f) of this section shall not apply to this bridge.

• • • • •

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4))

Dated: March 15, 1974.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 74-RM-4]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the transition area at Helena, Mont.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, Colorado 80207. All communications received on or before April 19, 1974, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 E. 25th Avenue, Aurora, Colorado 80010.

Instrument approach procedures at Helena, Mont., have been revised to include 15 nautical miles DME transition arcs to the ILS runway 26 and VOR/DME runway 26 SIAPs. Additional controlled airspace is required east of Helena VORTAC to provide protection for aircraft holding at Hauser NDB/Sewell DME fix.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (39 FR 440) amend the 1200-foot transition area at Helena, Mont., to read:

• • •; and that airspace extending upward from 1200 feet above the surface within a 24-mile radius of the Helena VORTAC, extending from the Helena VORTAC 272° radial clockwise to the Helena VORTAC 191° radial; within 6 miles south and 9 miles north of the Helena VORTAC 272° radial, extending from the VORTAC to 45 miles west of the VORTAC; within 5 miles east and 9 miles west of the Helena VORTAC 023° radial, extending from the 24-mile radius area to 36 miles northeast of the VORTAC; and within 6 miles south and 9.5 miles north of the Helena VORTAC 102° radial, extending from the 24-mile radius area to 28.5 miles east of the VORTAC.

This amendment is proposed under authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Aurora, Colorado, on March 15, 1974.

I. H. HOOVER,
Acting Director, Rocky Mountain Region.

[FR Doc.74-6768 Filed 3-22-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-SO-30]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Knoxville, Tenn., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Knoxville transition area described in § 71.181 (39 FR 440) would be amended as follows:

"• • • excluding the portion within the Morristown, Tenn., transition area • • •" would be deleted and "• • • within an 8-mile radius of Knoxville Downtown Island Airport (latitude 35°57'45" N., longitude 83°52'30" W.); excluding the portion within Morristown, Tenn., transition area • • •" would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for additional IFR operations at Knoxville Downtown Island Airport. A prescribed instrument approach procedure to this airport, utilizing the Knoxville VORTAC and conducting the approach from the north, is proposed in conjunction with the alteration of this transition area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on March 13, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.74-6764 Filed 3-22-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-EA-11]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Lewisburg, W. Va., Transition Area (39 FR 529).

A new instrument landing system approach procedure to Runway 4 was recently developed for the Greenbrier Valley Airport, Lewisburg, W. Va. The new procedure will require additional 700-foot floor transition area to provide controlled airspace for the holding pattern associated with the procedure.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Lewisburg, West Virginia, proposes the airspace action hereinafter set forth:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations so as to alter the description of the Lewisburg, W. Va. 700 foot floor transition area as follows: In the text, delete, "within 3-miles each side of the 216° bearing from the Lewisburg, W. Va. RBN (lat. 37°46'52" N., long. 80°28'10" W.) extending from the RBN to 9.5 miles southwest" and by substituting, "within 6.5 miles west and 4.5 miles east of a 216° bearing from the Lewisburg, W. Va. RBN extending from the RBN to a point 11.5 miles southwest of the RBN.".

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on March 7, 1974.

JAMES BISPO,
Deputy Director, Eastern Region.

[FR Doc.74-6771 Filed 3-22-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-NW-05]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Eugene, Oregon Transition Area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108. All communications received within 30 days after publication of this notice in the Federal Register will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108.

This amendment would provide additional controlled airspace for radar vectoring of enroute and arriving aircraft at Eugene, Oregon; thereby permitting more direct routing and some decrease in the distance flown.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (39 FR 440) the description of the Eugene, Oregon Transition Area is amended to read as follows:

EUGENE, OREGON

That airspace extending upward from 700 feet above the surface within a 21-mile radius of the Eugene VORTAC; that airspace extending upward from 1200 feet above the surface northeast of Eugene, bounded on the north by V-536, on the southeast by V-121N (proposed), on the southwest by the arc of the 21-mile radius circle, on the northwest by V-23E; that airspace east of Eugene bounded on the north by V-121 (proposed), on the east by latitude 122°30'00" W. on the southwest by V-452 and on the west by the arc of the 21-mile radius circle.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington on March 12, 1974.

C. B. WALK, Jr.,
Director, Northwest Region.

[14 CFR Part 71]

[Airspace Docket No. 74-NW-04]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Portland, Oregon Transition Area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108.

The proposed amendment to the Portland, Oregon Transition Area would provide lower minimum vector altitudes between Salem and Redmond, Oregon and lower minimum altitudes for vectoring enroute aircraft operating to and from Portland, Medford and Eugene, Oregon.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (39 FR 440) the description of the Portland, Oregon Transition Area is amended as follows.

Delete the last sentence of the description beginning, "That airspace south of Portland extending upward from 10,000 feet MSL • • •" and substitute the following, "That airspace south of Portland extending upward from 7500 feet MSL bounded on the north by the 60-mile circle centered on Portland International Airport, on the northeast by the southwest edge of V-165, on the east by longitude 120°00'00"W, on the south by the north edge of V-536, on the west by longitude 122°23'00"W; that airspace southeast of Portland extending upward from 10,000 feet MSL bounded on the northeast by the southwest edge of V-165, on the south by the north edge of V-536, and on the west by longitude 122°00'00"W."

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington on March 11, 1974.

C. B. WALK, Jr.,
Director, Northwest Region.

[Airspace Docket No. 74-EA-13]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Potsdam, N.Y. (39 FR 571) and Ogdensburg, N.Y. (39 FR 557) Transition Areas.

A new instrument approach procedure to Runway 24 at Potsdam, N.Y. Airport, based on the Potsdam, N.Y. non-federal radio beacon, is in development. To provide controlled airspace for the procedure

V 39158 MAR 25 74 XUM

will require alteration of the transition areas.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Potsdam, New York, proposes the airspace action hereinafter set forth:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations by amending the description of the Potsdam, N.Y. 700-foot floor transition area by adding, "and within 3.5 miles each side of a 044° bearing from the Potsdam, N.Y. radio beacon (lat. 44°43'24'' N., long. 74°52'59'' W.) extending from the 6.5 mile radius area to 11.5 miles northeast of the radio beacon." following, "long. 74°57'00'' W.".

2. Amend § 71.181 of Part 71, Federal Aviation Regulations by amending the description of the Ogdensburg, N.Y. 1200-foot floor transition area by deleting, "to point of beginning." and by substituting "44°42'00'' N., 74°54'00'' W.; to 44°36'-00'' N., 75°00'00'' W.; to point of beginning.", therefor.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on March 7, 1974.

JAMES BISPO,
Deputy Director,
Eastern Region.

[14 CFR Part 71]

[Airspace Docket No. 74-SW-10]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations to designate a 700-foot transition area at Yoakum, Tex.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Texas. An informal docket will also be available for examination at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

It is proposed to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth.

In § 71.181 (39 FR 440), the following transition is added:

YOAKUM, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Yoakum Municipal Airport (latitude 29°18'50'' N, longitude 97°08'18'' W) and within 3.5 miles either side of the 143°T (135°M) radial extending from the 5-mile radius to a point 8 miles southeast of the NDB (latitude 29°18'50'' N, longitude 97°08'-18'' W).

The proposed transition area will provide controlled airspace for aircraft executing the proposed NDB RWY 31 (original) approach procedure at the Yoakum Municipal Airport, Yoakum, Tex.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, TX, on March 11, 1974.

ALBERT H. THURBURN,
Director, Southwest Region.

[FR Doc.74-6766 Filed 3-22-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-EA-14]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a Norwich, N.Y., Transition Area over Warren Eaton Airport, Norwich, New York.

A VOR/DME instrument approach procedure has been developed for Warren Eaton Airport, Norwich, N.Y., and will require designation of a Norwich, N.Y., transition area to provide controlled airspace protection for IFR arrivals and departures at Warren Eaton Airport.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Norwich, New York, proposes the airspace action hereinafter set forth:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a Norwich, N.Y. transition as follows:

NORWICH, N.Y.

That airspace extending upward from 700 feet above the surface within a 12-mile radius of the center, 42°34'00'' N., 75°31'30'' W., of Warren Eaton Airport, Norwich, N.Y.; within a 12.5-mile radius of the center of the airport, extending clockwise from a 071° bearing to a 103° bearing from the airport; within a 13.5-mile radius of the center of the airport, extending clockwise from a 235° bearing to a 351° bearing from the airport.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Jamaica, N.Y., on March 11, 1974.

JAMES BISPO,
Deputy Director,
Eastern Region.

[14 CFR Part 71]

[Airspace Docket No. 74-SO-10]

VOR FEDERAL AIRWAYS

Proposed Revocation

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would revoke airway segments in the Atlanta, Ga., to Charlotte, N.C., area which are no longer needed.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 24, 1974, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would:

1. Revoke V-194, in part, between Norcross, Ga., and Liberty, N.C.

2. Revoke V-296, in part, between Sugarloaf Mountain, N.C., and Fort Mill, S.C.

The FAA proposes to revoke these airway segments because they do not conform to the new traffic flow patterns associated with revised terminal area procedures at Anderson County Airport, Anderson, S.C., and Douglas Municipal Airport, Charlotte, N.C. Other existing airways provide adequate routings for aircraft operating in this area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 15, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and
Air Traffic Rules Division.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 15]

FEDERAL CONTRACTS, GRANTS, OR LOANS

Administration of the Clean Air Act and the Federal Water Pollution Control Act

Pursuant to his authority under the Clean Air Act, as amended (42 U.S.C. 1857 et seq.) and particularly section 306 of that Act, which was added by the Clean Air Act Amendments of 1970 (Pub. L. 91-604), and the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.) and particularly section 508 of that Act, which was added by the Federal Water Pollution Control Act Amendments of 1972 (Pub. L. 92-500), the President on September 10, 1973, issued Executive Order 11738, providing for the administration of the Clean Air Act and the Federal Water Pollution Control Act with respect to Federal contracts, grants, or loans. Executive Order 11738 superseded Executive Order 11602, dated June 29, 1971, providing for the administration of the Clean Air Act with respect to Federal contracts, grants, or loans.

Section 5 of Executive Order 11738 requires the Administrator of the Environmental Protection Agency to issue implementing rules and regulations. Regulations implementing the air requirements were promulgated in the FEDERAL REGISTER (see 40 CFR Part 15, 38 FR 35310). The regulations which follow are intended to revise the previously promulgated air regulations to incorporate appropriate provisions respecting the water requirements of the Executive Order.

The proposed program is intended to supplement Federal, State, and local enforcement activities under the Clean Air Act and the Federal Water Pollution Control Act. The primary purpose of the program is to ensure that facilities in noncompliance with clean air and water standards are not utilized for Federal contracts, grants, or loans.

Interested persons may submit written comments on or before April 24, 1974 in triplicate to the Office of Federal Activities, Environmental Protection Agency, Washington, D.C. 20460. All revelant comments received within this thirty (30) day period shall be considered.

Dated: March 15, 1974.

JOHN QUARLES,
Acting Administrator.

It is proposed to revise 40 CFR Part 15 as follows:

PART 15—ADMINISTRATION OF THE CLEAN AIR ACT AND THE FEDERAL WATER POLLUTION CONTROL ACT WITH RESPECT TO FEDERAL CONTRACTS, GRANTS, OR LOANS

Subpart A—Administrative Requirements

Sec.
15.1 Purpose.
15.2 Administrative responsibility.
15.3 Definitions.
15.4 Agency responsibilities.
15.5 Exemptions.

Subpart B—Remedies

15.20 List of Violating Facilities.
15.21 Hearings.
15.22 Public participation.
15.23 Agency participation.
15.24 Investigation.
15.25 Referral to the Justice Department.

Subpart C—Ancillary Matters

15.40 Interpretations.
15.41 Reports.
15.42 Delegation of authority by the Director.

Subpart A—Administrative Requirements

§ 15.1 Purpose.

(a) The regulations in this part are issued pursuant to the Clean Air Act, as amended (42 U.S.C. 1857 et seq., as amended by Pub. L. 91-604), the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq., as amended by Pub. L. 92-500), and Executive Order 11738, to provide certain prohibitions and requirements concerning administration of the Clean Air Act and the Federal Water Pollution Control Act with respect to Federal contracts, grants, and loans. The regulations in this part apply to all agencies in the Executive Branch of the Government which award contracts, grants, or loans. The regulations also apply to contractors and subcontractors and to recipients of funds under grants and loans to the extent set forth in this part.

(b) The rights and remedies of the Government hereunder are not exclusive and do not affect rights and remedies provided elsewhere by law, regulation, or contract; neither do the regulations limit the exercise by the Administrator, Federal agencies, or other parties of powers not herein specifically set forth, but otherwise granted to them by the Air Act and the Water Act or the Order.

(c) The program provides for the establishment of a List of Violating Facilities which will reflect those ineligible for the award of a Federal contract, grant, or loan. Facilities will be listed upon a determination by EPA of continuing or recurring noncompliance with clean air or water standards. Federal, State, and local criminal convictions, civil adjudications, and administrative findings of noncompliance may serve as a basis for consideration of listing. In cases where a facility has been subjected to a State or local civil adjudication or administrative finding that such facility is in noncompliance with clean air or water standards, EPA shall consider listing at the request of the Governor. The program shall apply to any contract, grant, or loan in excess of $100,000, as well as any contract of a lesser amount involving a facility giving rise to a Federal criminal conviction.

§ 15.2 Administrative responsibility.

The Director, Office of Federal Activities, is hereby delegated authority and assigned responsibility for carrying out the responsibilities assigned to the Administrator under the Order, except the power to issue rules and regulations, and provided that the Assistant Administrator for Enforcement and General Counsel, EPA, shall continue to exercise principal responsibility for EPA's enforcement of the Clean Air Act, the Federal Water Pollution Control Act, and clean air and water standards issued pursuant thereto. All correspondence regarding the Order or the regulations in this part should be addressed to the Director, Office of Federal Activities, U.S. Environmental Protection Agency, Washington, D.C. 20460.

§ 15.3 Definitions.

(a) The term "Air Act" means the Clean Air Act, as amended (42 U.S.C. 1857 et seq., as amended by Public Law 91-604).

V 39158 MAR 25 74 XUM

(b) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(c) The term "agency" means any department, agency, establishment, or instrumentality in the Executive Branch of the Federal Government, including wholly owned government corporations which award contracts, grants, or loans.

(d) The term "applicant" means any person who has applied but has not yet received a contract, grant, or loan and includes a bidder or proposer for a contract which is not yet awarded.

(e) The term "air pollution control agency" means any agency which is defined in section 302(b) or section 302(c) of the Air Act.

(f) The term "borrower" means a prime recipient of a loan.

(g) The term "clean air standards" means any enforceable rules, regulations, guidelines, standards, limitations, orders, controls, prohibitions, or other requirements which are contained in, issued under, or otherwise adopted pursuant to the Air Act or the Order, an applicable implementation plan as described in section 110(d) of the Air Act, an approved implementation procedure or plan under section 111(c) or section 111(d), respectively, of the Air Act, or an approved implementation procedure under section 112(d) of the Air Act.

(h) The term "clean water standards" means any enforceable limitation, control, condition, prohibition, or other requirement which is set by the Water Act or contained in a permit issued to a discharger by EPA, or by a State under an approved program, as authorized by section 402 of the Water Act, or by a local government to ensure compliance with pretreatment regulations as required by section 307 of the Water Act.

(i) The term "compliance" means compliance with clean air or water standards. For the purpose of these regulations, "compliance" shall also mean compliance with a schedule or plan ordered or approved by a court of competent jurisdiction, the Environmental Protection Agency, or an air or water pollution control agency, in accordance with the requirements of the Air or Water Act and regulations issued pursuant thereto.

(j) The term "contract" means any Federal contract for the procurement of goods, materials, or services.

(k) The term "contractor" means the prime contractor with whom the Federal Government has contracted for procurement of goods, materials, or services.

(l) The term "Director" means the Director, Office of Federal Activities, U.S. Environmental Protection Agency, or any person to whom he delegates authority under the regulations in this Part.

(m) The term "facility" means any building, plant, installation, structure, mine, location or site of operations owned, leased, or supervised by an applicant, contractor, subcontractor, grantee, subgrantee, borrower or subborrower to be utilized in the performance of a contract, grant, or loan. Where a location, or site of operations contains or includes more than one building, plant, installation, or structure, the entire location or site shall be deemed to be a facility, except where the Director determines that independent facilities are co-located in one geographic area.

(n) The term "Governor" means the Governor or principal executive officer of each State.

(o) The term "grant" means any Federal grant, including grant-in-aid.

(p) The term "grantee" means the prime recipient of a grant.

(q) The term "loan" means a loan of Federal funds.

(r) The term "Order" means Executive Order 11738, dated September 10, 1973 (38 FR 25161), which superseded Executive Order 11602, dated June 29, 1971 (36 FR 12475).

(s) The term "person" means any natural person, corporation, partnership, unincorporated association, State or local government, or any agency, instrumentality, or subdivision of such a government or any interstate body.

(t) The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, or the Trust Territories of the Pacific Islands.

(u) The term "subborrower" means any person holding a subloan.

(v) The term "subcontract" means any agreement or arrangement under which any portion of the contractor's obligation is performed, undertaken, or assumed.

(w) The term "subcontractor" means any person holding a subcontract.

(x) The term "subgrant" means any agreement or arrangement under which any portion of the activity or program which is being assisted under the grant is performed, undertaken, or assumed.

(y) The term "subgrantee" means any person holding a subgrant.

(z) The term "subloan" means any agreement or arrangement under which any portion of the business, program, or activity which is being assisted under the loan is performed, undertaken, or assumed.

(aa) The term "United States" as used herein includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territories of the Pacific Islands.

(bb) The term "Water Act" means Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq., as amended by Pub. L. 92-500).

(cc) The term "water pollution control agency" means any agency which is defined in section 502(1) or section 502(2) of the Water Act.

§ 15.4 Agency responsibilities.

(a) *General.* Pursuant to the Order, each agency will take appropriate steps to ensure that all officers and employees whose duties entail compliance or comparable functions with respect to contracts, grants, and loans are familiar with the Order and the regulations under this Part. Such officers and employees will promptly report to the head of the agency or his designee any condition in any facility involved in a contract, grant, or loan made by an agency which may involve noncompliance with the clean air or water standards and which comes to their attention in the performance of their regular duties. The head of the agency or his designee will promptly transmit such reports to the Director. The Director shall take action as may be appropriate in accordance with §§ 15.24 and 15.20.

(b) *Procurement, grant, and loan regulations.* Section 4 of the Order provides that agencies responsible for promulgating contract, grant, and loan regulations shall, following consultation with the Administrator, amend such regulations to require, as a condition of entering into, renewing, or extending any nonexempt contract for the procurement of goods, materials, and services, or extending any financial assistance by way of nonexempt contract, grant, or loan, compliance with the Air and Water Acts and standards issued pursuant thereto. Pursuant to the authorities vested in the Administrator in section 5 of the Order, agencies responsible for promulgating contract, grant, and loan regulations shall be governed by this Part. Such regulations shall be amended to require, no later than July 1, 1974, the use of the provisions set forth below.

(c) *Procurement regulations.* The Federal Procurement Regulations, Armed Services Procurement Regulation, and to the extent necessary any supplemental or comparable regulations issued by any agency shall be amended to incorporate the following requirements with respect to nonexempt transactions to carry out the purposes of the Air and Water Acts, the Order, and this Part:

(1) A stipulation by the contractor or subcontractors that any facility to be utilized in the performance of any nonexempt contract or subcontract is not listed on the EPA List of Violating Facilities pursuant to § 15.20.

(2) Agreement by the contractor to comply with all the requirements of section 114 of the Air Act and section 308 of the Water Act relating to inspection, monitoring, entry, reports, and information, as well as all other requirements specified in section 114 and section 308 of the Air Act and the Water Act, respectively, and all regulations and guidelines issued thereunder.

(3) A stipulation that as a condition for the award of a contract the applicant or contractor shall notify the awarding official of the receipt of any communication from the Director indicating that a facility to be utilized for the contract is under consideration to be listed on the EPA List of Violating Facilities. Prompt notification shall be required prior to contract award.

(4) Agreement by the contractor that he will include or cause to be included the criteria and requirements in paragraph (c) (1) through (4) of this section in every nonexempt subcontract and requiring that the contractor will take such action as the Government may direct as a means of enforcing such provisions.

(d) *Grant and loan provisions.* To carry out the purposes of the Air and Water Acts, the Order, and this Part, agency grant and loan regulations shall be amended as necessary to incorporate the requirements set forth in paragraph (c) (1) through (4) of this section with respect to nonexempt transactions.

§ 15.5 Exemptions.

(a) *Exempted transactions.* — (1) *Transactions $100,000 and under.* Contracts, subcontracts, grants, subgrants, loans, and subloans not exceeding $100,000 are exempt from this Part.

(2) *Contracts and subcontracts for indefinite quantities.* With respect to contracts and subcontracts for indefinite quantities (including but not limited to time and material contracts, requirements contracts, and basic ordering agreements), this Part shall be applicable unless the purchaser has reason to believe that the amount to be ordered in any year under such contract will not exceed $100,000.

(3) *Assistance to abate, control, or prevent environmental pollution.* Any grant, subgrant, loan, or subloan, a principal purpose of which is to assist a facility or facilities to comply with any Federal, State, or local law, regulation, limitation, guideline, standard, or other requirement relating to the abatement, control, or prevention of environmental pollution is exempt from this part.

(4) *Exclusion.* The foregoing exemptions shall not apply to a proposed contractor whose facility is listed on the basis of § 15.20(a)(1)(i) and § 15.20(a)(1)(iv). Utilization of such a facility through the award of a Federal contract is barred by section 306(a) of the Air Act and section 508(a) of the Water Act where a conviction has been obtained pursuant to section 113(c)(1) of the Air Act and section 309(c) of the Water Act.

(b) *Authority of heads of agencies.* Where a head of an agency determines that the paramount interest of the United States so requires, he may exempt any individual contract, subcontract, grant, subgrant, loan, or subloan for a period of one year, and by rule or regulation any class of contracts, grants, or loans. In the case of an individual exemption, the head of the agency granting the exemption shall notify the Director as soon before or after granting the exemption as practicable. The justification for such an exemption or any renewal thereof, shall fully describe the purpose of the contract, grant, or loan, except as the interests of national security preclude, and shall indicate the manner in which the paramount interest of the United States requires that the exemption be made.

(c) *Facilities located outside the United States.* This Part shall not apply to the use of facilities located outside the United States.

Subpart B—Remedies

§ 15.20 List of violating facilities.

(a) Listing of facilities: Sections 2, 4, and 5 of the Order, section 306 of the Air Act, and section 508 of the Water Act require the Administrator to establish procedures which will identify for Federal agencies those facilities giving rise to a criminal conviction under the Air and Water Acts and which will establish sanctions and penalties necessary to assure that contracts, grants, and loans are not awarded to applicants whose facilities are found to be in noncompliance with clean air and water standards. The Director shall maintain the List of Violating Facilities in accordance with the following procedures:

(1) *Basis for consideration of listing.* Federal, State, or local criminal convictions, civil adjudications, or administrative findings of noncompliance may serve as the basis for consideration of listing facilities. However, the listing of a facility based on a State or local civil adjudication or administrative finding shall not be considered unless the Governor of the State has referred the applicant, contractor, grantee, or borrower whose facility has given rise to such adjudication or finding to the Director in accordance with § 15.23. The following Federal, State, and local determinations may serve as bases for listing:

(i) Facilities which have given rise to a conviction under section 113(c)(1) of the Air Act.

(ii) Facilities which have given rise to any permanent order, judgment, decree, or other form of civil ruling by a Federal, State, or local court issued as a result of noncompliance with clean air standards or facilities which have given rise to a conviction in a State or local court for noncompliance with clean air standards.

(iii) Facilities not in compliance with an order under section 113(a) of the Air Act or which have given rise to the initiation of court action under section 113(b) of the Air Actor have been subjected to equivalent State or local proceedings to enforce clean air standards.

(iv) Facilities which have given rise to a conviction under section 309(c) of the Water Act.

(v) Facilities which have given rise to any permanent order, judgment, decree, or other form of civil ruling by a Federal, State, or local court issued as a result of noncompliance with clean water standards or facilities of which have given rise to a conviction in a State or local court for noncompliance with clean water standards.

(vi) Facilities not in compliance with an order under section 309(a) of the Water Act or which have given rise to the initiation of court action under section 309(b) of the Water Act, or have been subjected to equivalent State or local proceedings to enforce clean water standards.

(2) *Listing proceedings.* No facility shall be listed until there has been notification to the owner and where appropriate the operator by the Director of his intent to place the facility on the List and the basis therefor, the representatives of the facility have been afforded an opportunity to confer with the Director and present orally or in writing, and with assistance of counsel, data or information relating to the proposed placement of the facility on the List, and the Director determines before listing that there is adequate evidence of continuing or recurring noncompliance with clean air or water standards at the facility. The Director's determination to list shall be in writing and shall summarize the basis for his action.

(3) *The List.* Upon carrying out the aforesaid requirements, the Director may list a facility. The List shall be distributed periodically to all agencies and published in the FEDERAL REGISTER. The List shall contain as a minimum the name of each person whose noncomplying facility has given rise to the listing, the name of such facility, the basis for the listing, and the date for each listing.

(4) *Effective date.* The Director shall initiate the maintenance of the List of Violating Facilities where such listing is determined based on paragraph (a)(1)(i) or (iv) of this section effective immediately. The Director shall initiate the maintenance of the List of Violating Facilities where such listing is determined based on paragraph (a)(1)(ii), (iii), (v), or (vi) of this section effective July 1, 1974.

(b) Debarment or suspension of designated facilities: Facilities listed by the Director resulting from the bases described in paragraph (a)(1)(i) and (iv) of this section, shall be debarred and no agency shall enter into, renew, or extend any contract, grant, or loan where such debarred facility would be utilized for the contract, grant, or loan. Facilities listed by the Director resulting from any other basis shall be suspended and no agency shall enter into, renew, or extend any contract, grant, or loan where such suspended facility would be utilized for the contract, grant, or loan.

(c) Removal of facility from List: If a conviction, order, judgment, decree, other form of civil ruling, or finding which has constituted the basis for consideration of listing a facility is reversed or otherwise modified to remove such basis or if the Director determines the facility is in compliance, the facility shall be removed promptly from such listing effective upon receipt of notification of the reversal or modification by the Director. Requests for removal of facilities from the List for any other basis including a request from a Governor shall be addressed to the Director. For facilities whose listing constitutes a debarment under paragraph (b) of this section, such request shall be in writing and should contain appropriate evidence that the condition which gave rise to the basis for listing has been corrected. For facilities whose listing constitutes a suspension under paragraph (b) of this section, such request shall be in writing and should contain appropriate evidence of compliance by the facility with clean air or water standards. In the event the request for removal is denied, a hearing pursuant to § 15.21 shall be granted by the Director, if requested within twenty (20) days of receipt of a notice of denial.

V 39158
MAR 25 74
XUM

§ 15.21 Hearings.

(a) Hearings held pursuant to § 15.20 (c) shall be conducted by a hearing officer designated by the Administrator. Each party shall have the right of counsel and a fair opportunity to present evidence and argument and to cross-examine. Other persons may be permitted to participate upon a showing that such persons have substantial interest in the proceedings and will contribute materially to the proper disposition thereof. The hearing officer shall base his decision solely upon the record before him.

(b) The decision of the hearing officer shall be final unless within twenty (20) days from the date of receipt of the decision the party adversely affected requests in writing a review by the Administrator.

§ 15.22 Public participation.

(a) Persons who wish to bring an alleged failure of compliance with clean air or water standards under this Part to the attention of the Government should file a statement in writing with the Director, Office of Federal Activities, U.S. Environmental Protection Agency, Washington, D.C. 20460.

(b) The statement should include the name, address, and telephone number of the person responsible for its filing, the name and address or other accurate description of the facility allegedly in noncompliance, a description of the noncompliance, with any available accompanying data considered to show that the noncompliance has occurred, and any other pertinent information which will assist in the investigation and resolution of the reported noncompliance. The statement must be signed by the person responsible for the filing or his authorized representative.

(c) The Director shall review the statement and within a reasonable period advise the person of the disposition of his statement.

(d) No action under this section shall satisfy the service of notice of intent to file suit requirement pursuant to section 304 of the Air Act or section 505 of the Water Act.

§ 15.23 Agency participation.

(a) *Federal agency participation.* Pursuant to § 15.4 (c) and (d), applicants must indicate whether a facility to be utilized in the performance of any nonexempt contract, grant, or loan has been identified by the Director as under consideration for listing. Federal contracting officers or awarding officials must determine whether any facility to be utilized in the performance of a nonexempt contract, grant, or loan appears on the List distributed by the Director under § 15.20. If such facility has been identified by the Director but the facility does not appear on the List, the contracting officer or awarding official shall promptly notify the Director. In accordance with § 15.24, the Director may request that the award of the contract, grant, or loan be withheld for a period not to exceed fifteen (15) working days pending completion of an appropriate investigation.

(b) *State participation.* If a Governor determines that a facility is in continuing or recurring noncompliance with clean air or water standards, the Governor may notify the Director. The Director shall take the necessary steps, under § 15.20 of this Part, to determine whether listing shall occur.

§ 15.24 Investigation.

(a) When substantial evidence of noncompliance with clean air or water standards is presented by private individuals, agency employees, a Governor, or other sources, or when pursuant to § 15.23, Federal contracting officers or awarding official notify the Director that a facility contemplated to be utilized in the performance of a contract, grant, or loan has been identified as under consideration for listing, the Director after consultation with the agency whose proposed contract, grant, or loan is involved, may request that the award of the contract, grant, or loan be withheld for a period not to exceed fifteen (15) working days effective the date the Director, as well as the interested Federal agency, is notified of the existence of such information and the initiation of the investigation. The agency shall withhold such award except when it is determined that the delay is likely to prejudice the agency's programs or otherwise seriously disadvantage the Government. Prompt notice shall be given to the Director in any case where such determination to award has been made.

(b) The Director shall promptly inform the agency whose contract, grant, or loan is involved of the findings, dispositions, or actions resulting from the investigation. Where the information causing the investigation was presented by a private individual or Governor, that individual or Governor shall also be promptly notified.

§ 15.25 Referral to the Justice Department.

The Administrator may recommend that appropriate legal proceedings or other action be taken in reference to the requirements set forth in the regulations contained in this Part. Referrals of any matters arising under such regulations to the Department of Justice shall be made only by the Administrator or with his express approval.

Subpart C—Ancillary Matters

§ 15.40 Interpretations.

Interpretations of the regulations contained in this Part shall be made by the Administrator or his designee.

§ 15.41 Reports.

(a) *Agency reports.* The head of each agency shall ensure that the Administrator is informed of each exemption granted under § 15.5(b) during the preceding fiscal year annually before August 1.

(b) *EPA reports.* (1) The Administrator will annually report to the President on measures taken toward implementation of section 306 of the Air Act, section 508 of the Water Act, the Order, and regulations in this Part, including but not limited to the progress and problems associated with such implementation.

(2) The Administrator will annually notify the President and the Congress of all exemptions granted or in effect under this Part during the preceding year.

§ 15.42 Delegation of authority by the Director.

The Director is authorized to redelegate the authority conferred upon him by this part.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

COLORADO

Proposed Revisions to Transportation Control Plan

On November 7, 1973 (38 FR 30818), the Administrator approved portions of the Colorado Transportation Control Plan and promulgated other portions. One of the portions promulgated consisted of regulations for the control of stationary hydrocarbon sources.

This notice is issued to advise the public that the State of Colorado adopted stationary hydrocarbon regulations, Colorado Regulation 7, and submitted these regulations to the Environmental Protection Agency as plan revisions on November 21, 1973. The revisions include regulations similar to the EPA promulgated regulations but do not require vapor recovery for gasoline marketing operations.

EPA regulation (38 FR 30818) § 52.331, *Control of drycleaning solvent evaporation*, is similar to Colorado Regulation 7.J; § 52.332, *Degreasing Operations* is similar to Regulation 7.K; § 52.333 *Organic solvent usage* is similar to Regulation 7.G, 7.H, and 7.I; and § 52.334, *Storage of petroleum products* is similar to Regulation 7.B.

Colorado Regulation 7 does not require vapor recovery for filling service station tanks or for filling of vehicular tanks as is required by 38 FR 30818, §§ 52.336 and 52.337. Regulation 7.C does not require an equivalent degree of control to EPA § 52.335 *Organic liquid loading* (Regulation 7.C would allow as much as 1.5 pounds of hydrocarbon vapors to be emitted per thousand gallons loaded. § 52.335 requires 90 percent control or about 0.5 pounds per thousand gallons if submerged fill is used). In addition, § 52.336 requires that the vapor-laden delivery vessel may only be refilled at facilities equipped with vapor recovery systems or their equivalent capable of 90 percent control. Regulation 7.C is not consistent with this requirement.

Colorado Regulation 7 contains the following provisions which are covered by EPA regulations §§ 52.334 through 52.337: 7.D, "Water Separation from Petroleum Products"; 7.E, "Pumps and Compressors". Colorado Regulation 7.F, "Waste Gas Disposal" is not covered by EPA regulations and would affect polymer processes. Control plans must be submitted by March 1, 1974, and final compliance must be achieved by December 31, 1974, for all sources subject to Colorado Regulation 7.

Colorado Regulation 7 does not require control consistent with EPA regulations §§ 52.335, 52.336, and 52.337. The sources covered by these three EPA regulations (gasoline marketing) account for almost half of the stationary source hydrocarbon emissions. Thus, §§ 52.335, 52.336, and 52.337 will probably not be withdrawn, unless subsequent changes are made to the State Regulation 7.

If after reviewing the regulations and any public comments, the Administrator finds they are approvable in whole or in part, any duplicated stationary hydrocarbon emission control regulations promulgated in 38 FR 30818 will be withdrawn. The additional stationary hydrocarbon regulations adopted by the State of Colorado, if approved by the Environmental Protection Agency, will also become a part of the Transportation Control Plan.

The public is invited to submit written comments on whether the proposed revisions should be approved or disapproved by the Administrator. His action will be based on whether the proposed revisions meet the requirements of section 110(a)(2)(a)–(H) of the Clean Air Act and 40 CFR Part 51. Only comments received on or before April 24, 1974, will be considered.

Copies of the proposed revisions are available for inspection at the Environmental Protection Agency, Office of Public Affairs, Region VIII, Lincoln Towers Building, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203; at the Environmental Protection Agency, Room 329, 401 M Street, SW., Washington, D.C. 20460; and at the Colorado State Department of Health, 4210 East 11th Avenue, Denver, Colorado 80220.

Comments should be addressed to the Regional Administrator, Environmental Protection Agency, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203.

(Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 1857c-5(a))

Dated: March 19, 1974.

JOHN QUARLES,
Acting Administrator,
Environmental Protection Agency.

[FR Doc.74-6845 Filed 3-22-74;8:45 am]

[40 CFR Part 85]

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Recall Regulations

Notice is hereby given that the Environmental Protection Agency is considering the addition of a new Subpart S to 40 CFR Part 85, as set forth below.

Explanatory statement. Section 207 (c) (1) of the Clean Air Act provides that "if the Administrator determines that a substantial number of any class or category of vehicles or engines, although properly maintained and used, do not conform to the regulations prescribed under section 202, when in actual use throughout their useful life • • • he shall require the manufacturer to submit a plan for remedying the nonconformity • • •." The manufacturer may request a public hearing to contest the Administrator's determination of nonconformity. Unless, as a result of such hearing, the determination is withdrawn, the manufacturer must give dealers, ultimate purchasers, and subsequent purchasers notice of the noncomformity. Section 207(c)(2) authorizes the Administrator to promulgate regulations to prescribe the content of the notification and the manner in which it is given. Section 208(a) authorizes the Administrator to require the manufacturer to establish and maintain such records and to make such reports as are necessary to ensure that the manufacturer is in compliance with title II, part A of the Act and applicable regulations thereunder.

Without an adequate regulatory scheme, the effectiveness of any recall will be diminished by the delays which accompany ad hoc decision and policy making. These delays are contrary to the interest of the public, the environment, and the Agency and should be avoided. To this end, it is proposed that the statutory requirements of the Clean Air Act be implemented by promulgating the regulations to follow. These regulations are contained in six major sections:

1. Section 85.1802 describes the notification to be sent by the Administrator to a manufacturer of vehicles or engines against whom a determination of nonconformity has been lodged. The notification will include a description of each class or category of vehicles or engines subject to the determination of nonconformity as well as the factual basis for the determination. Finally the manufacturer will be given a date by which he is to submit a plan to remedy the nonconformity.

2. Section 85.1803 describes the Remedial Plan. The regulations require the manufacturer, upon notification by the Administrator that a nonconformity exists, to submit descriptions of the proposed repairs, alterations, or modifications he intends to use to correct the nonconformity, the method by which owners of the nonconforming vehicles or engines will be identified, and the procedure which owners must follow to have their vehicles remedied. The proposed regulations further require the manufacturer to describe any conditions upon which eligibility for repair is premised.

The proposed regulations also address the obligations of a manufacturer subject to a recall in regard to the notification of purchasers. Notification to ultimate and subsequent purchasers is required to be in writing. A copy of the notification must be included in the plan. To increase the efficiency of the notification process, a manufacturer must use all reasonable means necessary to locate ultimate and subsequent purchasers.

Under the proposed regulations, each vehicle brought to a repair facility in response to notification would have a decal affixed to one of the non-movable inside glass surfaces. In addition, vehicle owners would receive recall campaign certificates. Some owners of recalled vehicles may not be eligible for free remedial repair (e.g., the vehicle was not properly maintained and used) but the decal and certificate would still be issued if the vehicle were brought to the appropriate repair facility.

The decal and certificate programs are directly related to the purposes of recall. If maximum benefit is to be derived from a recall, the number of vehicles brought to repair facilities must be maximized. By imposing sanctions for failure to obtain the recall decal and certificate, States can encourage those owners who qualify for free repair under the remedial plan to obtain repair and can encourage vehicle owners not eligible for free remedial repair to visit repair facilities and possibly obtain repair at their own expense.

An alternative approach would be to condition the receipt of the decal and certificate upon actual repair of the vehicle. The decal-certificate programs are designed, however, to complement state programs. To impose such a condition, it was felt, could deter some States from utilizing the programs. The present provisions, therefore, only require an owner to bring his vehicle to a repair facility to qualify for a campaign certificate and decal.

Since the effectiveness of the decal and certificate provisions depends upon state action, the various states are particularly encouraged to comment upon these provisions of the proposed regulations.

3. Section 85.1804 provides for the approval of the remedial plan by the Administrator and for the implementation of the plan by the manufacturer. Under the proposed provisions, the manufacturer will receive written notice that the remedial plan has been approved. Upon receipt of this notice the manufacturer is to commence implementation of the plan.

One aspect of implementation is the notification of ultimate and subsequent purchasers. The proposed regulations provide that when no public hearing is requested to challenge the determination of nonconformity, consumer notification is to commence within 15 days of the receipt of the Administrators approval of the remedial plan. If a hearing is held, unless the Administrator withdraws his determination of nonconformity, the Administrator will, within 60 days of the completion of the hearing, order the manufacturer to commence prompt notification of vehicle and engine owners.

4. Section 85.1805 describes the content of the notification to be sent to ultimate purchasers and subsequent purchasers. The section requires the manufacturer to explain to the vehicle or engine owner most of what is contained in the remedial plan. Besides describing the procedural aspects of obtaining correc-

V 39 58 MAR 25 74 XUM

tion of the nonconformity, the notification will inform the vehicle or engine owner of the adverse effects, if any, that an uncorrected nonconformity may have on performance, durability, and the functioning of other engine components. In addition, owners will be warned that failure to correct the nonconformity may cause vehicles to fail an emission inspection, if required by State or local law, and may jeopardize the warranty made applicable to engines and vehicles by section 207 of the Act. These warnings are designed to improve the response to the recall campaign by encouraging vehicle and engine owners to seek correction of the nonconformity as well as to give vehicle and engine owners important information concerning the mechanical condition of their vehicles or engines and the legal impact of the failure to obtain correction of the nonconformity.

5. Section 85.1806 describes the records which a manufacturer must keep and the reports he must make of the recall campaign. From this data, the Administrator will be able to evaluate the success of the recall campaign and determine whether a second notification will be required.

6. Section 85.1807 describes the procedures which will be followed in the event that the manufacturer requests a public hearing to contest the Administrator's finding of nonconformity. The hearing is designed to conform with the requirements of the Administrative Procedure Act, 5 U.S.C. 551–9, and 701–6, as amended. Section 207(c)(1) of the Clean Air Act requires the Administrator to provide "the manufacturer and other persons an opportunity to present their views and evidence in support thereof at a public hearing." Although the precise meaning of this provision is not entirely clear, a strong argument can be made that a formal hearing is required by it, and the proposed regulations would provide for a formal hearing. Under the proposed regulations, party status would be afforded the contesting manufacturer, the Agency, and intervenors. Any member of the public may petition to intervene. If the presiding officer determines that certain criteria are met, the petition will be granted. The criteria are designed to test the petitioner's interest in the proceeding. In this manner, effective public participation can be provided without sacrificing the concomitant public interest in an expedited hearing.

This rule is proposed under the authority of section 301(a) of the Clean Air Act, 81 Stat. 504, as amended by section 15(c), 84 Stat. 1713, 42 U.S.C. 1857g(a). The proposed regulations implement section 207(c)(1)–(2) of the Clean Air Act, 84 Stat. 1697, 42 U.S.C. 1847f–5a(c)(1)–(2); and section 208(a) of the Clean Air Act, 81 Stat. 501, as renumbered by section 8(a), 84 Stat. 1694, 42 U.S.C. 1857f–6(a).

Interested persons may participate in this rulemaking proceeding by submitting written comments in triplicate to:

Director
Mobile Source Enforcement Division
401 M Street SW., Room 3220
Washington, D.C. 20460

All comments received on or before May 24, 1974, will be considered. Comments received after publication of this proposal will be available for public inspection during normal working hours (8 a.m. to 4:30 p.m.) at the Office of Public Affairs, Room 232, Waterside Mall, Fourth and M Streets, SW., Washington, D.C. 20460.

Final regulations, modified as the Administrator deems appropriate after consideration of comments, will be promulgated as soon as practicable after such consideration.

Dated: March 19, 1974.

JOHN QUARLES,
Acting Administrator.

PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Subpart S—Recall Regulations

Sec.
85.1801 Definitions.
85.1802 Notice to manufacturer of nonconformity.
85.1803 Remedial plan.
85.1804 Approval of plan; implementation.
85.1805 Notification to ultimate purchasers and subsequent purchasers.
85.1806 Records and reports.
85.1807 Public hearings.

AUTHORITY: 81 Stat. 504, as amended, 84 Stat. 1713; 45 U.S.C. 1859g(a); 42 U.S.C. 1857.

§ 85.1801 Definitions.

For the purposes of this subpart, the term "Act" shall mean the Clean Air Act, 42 U.S.C. 1857, as amended. Except as otherwise provided, words shall be defined as provided for by sections 213 and 302 of the Act.

§ 85.1802 Notice to manufacturer of nonconformity.

A manufacturer will be notified that the Administrator has determined that a substantial number of a class or category of vehicles or engines produced by that manufacturer, although properly maintained and used, do not conform to the regulations prescribed under section 202 of the Act. The notification will include a description of each class or category of vehicles or engines encompassed by the determination of nonconformity, will give the factual basis for the determination of nonconformity, and will designate a date, no sooner than 30 days from the date of receipt of such notification, by which the manufacturer shall have submitted a plan to remedy the nonconformity.

§ 85.1803 Remedial plan.

(a) When any manufacturer is notified by the Administrator that a substantial number of any class or category of vehicles or engines, although properly maintained and used, do not conform to the regulations (including emission standards) promulgated under section 202 of the Act, the manufacturer shall submit a plan to the Administartor to remedy such nonconformity. The plan shall contain the following:

(1) A description of each class or category of vehicle or engine to be recalled including the model year, the make, the model, and such other information as may be required to identify the vehicles or engines to be recalled.

(2) A description of the specific modifications, alterations, repairs, corrections, adjustments or other changes to be made to bring the vehicles or engines into conformity including a brief summary of the data and technical studies which support the manufacturer's decision as to the particular remedial changes to be used in correcting the nonconformity.

(3) A description of the method by which the manufacturer will determine the names and addresses of purchasers and subsequent purchasers.

(4) A description of the proper maintenance and use, if any, upon which the manufacturer conditions eligibility for repair under the remedial plan, an explanation of the manufacturer's reasons for imposing any such condition, and a description of the proof to be required of a purchaser or subsequent purchaser to demonstrate compliance with any such condition. No such condition may be imposed unless the maintenance concerned is, in the judgment of the Administrator, demonstrably related to preventing the nonconformity.

(5) A description of the procedure to be followed by purchasers and subsequent purchasers (if known) to obtain correction of the nonconformity. This shall include designation of the date on or after which the owner can have the nonconformity remedied, the time reasonably necessary to perform the labor required to correct the nonconformity, and the designation of facilities at which the nonconformity can be remedied: *Provided*, That repair shall be completed within 60 days from the date the owner first tenders the vehicle or engine unless the Administrator extends such period for good cause.

(6) If some or all of the nonconforming vehicles or engines are to be remedied by persons other than dealers of the manufacturer, a description of the class of persons other than dealers of the manufacturer who will remedy the nonconformity and a statement indicating (i) which members of the class are to perform the repair under the remedial plan; (ii) that each member has agreed to perform the necessary repair; and (iii) that each member will be properly equipped to perform such remedial action.

(7) Copies of the letters of notification to be sent to ultimate purchasers and subsequent purchasers (if known).

(8) A statement that an adequate supply of parts will be available to perform the repair under the remedial plan.

(9) Copies of all necessary instructions to be sent to those persons who are to perform the repair under the remedial plan.

(10) A description of the impact of the proposed changes on fuel consumption, driveability, and safety of each class or category of vehicles or engines to be recalled and a brief summary of the data or technical studies which support these conclusions.

(11) Any other information, reports or data which the Administrator may determine is necessary to evaluate the remedial plan.

(b)(1) Notification to ultimate purchasers and subsequent purchasers (if known) shall be in writing, shall be made by certified mail or such other means as approved by the Administrator, and shall conform to § 85.1805.

(2) The manufacturer shall use all reasonable means necessary to locate ultimate and subsequent purchasers: *Provided*, That the Administrator may require the manufacturer to use motor vehicle registration lists as available from State or commercial sources to obtain the name and addresses of purchasers and subsequent purchasers to ensure an effective notification.

(c)(1) Where allowed by State law, the manufacturer shall require those who perform the repair under the remedial plan to affix a decal to each vehicle submitted for such repair.

(2) The decal shall be placed in a conspicuous location on one of the non-movable, inside glass surfaces of the vehicle as allowed by applicable State law.

(3) The decal shall:

(i) Contain the recall campaign number as designated by the manufacturer.

(ii) Designate the facility to which the vehicle was submitted for repair.

(d)(1) The manufacturer shall require those who perform the repair under the remedial plan to issue a recall campaign certificate to each vehicle owner whose vehicle is submitted for repair under the remedial plan.

(2) The certificate shall:

(i) State that the vehicle was submitted for repair;

(ii) Contain the recall campaign number as designated by the manufacturer;

(iii) Designate the facility to which the vehicle was submitted for repair; and

(iv) Contain the vehicle identification number.

(e) The remedial plan shall be submitted to the Administrator within the time limit specified in the Administrator's notification: *Provided*, That the Administrator may grant the manufacturer an extension upon good cause shown.

(f) The Administrator may require the manufacturer to conduct tests on engines or vehicles incorporating a proposed change, repair, or modification by methods and under conditions as the Administrator may prescribe.

(g) The Administrator reserves the right to require the manufacturer to (i) send by appropriate and reasonable means a second notification in order to increase the effectiveness of the recall campaign and (ii) to require records to be maintained to evaluate both the first notification, and any subsequent notification.

§ 85.1804 Approval of plan; implementation.

(a) If the remedial plan is approved by the Administrator, he will so notify the manufacturer in writing. If the remedial plan is not approved by the Administrator, he will so notify the manufacturer and will give the reasons for the disapproval.

(b) Upon receipt of notice from the Administrator that the remedial plan has been approved, the manufacturer shall commence implementation of the approved plan. Notification of ultimate purchasers and subsequent purchasers shall be in accordance with the requirements of this subpart and shall proceed as follows:

(1) When no public hearing as described in section 85.1807 of this subpart is requested by the manufacturer, notification of ultimate purchasers and subsequent purchasers shall commence within 15 days of the receipt by the manufacturer of the Administrator's approval unless otherwise specified by the Administrator.

(2) When a public hearing as described in § 85.1807 is held, unless as a result of such hearing the Administrator withdraws the determination of nonconformity, the Administrator shall, within 60 days after the completion of such hearing, order the manufacturer to provide prompt notification of such nonconformity.

§ 85.1805 Notification to ultimate purchasers and subsequent purchasers.

(a) The notification of ultimate purchasers and subsequent purchasers shall contain the following:

(1) The statement: "This notice is sent in accordance with the Federal Clean Air Act."

(2) The statement: "The Administrator of the U.S. Environmental Protection Agency has determined that your (model year, make, model of a vehicle, or family identification, engine model number, and engine number of an engine) may be emitting pollutants in excess of the Federal emission standards. These standards were established to protect the public health or welfare from the dangers of air pollution."

(3) A statement that the nonconformity of any such vehicles or engines which have been, if required by the remedial plan, properly maintained and used, will be remedied at the expense of the manufacturer.

(4) A description of the proper maintenance and use, if any, upon which the manufacturer conditions eligibility for repair under the remedial plan and a description of the proof to be required of a purchaser or subsequent purchaser to demonstrate compliance with such condition.

(5) A clear description of the components which will be affected by the remedy and a general statement of the measures to be taken to correct the nonconformity.

(6) A statement that such nonconformity if not repaired may cause the vehicle or engine to fail an emission inspection test when such tests are required under State or local law.

(7) A description of the adverse affects, if any, that an uncorrected nonconformity would have on the performance or driveability of the vehicle or engine.

(8) A description of the adverse effects, if any, that such nonconformity would have on the functioning of other engine components.

(9) A description of the procedure which the vehicle owner should follow to obtain correction of the nonconformity. This shall include designation of the date on or after which the owner can have the nonconformity remedied, the time reasonably necessary to perform the labor required to correct the nonconformity, and the designation of facilities at which the nonconformity can be remedied.

(10) The statement: "It is recommended that you bring the (vehicle or engine) in for repair as soon as possible since failure to do so may jeopardize your protection under the warranty made applicable to your (vehicle or engine) by the Clean Air Act."

(11) A card to be used by an ultimate purchaser or subsequent purchaser in the event the vehicle or engine to be recalled has been sold. Such card should be addressed to the manufacturer and shall provide a space in which the ultimate or subsequent purchaser may indicate the name and address of the person to whom the car was sold.

(b) No notice sent pursuant to paragraph (a) of this section nor any other contemporaneous communication sent to ultimate purchasers, subsequent purchasers, or dealers shall contain any statement or implication that the nonconformity does not exist or that the nonconformity will not degrade air quality.

(c) The manufacturer shall be informed of any other requirements pertaining to the notification under this section which the Administrator has determined are necessary to fulfill the intent of the law.

§ 85.1806 Records and reports.

(a) The manufacturer shall provide to the Administrator a copy of all communications which relate to the remedial plan directed to dealers and other persons who are to perform the repair under the remedial plan. Such copies shall be mailed to the Administrator contemporaneously with their transmission to dealers and other persons who are to perform the repair under the remedial plan.

(b) The manufacturer shall provide for the establishment and maintenance of records to enable the Administrator to conduct a continuing analysis of the adequacy of the recall campaign. The records shall include for each class or category of vehicle or engine, but shall not be limited to, the following:

(1) The dates on which the notification of the ultimate and know subsequent purchasers was commenced and completed.

(2) The number of engines and vehicles subject to the recall campaign.

(3) The number of (i) ultimate purchasers and (ii) subsequent purchasers to whom notification was sent.

(4) The number of vehicles that were brought to repair facilities in response to notification.

V 39 158 MAR 25 74 XUM

(5) When inspection or diagnosis is required by the remedial plan prior to any repair:

(i) The number receiving inspection or diagnosis;

(ii) The number shown by inspection or diagnosis to require repair;

(6) The number repaired under the remedial plan.

(7) The names and addresses of ultimate purchasers and subsequent purchasers to whom notification was given.

(8) The names and addresses of those purchasers whose vehicles or engines received repair under the remedial plan.

(9) The names and addresses of the ultimate and subsequent purchasers whose vehicles or engines were brought to repair facilities but not repaired or, when required, inspected or diagnosed, under the remedial plan and the reasons for the failure to do so.

(c) Unless otherwise directed by the Administrator, the manufacturer shall submit a quarterly report to the Administrator for six consecutive quarters beginning with the quarter in which notification of purchasers is begun containing the records described in paragraph (b) of this section except paragraph b(7), (8), and (9). Such report shall be received no later than 25 working days after the close of each calendar quarter.

(d) The records described in paragraphs b (7), (8), and (9) of this section shall be made available to the Administrator upon his request.

(e) The records and reports required by this section shall be retained for not less than 5 years.

§ 85.1807 Public hearings.

(a) *Definitions.* The following definitions shall be applicable to this section:

(1) "Hearing Clerk" shall mean the Hearing Clerk of the Environmental Protection Agency.

(2) "Intervenor" shall mean a person who files a petition to be made an intersection and whose petition is approved.

(3) "Manufacturer" refers to a manufacturer contesting a recall order directed at that manufacturer.

(4) "Party" shall include the Agency, the manufacturer, and any intervenors.

(5) "Presiding Officer" shall mean an Administrative Law Judge appointed pursuant to 5 U.S.C. 3105 (see also 5 CFR 930 as amended), and such term is synonymous with the term "Hearing Examiner" as used in the Act or in the United States Code.

(b) *Request for public hearing.* (1) If the manufacturer disagrees with the Administrator's finding of nonconformity he may request a public hearing as described in this section. Requests for such a hearing shall be filed with the Administrator not later than 30 days after the Administrator's notification of nonconformity unless otherwise specified by the Administrator. A copy of such request shall simultaneously be filed with the Director of the Mobile Source Enforcement Division and with the Hearing Clerk. Failure of the manufacturer to request a hearing within the time provided shall constitute a waiver of his right to such a hearing. In such case, the manufacturer shall carry out the recall order as required by § 85.1803–6.

(2) The request for a public hearing shall contain:

(i) A statement as to which classes or categories of vehicles or engines are to be the subject of the hearing;

(ii) A concise statement of the issues to be raised by the manufacturer at the hearing for each class or category of engine or vehicle for which the manufacturer has requested the hearing; and

(iii) A summary of the evidence which supports the manufacturer's position on each of the issues so raised.

(3) A copy of all requests for public hearings will be kept on file in the Office of the Hearing Clerk and will be made available to the public during Agency business hours.

(c) *Time; filing of documents.* (1) In computing any period of time prescribed or allowed by this section, except as otherwise provided, the day of the Act or event from which the designated period of time begins to run shall not be included. Saturdays, Sundays, and holidays shall be included in computing any such period allowed for the filing of any document or paper, except that when such period expires on a Saturday, Sunday, or federal legal holiday, such period shall be extended to include the next following business day.

(2) Except as otherwise provided, all documents required or permitted to be filed should be filed with the Hearing Clerk. If filing is to be accomplished by mailing, the documents should be sent to the address set forth in the notice of public hearings as described in paragraph (e) of this section. Documents shall be dated and deemed filed upon receipt.

(3) A copy of all documents required or permitted to be filed, other than a request for a public hearing and requests to be made an intervenor, shall be served upon all parties.

(d) *Consolidation.* The Administrator or the Presiding Officers in his or their discretion may consolidate two or more proceedings to be held under this section for the purpose of resolving one or more issues whenever it appears that such consolidation will expedite or simplify consideration of such issues. Consolidation shall not affect the right of any party to raise issues that could have been raised if consolidation had not occurred.

(e) *Notice of public hearings.* (1) Notice of a public hearing under section 207(c)(1) of the Act shall be given by publication in the FEDERAL REGISTER. Notice will be given at least 30 days prior to the commencement of such hearings.

(2) The notice of a public hearing shall include the following information:

(i) The purpose of the hearing and the legal authority under which the hearing is to be held;

(ii) A brief summary of the Administrator's determination of nonconformity;

(iii) A brief summary of the manufacturer's factual and legal basis for contesting the Administrator's determination of nonconformity;

(iv) Information regarding the time and location of the hearing and the address to which all documents required or permitted to be filed should be sent;

(v) The address of the Hearing Clerk to whom all inquiries should be directed;

(vi) A statement that all petitions to be made an intervenor must be filed with the Hearing Clerk within 30 days and must conform to the requirements of paragraph (f) of this section.

(f) *Intervenors.* (1) Any person desiring to intervene in a hearing to be held under section 207(c)(1) of the Act shall file a petition setting forth the facts and reasons why he thinks he should be permitted to intervene.

(2) In passing upon a petition to intervene, the following factors, among other things, shall be considered by the Presiding Officer:

(i) The nature of the petitioner's interest including the nature and the extent of the property, financial, environmental protection, or other interest of the petitioner;

(ii) The effect of the order which may be entered in the proceeding on petitioner's interest;

(iii) The extent to which the petitioner's interest will be represented by existing parties;

(iv) The extent to which petitioner's participation may reasonably be expected to assist in the development of a complete record.

(3) A petition to intervene must be filed within 30 days following the notice of public hearing under section 207(c)(1) of the Act.

(4) All petitions to be made an intervenor shall be reviewed by the Presiding Officer using the criteria set forth in paragraph (f)(2) of this section. If the Presiding Officer grants the petition he shall so notify, or direct the Hearing Clerk to notify, the petitioner. If the Presiding Officer denies the petition he shall so notify, or direct the Hearing Clerk to notify, the petitioner and shall briefly state the reasons why the petition was denied.

(5) All petitions to be made an intevenor shall include an agreement by the petitioner, and any person represented by the petitioner, to be subject to examination and cross-examination and, in the case of a public interest group, corporation or association, to make any supporting and relevant records available at its own expense upon the request of the Presiding Officer, on his own motion or the motion of any party or other intervenor. If the intervenor fails to comply with any such request, the Presiding Officer may in his discretion, terminate his status as an intervenor.

(g) *Intervention by motion.* Following the expiration of the time prescribed in paragraph (f) of this section for the submission of petitions to intervene in a hearing, any person may file a motion with the Presiding Officer to intervene in a hearing. Such a motion must contain the information required by paragraph (f)(2) of this section, and, in addition, must show that there is good cause for granting the motion and must contain a statement that the intervenor shall be bound by agreements, arrangements, and other determinations which may have been made in the proceeding.

(h) *Amicus curiae.* (1) Persons not parties to the proceedings wishing to file briefs may do so by leave of the Presiding Officer granted on motion. A motion for leave shall identify the interest of the applicant and shall state the reasons why the proposed amicus brief is desirable.

(i) *Presiding Officer.* The Presiding Officer shall have the duty to conduct fair and impartial hearings, to take all necessary action to avoid delay in the disposition of the proceedings and to maintain order. He shall have all power consistent with the Agency rule and with the Administrative Procedure Act necessary to this end, including the following:

(1) To administer oaths and affirmations;

(2) To rule upon offers of proof and receive relevant evidence;

(3) To regulate the course of the hearings and the conduct of the parties and their counsel therein;

(4) To hold conferences for simplification of the issues or any other proper purpose;

(5) To consider and rule upon all procedural and other motions appropriate in such proceedings;

(6) To require the submission of testimony in written form with or without affidavit whenever, in the opinion of the Presiding Officer, oral testimony and cross-examination are not necessary for full and true disclosure of the facts. Testimony concerning the conduct and results of tests and inspections may be submitted in written form.

(7) To enforce agreements and orders requiring access as authorized by law;

(8) To require the filing of briefs on any matter on which he is required to rule;

(9) To require any party or any witness, during the course of the hearing, to state his position on any issue;

(10) To take or cause depositions to be taken whenever the ends of justice would be served thereby;

(11) To make decisions or recommend decisions to resolve the disputed issues on the record of the hearing.

(j) *Conferences.* (1) At the discretion of the Presiding Officer, conferences may be held prior to or during any hearing. The Presiding Officer shall direct the Hearing Clerk to notify all parties and intervenors of the time and location of any such conference. At the discretion of the Presiding Officer, persons other than parties may attend. At a prehearing conference the Presiding Officer may:

(i) Obtain stipulations and admissions, receive requests and order depositions to be taken, identify disputed issues of fact and law, and require or allow the submission of written testimony from any witness or party;

(ii) Set a hearing schedule for as many of the following as are deemed necessary by the Presiding Officer:

(A) Oral and written statements;

(B) Submission of written direct testimony as required or authorized by the Presiding Officer;

(C) Oral direct and cross-examination of a witness where necessary as prescribed in paragraph (m);

(D) Oral argument, if appropriate.

(iii) Identify matters of which official notice may be taken;

(iv) Consider limitation of the number of expert and other witnesses;

(v) Consider the procedure to be followed at the hearing; and

(vi) Consider any other matter that may expedite the hearing or aid in the disposition of the issue.

(2) The results of any conference including all stipulations shall, if not transcribed, be summarized in writing by the Presiding Officer and made part of the record.

(k) *Primary discovery (exchange of witness lists and documents).* At a prehearing conference or within some reasonable time set by the Presiding Officer prior to the hearing, each party shall make available to the other parties the names of the expert and other witnesses the party expects to call, together with a brief summary of their expected testimony and a list of all documents and exhibits which the party expects to introduce into evidence. Thereafter, witnesses, documents, or exhibits may be added and summaries of expected testimony amended upon motion by a party.

(l) *Other discovery.* (1) Except as so provided by paragraph (k) of this section further discovery, under this paragraph, shall be permitted only upon determination by the Presiding Officer:

(i) That such discovery will not in any way unreasonably delay the proceeding;

(ii) That the information to be obtained is not otherwise obtainable; and

(iii) That such information has significant probative value.

The Presiding Officer shall be guided by the procedures set forth in the Federal Rules of Civil Procedure, where practicable, and the precedents thereunder, except that no discovery shall be undertaken except upon order of the Presiding Officer or upon agreement of the parties.

(2) The Presiding Officer shall order depositions upon oral questions only upon a showing of good cause and upon a finding that:

(i) The information sought cannot be obtained by alternative methods; or

(ii) There is a substantial reason to believe that relevant and probative evidence may otherwise not be preserved for presentation by a witness at the hearing.

(3) Any party to the proceeding desiring discovery shall make a motion or motions therefor. Such a motion shall set forth:

(i) The circumstances warranting the taking of the discovery;

(ii) The nature of the information expected to be discovered; and

(iii) The proposed time and place where it will be taken.

If the Presiding Officer determines the motion should be granted, he shall issue an order for the taking of such discovery together with the conditions and terms thereof.

(m) *Evidence.* (1) The official transcripts and exhibits, together with all papers and requests filed in the proceeding, shall constitute the record. Immaterial or irrelevant parts of an admissible document shall be segregated and excluded so far as practicable. Evidence may be received at the hearing even though inadmissible under the rules of evidence applicable to judicial proceedings. The weight to be given evidence shall be determined by its reliability and probative value.

(2) The Presiding Officer shall allow the parties to examine and to cross-examine a witness to the extent that such examination and cross-examination is necessary for a full and true disclosure of the facts.

(3) Rulings of the Presiding Officer on the admissibility of evidence, the propriety of examination and cross-examination and other procedural matters, shall be final, and shall appear in the record.

(4) An interlocutory appeal may be taken to the Administrator with the consent of the Presiding Officer and where he certifies on the record or in writing that the allowance of an interlocutory appeal is clearly necessary to prevent exceptional delay, expense or prejudice to any party or substantial detriment to the public interest. If an appeal is allowed, any party to the hearing may file a brief with the Administrator within such period as the Presiding Officer directs. No oral argument will be heard unless the Administrator directs otherwise.

(5) Except under extraordinary circumstances as determined by the Presiding Officer, the taking of an interlocutory appeal will not stay the hearing.

(6) Parties shall automatically be presumed to have taken exception to an adverse ruling.

(n) *Record.* (1) Hearings shall be stenographically reported and transcribed, and the original transcript shall be part of the record and the sole official transcript. Copies of the record shall be filed with the Hearing Clerk and made available during Agency business hours for public inspection. Any person desiring a copy of the record of the hearing or any part thereof shall be entitled to the same upon payment of the cost thereof.

(2) The official transcripts and exhibits together with all papers and requests filed in the proceeding, shall constitute the record.

(o) *Proposed findings, conclusions.* (1) Within 20 days of the close of the reception of evidence, or within such longer time as may be fixed by the Presiding Officer, any party may submit for the consideration of the Presiding Officer proposed findings of fact, conclusions of law, and a proposed rule or order, to-

V 3 9 5 8 MAR 25 74 XUM

gether with reasons therefor and briefs in support thereof. Such proposals shall be in writing, shall be served upon all parties, and shall contain adequate references to the record and authorities relied on.

(2) The record shall show the Presiding Officer's ruling on each proposed finding and conclusion, except when his order disposing of the proceeding otherwise informs the parties of the action taken by him thereon.

(p) *Decision of the Presiding Officer.* (1) The Presiding Officer shall issue and file with the Hearing Clerk his decision within 30 days after the period for filing proposed findings as provided for in paragraph (o) of this section has expired.

(2) The Presiding Officer's decision shall become the decision of the Administrator thirty (30) days after issuance thereof or thirty (30) days after the filing of notice of appeal, whichever shall be later, unless in the interim a party filing such a notice shall have perfected an appeal by filing an appeal brief, or the Administrator shall have taken action to review or stay the effective date of the decision.

(3) The Presiding Officer's decision shall include a statement of findings (with specific page references to principal supporting items of evidence in the record) and conclusions, as well as the reasons or basis therefor, upon all the material issues of fact or law presented on the record, and an appropriate rule or order. Such decision shall be based upon a consideration of the whole record.

(4) At any time prior to the issuance of his decision, the Presiding Officer may reopen the proceeding for the reception of further evidence. Except for the correction of clerical errors, the jurisdiction of the Presiding Officer is terminated upon the issuance of his decision.

(q) *Appeal from the decision of the Presiding Officer.* (1) Any party to a proceeding may appeal the Presiding Officer's decision to the Administrator: *Provided,* That within ten (10) days after issuance of the Presiding Officer's decision such party files a notice of intention to appeal and an appeal brief within 20 days of such decision.

(2) When an appeal is taken from the decision of the Presiding Officer, any party may file a brief in support of such decision. The brief shall be filed within 30 days of the issuance of the decision of the Presiding Officer.

(3) Any brief filed pursuant to this paragraph shall contain, in the order indicated, the following:

(i) A subject index of the matter in the brief, with page references, and a table of cases (alphabetically arranged) textbooks, statutes, and other material cited, with page references thereto;

(ii) A specification of the issues intended to be urged;

(iii) The argument presenting clearly the points of fact and law relied upon in support of the position taken on each issue, with specific page references to the record and the legal or other material relied upon; and

(iv) A proposed form of rule or order for the Administrator's consideration if different from the rule or order contained in the Presiding Officer's decision.

(4) No brief in excess of 40 pages shall be filed without leave of the Administrator.

(5) Oral argument will be allowed in the discretion of the Administrator.

(r) *Review of the Presiding Officer's decision in absence of appeal.* (1) If, after the expiration of the period for taking an appeal as provided for by paragraph (g) of this section, no appeal has been taken from the Presiding Officer's decision, the Hearing Clerk shall so notify the Administrator.

(2) The Administrator may, on his own motion, review the decision of the Presiding Officer. Notice of the intention of the Administrator to review the decision of the Presiding Officer shall be given to all parties and shall set forth the scope of such review and the issues which shall be considered and shall make provision for filing of briefs.

(s) *Decision on appeal or review.* (1) Upon appeal from or review of the Presiding Officer's decision, the Administrator shall consider such parts of the record as are cited or as may be necessary to resolve the issues presented and, in addition shall to the extent necessary or desirable exercise all the powers which he could have exercised if he had presided at the hearing.

(2) In rendering his decision, the Administrator shall adopt, modify or set aside the findings, conclusions, and rule or order contained in the decision of the Presiding Officer and shall include in the decision a statement of the reasons or bases for his action.

(3) In those cases where the Administrator believes that he should have further information or additional views of the parties as to the form and content of the rule or order to be issued the Administrator, in his discretion, may withhold final action pending the receipt of such additional information or views, or may remand the case to the Presiding Officer.

(t) *Reconsideration.* Within twenty (20) days after issuance of the Administrator's decision, any party may file with the Administrator a petition for reconsideration of such decision, setting forth the relief desired and the grounds in support thereof. Any petition filed under this subsection must be confined to new questions raised by the decision or final order and upon which the petitioner had no opportunity to argue before the Presiding Officer or the Administrator. Any party desiring to oppose such a petition shall file an answer thereto within ten (10) days after the filing of the petition. The filing of a petition for reconsideration shall not operate to stay the effective date of the decision or order or to toll the running of any statutory time period affecting such decision or order unless specifically so ordered by the Administrator.

(u) *End of hearing.* The hearing shall be deemed to have ended at the expiration of all periods allowed for appeal and review as provided for in this section.

(v) *Judicial review.* (1) The Administrator hereby designates the Deputy General Counsel, Environmental Protection Agency as the officer upon whom copy of any petition for judicial review shall be served. Such officer shall be responsible for filing in the court the record on which the order of the Administrator is based.

(2) Before forwarding the record to the court, the Agency shall advise the petitioner of costs of preparing it and as soon as payment to cover fees is made shall forward the record to the court.

[FR Doc.74-6846 Filed 3-22-74;8:45 am]

[40 CFR Part 420]

IRON AND STEEL MANUFACTURING POINT SOURCE CATEGORY

Proposed Effluent Limitations Guidelines and New Source Standards; Extension of Time for Comments

On February 19, 1974, the Environmental Protection Agency (EPA) published a notice of proposed rulemaking pursuant to sections 301, 304 (b) and (c), 306(b) and 307(c) of the Federal Water Pollution Control Act as amended, 33 U.S.C. 1251, et. seq. (39 FR 6484). The proposed regulation establishes effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources in the iron and steel manufacturing point source category. The due date for comments provided in the notice was March 21, 1974.

EPA anticipated that the "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the Iron and Steel Manufacturing Point Source Category" and the supplementary report entitled "Economic Analysis of Proposed Effluent Limitations Guidelines for the Iron and Steel Industry" which contain information pertinent to the proposed regulation, would be available to the public throughout the comment period. Production difficulties, however, delayed the availability of the Development Document until March 5, and the economic analysis report was not distributed until shortly before publication of this notice. The Agency believes that members of the public should have an opportunity to review the Development Document and the Economic Report in connection with their review of the proposed regulation. Accordingly, the date for submission of comments is hereby extended to and including April 7, 1974.

The Agency is under a Federal court order to promulgate effluent limitations guidelines for the iron and steel category by May 27, 1974. Under the court order, the Agency may not extend the public comment period such that the date upon which the extended period closes is less than 50 days from the date on which promulgation is required.

Dated: March 19, 1974.

ALAN G. KIRK, II,
Assistant Administrator for Enforcement and General Counsel.

[FR Doc.74-6847 Filed 3-22-74;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 89, 91, 93]

[Docket No. 18261; FCC 74-242]

LAND MOBILE/UHF-TV SHARING PLAN FOR HOUSTON, DALLAS-FORT WORTH, AND MIAMI

Fourth Further Notice of Proposed Rule Making

In the matter of amendment of the Commission's rules to extend the Land Mobile/UHF-TV Sharing Plan for channels 14-20 to Houston and Dallas-Fort Worth, Texas, and Miami, Florida.

1. Notice of proposed rulemaking is hereby given in the above-entitled matter.

2. On May 20, 1970, the Commission adopted a plan for the shared use of some of the lower UHF television channels (Channels 14 through 20, 470–512 MHz) by the land mobile radio services within fifty miles of the center of the ten largest urban areas of the country, according to the 1960 census.[1] Key elements in the plan include geographic separations between land mobile stations and authorized television stations (operating or not yet in operation) on any of the Channels 14–21, to avoid co-channel, adjacent channel, or intermodulation interference to television reception; limitations on the antenna height and power for land mobile base stations (1,000 feet AAT, 1,000 ERP, or the equivalent); restrictions on the area of operation of mobile stations; and others. No more than two of the seven UHF television channels may be used in any one area for land mobile purposes. These, and other restrictions, were adopted because of the Commission's desire to protect television reception from interference, while providing reasonably adequate facilities for the land mobile services, and to preserve sufficient spectrum in and near the areas involved for future growth of UHF television. While this plan did freeze a number of UHF television table assignments, in almost every case, substitute channels were available, or could be made available, for proposed television stations.

3. The Commission had originally proposed in that proceeding to provide for shared use of as many of the lower seven UHF television channels as feasible in the twenty-five largest urban areas of the country. For a number of reasons, however, a more limited sharing plan was adopted and was confined to the largest ten urban areas.[2] When the Commission reached its decision, it stated that the sharing plan then adopted would be supervised closely for a five-year period and, at the end of that period as well as during the period, appropriate changes may be made. The plan has been in effect now for nearly four years. It has been implemented with detailed rules and suballocations. The land mobile services are making extremely good use of the frequencies in the 470–512 MHz band. For example, New York City has been provided the frequency resources in this band to accommodate the future communications requirements of its police department. In fact, in the New York and in the Washington, D.C., metropolitan areas, the frequency assignment growth in this band has been so rapid that changes in the suballocation structure became necessary.[3] During this period, we have had no complaints of interference to UHF television reception from land mobile operations in the 470–512 MHz band, and no indications that the sharing plan has had adverse effects on UHF television.

4. In view of this background and the continued growth of land mobile communications requirements, the Commission has studied the feasibility of extending the sharing plan into other urban areas. Our examination of land mobile requirements indicates that it is appropriate to extend the plan into the urban areas of Houston and Dallas-Fort Worth, Texas, and Miami, Florida. These areas were selected because land mobile growth there has been particularly rapid as a result of the burgeoning population and economic growth. Moreover, it appears that the land mobile radio services can be given access to frequencies in the 470–512 MHz band immediately, since replacement UHF television channels can be made available in these areas while providing full protection to existing television facilities (operating, or authorized but not yet constructed), with no modification of any television station authorization.

5. The Commission has also examined carefully the need for providing access to the 470–512 MHz band at this time to the land mobile radio services in these three areas. In so doing, we took into account the impending availability of frequencies in the 806–947 MHz region, as well as the possibility of accommodating the most urgent needs for spectrum within the present land mobile allocations below 470 MHz. Some room exists within the present allocations to accommodate part of the requirements, but not within the services where the need for additional communications is most pressing. Thus, for example, in the Business Radio Service in Houston, we have authorized, on the average, 145.87 mobiles per available frequency in the 450–470 MHz band. To a lesser degree, the Business frequencies are also heavily loaded in the Dallas-Fort Worth and in the Miami urban areas. While the number of authorized units may not always reflect the number of mobile units in actual operation, the average authorized channel loadings indicated may very well exceed the Commission's guidelines.

6. The frequencies in the 806–947 MHz region, when Docket No. 18262 is finalized, will, of course, provide for the future growth of land mobile communications. It should be noted, however, that there will be a period of time following the issuance of our decision in Docket No. 18262 before equipment will be available on a regular basis. By contrast, radio equipment for operation in the 470–512 MHz band is readily available; is produced on a regular basis; and has been tested in regular operation. In short, while the industry prepares to implement the frequency allocations in the 806–947 MHz region, present land mobile requirements in the areas mentioned can be accommodated in the 470–512 MHz band, particularly since this can be accomplished without appreciable adverse impact on existing television broadcasting.

7. However, since we are closer to the implementation of the frequencies in the 900 MHz band, we believe that a single UHF TV channel in each of the three urbanized areas should be sufficient to accommodate the immediate needs of the land mobile services there. Accordingly, we propose to amend Parts 2, 21, 89, 91 and 93 of the Commission's rules to make available to the land mobile radio services the following frequency bands: Miami, Florida, 470–476 MHz; Houston, Texas, 488–494; and Dallas-Fort Worth, Texas, 482–488 MHz. These frequencies would be made available under the rules and standards adopted in the First Report and Order in this proceeding. 23 FCC 2d 325. The necessary changes in the Table of Television Assignments are being covered in a separate notice adopted concurrently in Docket No. 19964.

8. Further, while the frequencies mentioned will be made available and are to be governed by the standards set out in our rules for 470–512 MHz land mobile operations, we will not suballocate the space as we did before. The reason for this stems partially from our experience, to date, in assigning frequencies in the "pools" designated in our prior orders in this case, but it is also based upon our desire to keep the assignment plan for Dallas-Fort Worth, Houston, and Miami as flexible as possible, so that whatever the pressing requirements of users in these areas turn out to be, we will be able to adjust to them with a minimum of procedural delay. Accordingly, unlike our prior assignment plan, we will not designate any particular frequency group for use by any particular class of eligibles.[4]

9. In view of the long background of this proceeding, we feel that the scope of the notice should be limited. In this regard, no useful purpose would be served by commenting on the sharing concept, as such, or on the particular sharing plan we have already implemented in other urbanized areas. Therefore, the parties should confine their comments to whether the UHF-television/land mobile sharing plan we have already adopted should be extended to the urbanized

---

[1] Docket No. 18261, First Report and Order, 23 FCC 2d. 235.

[2] To date, because of delays in completing the necessary coordination with Canada, the sharing plan has not been implemented in Detroit, Michigan, and in Cleveland, Ohio.

[3] Fourth Report and Order, Docket No. 18261, 43 FCC 2d 949 (1973).

[4] We propose, however, to allocate, in each of the three urbanized areas, twelve frequency pairs in the Domestic Public Radio Services to be made available under existing rules.

V 39 158 MAR 25 74 XUM

areas mentioned above. With this narrow limit, the comment period will be thirty days with additional fifteen days for replies.

10. Authority for the proposed amendments is contained in section 4(i) and 303 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before April 22, 1974, and reply comments on or before May 6, 1974. Relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this notice.

11. In accordance with the provisions of § 1.419 of the Commission's rules, an original and fourteen copies of all statements, briefs, or comments filed shall be furnished the Commission. Response will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Adopted: March 7, 1974.

Released: March 15, 1974.

FEDERAL COMMUNICATIONS COMMISSION [*]
[SEAL] VINCENT J. MULLINS,
Secretary.

[*] Dissenting statement of Commissioner Robert E. Lee filed as part of the original document.

Parts 2, 21, 89, 91, and 93 of 47 CFR Chapter I are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

1. In § 2.106, the table is amended with respect to the frequency band 470–512 MHz in columns 7 through 11 and footnote NG 66 is amended to read as follows:

§ 2.106 Table of Frequency Allocations.

• • • • • • • •

Federal Communications Commission

Band (MHz)	Service	Class of station	Frequency	Nature of services of stations
7	8	9	10	11
•	•	•	•	•
470-512	BROADCASTING..... LAND MOBILE. (NG66)	Television broadcasting..... Land mobile.		BROADCASTING. PUBLIC SAFETY. LAND TRANSPORTATION. INDUSTRIAL. DOMESTIC PUBLIC.
•	•	•	•	•

NG66 The frequency band 470–512 MHz is allocated for use in the broadcasting and land mobile radio services. In the land mobile services it is available for assignment in the domestic public, public safety, industrial, and land transportation radio services at, or in the vicinity of 13 urbanized areas of the United States, as set forth in the table below, and subject to the standards and conditions set forth in parts 21, 89, 91, and 93 of this chapter.

Urbanized area	TV channel
New York-Northeastern New Jersey	14, 15
Los Angeles	14, 20
Chicago-Northwestern Indiana	(1)
Philadelphia, Pa.-New Jersey	(1)
Detroit, Mich	15, 16
San Francisco-Oakland, Calif	16, 17
Boston, Mass	14, 16
Washington, D.C.-Maryland-Virginia	17, 18
Pittsburgh, Pa	14, 16
Cleveland, Ohio	14, 15
Miami, Fla	14
Houston, Tex	17
Dallas, Tex	16

[1] The specific channel availability will be designated following the conclusion of a separate proceeding.

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)

2. In § 21.501(l), Table A is amended by the addition of the three cities listed below:

§ 21.501 Frequencies.

• • • • •

(l) (5)

• • • • •

TABLE A.—*Frequency availability for land mobile use*

Urbanized area	Geographic center: North latitude	Geographic center: West longitude	Frequencies (MHz)
•	•	•	•
Miami, Fla.....	25°46'37"	80°11'32"	Channel 14 470-476.
Houston, Tex..	29°45'26"	95°21'37"	Channel 17 488-494.
Dallas, Tex.....	32°47'09"	96°47'37"	Channel 16 482-488.
•	•	•	•

PART 89—PUBLIC SAFETY RADIO SERVICES

3. Section 89.60(a)(2) is amended by the addition of three cities to the list of urbanized areas as follows:

§ 89.60 Use of FCC Form 425.

(a) • • •
(2) • • •

11. Miami, Fla.
12. Houston, Tex.
13. Dallas, Tex.

• • • • • •

4. In § 89.123(b), Table G is amended by the addition of the three cities listed below:

§ 89.123 Frequencies in the band 470–512 MHz.

• • • • • •

(b) • • •

TABLE G.—*Frequency availability for land mobile use.*

Urbanized area	Geographic center: North latitude	Geographic center: West longitude	Frequencies (MHz)
•	•	•	•
Miami, Fla.....	25°46'37"	80°11'32"	Channel 14 470-476.

[47 CFR Part 73]

[Docket No. 19964; FCC 74-243]

TELEVISION BROADCAST STATIONS IN FLORIDA, OKLAHOMA, AND TEXAS

Table of Assignments

In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations. (Boca Raton, Florida; Ardmore, Hugo, and Lawton, Oklahoma; and Longview, Texas).

1. Notice of proposed rulemaking is hereby given in the above-entitled matter.

2. In a First Report and Order in Docket No. 18261, adopted May 20, 1970, the Commission established a plan under which licensees in the land mobile radio services are allowed to share a maximum of two of the lower seven UHF television channels (Channels 14 through 20) in and near the ten largest urban areas of the country (23 F.C.C. 2d 235). In a Fourth Further Notice of Proposed Rule Making adopted today in the same docket No. 18261 (FR 11109), is proposed to extend the frequency sharing plan to the urban areas of Miami, Florida, and Houston and Dallas-Fort Worth, Texas. However, the proposal would allow the sharing of only one channel in each of these areas. Channel 14 would be shared at Miami, Channel 17 at Houston, and Channel 16 at Dallas-Fort Worth. The reasons for this proposed extension of the sharing plan are set forth in the Fourth Further Notice mentioned above and will not be repeated here.

3. If the proposed plan is adopted, it would not affect usage of currently assigned UHF channels in the vicinity of Houston. However, as to Miami, land mobile users in the area could not afford appropriate protection against interference to an occupant of Channel [*]14 at Boca Raton (presently unoccupied and unapplied for). Similarly, there are UHF channels, presently unoccupied and unapplied for, at Longview, Texas (Channel 16), and the Oklahoma communities of Ardmore (Channel [*]17), Hugo (Channel [*]15), and Lawton (Channel 16), to which land mobile users at Dallas-Fort Worth could not afford adequate protection if the channels were to become occupied. Because of this, we are proposing to freeze the aforementioned channel assignments at the communities mentioned, in the event that the proposed sharing plan is adopted. Moreover, in view of the fact that interest in activating some of these channels has been demonstrated, we think it in the public interest to propose replacement channels for them.

4. By freezing the channels, we mean that we shall not accept applications for construction permits for new television facilities on them, and that we shall not accept requests for changes in the table of assignments that would involve moving an assignment of an affected channel to another location within 212 miles, co-channel, and 140 miles, adjacent channel, of the geographic centers of the three aforementioned urbanized areas as set forth in the proposed amendment of Table G, § 89.123 of the rules, appearing in the Fourth Further Notice of Proposed Rulemaking adopted today in Docket No. 18261.

5. In view of the foregoing, we are proposing to make the following amendments to the Television Table of Assignments, § 73.606(b) of the Commission rules, if the sharing plan proposed in Docket No. 18261 is adopted:

City	Channel No.: Present	Channel No.: Proposed
Boca Raton, Fla	[*]14	[*]14,[1] [*]62
Ardmore, Okla	[*]17	[*]17,[1] [*]28
Hugo, Okla	[*]15	[*]15,[1] [*]48
Lawton, Okla	16	16,[1] 45
Longview, Tex	16	16,[1] 51

[1] Following the decision in docket No. 18261, channels so indicated will not be available for television use until further action by the Commission.

6. Authority for the proposed amendments is found in sections 4(i), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended.

7. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before April 22, 1974, and reply comments on or before May 6, 1974. All submissions by parties to this proceeding, or persons action on behalf of such parties, must be made in written comments, reply comments, or other appropriate pleadings.

8. In accordance with the provisions of § 1.419 of the rules and regulations, an original and 14 copies of all comments, reply comments, pleadings, briefs, and other documents shall be furnished the Commission. These will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters, 1919 M Street, NW., Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[47 CFR Part 73]

[Docket No. 19975; RM-2137]

FM STATIONS IN JEFFERSON, KY.

Table of Assignments

In the matter of amendment of § 73.202(b), table of assignments, FM broacast stations. (Jeffersontown, Kentucky).

1. Notice of proposed rule making is given with respect to the petition of Charles N. Cutler requesting amendment of the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations) to assign Channel 296A as a first FM assignment to Jeffersontown, Kentucky.

2. Jeffersontown, population 9,701, is located in Jefferson County, population 695,055.[1] Jeffersontown is approximately four miles east of Louisville (population 261,472), the central city of the Louisville Standard Metropolitan Statistical Area (SMSA); the SMSA has a 1973 population of 867,330.[2] In support of the petition, Cutler urges that despite the proximity of Jeffersontown to Louisville, it "is not a close-in suburb • • • [and] has a life of its own". (Petition p. 2.) We are told that Jeffersontown has a city government with a full range of municipal services; a full school system (two elementary schools, a junior high, and a high school) and a parochial school and a vocational school are there. The petition details other information and data indicating the independent nature of Jeffersontown's existence including a post office, banks, government, and commercial services, shopping centers and stores, 16 churches within a three mile radius. Petitioner states that it is unrealistic to expect the many Louisville broadcast stations to provide meaningful broadcast service to Jeffersontown; eight AM stations (five unlimited time), five FM stations, and two non-commercial educational FM stations. There are six other aural broadcast services in the area: a Class A FM station at St. Matthews, population 13,152, which, it might be noted, is completely within the city of Louisville; two daytime-only stations and a non-commercial educational FM station at New Albany, population 38,402, located in Floyd County, Indiana; and finally Jeffersonville, population 20,008, in Clark County, Indiana, has a Class IV AM station and a Class B FM station.

[1] All population information is from the 1970 U.S. Census unless otherwise indicated.

[2] It consists of Jefferson, Bullitt, and Oldham Counties in Kentucky, and Clark and Floyd Counties in Indiana. The populations of the latter are 26,090, 14,687, 75,876, and 55,622, respectively.

V 39 158 MAR 25 74 XUM

3. It would appear that the petitioner has made an adequate showing that the assignment of Channel 269A to Jeffersontown might serve the public interest, convenience, and necessity, at least to the extent of our putting the matter out for proposed rule making. However, we should like further information as to whether other FM channels are available for assignment to three Kentucky communities of 2,000 or more population which would be precluded by assignment of Channel 269A to Jeffersontown; these are Eminence, population 2,225 the largest city in Henry County (population 10,910), Mt. Washington, population 2,020 (in Bullitt County) and Shelbyville, population 4,182, the seat of Shelby County (population 18,999); both Eminence and Shelbyville have a day-time-only AM station. In this respect, petitioner and other parties interested in this rule making are referred to discussions in Cayce, 30 F.C.C. 2d 180, 181, 184 (1971); Modesto and Albuquerque, 35 F.C.C. 2d 230, 231–2, 235 (1972), about assignments to communities in an SMSA where there is a plethora of service; see also Whaleyville, 28 F.C.C. 2d 641 (1971), on reconsideration, 34 F.C.C. 2d 856 (1973); and compare with Wilmington, 34 F.C.C. 2d 440 (1972), affirmed 35 F.C.C. 2d 735, 736 (1972); and Colorado Springs adopted January 23, 1974 (FCC 74–70), __ F.C.C. 2d ___.

4. In view of the foregoing, pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules and Regulations, IT IS PROPOSED TO AMEND, Section 73.202 (b) of the Commission's Rules and Regulations, the FM Table of Assignments, as concerns Jeffersontown, Kentucky, as follows:

City	Channel No. Present	Proposed
Jeffersontown, Ky		269A

5. *Showings required.* Comments are invited on the proposal discussed above. Petitioner and other interested parties are expected to answer whatever questions are raised in the Notice. Petitioner or any other party interested in the assignment of Channel 269A to Jeffersontown should also specifically state an intention to apply for the channel if it is assigned and, if authorized, to build the station promptly. Failure to file such comments may lead to denial of the request.

6. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding:

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered, if advanced in reply comments.

(b) With respect to petitions for rule making which conflict with the proposal in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given, as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

7. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before April 30, 1974, and reply comments on or before May 10, 1974. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

8. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

9. All filings made in this proceeding will be available for examination by interested parties during business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C. (1919 M Street, NW.).

Adopted: March 15, 1974.

Released: March 20, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[47 CFR Part 73]

[Docket No. 19974]

TELEVISION STATION IN PONCE, PUERTO RICO

Table of Assignments

INTRODUCTION

In the Matter of Amendment of section 73.606(b) of the Commission's Rules, the Table of Television Assignments, to change Channel 7 at Ponce, Puerto Rico to a Ponce-San Juan assignment. General Policy Questions Involved in the Proposal to Move the Transmitter location of the Ponce, Puerto Rico Channel 7 station to a point closer to San Juan, Puerto Rico.

1. This proceeding is instituted in order to explore various questions, and possible approaches, involved in a proposal by Ponce Television Corporation (WRIK), licensee of Station WRIK–TV, Ponce, Puerto Rico (Channel 7) to move that station's transmitter location to a point which is closer to San Juan, the major city of Puerto Rico, than to Ponce. The proceeding is prompted by a "Petition for Declaration of Policies with Respect to Television Service in Puerto Rico", filed by WRIK on September 19, 1973 (and opposed by various other parties as mentioned below). The petition follows, by some 15 months, the withdrawal and dismissal with prejudice of WRIK's application to make the above-mentioned move, which had been vigorously opposed by three stations, and designated for hearing on various issues (designated March 1972, Docket 19459; see Ponce Television Corporation, 33 FCC 2d 940).

2. As described in the petition (correctly as far as we know), WRIK–TV is one of four Puerto Rican stations which, among them, serve as the originating sources of the bulk of the island's TV programming,[1] the others being WAPA–TV and WKAQ–TV, San Juan, and WKBM–TV, Caguas-San Juan. All have other outlets increasing their coverage of the island beyond that possible by direct off-air reception of the main station, particularly in the Western portion; WAPA–TV and WRIK–TV have agreements under which regular stations at Aguadilla and Mayaguez respectively re-broadcast their programs. WKBM–TV has a satellite station at Ponce, and WKAQ–TV uses a number of translators (the other three systems also involve some translators). WRIK–TV claims in its petition that these are in effect Puerto Rico's "networks", and that competitive equality among them has the same high importance here as the Commission has recognized generally in connection with the three mainland U.S. national networks, ABC, CBS and NBC. This, it is said, requires both Island-wide coverage and equal access by the four "flagship" stations to the populous and relatively wealthy San Juan market, which WRIK–TV does not have because of its greater distance from San Juan than the other three (and terrain obstacles in this generally rugged area).[2]

3. In substance, WRIK asks the Commission to issue a policy statement to the effect that, in its case and any similar Puerto Rican situation, this concept of equality for the flagship stations of Island-wide systems (or networks) is "a matter of high importance not to be cast aside without very strong countervailing reasons". (See Appendix for the complete text of its requested policy statement.) It would have us make this statement even assuming arguendo the truth of the allegations against its application made by the opponents and embodied generally in the four Docket 19459 hearing issues particularly pertinent here: (1) "UHF impact" on the future establishment of a

[1] For linguistic and perhaps other reasons, there is virtually no "national" network service (from ABC, CBS, and NBC) in Puerto Rico, with the possible exception of some sports events. There is some use of "off-network" material translated into Spanish.

[2] WRIK–TV asserts that the public interest is harmed if one of these four program sources is in economic jeopardy, inter alia because it might mean the critical impairment or total destruction of the economic viability of the outlying stations to serve as means of local self-expression.

San Juan UHF station;[3] (2) "shadowing" problems with respect to coverage of Ponce from the proposed location, which might require "a waiver of a minor technical rule" (§§ 73.685(a), concerning determination of the signal intensity over the community of license, and 73.658(b) concerning suitability of transmitter location); (3) possible losses or degradations of television service to areas and populations; (4) that grant of WRIK's application to move site, to a point closer to the larger city of San Juan than to Ponce, might be considered a de facto reallocation of the channel to San Juan, "despite the fact that WRIK will continue to provide a local outlet for Ponce."

4. The WRIK "Petition" seeks a statement of policy as mentioned above. However, in a subsequent letter to the staff, petitioner suggested as an alternative the addition of a statement to the rules, as a footnote to § 73.606(a), as follows:

> The Commission's policy of providing equal facilities so far as possible to national networks is applicable to Puerto Rican television networks. Accordingly, in the absence of strong countervailing reasons, the Commission will grant authorizations or waivers, or both, to the extent necessary to provide Puerto Rican networks with facilities for equal and adequate access to the principal communities of the island.

BRIEF SURVEY OF PUERTO RICAN TV ASSIGNMENTS AND STATIONS, AND THE HISTORY OF WRIK–TV

5. There are 10 VHF channel assignments in Puerto Rico, of which two (at San Juan and Mayaguez) are used by non-commercial educational stations. One (Ch. 13 at Fajardo) is occupied by an authorized station which has not gone into operation (litigation over a modification is pending. The remaining 7 assignments are occupied by the two San Juan and one Caguas-San Juan stations mentioned, WRIK–TV and WSUR at Ponce (the latter a satellite of the Caguas-San Juan station) and, in the Western part of the island, WOLE–TV at Aguadilla (with authority to identify with Mayaguez also) and WORA–TV at Mayaguez.[4] There are also 25 UHF assignments, 9 of them reserved for education, of which one unreserved channel at Aguadilla is occupied by an authorized (1972) but not yet operational station, and one at San Juan is applied for (see footnote 3, above). It should be noted that the distances between major communities are comparatively small—e.g., about 47 miles between San Juan (on the northern coast slightly east of center) and Ponce (near the southern coast slightly west of center); but rugged terrain in much of the island prevents direct reception over long distances. The entire island extends slightly more than 100 miles from east to west and about 35 miles north-south.

6. *WRIK–TV.* This station is licensed to Ponce Television Corporation, 80 percent of whose stock since 1970 has been owned, ultimately, by United Artists Corporation, a major U.S. film producer and distributor. The station went on the air in 1958, and for several years operated from a site close to Ponce and served as a rebroadcast outlet for Station WKAQ–TV, San Juan. In 1967, after Commission approval, it moved its transmitter site to its present location (Cerro Maravilla) 10 miles north and slightly east of Ponce and 35 miles southwest of San Juan. At about the same time it took steps to become an independent programming source, enlarging its staff and building a large studio in San Juan. From this site, it puts a predicted principal-city signal over San Juan as well as Ponce, but in March 1969 the Commission denied an application for authority for dual-city identification, because of impact on the development of UHF (particularly on Station WTSJ, San Juan). See Ponce Television Corporation, 17 FCC 2d 411 and, on reconsideration, 18 FCC 2d 543 (both 1969). In the latter decisions, the Commission set forth certain conditions on WRIK's use of its "auxiliary" San Juan studio: more than 50% of the station's programs other than network and other than entertainment (including sports) must originate from Ponce, and if the San Juan studio has facilities for color telecasting the Ponce studio must have them also.

7. In March 1971 WRIK applied for permission to move transmitter site to a location close to those of the two San Juan stations, some 37 miles east and slightly north of Ponce and about 24 miles south of San Juan.[5] This was opposed by three stations, as mentioned above, particularly WAPA–TV and WTSJ, San Juan, and was designated for hearing in March 1972, on issues mentioned above, and also an issue as to whether, in fact, WRIK had moved its main studio to San Juan without Commission authority (the opponents claimed that WRIK–TV had not complied with the two requirements mentioned above). Shortly thereafter WRIK withdrew its application rather than go through a long and burdensome hearing proceeding (described in the instant petition as "an adventure in self-immolation"), and later paid a $10,000 fine in connection with the studio question, whereupon the hearing was terminated. In September 1973 it filed the instant petition requesting a declaration of policy. Other details of WRIK's operation, including its claimed losses, are set forth below.

MATERIAL IN THE PETITION AND RESPONSIVE PLEADINGS

8. Essentially, WRIK's petition sets forth the position that the whole island of Puerto Rico is one market for TV advertising purposes, with the greater San Juan area as the crucial core of that market; that the basis of Puerto Rican television is the island-wide systems (now four) each with a "flagship" station serving San Juan and having island-wide coverage through translators or rebroadcast arrangements with regular stations (no station has ever operated successfully without being part of such a system); that the WRIK system ("Rickavision") is at a serious disadvantage by virtue of its inferior coverage of San Juan compared to the other three "flagship stations", to the extent that it is cut off "from at least half the market opportunities in the island", which precludes its long-term viability; and that as a result it has had staggering losses, totalling nearly $8.5 million in the three years 1970–1972, requiring cash advances from the parent United Artists of about that amount in three years and a total of more than $10,000,000 by the end of 1973 (all despite higher than average program expenses ranging from $2,650,000 to $2,856,000 per year, including its payment to WORA–TV for rebroadcast of $720,000 or more each year, which in two of the three years were more than its total revenues). It is stated that the station's survival is jeopardized, and it cannot continue these losses much longer; the survival of outside stations as well would thus be jeopardized.

9. Recognizing that it had an opportunity in 1972 to make its case in a hearing, WRI asserts that it withdrew because of the delay and burden involved—"defeat by attrition". It asks now that the Commission dispose of the objections of its opponents by "advance recognition by the Commission of the unique nature of the television industry in Puerto Rico

[3] In the Docket 19459 hearing order, this was the first issue, and was put in general terms—whether grant would impair the ability of authorized and prospective UHF stations in the area to compete effectively, or would wholly or partly jeopardize the continuation of existing UHF service. At that time UHF Station WTSJ operated in San Juan, along with satellite stations at Ponce and Mayaguez; however, these three stations ceased operation, and their authorizations were surrendered, in November 1972. An application was tendered for the same San Juan UHF channel at about the time of WRIK's present petition (September 1973); the new San Juan applicant, who opposes the WRIK petition, proposes an English-language service, the same type of operation engaged in by WTSJ. One UHF station is authorized but not operational in Puerto Rico, at Aguadilla, in the northwestern part of the island.

[4] One aspect of this matter which should be noted is that there are no mileage separation problems. There are no co-channel assignments in Puerto Rico on this or any channel; the only adjacent-channel assignment in the area is Channel 8 at Christiansted, V.I., more than 85 miles from the location proposed in WRIK's last application and farther from either San Juan or Ponce.

[5] The site of the Caguas-San Juan station is north of these locations, closer to Caguas and San Juan.

V 39 58 MAR 25 74 M XUM

and the necessity of equal access to San Juan by the flagship station of each system." This would remove the contentions of the opponents as "substantial and material questions of fact" and thus make an evidentiary hearing on another application unnecessary, depriving the opponents of the procedural tool which otherwise they will be able to use indefinitely to perpetuate their competitive advantage and the anti-competitive situation. Accordingly, we are asked to make a formal statement to the effect that the various matters urged cannot equal in importance the "equality of access for flagship stations" concept—[8] which, it is claimed, the Commission has recognized many times in connection with mainland U.S. broadcast matters. Examples are cited of past Commission general statements concerning matters involved in applications and hearings—"307(b)", comparative broadcast hearings, TV multiple ownership, etc.

10. WRIK submits considerable factual data in support of various parts of its argument. One subject is the importance of San Juan and its area in the life of Puerto Rico, including only about 27% of the population but 70% of the wholesale and 50% of the retail trade, and 72% of service activities, and having with 45 of 52 of the island's advertising agencies which place 99% of the total advertising placed by Puerto Rican agencies.[9] It is also described as the center of government and of the island's cultural activity. A second area as to which data was advanced concerns WRIK–TV's share of audience in the San Juan area, in the South-West region which includes Ponce, Mayaguez and Aguadilla, and in the island overall. Based on a May 1973 survey, WRIK–TV is fourth in 61 of 63 weekly evening half-hours (third in two), whereas in the South-West Region it was first or second in 62 of 63 (third once).[9]

11. *Arguments of the opponents.* The WRIK petition was opposed by the licensees of the two San Juan stations, WAPA–TV and WKAQ–TV, and by Suburban Broadcasting Corporation, the new UHF applicant there. The first two oppositions were in the form of motions to dismiss. All of these parties urge largely procedural concepts—that the petition's request is without precedent, a "circumvention of established procedures" (either the hearing opportunity which WRIK decided not to accept, or formal rulemaking to reallocate the channel), a petition for reconsideration of matters already decided when the Commission designated the earlier WRIK application for hearing, or a request for an "advance waiver" of important matters which would be involved in any future hearing. It is claimed that WRIK has not sustained the burden of establishing why such an unprecedented approach should be taken, and, indeed, that it is not permissible under the Communications Act and the Administrative Procedure Act. It is urged that none of the past examples of Commission general policy statements cited is precedent here (for example, it is claimed that the Comparative Hearing policy statement was basically a statement of existing policy, not the formulation of a new policy); and that this kind of approach would spawn a host of similar requests by potential applicants, to have troublesome issues settled in advance.

12. WKAQ–TV also goes into the particular facts of the situation, urging: (1) WRIK obviously was not so concerned about time pressure when it dismissed its application in 1972, since it could well have had a hearing decision by now if it had continued; (2) the economic situation is simply not all that urgent, in view of the profitability of United Artists and Transamerica Corp. (the ultimate parent of WRIK); lower deficits in 1972 than in earlier years; the facts that Ponce, the WRIK–TV city of license, showed radio revenues of over $1,000,000 in 1970 and should be able to support two TV stations, and that there is a UHF permitted in the smaller city of Aguadilla; and (3) the fact that the Commission is not a guarantor of profit.

13. The new San Juan UHF applicant makes some of these arguments and also urges the importance of localism in the Commission's allocation of television channels, and the fact that the addition of a fourth San Juan VHF competitor would assertedly mean the end of the proposed UHF operation (splitting the advertising revenue available among four, rather than three, powerful VHF competitors). It asserts that what is involved here is really a reallocation of Channel 7 to San Juan, in which case the station authorized on the channel now does not have rights greater than any other applicant; and it requests equal opportunity to apply for the channel if it is reassigned to San Juan.

14. There were later pleadings by WRIK and WKAQ, but, since we are herein taking no final action, it is not necessary to discuss them.

15. *Letters from the representative of the Governor of Puerto Rico.* On September 27, 1973, a letter was addressed to the Commission by Mr. Jose A. Cabranes, of Washington, D.C., Administrator and Special Counsel to the Governor of Puerto Rico. It is asserted that the circumstances of Puerto Rico, including television, are unique and different as compared to those of the mainland U.S. (as to language, economic conditions, etc.), so that the same policies should not necessarily apply (citing our recent rule-making proposal concerning dual-language TV/FM programming). It is stated that for practical purposes the island is one television market, served by four systems or "networks" (as described above); and it is urged that the Commission recognize the problems and "take such action, as promptly as possible, as well as assure diverse sources of programming for Puerto Rico while avoiding undue or unusual concentration of control of the broadcast media."

16. On October 10, 1973, Mr. Cabranes directed another letter, stating that the Commonwealth Government neither supports nor opposes the WRIK petition, but that the earlier letter was simply designed to provide the Commission with information as to Puerto Rico and its acknowledged "uniqueness".

DISCUSSION

17. *Preliminary observations.* At the outset of our discussion of the foregoing matters, it is appropriate to make one general observation. At this point, it appears to us far from clear that the public interest would be furthered by permitting WRIK–TV to make the transmitter move proposed in its earlier application, or that, even if the move should be found ultimately to be in the public interest, it is appropriate or feasible to issue the kind of advance "policy statement" which WRIK seeks. The hearing process, whatever its drawbacks, is the procedure designed to develop most completely the facts of a given situation; and the Commission has often been reversed by the Court of Appeals for not adopting it in various situations. WRIK rejected its earlier opportunity to present its case in this fashion; and it may well be that the most appropriate course is simply to afford it the same opportunity if and when it tenders a similar application. The four hearing issues concerning the earlier application which were mentioned above—"UHF impact", the matter of de facto reallocation of the channel, "shadowing" over the principal community and net losses in service—are important considerations, and also subjects where at least a fairly close look at the particular facts involved appears likely to be necessary before a decision can be reached. Unless we conclude that the "equal facilities for flagship stations" concept urged, together with WRIK–TV's economic situation, is so compelling as to dwarf these other matters, it is rather hard to see how a hearing could be avoided, as long as Channel 7 remains assigned to Ponce.

18. Because of these reservations and problems concerning a possible "statement of policy", we are including herein, although not requested by petitioner, the matter of simply reassigning the channel so as to make it available for use by a station licensed to San Juan, by re-designating it as a hyphenated "Ponce-San Juan" assignment. This is the traditional and most direct approach to such matters, and it eliminates the question of "de facto reallocation", although it probably also means that the channel would be open to other applicants, such as the new UHF applicant. The matter of reassignment is discussed more fully below, and one of the questions on which comments are invited is whether—legally or as a matter of basic fairness—such reassignment does in fact open the channel to any applicant who wishes to seek it.

19. However, despite the foregoing doubts and problems, we believe the possibility of issuing a statement in this situation, with a view to settling at an early date as many matters as can be so resolved, should be explored, and that is one of the chief purposes of this proceeding. This threshold question is one of the matters set forth below on which comment is invited. As WRIK points out, the Commission has in the past issued policy statements designed to create certainty and simplify or eliminate matters as hearing issues.[9] While use of that approach here would be somewhat novel, for one reason because at most only a very few situations would be involved if the matter is limited to Puerto Rico, this does not by itself render such a procedure either inappropriate or unfeasible. The hearing process is undoubtedly a time-consuming and burdensome one, for the Commission and staff as well as for the parties. Consistent with the Commission's authority, and indeed its obligation, to adopt procedures which conduce to the most prompt and efficient handling of its business, we believe consideration should be given to the possible issuance of a statement which would settle some, or conveivably all, of the matters which might otherwise require a hearing if and when WRIK tenders an application similar to that of 1971. This is the only conclusion which has been reached at this point. There is another advantage also: instituting a proceeding in the form of this one may provide useful comments on questions which come up from time to time. One of these is the question of whether, under circumstances such as those here assuming a transmitter move like that previously applied for, there would have been a "de facto" reallocation of the channel to make it a San Juan assignment. Another is whether a channel reassignment—either a "de facto" one or a formal rule-making action—automatically opens the channel up to other applicants. These matters are discussed below.

20. *Re-designation of Channel 7 as a "Ponce-San Juan" assignment.* This is the only rule-making proposal included herein.[10] We have substantial reservations about whether it would be an appropriate move; as mentioned, it is advanced as probably the most direct approach to the problems raised by petitioner, assuming *arguendo* that any relief can and should be given. Use of the channel at San Juan might be justifiable, from a "307(b)" standpoint, in light of the comparative populations of the two cities (footnote 7 above), since this would mean three unreserved VHF channels at San Juan (or four if the Caguas assignment is counted) compared to one for Ponce. While there are arguments the other way, such as encouragement of a "choice of local service" at Ponce (particularly since the other existing station operates entirely or very largely as a satellite), we believe the formal reassignment warrants consideration. Many of the subjects set forth below on which comment is invited are relevant in this connection also, and will be considered in both connections without having to be set forth separately. One of these subjects is the question of whether, if the channel is so reassigned and WRIK–TV seeks modification of license to become a San Juan station, the channel thus becomes available to other Ponce and San Juan applicants.

21. *The economic situation and prospects of WRIK–TV.* While we do not here attempt to spell out the showings which will be required in this matter, it appears likely that the economic situation and prospects of WRIK–TV may well be an important part of the case, both as to the need for and propriety of the "advance ruling" requested and as to the ultimate merits of its transmitter-move proposal. The Commission will consider the data contained in stations' annual financial reports, and we will assume that WRIK agrees that such data for WRIK–TV may be made public to the extent necessary to support the decision reached. The same assumption will be made as to other Puerto Rican licensees who participate in the proceedings.

22. *"Inequality in access to San Juan".* One of the important aspects of WRIK's case is that WRIK–TV does not put a signal over the major city of San Juan comparable to those of the other three stations, despite the fact that all put a predicted principal-city signal over this area, and that therefore it is at a serious competitive disadvantage. The data in support of this consists of an audience-preference survey, showing respective shares of audience in greater San Juan and elsewhere. While this might be indicative of comparative signal quality, it might also reflect to a substantial extent the programming of the stations, since audience tastes vary among viewers, including variations among different areas, e.g., large-city vis-a-vis more rural areas. Therefore it would be desirable for a showing on this subject to include more than audience data, so as to indicate more precisely whatever technical difference in signals may exist.

23. *"Comparative equality for flagship stations" and "UHF impact".* The first of these concepts is the key to WRIK's argument—that here there should be equal facilities and access to the heart of the market for the four Puerto Rican "originating stations", and that the Commission should hold this to be an overriding consideration outweighing the various other aspects of the matter, including impact on UHF development. It is true, as WRIK points out, that past Commission actions have emphasized the concept of "equality" and "equal access" among networks and their outlets.[11] However, particularly in more recent years, there have been substantial limits on the application of such concepts, chiefly resulting from the matter of "UHF impact", which has been of particular concern to the Commission in light of our commitment to make vigorous efforts to further UHF development generally, a commitment made in connection with enactment of the "all channel receiver law" in 1962 (see § 303(s) and 330 of the Communications Act). Thus, in the VHF drop-in matter cited by the petitioner and above, we refused to make 7 additional VHF short-spaced drop ins. More recently, we acted to terminate ABC's authority to continue serving the San Diego market through a Tijuana, Mexico VHF station, in order to further the development of UHF in San Diego. See American Broadcasting Companies, Inc., 35 FCC 2d 1 (1972). There are numerous other examples. The all-channel law and our implementing rules apply as much to Puerto Rico as they do to the mainland U.S., and therefore the same general considerations would appear to apply also.

---

[8] WRIK claims that the four lines of objection are not of great importance; the shadowing and "loss of service" problems (if any) can be cured by translators, the impact on a potential UHF station in San Juan cannot be held to equal the importance of maintaining existing services, and, as long as WRIK maintains its present extent of local service to Ponce, it is idle to ask whether the move might be considered by some a "de facto" reallocation of the channel to San Juan.

[9] Pertinent 1970 Census population figures are as follows: Puerto Rico, 2,712,033; San Juan city, 452,759, urbanized area 820,442, SMSA 851,247; Ponce city, 128,233, SMSA 158,981. Caguas, fairly close to San Juan, had a city population of 63,216 and an SMSA population of 95,661.

[9] For the island as a whole, WRIK–TV was first in 3 half-hours, second in 4, third in 25 and fourth in 31.

[9] See Policy Statement on Comparative Broadcast Hearings, 1 FCC 2d 393 (1965); Policy Statement on Section 307(b) Considerations for Standard Broadcast Facilities Involving Suburban Communities 2 FCC 2d 190 (1965); Interim Policy Concerning Acquisition of Television Broadcast Stations, FCC 65–548, 30 F.R. 8173, 5 R.R. 2d 271 (1965).

[10] We do not believe it appropriate to consider the addition of a footnote to § 73.606, as suggested by petitioner in a letter and mentioned in par. 4 above. There appears no reason to clutter the Table of Assignments with a statement which is both somewhat indefinite and applicable only in a very few situations. As to reassigning the channel to San Juan alone, while comments making this suggestion will be entertained, we do not believe it appropriate as a Commission proposal, since it would, at least for now, foreclose the second largest city in Puerto Rico (Ponce) from having a local station other than a satellite. While "hyphenation" is not a favored concept, it appears the most suitable approach here if any change is to be made.

[11] WRIK cites the VHF drop-in decisions, 25 R.R. 1687, 1696 (1963), particularly Chairman Minow's concurring statement; the ABC–ITT Merger decision, 9 FCC 2d 546, 571 (1967); and in radio, various Court and Commission actions in the "KOB–WABC" case (1960 and 1965 Court decision, 280 F. 2d 631, 635, and 345 F. 2d 954, and the Commission's later 1969 rule-making action, Clear Channel Broadcasting, 17 FCC 2d 257, 270). Other actions could be cited, such as the third-VHF-channel "drop ins" made in 1961 in Grand Rapids, Mich. and Rochester and Syracuse, N.Y., as well as the "move-in" of the New Bedford, Mass. station to a location where it could better serve the Providence, R.I. market (see 17 R.R. 1737, 1748a and 1754, and 23 R.R. 1050, respectively).

V 39 58 MAR 25 74 XUM

24. Since there have been San Juan UHF operations in the past and there is now a pending application, the "UHF impact" concept may be the most difficult hurdle facing WRIK in this matter, now or later. However, it may be that there are possible counter-arguments worthy of attention, for example the absence here of any mileage separation deviation, the fact that no impact on any existing UHF station is involved now (unlike the situation earlier) [12], and the importance (if in fact it exists) of a transmitter move to insure the survival of a station providing some locally originated service to Ponce. These matters appear to warrant exploration, together with the "equality" concept which WRIK urges so strongly.[13]

25. *"Shadowing" and "loss of service" resulting from the move.* These matters, included as two of the four basic hearing issues on which the earlier application was designated, are not subjects which can profitably be discussed at length in the absence of specific facts. They may be of high importance (for example, as to losses in service, see Hall v. FCC, 237 F 2d 567 (1956), and Television Corporation of Michigan v. FCC, 294 F 2d 730 (1961)), or they may be of considerably lesser weight, depending on the facts presented in a given situation.[14] As discussed below, the problem of "shadowing" into Ponce, to the extent it may exist, may be relevant in connection with the question of whether the transmitter move contemplated would amount to a *de facto* reassignment of the channel. One point should be noted: WRIK asserts that whatever drawbacks in these respects its proposal may have, they are curable by translator operation; it should be specific as to its intentions in these respects if it wishes to get any kind of an advance determination on these points (which may well not be possible anyhow).

26. *"De facto" reallocation and whether reallocation opens the channel to all applicants.* Comment is invited on two questions which involve legal as well as policy considerations: (1) Whether under all of the circumstances here, permitting a transmitter move such as that in WRIK–TV's earlier application is in effect a de facto reallocation or reassignment of the channel to San Juan, in any meaningful sense; and (2) assuming either a de facto or a formal reassignment, whether this means that the channel should be open to all applicants, assuming, in the case of a formal reassignment, that the station takes steps, such as moving its site or seeking a change in its city of license, to become a station tied to the larger city. In connection with the first question, it is certainly arguable that the combination of facts would make the station really a San Juan station, taking into account its location closer to San Juan than to Ponce (and providing a better signal to the former than to the latter), the maintenance of elaborate studios in San Juan, the origination of the bulk of its programming there (both entertainment and part of non-entertainment material), and the established fact that stations generally tend to be oriented toward the larger city, where the bulk of their potential audience and potential advertising revenues are located. On the other hand, it may be that this is too rigid a view of the matter to be realistic. TV stations and channels assigned in the general area of large cities, but not to them, have shown a very strong tendency to gravitate toward the larger center; and it may be that all that should be expected of an assignment like Ponce Channel 7 is that the station will be licensed to the smaller city, will maintain an adequate studio in and originate at least a fairly substantial amount of regular programming from it (geared to its needs and interests), and will put a predicted principal-city signal over it even though there are some shadowing problems (with the latter problems to be mitigated by translators). We reach no conclusions; comments on these matters are invited.

27. As to the second question—the consequences of reassignment of the channel, interns of opening it up to other applicants—the prevailing view at least for several years has been that a formal reassignment does have this effect. At least two U.S. Court of Appeals (D.C.) decisions have so indicated, though neither involved a square holding. See Community Telecasting Co. v. FCC, 255 F. 2d 891 (1958) and Louisiana Television Corp. v. FCC, 347 F. 2d 808 (1965), in which the Court appeared to extend this principle to de facto, as well as formal, reallocations. Nevertheless, neither of these was a square holding on the point, and in one early case the Commission did not follow this concept (Muskogee-Tulsa, Oklahoma, 15 R.R. 1720 (1957)). Therefore, comments upon this matter are invited, in light of both legal requirements and general public-interest policy and fairness considerations. However, we know of no reason at this time why the viewpoint set forth in the two court cases cited does not apply, at least to a formal reallocation.

SUBJECTS ON WHICH COMMENTS ARE INVITED

28. In light of the matters discussed above, comments are invited on the following matters.

(a) Whether Channel 7, now assigned in § 73.606(a) of the Rules to Ponce, P.R., should be re-designated a "Ponce-San Juan" assignment by amending the Table of Television Assignments in § 73.606(a) accordingly. This is the only rule-making proposal in this proceeding. Such action will be considered in light of the matters referred to above, comments filed in response to specific questions in this paragraph, below, and other matters pertinent to Commission decisions in television channel assignment proceedings.

(b) Whether a statement of policy can or should be issued concerning equality of access to the San Juan market (facilities and transmitter location) by Puerto Rican stations, particularly those which originate substantial amounts of programming, and concerning applications to move transmitter site to improve such access, like that by Ponce Television Corporation in 1971 (BPCT–4421) involving a proposal to move to a location closer to San Juan than to Ponce.* This statement, if issued, would be an attempt to indicate what weight will be attached to various considerations discussed above and in this paragraph below, if an application containing such a transmitter-move proposal is filed. The Appendix, WRIK–TV's proposed policy statement, is set forth to show the kind of material such a statement might contain, although it is not proposed for adoption as such:

(c) In connection with either a formal reassignment of the channel, or a possible "statement of policy", what significance should be attached to the following matters, in light of past Commission decisions, general Commission policies, and the facts of this case including the economic situation and prospects of WRIK–TV:

(1) Provision of generally equal facilities, in terms of quality of signal to the San Juan area, for the originating stations of the four existing Puerto Rican television broadcast "systems", and for any other VHF or UHF stations which originate substantial amounts of programming.

(2) The effect of the kind of site change proposed by WRIK–TV on the development of UHF in Puerto Rico, including the station recently applied for in San Juan, other authorized stations in Puerto Rico, and future UHF development in Puerto Rio generally.

(3) The extent to which such a transmitter move may be necessary to insure the survival of WRIK–TV and of the station (WORA–TV, Mayaguez) which rebroadcasts much of its programming.

(4) Whatever gains or losses in television service to areas and populations would result from such a transmitter move.

(5) "Shadowing" which may exist over Ponce from the proposed location, in relation to the requirements of § 73.658(a) and (b).

(d) Whether a transmitter move such as that proposed should be regarded in any significant sense as a "de facto reallocation" of the channel involved, bearing in mind the transmitter location closer to the larger city and likely provision of a better signal to it than to Ponce, the maintenance of studios in San Juan at least as well-equipped and elaborate as those in Ponce, and the origination of the bulk of the programming from San Juan but more than half of the non-entertainment programming from Ponce.

(e) Whether a reassignment of the channel, either the formal reassignment as proposed in (a) above (together with steps by the licensee to move toward San Juan), or a "de facto reallocation" to the extent it may be involved, serves to open the channel to application for its use by other parties either in Ponce or in San Juan.

29. Authority for the institution of this proceeding is found in §§ 4(i) and (j), 303 (d), (f), (g), (h), (i) and (r), 307(b), and 403 of the Communications Act of 1934, as amended.

30. Pursuant to applicable procedures set out in § 1.415 of the Commission's Rules, interested persons may file comments on or before April 22, 1974 and reply comments on or before May 3, 1974. All submissions by parties to this proceeding or by persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

31. In accordance with the provisions of § 1.419 of the Commission's Rules, an original and 14 copies of all comments, replies, pleadings, briefs, and other documents shall be furnished the Commission. These documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Adopted: March 13, 1974.

Released: March 20, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS, *Secretary.*

[12] Some of the Commission rule-making decisions involving formal reassignment of channels have turned on "UHF impact" in terms of potential development only. However, most, if not all, of the cases involving transmitter moves rather than new assignments have involved injury to an authorized UHF station.

[13] To the extent this concept may be determinative here, the question of course is what weight should be attached to the concept of equality among the four Puerto Rican television "systems". There are both similarities and differences between this question and the concept of equality among the three mainland networks, which may work both ways—for example, the question of whether these really are "networks," since they involve only two regular stations at most, and one of these serves the bulk of the population covered; and, on the other hand, the fact that there is involved here the matter of equality of access by the "flagship station", which has not arisen in the case of U.S. networks because all three have comparable access with respect to what could be considered their "flagship" stations (New York, Los Angeles and Chicago). "Network equality" in the U.S. television situations has involved access to smaller markets, such as those mentioned above.

[14] In terms of predicted Grade A coverage as as shown in the contour maps attached to the petition, the losses might not be crucial. WSUR, the Ponce satellite, provides all of the island with a predicted Grade A signal, the two San Juan stations so cover roughly 75% of it, and Stations WOLE–TV, Aguadilla, and WORA–TV, Mayaguez, both cover much of the Western area not reached by the San Juan stations. It appears that the move might result in reduction of a very small area in the central West to one Grade A signal, and more substantial areas in the Northwest and central West to two Grade A signals (WSUR and either WORA–TV or WOLE–TV). However, in view of the rugged terrain involved, depiction of predicted contours is not necessarily the complete answer.

* Parties may wish to comment on the situation of Station WSTE–TV, Fajardo, P.R. (authorized but never operating) in this respect.

APPENDIX

TEXT OF POLICY DECLARATION REQUESTED BY PONCE TELEVISION CORPORATION [1]

(a) Puerto Rico has been compelled by circumstances, linguistic and economic in nature, to develop for itself a microcosm of mainland networks.

(b) Four broadcasting systems operating in Puerto Rico compete with each other on an island-wide basis in the same manner as the three television networks on the mainland compete on a nationwide basis.

(c) The Commission will give high priority to the maintenance and encouragement of island-wide competition. The competitive disadvantage of one island-wide network or system has adverse island-wide effects on the public interest. Without such island-wide systems, with equivalent access to San Juan, the viability of non-San Juan outlets for local expression will be critically impaired if not destroyed.

(d) Equal facilities for the flagship stations of island-wide systems or networks is a matter of high importance not to be cast aside without very strong countervailing reasons.

[FR Doc.74–6801 Filed 3–22–74;8:45 am]

[47 CFR Part 76]

[Docket No. 18891; FCC 74–263]

DIVERSIFICATION OF CONTROL OF CABLE TELEVISION

Memorandum Opinion and Order Extending Time

In the matter of amendment of Part 76 of the Commission's rules and regulations relative to diversification of control of community antenna television systems; and inquiry with respect thereto to formulate regulatory policy and rule making and/or legislative proposals.

1. On June 24, 1970, the Commission adopted its notice of proposed rule making and of inquiry (Docket No. 18891), 35 FR 11042, 23 FCC 2d 833. There the Commission proposed to deal with several matters concerning diversification of control of cable television. One of the matters was whether the Commission should enact a rule prohibiting daily newspapers from owning local cable television systems. In paragraph 4 of the notice, the Commission stated that in view of the fact that the question of cross-ownership of newspapers and local broadcast stations is under study in Docket No. 18110, the newspaper/cable portion of Docket No. 18891 will be considered at the same time as Docket No. 18110.

2. The deadline for filing comments in the newspaper/cable cross-ownership phase of Docket No. 18891 was in May 1971; the deadline for reply comments was in August 1971. As we stated in paragraph 11, Memorandum Opinion and Order in Docket No. 18110, FCC 74–222, FCC 2d (Released March 7, 1974), although there are issues in common with certain of the questions pending in Docket 18110, there are enough unique considerations in the newspaper/cable proposal and other non-newspaper questions in Docket No. 18110 so that we will not totally consolidate these pending matters. On the other hand, there are enough common factors to warrant our consideration and final resolution of these issues at approximately the same time.

3. Although we are not now scheduling oral argument on the newspaper/cable matter, we believe it appropriate, in view of the time and the changes that have taken place in the industry since this proceeding was commenced, to reopen the docket for the filing of supplemental or new comments by all interested persons. All such comments should be filed by May 15, 1974. If deemed necessary, oral argument will be scheduled at a later date.

Adopted: March 13, 1974.

Released: March 18, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS, *Secretary.*

[FR Doc.74–6798 Filed 3–22–74;8:45 am]

FEDERAL MARITIME COMMISSION

[46 CFR Part 502]

[Docket No. 74–11]

RULES OF PRACTICE AND PROCEDURE

Proposed Miscellaneous Amendments

The Commission has become concerned with the amount of time required to conduct formal proceedings before it. In an effort to expedite such proceedings, the Commission proposes to revise certain of the procedural rules and regulations under which they are conducted.

The principal thrust of the amendments proposed herein is to make discovery procedures more orderly and less time consuming. The Commission's present rules relating to discovery procedures were promulgated in September 1968 pursuant to Pub. L. 90–177, which amended section 27 of the Shipping Act, 1916. That law furthermore provided that such rules "shall, to the extent practicable, be in conformity with the rules applicable in civil proceedings in the district courts of the United States."

The basic purpose of the rules was to streamline and expedite proceedings before the Commission. Since the rules would enable litigants to obtain facts and documentary materials in advance of the hearing, it was believed that the parties would be better prepared for trial, that surprise would be avoided, and that consequently there would be little or no need to grant time-consuming continuances once the hearing had begun. These are also the purposes of the Federal Rules of Civil Procedure, after which the Commission rules are, to the extent practicable, required to be patterned.

Despite these good intentions, however, the Commission's present discovery rules have frequently failed to succeed in their basic objective for several reasons. Litigating parties often fail to utilize the procedures established by the rules expeditiously and the rules themselves do

[1] The text of the requested statement is set forth for information only.

V 39158 MAR 25 74 XUM

not generally impose specific time limitations especially with regard to commencement of discovery procedures and filing of motions to compel answers or applications for enforcement of discovery-related orders of the Commission or of the presiding officer. Furthermore, the Commission's rules have not been revised so as to conform to the present Federal Rules of Civil Procedure which were amended significantly in 1970 in order to promote greater expedition and efficiency in their use.

The following proposed revisions to the Commission's discovery rules are designed to follow the 1970 amendments to the Federal rules where practicable. Thus, the requirement in Rules 12(a), (f), and (h) that parties must wait 20 days or 10 days after commencement of the proceeding before serving interrogatories or requests for admission without leave of the Commission has been eliminated. Rules 12(f), 12(g), and 12(h) relating to interrogatories, motions for production, and requests for admission have been revised so as to conform generally to revised Federal Rules 33, 34, and 36. Federal Rule 33 no longer requires parties to answer interrogatories within 15 days or object within 10 days with a notice for hearing on the objections. Instead, a period of 30 days is generally prescribed for the filing of answers or objections and the party seeking to overcome objections must file a motion to compel answers. Federal Rule 34 eliminates the requirement that a party file a motion for production showing "good cause." Instead he may serve a request on any other party and, in case of objections, file a formal motion for an order compelling disclosure. Federal Rule 36 regarding requests for admissions has been similarly revised.

Other provisions in Federal Rule 33 have been incorporated in Commission Rule 12(f) relating to the scope of interrogatories and the option to produce business records. In the former case, the revision makes clear that an interrogatory may inquire as to opinions or contentions, even if involving the application of law to fact. In the latter case, an answering party may choose to allow the interrogating party to undertake the burden of researching answers by granting access to records containing pertinent material.

Certain provisions in revised Federal Rule 37(b) relating to sanctions for failure to comply with discovery-related orders have been incorporated in Commission Rules 12(j) and 12(k). These relate to adverse rulings which a party may suffer who refuses to comply with such orders. The Commission's rules presently provide no specific sanctions for failure to comply and leave the affected party no alternative but to seek ultimate enforcement in the courts.

In certain Federal district courts, the practice is to require counsel to meet informally in an effort to resolve discovery-related issues before seeking formal rulings from the presiding judge. See, e.g., U.S. District Court, Central District of California, Rule 3(l); U.S. District Court, Southern District, New York, Rule 9(f). These rules encourage counsel to resolve issues informally, thus saving both the court and the parties the time and expense of engaging in formal court proceedings. Provisions establishing this practice have been incorporated in Commission Rules 12(f) and 12(g) relating to interrogatories and requests for production.

New provisions have been incorporated in certain rules imposing specific time limitations in order to insure that parties intending to utilize discovery procedures will do so expeditiously and will pursue the matters to conclusion, including prompt application to the Commission or the courts for enforcement of orders compelling answers or production. Special provisions are applicable to interveners in order to avoid undue delay which may result if late-appearing interveners wish to commence discovery procedures. These provisions are contained in rules 12(a) (general), 12(d) and 12(e) (depositions), 12(f) (interrogatories), 12(g) (production), 12(h) (requests for admission), Rules 5(l) (interventions), 12(j) (enforcement of orders), and 12(k) (enforcement orders).

In addition to the revisions to Rules 12(j) and 12(k) discussed above which relate to sanctions in cases of noncompliance with orders of the Commission or the presiding officer and imposition of time limitations on parties seeking enforcement of such orders, these particular rules have been revised in order to clarify the procedures for enforcement. Rule 12(k) has also been amended so as to delete reference to persons, documents, or other things located in the United States, which matters are covered in Rule 12(j).

In addition, provision has been made for setting a specified hearing date in proceedings referred to the Office of Administrative Law Judges.

It is also proposed to amend Subpart K, Shortened Procedure, and Subparts S and T, Informal and Formal Procedures for Adjudication of Small Claims to reduce the number of filings and the amount of time required to conduct proceedings under such procedures.

Finally, a new § 502.243 is proposed to be added to specify the conditions under which oral argument will be granted and to clarify the position of an individual Commissioner who is not present at oral argument.

Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553) and sections 27 and 43 of the Shipping Act, 1916 (46 U.S.C. 826, 841(a)), 46 CFR Part 502 is proposed to be amended as set forth below.

1. Section 502.61 is proposed to be amended by the addition of the following sentence:

§ 502.61 Proceedings.

• • • • • •

In proceedings referred to the Office of Administrative Law Judges, the Commission shall specify a date on or before which hearing shall commence, which date shall be no more than six months from date of service of the order or complaint. Hearing dates may be deferred by the presiding judge only upon a showing of extraordinary good cause.

2. Section 502.72 is proposed to be amended by redesignating the current text as paragraph (a) and adding a new paragraph (b) as follows:

§ 502.72 Petition for intervention.

• • • • • •

(b) Any intervener desiring to utilize the procedures provided by Subpart L must commence doing so no later than 10 days after his petition for leave to intervene has been granted. If the petition is filed later than 20 days after the date of service of the Commission's order instituting the procedings or the date of service of the complaint, petitioner will be deemed to have waived his right to utilize such procedures unless good cause is shown for the failure to file the petition within the 20-day period; provided, however, the use of Subpart L procedures by an intervener whose petition was filed beyond the 20-day period described above will in no event be allowed if, in the opinion of the presiding officer, such use will result in delaying the proceeding unduly.

3. Sections 502.182, 502.183, and 502.184 are proposed to be revised as follows:

§ 502.182 Complaint and memorandum of facts and arguments.

A complaint filed with the Commission under this subpart shall have attached a memorandum of the facts, subscribed and verified according to § 502.112 (Rule 8(b)), and of arguments separately stated, upon which it relies. The original of each complaint with memorandum shall be accompanied by copies for the Commission's use [Rule 11(b)].

§ 502.183 Respondent's answering memorandum.

Within twenty-five (25) days after date of service of the complaint, unless a shorter period is fixed, each respondent shall, if he consents to the shortened procedure provided in this subpart, serve upon complainant an answering memorandum of the facts, subscribed and verified according to § 502.112 (Rule 8(b)), and of arguments, separately stated, upon which it relies. The original of the answering memorandum shall be accompanied by a certificate of service as provided in § 502.114 of this part and shall be accompanied by copies for the Commission's use. If the respondent does not consent to the proceeding being conducted under the shortened procedure provided in this subpart, the matter will be governed by Subpart E of this part (Rule 5) and the respondent shall file an answer under § 502.64 [Rule 11(c)].

§ 502.184 Complainant's memorandum in reply.

Within fifteen (15) days after the date of service of the answering memorandum prescribed in § 502.183, unless a shorter period is fixed, each complainant may file a memorandum in reply, subscribed and verified according to § 502.112 (Rule 8

(b)), served as provided in § 502.114 of this part, and accompanied by copies for the Commission's use. This will close the record for decision unless otherwise determined by the Presiding Officer [Rule 11(d)].

4. Section 502.201 is proposed to be amended by deleting the second sentence of paragraph (b)(1) and revising the first sentence of paragraph (b)(2).

§ 502.201 General.

• • • • • •

(b) • • •

(2) Unless otherwise ordered by the presiding officer for good cause shown, the use of the procedures set forth in this subpart shall be completed prior to hearing and shall be commenced no later than 20 days after the date of service of the Commission's order instituting the proceeding or the date of service of the complaint, or, if the particular discovery is in the nature of a new phase of discovery generated by answers or information obtained through earlier discovery procedures, within 15 days after such answers have been served or such information obtained. Interveners desiring to use any such procedures must comply with the applicable provisions of § 502.72. • • •

• • • • • •

5. Section 502.204 is proposed to be amended by addition of the following new paragraph (h):

§ 502.204 Depositions upon oral examination.

• • • • • •

(h) Any party desiring to take a deposition as provided by this section must comply with the applicable provisions of § 502.201(b)(2).

6. Section 502.205 is proposed to be amended by addition of the following new paragraph (e):

§ 502.205 Depositions of witnesses upon written interrogatories.

• • • • • •

(e) Any party desiring to take a deposition as provided by this section must comply with the applicable provisions of § 502.201(b)(2).

7. Section 502.206(a) is proposed to be amended by deleting the present text following the first sentence and substituting the language set forth below. Paragraph (b) would be amended by inserting the sentence set forth below after the present first sentence. Paragraph (c) would be added as set forth below.

§ 502.206 Interrogatories to parties.

(a) • • • Any party desiring to serve interrogatories as provided by this section must comply with the applicable provisions of § 502.201(b)(2).

(1) Each interrogatory shall be answered separately and fully in writing under oath, unless it is objected to, in which event the reasons for objection shall be stated in lieu of an answer. The answers are to be signed by the person making them, and the objections signed by the attorney making them. The party upon whom the interrogatories have been served shall serve a copy of the answers, and objections if any, on the party submitting the interrogatories within 30 days after the service of the interrogatories, unless the presiding officer for good cause shown, enlarges or shortens the time. The party submitting the interrogatories may move for an order under § 502.210 or § 502.211 with respect to any objection or to other failure to answer an interrogatory. Unless otherwise ordered by the presiding officer for good cause shown, such a motion shall be filed no later than 15 days after date of service of the answers or objections. Failure to file a timely motion, absent good cause, shall constitute a waiver of the party's right to utilize the provisions of § 502.210 or § 502.211 with respect to the particular answers or objections. Oral argument on answers or objections shall not be heard unless the presiding officer, as a matter of discretion, deems that the matter cannot be decided on the pleadings. No motion described in this paragraph will be entertained unless counsel for the moving party files with the Commission on or before the due date for filing a reply to the motion an affidavit certifying that he has conferred with counsel for the opposing party in an effort in good faith to resolve by agreement the issues raised by the motion without the intervention of the presiding officer and has been unable to reach such agreement. If part of the issues raised by motion have been resolved by agreement, the affidavit shall specify the issues so resolved and the issues remaining unresolved.

(b) • • • An interrogatory otherwise proper is not necessarily objectionable merely because an answer to the interrogatory involves an opinion or contention that relates to fact or the application of law to fact, but the presiding officer may order that such an interrogatory need not be answered until after designated discovery has been completed or until a prehearing conference or other later time. • • •

(c) *Option to produce business records.* Where the answer to an interrogatory may be derived or ascertained from the business records of the party upon whom the interrogatory has been served or from an examination, audit or inspection of such business records, or from a compilation, abstract or summary based thereon, and the burden of deriving or ascertaining the answer is substantially the same for the party serving the interrogatory as for the party served, it is a sufficient answer to such interrogatory to specify the records from which the answer may be derived or ascertained and to afford to the party serving the interrogatory reasonable opportunity to examine, audit or inspect such records and to make copies, compilations, abstracts or summaries.

8. Section 502.207 is proposed to be revised to read as follows:

§ 502.207 Production of documents and things and entry upon land for inspection and other purposes.

(a) *Scope.* Any party may serve on any other party a request (1) to produce and permit the party making the request, or someone acting on his behalf, to inspect and copy any designated documents (including writings, drawings, graphs, charts, photographs, phono-records, and other data compilations from which information can be obtained, translated, if necessary, by the respondent through detection devices into reasonably usable form), or to inspect and copy, test, or sample any tangible things which constitute or contain matters within the scope of § 502.201 and which are in the possession, custody or control of the party upon whom the request is served; or (2) to permit entry upon designated land or other property in the possession or control of the party upon whom the request is served for the purpose of inspection and measuring, surveying, photographing, testing, or sampling the property or any designated object or operation thereon, within the scope of § 502.201.

(b) *Procedure.* The request shall set forth the items to be inspected either by individual item or by category, and describe each item and category with reasonable particularity. The request shall specify a reasonable time, place, and manner of making the inspection and performing the related acts. The party upon whom the request is served shall serve a written response within 30 days after the service of the request. The response shall state, with respect to each item or category, that inspection and related activities will be permitted as requested, unless the request is objected to, in which event the reasons for objection shall be stated. If objection is made to part of an item or category, the part shall be specified. The party submitting the request may move for an order under § 502.210 or § 502.211 with respect to any objection to or other failure to respond to the request or any part thereof, or any failure to permit inspection as requested. Oral argument on responses or objections shall not be heard unless the presiding officer, as a matter of discretion, deems that the matter cannot be decided on the pleadings.

(c) *Time and procedural requirements.* Any party desiring to serve a request as provided by this section must comply with the applicable provisions of § 502.201(b)(2). Any party submitting a request who desires to move for an order under § 502.210 or § 502.211 with respect to any objection to or other failure to respond to the request must file an appropriate motion within 15 days after date of service of the written response. Failure to file a timely motion, absent good cause, shall constitute a waiver of the party's right to utilize the provisions of § 502.210 or § 502.211 with respect to objection to or other failure to respond to the request. Such motion will not be entertained unless counsel for the moving party files with the Commission on or before the due date for filing a reply to the motion an affidavit certifying that he has conferred with counsel for the opposing party in an effort in good faith to resolve by agreement the issues raised by the motion without the intervention of the presiding officer and has been unable to reach such an agreement. If part of the issues raised

V 39158 MAR 25 74 XUM

by motion have been resolved by agreement, the affidavit shall specify the issues so resolved and the issues remaining unresolved.

9. Section 502.208 is proposed to be revised to read as follows:

§ 502.208 Requests for admission.

(a) A party may serve upon any other party a written request for the admission, for purposes of the pending action only, of the truth of any matters within the scope of § 502.201(c) set forth in the request that relate to statements or opinions of fact or of the application of law to fact, including the genuineness of any documents described in the request. Copies of documents shall be served with the request unless they have been or are otherwise furnished or made available for inspection and copying. Any party desiring to serve a request as provided by this section must comply with the applicable provisions of § 502.201(b)(2).

(i) Each matter of which an admission is requested shall be separately set forth. The matter is admitted unless, within 30 days after service of the request, or within such shorter or longer time as the presiding officer may allow, the party to whom the request is directed serves upon the party requesting the admission a written answer or objection addressed to the matter, signed by the party or by his attorney. If objection is made, the reasons therefor shall be stated. The answer shall specifically deny the matter or set forth in detail the reasons why the answering party cannot truthfully admit or deny the matter. A denial shall fairly meet the substance of the requested admission, and when good faith requires that a party qualify his answer or deny only a part of the matter of which an admission is requested, he shall specify so much of it as is true and qualify or deny the remainder. An answering party may not give lack of information or knowledge as a reason for failure to admit or deny unless he states that he has made reasonable inquiry and that the information known or readily obtainable by him is insufficient to enable him to admit or deny. A party who considers that a matter of which an admission has been requested presents a genuine issue for trial may not, on that ground alone, object to the request; he may, subject to the provisions of § 502.208(c) deny the matter or set forth reasons why he cannot admit or deny it.

(ii) The party who has requested the admissions may move to determine the sufficiency of the answers or objections provided that he files an appropriate motion within 15 days after date of service of such answers or objections. Oral argument on answers or objections shall not be heard unless the presiding officer, as a matter of discretion, deems that the matter cannot be decided on the pleadings. Unless the presiding officer determines that an objection is justified, he shall order that an answer be served. If the presiding officer determines that an answer does not comply with the requirements of this rule, he may order either that the matter is admitted or that an amended answer be served. The presiding officer may, in lieu of these orders, determine that final disposition of the request be made at a pretrial conference or at a designated time prior to trial.

(b) *Effect of admission.* Any matter admitted under this rule is conclusively established unless the presiding officer on motion permits withdrawal or amendment of the admission. The presiding officer may permit withdrawal or amendment when the presentation of the merits of the action will be subserved thereby and the party who obtained the admission fails to satisfy the presiding officer that withdrawal or amendment will prejudice him in maintaining his action or defense on the merits. Any admission made by a party under this rule is for the purpose of the pending proceeding only and is not an admission by him for any other purpose nor may it be used against him in any other proceeding.

(c) *Expenses on failure to admit.* If a party fails to admit the genuineness of any document or the truth of any matter as requested under § 502.208(a), and if the party requesting the admissions thereafter proves the genuineness of the document or the truth of the matter, he may apply to the presiding officer for an order requiring the other party to pay him the reasonable expenses incurred in making that proof, including reasonable attorney's fees. The presiding officer shall make the order unless he finds that (1) the request was held objectionable pursuant to § 502.208(a), or (2) the admission sought was of no substantial importance, or (3) the party failing to admit had reasonable ground to believe that he might prevail on the matter, or (4) there was other good reason for the failure to admit [Rule 12(h)].

10. Section 502.210 is proposed to be amended by adding the following sentence at the end of paragraph (a), revising paragraph (b), and adding paragraph (c) as follows:

§ 502.210 Refusal to make discovery: consequences.

(a) • • • Application for any order made pursuant to this section shall be filed within the time limits and in accordance with the provisions set forth in § 502.206, § 502.207, and § 502.208 where applicable. With respect to depositions, unless otherwise ordered by the presiding officer for good cause shown, application shall be filed within 15 days after deponent's refusal to answer.

(b) *Sanctions for failure to comply with order.* If a party or an officer or duly authorized agent of a party refuses to obey an order made under paragraph (a) of this section requiring him to answer designated questions or to produce any document or other thing for inspection, copying or photographing or to permit it to be done, the presiding officer may make such orders in regard to the refusal as are just, and among others the following:

(1) An order that the matters regarding which the order was made or any other designated facts shall be taken to be established for the purposes of the action in accordance with the claim of the party obtaining the order;

(2) An order refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting him from introducing designated matters in evidence;

(3) An order striking out pleadings or parts thereof, or staying further proceedings until the order is obeyed, or dismissing the action or proceeding or any part thereof, or rendering a judgment by default against the disobedient party.

(c) *Enforcement of orders.* In the event of refusal to obey an order made under paragraph (a) of this section the affected party or the Commission may apply for enforcement to a district court having jurisdiction of the parties, provided that the affected party seeks court enforcement within 15 days of the date of refusal to obey the order in question. The presiding officer may direct the affected party to seek such enforcement of an order relating to persons, documents, or other things located in the United States. Failure to seek enforcement in timely fashion will result in a waiver of the affected party's rights to enforcement of the subject order.

11. Section 502.211 is proposed to be amended by revising the last sentence of paragraph (a), and revising paragraphs (b) and (c) to read as follows:

§ 502.211 Witnesses and evidence located in a foreign country.

• • • • •

(a) • • • Application for any order made pursuant to this section shall be filed within the time limits and in accordance with the provisions set forth in Sections 502.206, 502.207 and 502.208 where applicable. With respect to depositions, unless otherwise ordered by the Commission for good cause shown, application shall be filed within 15 days after deponent's refusal to answer.

(b) *Sanctions for failure to comply with order.* In the event of refusal to obey an order of the Commission described in paragraph (a), the Commission may make such orders or take such actions in regard to the refusal as are just, including the specific sanctions provided in § 502.210(b).

(c) *Enforcement orders.* Application to a district court for enforcement of an order which relates to persons, documents, or other things located in a foreign country, shall be made by the Commission. In the event of refusal to obey an order of the Commission described in paragraph (a) the affected party may request the Commission to seek court enforcement provided that such request is filed with the Commission within 15 days of the date of refusal to obey the order in question. Failure of the affected party to file a timely request with the Commission will result in a waiver of the affected party's rights to enforcement of the subject order. The presiding officer may direct the affected party to file such request with the Commission.

12. A new section 502.243 is proposed to be added as follows:

§ 502.243 Granting of oral argument.

Oral argument shall not be granted unless at least two Commissioners specify that they desire the parties to present further argument on particular points or furnish answers to particular questions. Where practicable, the notice of oral argument shall direct the parties to address themselves to such points or questions.

13. A new section 502.244 is proposed to be added as follows:

§ 502.244 Participation of absent commissioner.

Any commissioner who is not present at oral argument and who is otherwise authorized to participate in a decision shall participate in making that decision after reading the transcript of oral argument unless he files in writing an election not to participate.

14. In section 502.304, paragraphs (d), (e), (f) and (g) are proposed to be revised as follows:

§ 502.304 Procedures.

• • • • •

(d) A copy of each claim filed under this subpart, with attachments, shall be served by the Settlement Officer on the carrier involved.

(e) Within twenty-five (25) days from the date of service of the claim, the carrier shall file with the Commission its response to the claim, together with an indication as to whether the informal procedure provided in this subpart is consented to. Failure of the carrier to indicate refusal or consent in its response will be conclusively deemed to indicate such consent. The response shall consist of documents, arguments, legal authorities, or precedents, or any other matters considered by the carrier to be a defense to the claim. The Settlement Officer may request the carrier to furnish such further documents or information as he deems necessary, or he may require the claimant to reply to the defenses raised by the carrier.

(f) If the carrier refuses to consent to the claim being informally adjudicated pursuant to this subpart, the claim will be considered a complaint under section 502.311 and will be adjudicated under Subpart T.

(g) Both parties shall promptly be served with the Settlement Officer's decision which shall state the basis upon which the decison was made. This decision shall be final, unless, within fifteen (15) days from the date of service of the decision, the Commission exercises its discretionary right to review the decision.

15. Section 502.312 is proposed to be revised to read as follows:

§ 502.312 Answer to complaint.

The carrier shall file with the Commission an answer within 25 days of service of the complaint and shall serve a copy of said answer upon complainant. The answer shall admit or deny each matter set forth in the complaint. Matters not specifically denied will be deemed admitted. Where matters are urged in defense, the answer shall be accompanied by appropriate affidavits, other documents, and memoranda.

Interested persons may participate in this rulemaking proceeding by filing with the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before May 3, 1974 an original and 15 copies of their views or arguments pertaining to the proposed rules.

By the Commission.

[SEAL] FRANCIS C. HURNEY,
Secretary.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

SIZE STANDARDS DIFFERENTIALS

Proposed Change in Application

Section 121.3-7(b)(1) of 13 CFR Part 121 provides a 25 percent size standards differential for the purpose of assistance under section 7(a) of the Small Business Act (Act). Further, § 121.3-7(b)(2) of the regulation provides a 25 percent differential for concerns receiving financial assistance from a small business investment company or from a development company in connection with a loan under section 501 or 502 of the Small Business Investment Act of 1958, as amended. However, there is no provision for application of a differential for the purpose of assistance under section 7(b) of the Act.

The Small Business Administration has concluded that, in addition to the financial assistance programs for which the differential now is applicable, it should, in the interest of consistency, be made applicable to financial assistance under section 7(b).

Accordingly, it is proposed to revise § 121.3-7(b)(1) of 13 CFR Part 121 to read as follows:

§ 121.3-7 Differentials.

• • • • •

(b) • • •

(1) *Assistance under sections 7(a) and 7(b) of the Small Business Act.* Notwithstanding any other provision of this part, the applicable size standards for the purposes of assistance under sections 7(a) and 7(b) of the Act are increased by 25 percent whenever the concern maintains or operates a plant, facility, or other business establishment within an area of substantial unemployment or underemployment or redevelopment area as defined in § 121.3-2 (d) and (v) or is designated as a "Certified Eligible" concern by the Department of Labor and agrees to use the assistance within such area or, if it does not maintain a plant, facility, or other business establishment within such area, agrees to utilize the assistance for the establishment and/or operation of a plant, facility, or other business establishment within such area.

Interested parties may file with the Small Business Administration on or before April 9, 1974, written statements of facts, opinions, or arguments concerning the proposal.

All correspondence shall be addressed to:

William L. Pellington, Director
Office of Industry Studies and Size Standards
Small Business Administration
1441 L Street N.W.
Washington, D.C. 20416

Dated: March 14, 1974.

THOMAS S. KLEPPE,
Administrator.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF THE TREASURY

Office of the Secretary

NON-POWERED HAND TOOLS FROM JAPAN

Withholding of Appraisement

Information was received on August 20, 1973, that non-powered hand tools from Japan were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of September 26, 1973, on page 26738. The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), notice is hereby given that there are reasonable grounds to believe or suspect that the purchase price (section 203 of the Act; 19 U.S.C. 162) and the exporter's sales price (section 204 of the Act; 19 U.S.C. 163), of non-powered hand tools from Japan are less, or are likely to be less, than the foreign market value (section 205 of the Act; 19 U.S.C. 164).

Statement of reasons. The information currently before the U.S. Customs Service tends to indicate that there are sufficient sales in the home market to provide an adequate basis of comparison for fair value purposes. Also, indications are that sales by certain manufacturers to the United States are to a related party. Accordingly, the probable basis of comparison will be between purchase price or exporter's sales price, as appropriate, and the adjusted home market price of such or similar merchandise.

Preliminary analysis suggests that purchase price will probably be calculated on the basis of either an ex-godown port of lading, Japan, unit price to the United States or a c.i.f. unit price to the United States, as appropriate, with deductions for inland freight, where the price was ex-godown port of lading, Japan, and with deductions for inland freight, ocean freight, insurance and brokerage charges, where the price was c.i.f. U.S. port of destination. Adjustments will probably be made for differences in packing costs, in the merchandise compared and in the applicable rate of currency exchange, where appropriate.

Exporter's sales price will probably be calculated by deducting from the resale price to unrelated purchasers in the United States, U.S. duties, brokerage fees, freight charges, insurance, commissions, and selling expenses, as appropriate.

Home market price will probably be calculated on the basis of a weighted-average delivered price, with a deduction for inland freight. Adjustments will probably be made for differences in the merchandise compared, interest, advertising costs, and packing.

Using the above criteria, there are reasonable grounds to believe or suspect that purchase price or exporter's sales price, as appropriate, will be lower than the adjusted home market price.

Customs officers are being directed to withhold appraisement of non-powered hand tools from Japan in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

In accordance with §§ 153.32(b) and 153.37, Customs Regulations (19 CFR 153.32(b), 153.37), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street, NW, Washington, D.C. 20229, in time to be received by his office not later than April 4, 1974. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than April 24, 1974.

This notice, which is published pursuant to § 153.34(b), Customs Regulations (19 CFR 153.34(b)), shall become effective March 25, 1974. It shall cease to be effective September 25, 1974, unless previously revoked.

[SEAL] JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

MARCH 21, 1974.

ACADEMIC ADVISORY BOARD, U.S. NAVAL ACADEMY

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act [Pub. L. 92-463 (1972)], notice is hereby given that the Academic Advisory Board, United States Naval Academy, will have a meeting from 8:00 a.m. to 11:30 a.m. on April 1, 1974, at the United States Naval Academy, Annapolis, Maryland.

The purpose of this meeting is to advise and assist the Superintendent of the Naval Academy concerning the education of midshipmen.

Dated: March 18, 1974.

H. B. ROBERTSON, Jr.,
Rear Admiral, JAGC, U.S. Navy, Acting Judge Advocate General.

Office of Hearings and Appeals

[Docket No. M 74-62]

CAROLINA MINING INC.

Mandatory Safety Standard; Petition for Modification of Application

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Carolina Mining Inc., has filed a petition to modify the application of 30 CFR 77.1605(k) to its No. 2 Strip Mine.

Section 77.1605(k) of 30 CFR reads as follows:

"Berms or guards shall be provided on the outer bank of elevated roadways."

In support of its petition, Petitioner states:

(1) Berms which Petitioner has installed have created a drainage problem since the water table is even with the roadway level. The drainage problem makes the roadway slippery and more hazardous.

(2) The berms have hampered removal of snow causing the road to ice over and become dangerous; guardrails would be a worse hindrance.

(3) Some of Petitioner's roadway is on solid rock, therefore, before guardrails or berms could be installed, drilling and blasting would have to be done. This activity in addition to increasing manhours, would increase the accident potential as well.

(4) More than half of Petitioner's haulage time is on county or state roads which do not have these berms or guardrails. Consequently, these roads are no safer than Petitioner's private roads.

(5) More than half of Petitioner's haulage roads are temporary, and the man-hours and equipment needed for the installation and removal of these berms or guardrails would be a needless expense, in addition to an increased accident risk.

(6) If this modification is granted, appropriate warning and speed limit signs would be posted where the guardrails or berms are required.

(7) This winter Petitioner lost "trucking time" due to existing berms that were installed.

(8) Petitioner's alternate method will at all times guarantee no less than the same measure of protection afforded by the mandatory standard.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before April 24, 1974. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

MARCH 13, 1974.

[FR Doc.74-6742 Filed 3-22-74;8:45 am]

[Docket No. M 74-65]

FORD COAL CO.

Mandatory Safety Standard; Petition for Modification of Application

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Ford Coal Company has filed a petition to modify the application of 30 CFR 75.313 to its Mine No. 1.

Section 75.313 of 30 CFR reads in pertinent part as follows:

The Secretary or his authorized representative shall require, as an additional device for detecting concentrations of methane, that a methane monitor, approved as reliable by the Secretary after March 30, 1970, be installed, when available, on any electric face cutting equipment, continuous miner, longwall face equipment, and loading machine, except that no monitor shall be required to be installed on any such equipment prior to the date on which such equipment is required to be permissible under §§ 75.500, 75.501, and 75.504. When installed on any such equipment, such monitor shall be kept operative and properly maintained and frequently tested as prescribed by the Secretary. • • •

In support of its petition Petitioner states:

(1) Petitioner seeks a waiver of the mandatory safety standard as it applies to Petitioner's Jeffrey 100-L Continuous Miner (hereinafter, "miner").

(2) The miner in question is nine years old, and the life expectancy of the subject mine is nine months.

(3) The miner has been operating in the same seam of coal for approximately five years. During this period, no methane has been detected.

(4) The area in which the miner operates is tested for methane every twenty minutes when the miner is being used.

(5) The seam in which the miner operates is approximately 200 feet above the water table level.

(6) The miner will not be used after the present seam is discontinued.

(7) The miner is considered to be in permissible condition, and the operation of the miner without a methane monitor will provide the same amount of protection as afforded by the mandatory safety standard.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before April 24, 1974. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

Bureau of Land Management

[INT FES 74-14]

OUTER CONTINENTAL SHELF OFFSHORE TEXAS

Availability of Final Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental impact statement relating to a possible Outer Continental Shelf general oil and gas lease sale of 245 tracts of submerged lands on the Outer Continental Shelf in the Gulf of Mexico offshore Texas.

Single copies of the final environmental statement can be obtained from the Office of the Manager, Gulf of Mexico Outer Continental Shelf Office, Bureau of Land Management, Suite 3200, The Plaza Tower, 1001 Howard Avenue, New Orleans, Louisiana 70113, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240. Additional copies may be obtained by writing the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151.

Copies of the final environmental statement will also be available for public review in the main public libraries in the following cities: Port Arthur, Freeport, Houston, and Galveston, Texas.

CURT BERKLUND,
Director.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Designation No. A038]

IOWA

Designation of Emergency Area

The Secretary of Agriculture has found that a general need for agricultural credit exists in Calhoun County, Iowa.

The Secretary has found that this need exists as a result of a natural disaster consisting of hailstorms June 26; July 1, 8, and 18; and August 16, 1973; and a windstorm and heavy rains September 21, 1973.

Therefore, the Secretary has designated this area as eligible for emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 93-237, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Robert D. Ray that such designation be made.

Applications for emergency loans must be received by this Department prior to April 26, 1974, for physical losses and prior to November 26, 1974, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 19th day of March, 1974.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

Forest Service

GREEN MOUNTAIN NATIONAL FOREST; TIMBER MANAGEMENT PLAN

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement on the Timber Management Plan for the Green Mountain National Forest, USDA-FS-R9-FES-(Adm)-74-6.

The environmental statement concerns the implementation of the Green Mountain National Forest Timber Management Plan, which establishes an allowable harvest of 10.8 million board feet, and 7,000 cords per year for the two-year plan period FY '75-'76. The portion of the Green Mountain National Forest covered by this plan is wholly contained within the State of Vermont and includes portions of Addison, Bennington, Rutland, Washington, Windham and Windsor Counties.

This final environmental statement was filed with CEQ on March 18, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3231
12th St. & Independence Ave., SW
Washington, D.C. 20250
USDA, Forest Service
Eastern Region
633 West Wisconsin Avenue
Milwaukee, Wisconsin 53203
USDA, Forest Service
Green Mountain National Forest
Federal Building
151 West Street
Rutland, Vermont 05701

A limited number of single copies are available upon request to Forest Supervisor, Green Mountain National Forest, Federal Building, 151 West Street, Box 519, Rutland, Vermont 05701.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

JAY H. CRAVENS,
Regional Forester,
Eastern Region.

Office of the Secretary

ADVISORY COMMITTEE ON FOREIGN ANIMAL AND POULTRY DISEASES

Meeting

A meeting of the Advisory Committee on Foreign Animal and Poultry Diseases will be held at 8:30 a.m., on April 2, 1974, in the Emergency Programs Information Center on the 7th Floor of the Federal Building, 6505 Belcrest Road, Hyattsville, Maryland.

The purpose of the committee is to advise the Secretary of Agriculture regarding program operations or measures to prevent, suppress, control, or eradicate an outbreak of foot-and-mouth disease (FMD) or other destructive foreign animal and poultry diseases in the event such diseases should enter this country.

The purpose of the meeting is to review present criteria for determining if an area which is a territory of a FMD infected country, but which is geographically removed, can be considered as having a disease status different than the parent country.

The meeting is open to the public. Written statements may be filed with the committee before or after the meeting. Any member of the public who wishes to file a statement or who has further questions may contact Dr. F. J. Mulhern, Administrator, United States Department of Agriculture, Room 316E., Washington, D.C. 20250, telephone number (202) 447-3668.

Dated: March 20, 1974.

F. J. MULHERN,
Vice Chairman.

Packers and Stockyards Administration

WELD COUNTY LIVESTOCK COMMISSION CO. ET AL.

Deposting of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being

subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., name, and location of stockyard, date of posting

CO—123 Weld County Livestock Commission Company, Greeley, Colo., May 23, 1957.
GA-142 Georgia Livestock Market, Inc., Macon, Georgia, January 18, 1938.
GA-177 Longhorn Livestock Auction, Inc., Poulan, Georgia, May 1, 1973.
IN-117 Indianapolis Stockyards Corporation, Indianapolis, Indiana, November 1, 1921.
MN-137 Pine City Livestock Sales, Pine City, Minnesota, October 14, 1959.
NB-155 Minden Livestock Sales Co., Inc., Minden, Nebraska, February 1, 1950.
OH-110 Union Stock Yards, Cleveland, Ohio, November 1, 1921.
PA-122 Jamestown Livestock Commission Market, Jamestown, Pennsylvania, December 10, 1959.
SC-114 Clarendon Auction Sales, Inc., Manning, South Carolina, August 15, 1960.
WA-100 Auburn Livestock, Inc., Auburn, Washington, October 16, 1959.

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly deposting a stockyard which is no longer within the definition of that term contained in the Act.

The foregoing is in the nature of a rule relieving a restriction and may be made effective in less than 30 days after publication in the FEDERAL REGISTER. This notice shall become effective March 25, 1974.

(42 Stat. 159, as amended and supplemented; 7 U.S.C. 181 *et seq.*).

Done at Washington, D.C., this 19th day of March, 1974.

EDWARD L. THOMPSON,
Chief Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

Rural Electrification Administration

TRI-STATE GENERATION AND TRANSMISSION, INC.

Final Environmental Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Final Environmental Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a loan to Tri-State Generation and Transmission Association, Inc., P.O. Box 29198, Denver, Colorado 80229. This loan includes financing for the construction of 8.2 miles of 115 kV transmission line from Longmont Northeast Substation to Del Camino Substation.

Additional information may be secured on request, submitted to Mr. David H. Askegaard, Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue, SW., Washington, D.C., Room 4310 or at the borrower address indicated above.

Final REA action with respect to this matter (including any release of funds) may be taken after thirty (30) days, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 19th day of March 1974.

GEORGE P. HERZOG,
Acting Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

[File No. 22(71)-6]

WOLFGANG G. PRENOSIL, ET AL.

Order Denying Export Privileges for an Indefinite Period

In the matter of Wolfgang G. Prenosil, Apexa Deutschland G.m.b.H., and Bautelle fuer Elektronik (Apexa), Egerstrasse 2, 6200 Wiesbaden, Federal Republic of Germany (FRG), (Respondents).

The Director, Compliance Division, Office of Export Administration, Bureau of East-West Trade, US Department of Commerce, has applied for an order denying to the above-named respondents all export privileges for an indefinite period because said respondents failed to furnish answers to interrogatories and failed to furnish certain records and other writings specifically requested, without good cause being shown. This application was made pursuant to § 388.6 of the export regulations issued under the Export Administration Act.

The application for an indefinite denial order was referred to the Acting Hearing Commissioner, Bureau of East-West Trade, who after considering the evidence has recommended that the application be granted. The report of the Acting Hearing Commissioner and the evidence supporting the application have been considered.

The evidence presented shows that respondent Prenosil a naturalized U.S. citizen, is and has been engaged in the business of importing and exporting and otherwise dealing in electronic equipment. At one time, Prenosil controlled and operated North American Enterprises, Inc., a corporation engaged in the export business in California, but now defunct. At the same time, Prenosil also managed, and his wife and minor children purportedly owned, Apexa Deutschland GmbH, otherwise called Bautelle fuer Elektronik (Apexa), an export-import firm engaged in business in Wiesbaden, F.R.G., and they still do manage and own said firm.

The evidence further shows that the Compliance Division is conducting an investigation into the disposition by Prenosil and Apexa of certain US origin electronic equipment of a strategic nature which they obtained from the US through North American Enterprises, Inc., and other US firms.

It is impracticable to subpoena the respondents in West Germany. Accordingly, relevant and material interrogatories and a request to furnish certain specified documents relating to the transactions in question were served on respondents pursuant to § 388.6 of the export regulations. Said respondents have refused to answer said interrogatories and to furnish the requested documents, claiming that to do so would subject them to liability under four cited laws of the F.R.G. These laws having been examined by competent legal authorities, who deem them not to bar respondents from complying; and respondents having therefore been given further opportunity to answer the interrogatories and to furnish the documents; and respondents having again refused to do so; it is hereby determined that respondents have not shown good cause for their refusal. I therefore find that an order denying all US export privileges to said respondents for an indefinite period is reasonably necessary to protect the public interest and to achieve effective enforcement of the Act and regulations.

Accordingly, it is hereby ordered

I. All outstanding validated export licenses in which respondents appear or participate in any manner or capacity are hereby revoked and shall be returned forthwith to the Bureau of East-West Trade for cancellation.

II. The respondents, their successors or assigns, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or which are otherwise subject to the export regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the US or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) as a party or as a representative of a party to any validated export license application, (b) in the preparation or filing of any export license application or reexportation authorization, or any document to be submitted therewith, (c) in the obtaining or using of any validated or general export license or other export control document, (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data in whole or in part exported or to be exported from the United States, and (e) financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondents, but also to their agents and employees and to any successor, and to any person,

V 39 158 MAR 25 74 XUM

firm, corporation, or business organization with which they or either of them now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or services connected therewith.

IV. This order shall remain in effect until the respondents provide responsive answers, written information, and documents, in response to the interrogatories heretofore served upon them, or give adequate reasons for not doing so, except insofar as this order may be amended or modified hereafter in accordance with the export regulations.

V. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Bureau of East-West Trade, shall do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondents or in any association with the respondents or any related party, or whereby the respondents or related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) apply for, obtain, transfer, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States, by, to, or for any such respondent or related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

VI. A copy of this order shall be served on respondents.

VII. In accordance with the provisions of § 388.15 of the export regulations, the respondents may move at any time to vacate or modify this indefinite denial order by filing with the Hearing Commissioner, Bureau of East-West Trade, U.S. Department of Commerce, Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which, if requested shall be held before the Hearing Commissioner, at Washington, D.C., at the earliest convenient date.

This order shall become effective on March 27, 1974.

Dated: March 27, 1974.

RAUER H. MEYER,
Director, Office of Export Administration.

[FR Doc.74-6806 Filed 3-22-74;8:45 am]

[Case No. 459]

ALFRED P. GREENUP

Order Denying Export Privileges

On October 29, 1973, the Director, Compliance Division, Office of Export Administration, Bureau of East-West Trade, issued a charging letter against the above-named respondent, alleging violation of the regulations issued under the Export Administration Act of 1969, as amended. The charging letter was duly served, but the respondent did not answer or request an oral hearing. Accordingly, respondent is hereby found and held in default, pursuant to § 388.4(a) of the regulations. The Acting Hearing Commissioner held an informal hearing on March 4, 1974, at which evidence bearing on the following charges was presented by the Compliance Division.

The charge was, in substance, that, in February 1971, respondent in effect sold and exported to a person and firm which he knew were then denied all US export privileges, 21 strategic US origin oscilloscopes, worth about $130,000, without US government authorization.

The Acting Hearing Commissioner, after considering the evidence, reported his findings of fact and conclusion that a violation had occurred and he recommended that the sanction hereinafter set forth be imposed.

After considering the evidence, I adopt the Acting Hearing Commissioner's findings of fact, as follows:

FINDINGS OF FACT

1. Respondent was at the time of the violation charged a salesman employed by a UK firm engaged in the business of manufacturing electronic scientific instruments and of selling its own and other firms' products in the UK and other countries.

2. In January 1971, respondent obtained an order for 21 oscilloscopes from Franz Eggeling, of Austria, and the latter's firm Memisco Anstalt, of Liechtenstein. At the time, respondent knew that Eggeling and Memisco were denied all US export privileges. In addition, respondent then knew that the oscilloscopes were the product of a US manufacturer and were subject to US export controls with respect to any movement of them from England.

3. Shortly after, the 21 oscilloscopes were delivered to respondent's employer. In March 1971, shortly before the oscilloscopes were to be turned over to Eggeling, respondent was questioned by officials of the US manufacturer of the oscilloscopes as to the intended destination and end use. Respondent then told the US firm's representatives that all the oscilloscopes were for use by his employer in its production and service of other electronic scientific equipment in its UK factory, and were not to be sold or exported from England.

4. Notwithstanding this representation, respondent then caused the 21 oscilloscopes to be moved from his employer's establishment to his own home in Manchester, and shortly thereafter he delivered them to Eggeling, who took them by truck to Dover, for export from England to an undisclosed destination.

5. Thereafter, the UK government brought proceedings against respondent for participating in the exportation of the 21 oscilloscopes from that country without its required export license. In September 1972, respondent was fined £3000 for this transgression of UK laws.

Based on the foregoing findings, I have concluded that respondent violated §§ 387.4 and 387.10 of the US export control regulations, in that, without prior disclosure of the facts to, and specific authorization from, the Office of Export Administration, he knowingly sold and delivered commodities subject to US export controls to a party denied the privileges of participating, directly or indirectly, in transactions involving such commodities.

Now, after considering the record in this case and the report and recommendations of the Acting Hearing Commissioner, and being of the opinion that his recommendation as to the sanction that should be imposed is fair, just, and calculated to achieve effective enforcement of the law, it is

ORDERED

I. All outstanding validated export licenses in which respondent appears or participates in any manner or capacity are hereby revoked and shall be returned forthwith to the Bureau of East-West Trade for cancellation.

II. Respondent, for the duration of U.S. export controls, is hereby denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transactions involving commodities or technical data exported from the United States in whole or in part, or to be exported, or which are otherwise subject to the Export Control Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation: (a) as a party or as a representative of a party to any validated export license application; (b) in the preparation or filing of any export license application or reexportation authorization, or document to be submitted therewith; (c) in the obtaining, or using of any validated or general export license or other export control documents; (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data; (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondent, but also to his representatives, agents, and employees, and also to any person, firm, corporation, or other business organization, with which he now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or services connected therewith, including but not limited to Greenup Scientific (International), Ltd., P.O. Box 9, 27 Maple Road, Manchester, England, a company of which respondent is director and controlling shareholder.

IV. During the time when the respondent or other parties within the scope of this order are prohibited from engaging in any activity within the scope of Part II hereof, no person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Bureau of East-West Trade, shall do any of the following acts, directly or indirectly, in any manner or capacity, on behalf of or in any association with the respondent or other parties denied export privileges within the scope of this order, or whereby the respondent or such other parties may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control documents relating to any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States, by, to, or for any such respondent or other parties denied export privileges within the scope of this order; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

This order shall become effective on March 25, 1974.

Dated: March 25, 1974.

RAUER H. MEYER,
Director, Office of Export Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[NADA No. 4-173V]

PITMAN-MOORE, INC.

Amfetasul (Amphetamine Sulfate); Notice of Withdrawal of Approval of Application

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-351; 21 U.S.C. 360b), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), the following notice is issued:

New animal drug application No. 4-173V, held by Pitman-Moore, Inc., Washington Crossing, N.J. 08560, provides for Amfetasul, containing 5 percent amphetamine sulfate, for injectable use in cattle, horses and dogs.

The application was reevaluated by the Food and Drug Administration. The applicant was advised that data were needed to establish the absence of unsafe residues in edible tissues of cattle treated with the drug according to label directions for use. The applicant subsequently advised the Food and Drug Administration that distribution of the drug has been discontinued and requested that approval of the application be withdrawn. The firm further stated that they do not wish to avail themselves of an opportunity for a hearing regarding withdrawal of approval of the subject application. Therefore, notice is given that approval of NADA No. 4-173V, including all amendments and supplements thereto, is hereby withdrawn.

Effective date. This notice shall be effective March 25, 1974.

DATED: March 18, 1974.

SAM D. FINE,
Associate Commissioner for Compliance.

National Institutes of Health

DIVISION OF RESEARCH GRANTS

Notice of Meetings

Pursuant to Public Law 92-463, notice is hereby given of meetings of the following study sections and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

The Chief, Grants Inquiries Office of the Division of Research Grants, Mr. Richard Turlington, will furnish summaries of the meetings and rosters of committee members. Substantive information may be obtained from each Executive Secretary whose name, room number and telephone extension are listed below his Study Section. Mr. Turlington and the Executive Secretaries are all located in the Westwood Building, National Institutes of Health, Bethesda, Maryland 20014. Mr. Turlington's room number is 448, telephone area code 301-496-7441. Anyone planning to attend a meeting should contact the Executive Secretary to confirm the exact meeting time.

These meetings will be open to the public to discuss administrative details relating to Study Section business for approximately one hour at the beginning of the first session of the first meeting and closed thereafter in accordance with the provisions set forth in section 552(b)4 of Title 5 U.S. Code and section 10(d) of P.L. 92-463, in order to review, discuss and evaluate and/or rank grant applications. Attendance by the public will be limited to space available.

Office of the Secretary

PRESIDENT'S COMMITTEE ON MENTAL RETARDATION

Meeting

The President's Committee on Mental Retardation was established to provide advice and assistance to the President including evaluation of the adequacy of the national effort to combat mental retardation; coordination of activities of Federal agencies; provision of adequate liaison between Federal activities and related activities of State and local governments, foundations and private organizations; develop information designed for dissemination to the general public. The Committee will meet Friday and Saturday, March 29-30, 1974, from 9 a.m. to 4 p.m. at the L'Enfant Plaza Hotel in Washington, D.C. The Committee will discuss health, education, services and legal rights as they relate to the mentally retarded. These meetings are open to the public.

Dated: March 18, 1974.

FRED J. KRAUSE,
Executive Director, President's Committee on Mental Retardation.

Social Security Administration

ADVISORY COMMITTEE ON MEDICARE ADMINISTRATION, CONTRACTING, AND SUBCONTRACTING

Public Meetings

Notice is hereby given, pursuant to Pub. L. 92-463, that the Advisory Committee on Medicare Administration, Contracting, and Subcontracting, established pursuant to section 1114(f) of the Social Security Act, as amended, which advises the Secretary of Health, Education, and Welfare on Medicare matters, will meet on Friday, March 29, 1974, and Friday, April 5, 1974, at 9 a.m., in the conference room on the 31st floor at 299 Park Avenue, New York, N.Y. These meetings are open to the public. However, there will be no formal agenda and no time allotted for public discussion because the Committee will be entirely involved in drafting its report to the Secretary.

Further information on the Committee may be obtained from Mr. Max Perlman, Executive Secretary of the Committee, Room 585 East Building, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-9134. Members of the public planning to attend should notify the Executive Secretary.

(Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged-Hospital Insurance; 13.801, Health Insurance for the Aged-Supplementary Medical Insurance.)

Dated: March 20, 1974.

MAX PERLMAN,
Executive Secretary, Advisory Committee on Medicare Administration, Contracting, and Subcontracting.

National Institute of Education

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Meeting

Notice is hereby given that the next meeting of the National Council on Educational Research will be held on April 1, 1974 in Charleston, West Virginia. The sessions will be held at The Charleston House (Holiday Inn), 600 Kanawha Boulevard, Charleston, West Virginia, Telephone 304-344-4092.

The National Council on Educational Research is established under section 405(b) of the General Education Provisions Act (20 U.S.C. 1221e(b)). Its statutory duties include:

(a) Establishing general policies for, and reviewing the conduct of, the Institute;

(b) Advising the Assistant Secretary for Education and the Director of the Institute on development of programs to be carried out by the Institute;

(c) Recommending to the Assistant Secretary and the Director ways to strengthen educational reseach, to improve the collection and dissemination of research findings, and to insure the implementation of educational renewal and reform based upon the findings of educational research.

The Chairman of the Council is Patrick Haggerty, Chairman of the Board, Texas Instruments, Incorporated, Dallas, Texas.

All of the sessions of the meeting, except for the discussion of the budget and the executive session during lunch, will be open to the public. The tentative agenda includes:

J.20-00, fol. 25812, 31-10
37412, Grevera, E.T., 3-22-74

9:15-9:25	Welcoming Remarks.
9:25-9:30	Minutes of March 13 Meeting.
9:30-9:45	Director's Remarks.
9:45-10:15	Presentation by Dr. Lyman Ginger, Superintendent of Public Instruction, State of Kentucky, as liaison for Chief State School Officers.
10:15-10:30	Future Meetings of NCER.
10:30-12:00	NIE Budget (closed).
12:00-1:00	Lunch and Executive Session (closed).
1:00-2:00	Annual Report of NCER.
2:00-4:30	Presentation by Appalachia Educational Laboratory.

Members of the public are invited to attend the open sessions. Written statements relevant to an agenda item may be submitted at any time and should be sent to the Chairman and the Executive Secretary of the Council at the address below. Requests to address the Council meeting should be submitted in writing to the Chairman and the Executive Secretary by the close of business Thursday, March 28, 1974. The Chairman will determine whether a presentation should be scheduled.

In accordance with Council policy (NCER Resolution No. 013074-8), copies of Council resolutions and the approved minutes of Council meetings can be obtained by contacting the Executive Secretary.

In order to assure adequate seating arrangements at this meeting, persons interested in attending are requested to contact in advance:

Mrs. Caroline Phillips
Executive Secretary
National Council on Educational Research
National Institute of Education Room 714
Washington, D.C. 20208
Telephone: 202-254-7900

THOMAS K. GLENNAN, JR.,
Director, National Institute of Education.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 74 57]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Notice of Approval

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been granted as herein described during the period from December 28, 1973 to January 28, 1974 (List No. 2-74). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in 46 U.S.C. 367, 375, 390b, 416, 481, 489, 526p, and 1333; 43 U.S.C. 1333; 50 U.S.C. 198. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. The approvals listed in this document shall be in effect for a period of 5 years from the date of issuance, unless sooner cancelled or suspended by proper authority.

BUOYANT APPARATUS FOR MERCHANT VESSELS

Approval No. 160.010/28/1, 3.75' x 3.0' x 0.75' buoyant apparatus, fibrous glass reinforced plastic shell with unicellular plastic foam core, 11-person capacity, dwg. No. M-99-13, Alt. C dated January 28, 1959, manufactured by Marine Safety Equipment Corporation, Foot of Wycoff Road, Farmingdale, New Jersey 07727, effective January 3, 1974. (It is an extension of Approval No. 160.010/28/1 dated March 25, 1969.)

Approval No. 160.010/29/1, 6.0' x 4.0' x 0.75' buoyant apparatus, fibrous glass reinforced plastic shell with unicellular plastic foam core, 20-man capacity, dwg. No. M-99-14, Alt. D dated January 22, 1959, and fabrication specification dated March 10, 1958, revised September 24, 1958, manufactured by Marine Safety Equipment Corporation, Foot of Wycoff Road, Farmingdale, New Jersey 07727, effective January 3, 1974. (It is an extension of Approval No. 160.010/29/1 dated March 25, 1969.)

LIFEBOAT WINCHES FOR MERCHANT VESSELS

Approval No. 160.015/105/0, Type M-13 winch; approval is limited to mechanical components only and for a maximum working load of 1,300 pounds pull at the drum on a single-part fall; identified by general arrangement drawing W1-D-014, revision A dated January 7, 1974, and drawing list, revision A dated January 8, 1974, manufactured by Marine Safety Equipment Corporation, Foot of Wycoff Road, Farmingdale, New Jersey 07727, effective January 25, 1974.

WATER, EMERGENCY DRINKING (IN HERMETICALLY SEALED CONTAINERS), FOR MERCHANT VESSELS

Approval No. 160.026/27/2, container for emergency drinking water, Globe Equipment Corporation dwg. No. 1313 dated November 1, 1956, revised May 6, 1959, packed by Ash Jon Corporation, 257 Water Street, Brooklyn, New York 11201, for Globe Equipment Corporation, 257 Water Street, Brooklyn, New York 11201, effective January 3, 1974. (It is an extension of Approval No. 160.026/27/2 dated March 25, 1969.)

LIFEFLOATS FOR MERCHANT VESSELS

Approval No. 160.027/53/0, 5.0' x 3.83' (9'' x 9'' body section) rectangular life float, fibrous glass reinforced plastic shell with unicellular plastic foam core, 10-person capacity, dwg. No. M-99-16, Rev. A dated January 22, 1959, and fabrication specification dated March 10, 1958, revised March 19, 1958, manufactured by Marine Safety Equipment Corporation, specification dated March 10, 1958, revised March 19, 1959, manufactured by Foot of Wycoff Road, Farmingdale, New Jersey 07727, effective January 3, 1974. (It is an extension of Approval No. 160.027/53/0 dated March 25, 1969.)

BUOYS, LIFE, RING, UNICELLULAR PLASTIC

Approval No. 160.050/56/0, 30-inch ring life buoy, fibrous glass wrapped unicellular plastic foam core, Specification dated March 5, 1969 and Drawing No. 269 dated February 1, 1969, Type IV PFD, manufactured by Gladding Corporation, Flotation Division, Box 8277, Greenville, South Carolina 29604, formerly Style-Crafters, Inc., effective January 2, 1974. (It is an extension of Approval No. 160.050/56/0 dated March 19, 1969 and change of name of manufacturer.)

Approval No. 160.050/57/0, 24-inch ring life buoy, fibrous glass wrapped unicellular plastic foam core. Specification dated March 5, 1969 and Drawing No. 269 dated February 1, 1969, Type IV PFD, manufactured by Gladding Corporation, Flotation Division, Box 8277, Greenville, South Carolina 29604, formerly Style-Crafters, Inc., effective January 2, 1974. (It is an extension of Approval No. 160.050/57/0 dated March 19, 1969 and change of name of manufacturer.)

V 39 158 MAR 25 74 XUM

Approval No. 160.050/58/0, 20-inch ring life buoy, fibrous glass wrapped unicellular plastic foam core, Specification dated March 5, 1969 and Drawing No. 269 dated February 1, 1969, Type IV PFD, manufactured by Gladding Corporation, Flotation Division, Box 8277, Greenville, South Carolina 29604, formerly Style-Crafters, Inc., effective January 2, 1974. (It is an extension of Approval No. 160.-050/58/0 dated March 19, 1969 and change of name of manufacturer.)

KITS, FIRST-AID, FOR INFLATABLE LIFE RAFTS

Approval No. 160.054/1/0, Model No. 729 first-aid kit for inflatable life rafts, dwg. revised November 27, 1959, manufactured by Marion Health and Safety, Inc., 1515 Elmwood Road, Rockford, Illinois 61101, formerly Medical Supply Company, effective January 16, 1974. (It supersedes Approval No. 160.054/1/0 dated January 19, 1970 to show change of name and address of manufacturer.)

LIFE PRESERVERS, UNICELLULAR PLASTIC FOAM, ADULT AND CHILD FOR MERCHANT VESSELS

Approval No. 160.055/56/1, Non-Standard Model 8115, adult molded cloth covered unicellular plastic foam life preserver, dwg. No. 8115/10/67, revision 2 dated March 25, 1968, Type I PFD, approved for use on all vessels, manufactured by Atlantic-Pacific Manufacturing Corporation, 124 Atlantic Avenue, Brooklyn, New York 11201, effective January 8, 1974. (It supersedes Approval No 160.055/56/0 dated February 2, 1973 to show minor modification in construction.)

Approval No. 160.055/92/0, Standard Model 63, adult cloth-covered unicellular plastic foam life preserver, U.S.C.G. Specification Subpart 160.055, and dwg. No. 160.055–IB (Sheet 1 & 2), Type I PFD, manufactured by West Products Corporation, 236 South Street, Newark, New Jersey 07093, effective January 2, 1974. (It is an extension of Approval No. 160.-055/92/0 dated March 21, 1969.)

Approval No. 160.055/93/0, Standard Model 67, child cloth-covered unicellular plastic foam life preserver, U.S.C.G. Specification Subpart 160.055, and dwg. No. 160.055–IB (Sheet 3 & 4), Type I PFD, manufactured by West Products Corporation, 236 South Street, Newark, New Jersey 07093, effective January 2, 1974. (It is an extension of Approval No. 160.055/93/0 dated March 21, 1969.)

FIRE-PROTECTIVE SYSTEMS

Approval No. 161.002/8/1, Detex Newman Watchclock and Models D, FKDS, FKDL, SK, and SKL Watchclock Key Stations, Detex Newman Watchclock data sheet N–10–67 and Detex Watchclock Stations data sheet S–10–67, components for a watchman's supervisory system, manufactured by Detex Corporation, 53 Park Place, New York, New York 10007, effective January 2, 1974. (It is an extension of Approval No. 161.002/8/1 dated February 25, 1969.)

PRESSURE VACUUM RELIEF VALVES AND SPILL VALVES FOR TANK VESSELS

Approval No. 162.017/111/2, Tate Temco 2½" pressure-vacuum relief valve, Models 53–25F and 53–45F, Tate Temco 2½" pressure-vacuum relief valve, Model 53–65F, Tate Temco 4" pressure-vacuum relief valve, Models 53–25F, 53–45F and 53–65F, Tate Temco 6" pressure-vacuum relief valve, Models 53–25F, 53–45F and 53–65F, all Models are bronze construction, manufactured by Tate Temco, Inc., 1205 S. Carey Street, Baltimore, Maryland 21230, effective January 28, 1974. (It supersedes Approval No. 162.017/111/1 dated September 27, 1973.)

Approval No. 162.017/112/2, Tate Temco 2½" pressure-vacuum relief valve, Models 53–20F and 53–40F, Tate Temco 2½" pressure-vacuum relief valve, Model 53–60F, Tate Temco 4" pressure-vacuum relief valve, Models 53–20F, 53–40F and 53–60F, Tate Temco 6" pressure-vacuum relief valve, Models 53–20F, 53–40F and 53–60F, all Models are bronze construction, valves identical to those that were approved by Certificate of Approval 162.017/111/0 except for the "Manual Control" feature, manufactured by Tate Temco, Inc., 1205 S. Carey Street, Baltimore, Maryland 21230, effective January 28, 1974. (It supersedes Approval No. 162.017/112/1 dated September 27, 1973.)

SAFETY RELIEF VALVES, LIQUEFIED COMPRESSED GAS

Approval No. 162.018/35/4, 4" Style JQ safety relief valve for liquefied chlorine service (corrosive), approved for a maximum set pressure of 300 p.s.i., discharge capacity 15,350 cubic feet per minute of air measured at 60° F. and 14.7 p.s.i.a., O.D. of inlet flange has been reduced from 10" to 9½", manufactured by Crosby Valve & Gage Company, Wrentham, Massachusetts 02093, effective January 9, 1974. (It supersedes Approval No. 162.018/35/3 dated June 28, 1973.)

Approval No. 162.018/80/0,

Type	Seat	Inlet size	Orifice	MAWP[1]
81	Plastic	(3/4", 1", 1½"	dash 2 through 8	2160 p.s.i.g.
		1½", 2"	F, G, H, J	2160 p.s.i.g.
83	O-Ring	(3/4", 1", 1½"	dash 2 through 8	2160 p.s.i.g.
		1½", 2"	F, G, H, J	2160 p.s.i.g.

1. The seat material shall be compatible with the intended service (chemistry, temperature).

2. Refer to manufacturers literature for actual orifice area. Nozzle coefficient for all sizes is 0.816.

3. Service temperatures for the body and seat materials shall be as indicated on AGCO dwg. 3–5424. Body materials may require impact testing for service temperatures below 0°F.

Manufactured by Anderson, Greenwood & Company, P.O. Box 1097, Bellaire, Texas 77401, effective January 25, 1974.

INDICATORS, BOILER WATER LEVEL, SECONDARY TYPE

Approval No. 162.925/107/0, Penberthy Houdaille Series 52A, 58A, 31A, 34A, 62A, 64A, 36A, 37A, 68A, 38A, 32A and 35A direct reading tubular type secondary boiler water level indicators and Series SB try cock, maximum allowable working pressure 150 p.s.i. saturated steam, manufactured by Penberthy Houdaille, P.O. Box 112, Prophetstown, Illinois 61277, effective January 18, 1974.

Approval No. 162.025/108/0, Penberthy Houdaille Series C–23, C–24, C–25 and C–26 direct reading tubular type secondary boiler water level indicators and Series SB try cock, maximum allowable working pressure 150 p.s.i. saturated steam, manufactured by Penberthy Houdaille, P.O. Box 112, Prophetstown, Illinois 61277, effective January 18, 1974.

Approval No. 162.025/109/0, Penberthy Houdaille Series E–13, E–14, E–15 and E–16 direct reading tubular type secondary boiler water level indicators and Series SB try cock, maximum allowable working pressure 150 p.s.i. saturated steam, manufactured by Penberthy Houdaille, P.O. Box 112, Prophetstown, Illinois 61277, effective January 18, 1974.

HALON 1301 FIXED FIRE EXTINGUISHING SYSTEM

Approval No. 162.029/1/0, FiQuench Model 5–BC1301–M, pre-engineered Halon 1301 extinguishing system unit, stored pressure type, identical to that described in Underwriters' Laboratories, Inc. report file EX2828, Project 72NK848 dated November 29, 1972, approved for use on recreational boats and certain other uninspected vessels, manufactured by Fike Metal Products Corporation, 704 S. 10th Street, Blue Springs, Missouri 64015, effective January 14, 1974.

BACKFIRE FLAME CONTROL, GASOLINE ENGINES; FLAME ARRESTERS; FOR MERCHANT VESSELS AND MOTORBOATS

Approval No. 162.041/176/0, Barbron backfire flame arrester, part No. 57221B, brass element, base, and cover, alternate material for base and cover is anodized aluminum (57221A), all-aluminum models (not anodized) 57221AA, base is 2.25" high, opening in base is 5.09", manufactured by Barbron Corporation, 14580 Lesure Avenue, Detroit, Michigan 48227, effective December 28, 1973.

INCOMBUSTIBLE MATERIALS FOR MERCHANT VESSELS

Approval No. 164.009/118/0, "NA DISCO" fibrous glass cloth-faced fibrous glass type incombustible material identical to that described in National Bureau of Standards Test Report No. TG10210–2180:FR3717 dated April 1, 1969 and Jamestown Fiber Glass, Inc. letter dated March 5, 1969 as Sample A, approved in a density of 4 pounds per cubic foot, basic board is manufactured by Owens Corning Fiberglas Corporation Plant located at Toledo, Ohio, manufactured by Jamestown Fiber Glass, Inc., 146 Blackstone Avenue, Jamestown, New York 14701, effective January 8, 1974. (It is an extension of Approval No. 164.009/118/0 dated April 9, 1969.)

Approval No. 164.009/124/0, "Thermafiber" mineral wool panels identical to that described in National Bureau of Standards Test Report No. TG10230–27; FR 3644 dated December 16, 1964 and U.S.C.G. letter dated March 14, 1969, approved in density of 4 through 8 pounds per cubic foot, manufactured by United States Gypsum Company, 300 West Adams Street, Chicago, Illinois 60606, Plant: South Plainfield, New Jersey, effective January 8, 1974. (It is an extension of Approval No. 164.009/124/0 dated March 14, 1969 and change of address of manufacturer.)

Approval No. 164.009/172/0, "Incombustible Hullboard SGU—(Unscalped)" glass fiber type incombustible hull board identical to that described in National Bureau of Standards Test Report No. FR 3860 dated December 10, 1973, approved in 1.6 to 2.0 pounds per cubic foot density, manufactured by Johns-Manville Sales Corporation, Denver, Colorado 80217, Plant location: Richmond, Indiana, effective January 25, 1974. (It supersedes Approval No. 164.009/172/0 dated January 10, 1974 to show minor changes.)

Dated: March 15, 1974.

W. F. REA, III,
Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

Federal Highway Administration

MISSOURI; PROPOSED ACTION PLAN

Availability for Public Review

The Missouri State Highway Department has submitted to the Federal Highway Administration of the U.S. Department of Transportation a proposed Action Plan as required by Policy and Procedure Memorandum 90–4 issued on June 1, 1973. The Action Plan outlines the organizational relationships, the assignments of responsibility, and the procedures to be used by the State to assure that economic, social and environmental effects are fully considered in developing highway projects and that final decisions on highway projects are made in the best overall public interest, taking into consideration: (1) needs for fast, safe and efficient transportation; (2) public services; and (3) costs of eliminating or minimizing adverse effects.

The proposed Action Plan is available for public review at the following locations:

1. Missouri State Highway Department, State Highway Building, 119 West Capitol Avenue, Jefferson City, Missouri 65101.
2. Missouri Division Office—FHWA, 209 Adams Street, Jefferson City, Missouri 65101.
3. FHWA Regional Office—Region 7, 6301 Rickhill Road, Second Floor, Colonial Square Building, Kansas City, Missouri 64131.
4. U.S. Department of Transportation, Federal Highway Administration, Environmental Development Division, Nassif Building—Room 3246, 400–7th Street, S.W., Washington, D.C. 20590.

Comments from interested groups and the public on the proposed Action Plan are invited. Comments should be sent to the FHWA Regional Office shown above before April 20, 1974.

Issued on March 19, 1974.

NORBERT T. TIEMANN,
Federal Highway Administrator.

ATOMIC ENERGY COMMISSION

[Docket No. 50–333]

JAMES A. FITZPATRICK NUCLEAR POWER PLANT

Notice of Availability of Decision

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulations set forth in 10 CFR Part 50, Appendix D, paragraphs A.9 and A.11, notice is hereby given that a Decision dated January 29, 1974, by the Atomic Safety and Licensing Appeal Board in the above captioned proceeding, which relates to the Atomic Safety and Licensing Board's Initial Decision dated November 12, 1973 and Supplemental Initial Decision dated January 10, 1974, authorizing issuance of an operating license to the Power Authority of the State of New York and Niagara Mohawk Power Corporation for operation of the James A. FitzPatrick Nuclear Power Plant, Unit 1 located on the southeast shore of Lake Ontario in Oswego County, New York, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and in the Oswego City Library, 120 East Second Street, Oswego, New York 13126.

The Decision is also being made available at the New York State Office of Planning Services, 488 Broadway, Albany, New York 12207 and at the Central New York Regional Planning and Development Board, 321 East Water Street, Syracuse, New York 13202.

Based upon the record developed in the public hearing in the above captioned matter, the Decision modified in certain respects the Atomic Safety and Licensing Board's Initial Decision, and its Supplemental Initial Decision, as well as the contents of the Final Environmental Statements relating to the operation of the FitzPatrick Nuclear Power Plant, prepared by the Commission's Directorate of Licensing. Copies of the Initial Decision, the Supplemental Initial Decision and the Final Environmental Statement are also available for public inspection at the above designated locations.

Pursuant to the provisions of 10 CFR Part 50, Appendix D, Section A.11, the Initial Decision and Supplemental Initial Decision by the Atomic Safety and Licensing Board and the Final Environmental Statement are deemed modified to the extent that the findings and conclusions relating to environmental matters contained in the Decision are different from those contained in the Initial Decision, the Supplemental Initial Decision, and the Final Environmental Statement dated March 1973. As required by Appendix D, Section A.11, a copy of the Decision, which modifies the previously described documents, is being transmitted to the Council on Environmental Quality and has been made available to the public as noted herein.

Single copies of the Decision by the Atomic Safety and Licensing Appeal Board; the Initial Decision and Supplemental Initial Decision by the Atomic Safety and Licensing Board; and the Final Environmental Statement may be obtained by writing the U.S. Atomic Energy Commission, Regulation, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland this 18th day of March, 1974.

For the Atomic Energy Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Project Branch 2–1 Directorate of Licensing.

[FR Doc.74–6752 Filed 3–22–74;8:45 am]

[Docket Nos. 50–327, and 50–328]

TENNESSEE VALLEY AUTHORITY

Notice of Receipt of Application

Notice is hereby given that the Atomic Energy Commission (the Commission) has received an application for facility operating licenses from the Tennessee Valley Authority (the applicant) which would authorize the applicant to possess, use, and operate the Sequoyah Nuclear Plant, Units 1 and 2, two pressurized water nuclear reactors (the facilities), located on the applicant's site on the west shore of Chickamauga Lake in Hamilton County, Tennessee. Each unit would operate at a steady state reactor core power level of 3411 megawatts thermal.

The Commission will consider the issuance of facility operating licenses to the Tennessee Valley Authority, which would authorize the applicant to possess, use and operate the Sequoyah Nuclear Plant, Units 1 and 2, in accordance with the provisions of the licenses and the technical specifications appended thereto, upon: (1) The completion of a favorable safety evaluation on the application by the Commission's Directorate of Licensing; (2) the receipt of a report on the applicant's application for facility operating licenses by the Advisory Committee on Reactor Safeguards; and (3) a finding by the Commission that the application for the facility licenses, as amended, complies with the requirements

V 39158
MAR 25 74
XUM

of the Atomic Energy Act of 1954 as amended (Act), and the Commission's regulations in 10 CFR Chapter I. The Tennessee Valley Authority, as an agency of the Federal Government, and as the "lead agency" under the guidelines of the Council on Environmental Quality, has already prepared Draft and Final Environmental Statements for the facilities. The applicant's Final Environmental Statement incorporates comments by the Commission on the Draft Environmental Statement.

Construction of the facilities was authorized by Construction Permit Nos. CPPR–72 and CPPR–43, issued by the Commission on May 27, 1970. Construction of Unit 1 is anticipated to be completed by December 1, 1975, and Unit 2 by August 1, 1976.

Prior to issuance of any operating licenses, the Commission will inspect each facility to determine whether it has been constructed in accordance with the application, as amended, and the provisions of the Construction Permits. In addition, the licenses will not be issued until the Commission has made the findings reflecting its review of the application under the Act, which will be set forth in the proposed licenses, and has concluded that issuance of the licenses will not be inimical to the common defense and security or to the health and safety of the public. Upon issuance of the licenses, the applicant will be required to execute an indemnity agreement as required by section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

In addition to the above, the facility is subject to the provisions of section B of Appendix D to 10 CFR Part 50, which sets forth procedures applicable to review of environmental considerations for production and utilization facilities for which construction permits or operating licenses were issued in the period January 1, 1970 to September 9, 1971. These provisions require that a hearing be held to consider whether the construction permits should be continued, modified, terminated or appropriately conditioned to protect environmental values. With respect to this consideration, notice is hereby given, pursuant to the Act and the regulations in 10 CFR Part 2, Rules of Practice, and Appendix D to 10 CFR Part 50, Implementation of the National Environmental Policy Act of 1969, that a hearing will be held in the captioned proceeding by an Atomic Safety and Licensing Board (Board) at a time and place to be fixed by subsequent order of the Board to consider and make determinations on the matters set forth below.

1. In the event that this proceeding is not a contested proceeding as defined by 10 CFR 2.4(n) of the Commission's rules of practice, the Board will, without conducting a de novo evaluation of the application, determine whether the environmental review conducted by the applicant pursuant to NEPA has been adequate.

2. In the event that this proceeding is a contested proceeding, the Board will decide any matters in controversy among the parties within the scope of Appendix D to 10 CFR Part 50, with regard to whether, in accordance with the requirements of Appendix D to 10 CFR Part 50, the construction permits should be continued, modified, terminated, or appropriately conditioned to protect environmental values.

3. Regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D to 10 CFR Part 50, (a) determine whether the requirements of section 102(2)(C) and (D) of NEPA and Appendix D to 10 CFR Part 50 of the Commission's regulations, considering that the applicant is an agency of the Federal Government and the "lead agency" for these facilities under the guidelines of the Council on Environmental Quality, have been complied with in this proceeding; (b) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view toward determining the appropriate action to be taken; and (c) determine, after weighing the environmental, economic, technical, and other benefits against environmental costs and considering available alternatives, whether the construction permits should be continued, modified, terminated or appropriately conditioned to protect environmental values.

The Board will decide whether, in accordance with the applicable requirements of Appendix D of 10 CFR Part 50, considering that the applicant is an agency of the Federal Government and the "lead agency" for these facilities under the guidelines of the Council on Environmental Quality, the operating licenses should be issued as proposed.

The hearing will be scheduled to begin in the vicinity of the site of the proposed facility. The Board, which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel, consists of Edward Luton, Esq., Chairman, Dr. George C. Anderson, and Dr. Hugh C. Paxton.

Pursuant to 10 CFR 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

An answer to this notice, pursuant to the provisions of 10 CFR Part 2.705, must be filed by the applicant by April 15, 1974.

By April 25, 1974, the applicant may file a request for a hearing with respect to issuance of the facility operating license and any person whose interest may be affected by this proceeding may file a petition for leave to intervene (1) with respect to the issuance of the facility operating license; or (2) with respect to whether, considering those matters covered by Appendix D to 10 CFR Part 50, the construction permits should be continued, modified, terminated, or appropriately conditioned to protect environmental values. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed within the time prescribed in this notice, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

A petition for leave to intervene must be filed under oath or affirmation in accordance with the provisions of 10 CFR 2.714. As required by 10 CFR 2.714, a petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., by April 25, 1974. A copy of the petition should also be sent to the Chief Hearing Counsel, Office of the General Counsel, Regulation, U.S. Atomic Energy Commission, Washington, D.C. 20545 and to Robert H. Marquis, General Counsel, 629 New Sprankle Building, Knoxville, Tennessee 37919, attorney for the applicant.

A petition for leave to intervene which is not timely will not be granted unless the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition determines that the petitioner has made a substantial showing of good cause for failure to file on time and after considering those factors specified in 10 CFR § 2.714(a)(1)(4) and § 2.714(d).

For further details pertinent to the matters under consideration, see the application for the facility operating licenses dated January 31, 1974, and the Tennessee Valley Authority's Final Environmental Statement dated February 1974, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., and at the Chattanooga Public Library, 601 McCalley Street, Chattanooga, Tennessee. As they become available, the following documents may be inspected at the above locations: (1) The Safety Evaluation report prepared by the Directorate of Licensing; (2) the report of the Advisory Committee on Reactor Safeguards on the application for facility operating licenses; (3) the proposed facility operating licenses; and (4) the technical specifications, which will be attached to the proposed operating licenses.

Copies of items (1), (2) and (3), when available, may be obtained by request to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

For the Atomic Energy Commission.

Dated at Germantown, Maryland, this 12th day of March, 1974.

PAUL C. BENDER,
Secretary of the Commission.

[Docket 25427]

Notice of Oral Argument

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that oral argument in this proceeding is assigned to be held before the Board on May 15, 1974, at 10:00 a.m. (local time) in Room 1027, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C.

Dated at Washington, D.C., March 19, 1974.

[SEAL] RALPH L. WISER,
Chief Administrative Law Judge.

[FR Doc.74–6809 Filed 3–22–74;8:45 am]

TRANSPORTATION ASSOCIATION OF AMERICA

Meeting

Notice is hereby given that a presentation will be made by the above Association on April 3, 1974, at 10:00 a.m. (local time) in Room 1027, Universal Building, 1825 Connecticut Avenue, NW., Washington, D.C.

Dated at Washington, D.C., March 20, 1974.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

MANAGEMENT-LABOR TEXTILE ADVISORY COMMITTEE

Notice of Meeting

The Management-Labor Textile Advisory Committee will meet at 2 p.m. on April 3, 1974, in Room 4833, Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230.

The Committee, which is comprised of 40 members having special expertise in the textile and apparel industry, advises Department officials on conditions in the textile industry and on trade in textiles and apparel.

The agenda for the meeting is as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public. The public will be permitted to file written statements with the committee before or after the meeting. To the extent time is available at the end of the meeting the presentation of oral statements will be allowed.

Portions of future meetings which concern subjects not listed above will be open to public participation unless it is determined, in accord with section 10(d) of the Federal Advisory Committee Act and the OMB-Justice memorandum on Advisory Committee Management, that specifically identified portions will be closed.

Further information concerning the Committee may be obtained from Arthur Garel, Director, Office of Textiles, Main Commerce Building, U.S. Department of Commerce, Washington, D.C. 20230.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.74–6914 Filed 3–22–74;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

PEUGEOT AND ISUZU MOTORS

1976 Nitrogen Oxide Standard Suspension Request and Procedures for Disposition

Section 202(b)(5)(B) of the Clean Air Act, as amended, provides that at any time after January 1, 1973, any automobile manufacturer may file with the Administrator of the Environmental Protection Agency an application requesting the suspension for one year only of the effective date, with regard to that manufacturer, of the nitrogen oxides emission standard applicable to light duty vehicles manufactured beginning with the 1976 model year.

If the Administrator determines that such suspension should be granted, he must simultaneously with such determination prescribe by regulation an interim emission standard applicable to light duty vehicles manufactured during the 1976 model year.

On July 30, 1973, the Administrator granted to Chrysler Corporation, Ford Motor Company, and General Motors Corporation a one-year suspension of the effective date of the statutory 1976 light duty vehicle nitrogen oxides emission standard. The Administrator simultaneously established an interim NO_x emission standard of 2.0 grams per mile applicable to each applicant's 1976 model year vehicles (see 38 FR 22474, August 21, 1973).

The Administrator's decision was based on findings required by section 202(b)(5)(D)(i), (ii), (iii), and (iv) of the Clean Air Act, as amended. EPA regards findings (i) (a suspension is essential to the public interest) and (iii) and (iv) (technology required to meet the standards is not generally available) as applicable to the automobile industry as a whole and, hence, conclusive as to any applications for suspension of the 1976 NO_x statutory standard. The remaining finding, that the applicant has made all good faith efforts to meet the statutory standard (section 202(b)(5)(D)(ii)), will be made with respect to each applicant on the basis of an application, and after adequate time for public review and comment. A decision granting or denying any application will be made within 60 days after receipt thereof. Any manufacturer granted a suspension will be subject to the interim 2.0 grams per mile NO_x standard established by the July 30, 1973 decision.

On Friday, December 28, 1973, the Administrator announced receipt of several additional requests for suspension of the 1976 NO_x standard, and delineated procedures for disposition of those applications and all other applications for suspension filed with the Administrator prior to January 4, 1974 (see 38 FR 35528). Then on February 1, 1974 (see 39 FR 4132), the Administrator granted suspension of the 1976 NO_x emission standard to sixteen (16) additional manufacturers. Subsequently, two other requests for suspension were received:

V 39 58 MAR 25 74 XUM

Automobiles Peugeot (received on February 13, 1974), and Isuzu Motors (received on February 22, 1974).

The procedures for disposition of these two applications and all other requests for suspension under section 202(b)(5)(B) of the Act, filed with the Administrator prior to April 5, 1974, will be those procedures set forth in the aforementioned December 28, 1973, FEDERAL REGISTER notice, which are as follows: (i) The applications will be made available for public review and comment; (ii) the Administrator will conduct a public hearing, if, on the basis of public comments received, he determines a useful purpose would be served thereby (such hearing will be announced by FEDERAL REGISTER notice); (iii) each application will be reviewed by EPA to determine whether the applicant made all good faith efforts; (iv) if any application is deemed deficient the applicant will be notified by EPA to supplement his suspension request and, if the applicant fails to satisfactorily revise the application, the applicant will be required to appear and testify at a public hearing; and (v) the Administrator will issue by FEDERAL REGISTER notice his decision to grant or deny the respective applications on or before the 60th day from the day of receipt of such applications.

Any interested person may participate in this procedure through the filing of written comments or information with the Director, Mobile Source Enforcement Division, Environmental Protection Agency, Room 3220, 401 M Street SW., Washington, D.C. 20460 on or before April 12, 1974.

Any person who provides written information for consideration may be required, upon 24 hours notice, to appear at a hearing, if held, to respond to questions by the hearing panel or by such other interested persons as the panel deems appropriate at any time prior to conclusion of the hearing.

Presentations by interested persons shall be addressed to whether the applicant has made all good faith efforts to meet the standard.

The applications and such portions of the applicants' supporting documentation as may properly be made public will be available for public inspection in the Freedom of Information Office, Environmental Protection Agency, Room 227, 401 M Street SW., Washington, D.C. 20460. Any person may obtain copies of public portions of the applications as provided for by 40 CFR Part 2.

Dated: March 19, 1974.

JOHN QUARLES,
Acting Administrator.

MOTOR VEHICLE POLLUTION CONTROL

Technological Feasibility of Meeting Various Oxides of Nitrogen Emission Standards

The Environmental Protection Agency has submitted the following request for information for the National Academy of Sciences pursuant to a Congressionally mandated study being conducted by the Academy on the technological feasibility of meeting the emissions standards required by the Clean Air Act.

ANNOUNCEMENT AND REQUEST FOR INFORMATION

The Committee on Motor Vehicle Emissions of the National Academy of Sciences is seeking information which will aid its study of vehicle emission control technology.

Since early 1971, the Committee on Motor Vehicle Emissions of the National Academy of Sciences has been conducting a comprehensive study and investigation of the technological feasibility of meeting U.S. light duty motor vehicle emission standards. This study is in response to a request from Congress embodied in section 202(c) of the Clean Air Act (42 U.S.C. § 185f-1(c)). From time to time, the Committee has presented the results of its continuing investigation to Congress, the U.S. Environmental Protection Agency, and the general public.

The phase of the study currently being conducted by the Committee deals primarily with emission control of oxides of nitrogen (NO_x). The Committee will investigate the technological feasibility of meeting various assumed maximum permissible levels of NO_x emissions ranging from 3.1 grams per mile to 0.4 grams per mile. Hydrocarbon and carbon monoxide emissions and control technology will also be considered to the extent that they are related to and interact with the primary thrust of the study. The motor vehicle emission control systems to be evaluated will include: the conventional internal combustion engine using various emission control options such as mixture preparation (advanced carburetors, electronic fuel injection, mechanical fuel injection), ignition systems, exhaust reactors, catalysts (oxidizing, reducing and three-way), exhaust gas recirculation and electronic controls (e.g., electronic fuel injection with feedback controls); and near-term alternative automotive power systems such as the stratified-charge engine, the diesel engine, and the rotary engine. The time frame of primary interest to the Committee is 1976–1980.

For the purposes of the study, the Committee defines the determination of "technological feasibility" to include the following:

1. Feasibility of developing and designing an emission control system that would enable compliance with various emission standards as judged by the certification procedures prescribed by the Environmental Protection Agency.
2. Feasibility of mass producing systems of promising design.
3. Projected performance of such emission control systems in customer usage, including fuel economy and the requirements for maintenance necessary to assure continuing reliability.
4. The cost, per vehicle, associated with acquisition, maintenance and operation of the emission control system.

Emission control data to be collected by the Committee during the course of its study will typically include emissions data, a comprehensive description of the emission control system tested, vehicle characteristics and weight of the vehicle tested, the type of fuel used, the fuel consumption, the test procedure used, the purpose of the test, scheduled and unscheduled maintenance performed during the test, diagnostic and engineering analysis data developed from emission control system and component tests including both successes and failures, and information on the driveability and performance of the vehicle tested. Information will also be collected on basic analysis of emission control systems and feasibility studies.

The Committee will collect information on the manufacturability and costs of emission control systems and related items. Topics considered will include plant requirements and lead time, tooling requirements and lead time, resource requirements, production scheduling, projected vehicle mixes, costs of labor, parts and materials, and vehicle operating costs in terms of fuel consumption and maintenance costs.

Certain other topics will receive special scrutiny by the Committee: fuel economy data, the test procedures used to develop the data, and potential changes in fuel types and characteristics; the performance and durability of motor vehicle emission control systems in use (including performance during high-stress modes of operation) and the effects on emissions, performance, and driveability of emission control systems failure; the problems of adequate vehicle maintenance in use; and data on currently unregulated emissions from motor vehicles. The Committee will also update its review of longer term alternatives to the internal combustion engine.

All submissions to the Committee on Motor Vehicle Emissions (including photographs, documents, components, etc.) will become the property of the National Academy of Sciences unless otherwise requested. Information which is regarded as proprietary or confidential by the person or organization providing the information shall be so labeled in advance of submittal to the Committee. Such information will be treated in accordance with the Committee on Motor Vehicle Emissions Policy for Handling Confidential Information dated January 24, 1974, a copy of which is available upon request from the Committee on Motor Vehicle Emissions, National Academy of Sciences.

All submissions should be sent to:

Dr. Emerson W. Pugh
Executive Director
Committee on Motor Vehicle Emissions
National Academy of Sciences
2101 Constitution Avenue, NW.
Washington, D.C. 20418

Dated: March 15, 1974.

JOHN QUARLES,
Acting Administrator.

ALTERNATIVE WASTE TREATMENT MANAGEMENT TECHNIQUES AND SYSTEMS

Notice of Availability

Notice is hereby given that the Environmental Protection Agency (EPA) has published, in proposed form, a report entitled "Alternative Waste Treatment Management Techniques and Systems for Best Practicable Waste Treatment" pursuant to section 304(d)(2) of the Federal Water Pollution Control Act, as amended. (33 U.S.C. 1251, 1314(d)(2); 86 Stat. 816 et seq.; Pub. L. 92-500) ("The Act").

Section 304(d)(2) of the Act provides, in pertinent part, that the Administrator of EPA is to publish, after consultation with appropriate Federal and State agencies and other interested persons, information on alternative waste treatment management techniques and systems available to implement section 201 of the Act.

Section 201(b) of the Act provides, in pertinent part, that waste treatment management plans and practices shall provide for the application of the best practicable waste treatment technology before any discharge into receiving waters. Section 201(g)(2) provides, in pertinent part, that the Administrator shall not make grants from any funds authorized for any fiscal year beginning after June 30, 1974 for treatment works unless the grant applicant has demonstrated that alternative waste management techniques have been studied and evaluated and the works proposed for grant assistance will provide for the application of the best practicable waste treatment technology over the life of the works.

The report contains information on the three major alternative management techniques: land application; reuse; and treatment and discharge with an extensive bibliography on each technique.

The report is available for inspection and copying at the EPA Information Center, Room 227, West Tower, Waterside Mall, 4th and M Streets SW., Washington, D.C. Copies are being sent to all EPA Regional Offices and State water pollution control agency offices. An additional limited number of copies is available. Persons wishing to obtain a copy may write EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460; attention: Mr. Philip B. Wisman (A-107).

Interested persons are invited to comment on the proposed report by submitting written comments, in triplicate, to the Director, Municipal Construction Division, Office of Water Program Operations, Environmental Protection Agency, Washington, D.C. 20460. Comments may be submitted on or before May 9, 1974.

Dated: March 15, 1974.

JOHN QUARLES,
Acting Administrator.

FEDERAL ENERGY OFFICE

EMERGENCY ADVISORY COMMITTEE FOR NATURAL GAS; SUBCOMMITTEE ON LP-GAS SUPPLY AND DEMAND

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that the Subcommittee on LP-Gas Supply and Demand of the Emergency Advisory Committee for Natural Gas will hold a meeting on Tuesday, March 26, 1974 at 2:30 p.m. in Room 595, Federal Court House, 19th and Stout Street, Denver, Colorado. The committee was established to advise the Administrator, FEO, with direct and timely access to the technical knowledge possessed by a wide range of highly qualified independent businessmen engaged in the movement and distribution of LP-Gas supplies. The agenda for the meeting is as follows:

1. Opening remarks by the Chairman.
2. Review and discussion of the four Task Group reports:
   a. Supply.
   b. Demand.
   c. Governmental Policy.
   d. Transportation and Storage.
3. Preparation of final subcommittee report to be presented to the full Emergency Advisory Committee.

The meeting is open to the public; however, space and facilities are limited. Further information concerning the meetings may be obtained from Lou D'Andrea, Federal Energy Office, Washington, D.C., telephone: 202/961-8559.

The chairman of the subcommittee is empowered to conduct the meetings in a fashion that will, in his judgment, facilitate the orderly conduct of business.

Minutes of the meeting will be made available for public inspection at the Federal Energy Office, 13th and Pennsylvania Avenue, NW., Washington, D.C.

Issued in Washington, D.C. on March 21, 1974.

WILLIAM N. WALKER,
General Counsel.

WALLENIUS LINE

Notice of a Petition Filed

Notice is hereby given that the following petition has been filed with the Commission for approval pursuant to section 14b of the Shipping Act, 1916, as amended (75 Stat. 762, 46 U.S.C. 813a).

Interested parties may inspect a copy of the proposed contract form and of the petition at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126 or at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments with reference to the proposed contract form and the petition including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed contract system shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the proposed contract form and the petition (as indicated hereinafter), and the statement should indicate that this has been done.

Notice of Application to Modify Dual Rate Contract Filed by:

Denning & Wohlstetter
1700 K Street NW.
Washington, D.C. 20006

An application has been filed by Wallenius Line to modify its Merchant's Rate Agreement covering new unboxed automobiles, trucks and miscellaneous four-wheel vehicles from the U.S. North Atlantic and Great Lakes to Europe to includes the United Kingdom. It also corrects the current address of Wallenius' General Agent in the United States.

By Order of the Federal Maritime Commission.

Dated: March 20, 1974.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. RM74-14]

FERTILIZER INDUSTRY

Natural Gas Supply Priority, Senate Resolution and Request for Comments

MARCH 20, 1974.

On February 27, 1974, the United States Senate adopted S. Res. 289,[1] Report No. 93-691, 93rd Congress, 2nd Session, declaring, as the "sense of the Senate", that the Federal Power Commission afford the highest priority of natural gas delivery to the fertilizer industry. The Resolution, which is appended hereto and made a part hereof, states that the productive capacity of the fertilizer industry is not sufficient to meet this Nation's 1974 agriculture production goals. We are requested to do everything in our power to alleviate that situation, which is caused at least in part by the shortfall of natural gas supplies.

In our Statement of Policy issued March 2, 1973,[1a] the initial priority accorded natural gas used by the fertilizer industry could vary depending upon (1) the end-use, i.e., whether the natural gas is used as feedstock or as fuel and (2) whether the natural gas purchase contract held by the manufacturer is considered firm or interruptible.

If the industrial [2] contract is firm [3], the portion of natural gas requirements for use as a feedstock [4] would be placed in priority (2), subordinate only to gas needed for residential [5] and small commercial [6] requirements.

If the contract is firm, the portion used as fuel would generally fall into priority (3) unless the natural gas is used as boiler fuel [7], which would qualify its inclusion into priorities (4) or (5) depending upon the relative size of the requirement.

If the manufacturer can demonstrate upon a proper showing that its firm fuel requirements can qualify for process gas use,[8] those requirements would be placed into priority (2).

If the fertilizer manufacturer holds an interruptible [9] natural gas purchase contract, its requirements for feedstock, process gas, and plant protection would be placed in priority (3).[10] All other requirements will be placed into priorities (6) thru (9).

Customers of jurisdictional pipeline companies may seek relief from curtailment, first with the pipeline and upon denial of relief to the Commission. The Commission has authorized pipeline companies to grant relief unilaterally in response to emergency situations, including environmental emergencies, during periods where supplemental deliveries are required to forestall irreparable injury to life or property. If the pipeline denied relief to its customers, a petition requesting relief outlining the circumstances warranting extraordinary relief, may be filed with the Commission.

This Commission has no authority over natural gas deliveries to fertilizer manufacturers where the supplier is an intrastate pipeline company or a local distribution company. Curtailment of natural gas deliveries in those circumstances are subject to the authority of respective state public utility commissions. Any requested relief from curtailment should be addressed to those bodies.

Petitions for relief from curtailment have been filed recently with the Commission by or on behalf of the fertilizer or phosphate feed manufacturers and those petitions are presently pending final determination on their merits. The petitions were filed (1) Carnegie Natural Gas Company on behalf of its customer, United States Steel Corporation, on November 21, 1973, in Texas Eastern Transmission Corporation, Docket No. RP73-39-3; (2) Columbia Nitrogen Corporation and Nipro, Inc. on October 23, 1973, in Southern Natural Gas Company, Docket No. RP74-6, et al.; (3) Occidental Chemical Company on January 30, 1974, in South Georgia Natural Gas Company, Docket No. RP74-65-1; on January 22, 1974, Borden, Incorporated and on February 27, 1974, Gardinier, Inc., filed in

[1] A copy of S. Res. 289 is filed as part of the original document.

[1a] Order No. 467-B issued March 2, 1973 amending Order No. 467-A, January 15, 1973, and Order 467, January 8, 1973.

[2] "*Industrial.* Service to customers engaged primarily in a process which creates or changes raw or unfinished materials into another form or product including the generation of electric power." Order No. 493-A, issued October 29, 1973.

[3] "*Firm Service.* Service from schedules or contracts under which seller is expressly obligated to deliver specific volumes within a given time period and which anticipates no interruptions, but which may permit unexpected interruption in case the supply to higher priority customers is threatened." *Ibid.*

[4] "*Feedstock Gas.* Is defined as natural gas used as raw material for its chemical properties increasing an end product." *Ibid.*

[5] "*Residential.* Service to customers which consists of direct natural gas usage in a residential dwelling for space heating, air conditioning, cooking, water heating, and other residential uses." *Ibid.*

[6] "*Commercial.* Service to customers engaged primarily in the sale of goods or services including institutions and local, state, and federal government agencies for uses other than those involving manufacturing or electric power generation." *Ibid.*

[7] "*Boiler Fuel.* Is considered to be natural gas used as a fuel for the generation of steam or electricity, including the utilization of gas turbines for the generation of electricity." *Ibid.*

[8] "*Process Gas.* Is considered to be natural gas used as fuel for the generation of steam or electricity, including the utilization of gas turbines for the generation of electricity." *Ibid.*

[9] "*Interruptible Service.* Service from schedules or contracts under which seller is not expressly obligated to deliver specific volumes within a given time period, and which anticipates and permits interruption on short notice, or service under schedules or contracts which expressly or impliedly require installation of alternate fuel capability." *Ibid.*

[10] On October 29, 1973, in Order No. 493-A, the definition of "alternate fuel capability" was defined to exclude propane and other gaseous fuels. The Commission said: "The clarification made here is specifically intended to permit interruptible industrial consumers to qualify an appropriate portion of their requirements for Priority 3 usage under Order No. 467-B, where the use is for plant protection, feedstock, or process as those definitions are defined in this proceeding."

V 39 158 MAR 25 74 XUM

Florida Gas Transmission Corporation, Docket Nos. RP74–50–3 and RP74–50–4; and (5) on February 13, 1974, North Alabama Gas District filed in Texas Eastern Transmission Corp. in Docket No. RP74–39–8. In the pending petitions of Carnegies Natural Gas Company, Columbia Nitrogen Corporation and Nipro, Inc., and Borden, Inc., the Commission has granted temporary emergency relief pending final determination on the merits through formal hearing.

According to a recent report titled Fertilizer Situation published by the Economic Research Service of the U.S. Department of Agriculture in January, 1974, a domestic shortage of nitrogen fertilizers will exist during 1974. The extent of the shortage, according to the report, depends upon increases in planted acreage, the likelihood of continued strong demand for fertilizer due to high farm products prices, increases in export demand, and domestic transportation problems. The report indicates that exports of nitrogen fertilizers have increased substantially in 1973 compared to 1972 and that these larger exports helped deplete current U.S. inventories, which resulted in restricted domestic availability. The report concludes that already limited production capacity may be affected by the natural gas shortage.

According to data from the Fertilizer Institute, approximately 52 percent of domestic anhydrous ammonia is produced by natural gas purchased from interstate suppliers while the remaining 48 percent is produced by using natural gas purchased from intrastate suppliers. Of the total anhydrous ammonia production, including both interstate and intrastate natural gas supplies, approximately 78 percent is produced from purchases of natural gas under firm contracts, the remaining 22 percent is produced by gas delivered under interruptible purchase contracts. In the interstate market, firm deliveries of natural gas account for 68 percent of anhydrous ammonia production and 32 percent is attributable to deliveries under interruptible contracts. The intrastate market shows firm deliveries of natural gas account for 88 percent of production with the remaining 12 percent of production attributable to deliveries under interruptible contracts.

The efficient and equitable allocation of limited natural gas supply to meet the demands of our industrial and agricultural economy has been impaired by the shortage of alternate supplies of substitutable fuels. Consequently, the unfulfilled demand for natural gas cannot be referred to other fuels to the same degree as in 1970–1972 when the shortfall of natural gas or substitutable fuels was not as widespread as currently and accordingly could not be filled by alternate fuels. We have instituted conservation policies to reduce effective demand for natural gas and electricity which currently consumes over 25 percent of our primary energy resources.[11]

Even if a national policy of conservation reduces electric energy and natural gas consumption by 10 percent, we are still confronted with a national economy of energy scarcity requiring equitable allocations to avoid economic dislocation. In a national energy emergency it is axiomatic that any increase in industrial consumption due to grant of relief from curtailment can be accomplished only by a corresponding diminution of consumption in some other section of the economy.

During the continuance of the national energy emergency, principles of balancing public and private benefits must evolve:

1. First, there must be equitable allocations among industries which utilize substitutable fuels, both by more efficient distribution as well as mandatory allocations.

2. If the basic feedstock for an end use is nonsubstitutable, as in the case of natural gas use for the production of nitrogen fertilizer or for other special applications in the petrochemical industry, there can be no reference to other fuels and the burden of the shortfall must either be equitably shared on a priority basis by the affected industries or a hard and critical choice must be made to grant a higher priority to the industry determined to be most important to the national welfare. Some of the factors bearing upon the resolution of this dilemma are the impact of the allocation of limited supply upon health and safety, employment, productivity, and the national security.

In the allocation of natural gas, unlike the mandatory allocation program for other fuels, the Federal Power Commission must determine priorities on the basis of an evidentiary record developed in a proceeding before the Commission as prescribed by the Natural Gas Act and the Administrative Procedures Act.

In order for this Commission to take meaningful and appropriate action as may be necessary and in the public interest, notice of the Senate Resolution is hereby given for the purpose of soliciting comments from all segments of the natural gas industry, their customers, consumers, and all other interested persons including State regulatory agencies. Specifically, we direct attention to points (1) and (2) of the Resolution and request that the comments be directed to those points as they apply to this Commission and its statutory responsibilities under the Natural Gas Act.

The Commission orders:

Persons wishing to file comments in this matter may do so by filing with the Secretary on or before April 5, 1974, an original and four copies.

By Direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6841 Filed 3–22–74;8:45 am]

[11] Order No. 496, issued November 29, 1973, Emergency Actions for Conservation of Petroleum and Natural Gas Fuel Resources by Electric Utilities, setting a targeted overall nationwide electric energy reduction of 10%, and Order No. 498, issued December 21, 1973, Further Emergency Procedures for Conservation of Natural Gas Directed to Natural Gas Pipeline Companies, Gas Distributors, State Commissions and Gas Consumers, implementing measures for the conservation of natural gas to develop methods of obtaining an objective of a reduction of 10% in the demand for natural gas by improving efficiency of gas utilization.

[Docket No. E–8624]

ARIZONA PUBLIC SERVICE CO.

Filing and Suspending Proposed Fuel Adjustment Clause

MARCH 15, 1974.

On February 12, 1974, Arizona Public Service Company (APS) tendered for filing supplements to 14 wholesale rates schedules and 1 tariff which would include in these schedules and tariff a superseding Fuel Adjustment Clause. APS indicates that it is requesting an effective date of April 1, 1974. APS states that the proposed fuel adjustment clause would result in increased revenues of $4,189,813 (49.1 percent) for the period of April, 1974 through March, 1975.

APS also requests that, in the event the proposed new clause is not accepted, the existing clause be implemented in the interim until the proposed new clause becomes effective. The operation of the existing clause has been frozen since it was not certified pursuant to Order No. 437A–5 following the Phase I price freeze. Certification was not granted because the clause did not conform to the principles of § 35.14 of the Commission's regulations. Arizona states that due to its present tenuous financial position, it would be "seriously hurt" if additional revenues are not forthcoming.

The filing was noticed on February 27, 1974, with comments and petitions to intervene due on or before March 20, 1974. No comments or petitions were received.

Our review indicates that the proposed fuel cost adjustment clause does not conform to § 35.14 of the Commission's regulations. Section 35.14 of the regulations under the Federal Power Act requires that the cost of fuel shall include no items other than those in Account 151. The proposed clause includes items other than Account 151 items. Section 35.14 requires that the fuel adjustment shall apply only to that energy supplied from fossil fuel generation whereas the proposed clause expressly applies to nuclear and hydro generation. Further, § 35.14 states that the intent of the fuel clause is to reflect changes in the fuel components per kilowatt hour of delivered energy cost. The proposed clause is based on estimated costs and implicitly assigns total system losses to the wholesale sales as opposed to the losses applicable to the wholesale customers.

Due to the possibility of APS' suffering substantial revenue loss as a result of continued operations without an effective fuel adjustment clause, we shall accept the proposed clause for filing, and suspend it one day. We shall require that APS file within 20 days amendments to its fuel clause to cure the previously discussed deficiencies. Upon receipt of such filing, and our review thereof, we shall issue such further orders as may be appropriate.

The Commission finds:

(1) It is in the public interest and it is necessary and appropriate to aid in the enforcement of the Federal Power Act that the fuel adjustment clause filed by APS on February 12, 1974, be accepted for filing and suspended for one day.

(2) APS should be required to file within 20 days of the issuance of this order amendments to the proposed fuel adjustment clause so as to cure the deficiencies enumerated herein.

The Commission orders:

(A) The fuel adjustment clause filed by APS on February 12, 1974, is hereby accepted for filing and suspended for one day, until April 2, 1974.

(B) Within 20 days of the issuance of this order, APS shall file amendments to the fuel adjustment clause accepted for filing herein so as to cure the deficiencies enumerated herein.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. E–8187]

BOSTON EDISON CO.

Extension of Time and Postponement of Hearing; Correction

MARCH 14, 1974.

In the notice of extension of time and postponement of hearing and prehearing conference, issued March 8, 1974 and published in the FEDERAL REGISTER March 14, 1974, 39 FR 9858, please change the date of the Prehearing Conference from April 19 to "April 9".

KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6820 Filed 3–22–74;8:45 am]

[Docket No. CP74–234]

CITIES SERVICE GAS CO.

Notice of Application

MARCH 20, 1974.

Take notice that on March 11, 1974, Cities Service Gas Company (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP74–234 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities on its transmission system presently used for service to Continental Oil Company's oil refinery located near Ponca City, Oklahoma, and for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline and regulating facilities to allow for the continued service to said refinery, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon and reclaim regulating facilities and abandon in place approximately 9.81 miles of 6-inch and 7-inch gas pipeline in the Ponca City 6-inch line in Kay County, Oklahoma, and construct and operate approximately 5.62 miles of 6-inch gas pipeline and regulating facilities extending from the existing Burbank 16-inch and Shilder 12-inch pipelines to the Ponca City 6-inch line in Kay County, Oklahoma.

Applicant states that the proposed abandonment and construction is necessitated by the construction of the Kaw Reservoir on the Arkansas River in Kay and Osage Counties, Oklahoma. The estimated cost of the proposed facilities is $183,000 and the total reclamation cost for the proposed abandonment is $640. Applicant states that it will be reimbursed for the full amount of its abandonment and construction costs by the United States Army Corps of Engineers.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 12, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6822 Filed 3–22–74;8:45 am]

[Docket Nos. E–7685, E–7798]

CENTRAL VERMONT PUBLIC SERVICE CORP.

Order Approving Rate Settlement

MARCH 19, 1974.

On October 10, 1973, the Presiding Administrative Law Judge certified to the Commission a proposed settlement agreement in the above separately docketed wholesale rate increase proceedings, together with the record relating thereto. The proposed settlement is jointly sponsored by Central Vermont and its wholesale customers. The settlement agreement, if approved, would resolve all issues in the proceedings, and would result in a reduction of approximately $631,492 annually in Central Vermont's presently effective rates for the period ending June 30, 1973.

Central Vermont filed its proposed increase in rates in Docket No. E–7685 on November 29, 1971. The new rate, designated Rate R, became effective after suspension and subject to refund on June 28, 1972. The proposed increase in Docket No. E–7798 was filed on November 1, 1972, and the new rate, designated Rate R–1, became effective after suspension and subject to refund on June 1, 1973. The Rate R increase amounted to approximately $751,000 annually while the R–1 increase amounted to approximately $278,000 annually, based on sales for years 1970 and 1971 respectively.

The Commission set hearings in both the Rate R and R–1 proceedings, The hearing on Rate R in Docket No. E–7685 is completed, and the Presiding Administrative Law Judge issued his initial decision on August 1, 1973. Hearings on Rate R–1 have not commenced. All further proceedings in both dockets have been deferred pending action on the proposed settlement agreement.

Notice of the proposed settlement agreement was issued on November 6, 1973, providing for the filing of comments by interested parties on or before November 23, 1973. No comments were received in response to the notice.

The principal provisions of the proposed settlement agreement may be summarized as follows:

(1) The settlement provides for separate rates to cover three successive periods. The first rate, designated modified Rate R, will apply from June 28, 1972, through May 31, 1973. The second rate, designated modified Rate R–1, will apply from June 1, 1973, through June 30, 1973. The third rate, designated Rate R–2, will apply during the period commencing July 1, 1973, and continuing until such rate is changed in accordance with the provisions of the Federal Power Act.

V 39 N 58 MAR 25 74 XUM

(2) The modified Rates R and R-1 provide a single rate for both full and partial requirements service. Rate R-2 provides separate rates for these types of service, designated Rates R-2F and R-2P, respectively.

(3) Billing determinants for demand charges under Rate R-2 will be based on hourly interval readings rather than 15 minute interval readings.

(4) The ratchet provision for partial requirements service under Rate R-2 will be 50 percent rather than 90 percent.

(5) There is a moratorium on the filing of any rate changes or rate complaints prior to January 1, 1974.

(6) The settlement provides for certain additional clarifying and perfecting modifications in the general terms and conditions of wholesale service.

The settlement rates are based on a settlement cost of service as set forth in Appendix II of the settlement agreement and summarized in Appendix A hereto. The settlement rates result in an indicated rate of return on Central Vermont's net investment rate base of 4.57 percent. We find the settlement costs, return, and resulting rates to be reasonable, and they are accordingly approved.

Based on our review of the record in these proceedings, including the settlement agreement itself, the filings, documents and pleadings submitted by the parties, the evidence, and the transcripts of hearings and conferences which have been held, we conclude that the settlement agreement represents a reasonable resolution of the issues in these proceedings in the public interest, and that accordingly the settlement should be approved.

The Commission finds:

The settlement agreement certified by the Presiding Judge to the Commission in these dockets on October 10, 1973, should be approved and made effective.

The Commission orders:

(A) The settlement agreement certified by the Presiding Judge to the Commission in these dockets on October 10, 1973, is hereby approved and made effective.

(B) Within 30 days from the date of this order, Central Vermont shall file with the Commission revised tariff sheets and service agreements in conformity with the settlement agreement as herein approved.

(C) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, or any party or person affected by this order, in any proceeding now pending or hereinafter instituted by or against Central Vermont or any person or party.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

APPENDIX A—CENTRAL VERMONT PUBLIC SERVICE CORPORATION, DOCKET NOS. E-7685, E-7798

SUMMARY COST OF SERVICE TEST YEAR 1971, COMBINED WHOLESALE SERVICE

1. Settlement Revenues, $3,236,030.
2. Operating Expenses, $3,061,853.
3. Operating Income, $174,177.
4. Rate Base, $3,808,478.
5. Rate of Return (line 3 ÷ line 4), 4.57 percent.

[FR Doc.74-6823 Filed 3-22-74;8:45 am]

[Docket No. CP74-233]

COLUMBIA GULF TRANSMISSION CO.

Notice of Application

MARCH 20, 1974.

Take notice that on March 11, 1974, Columbia Gulf Transmission Company (Applicant), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP74-233 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon its Centerville Compressor Station located on Applicant's east supply lateral near Garden City, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon its Centerville Station consisting of a 20,000 horsepower gas turbine-driven compressor unit and related facilities constructed to compress additional quantities of gas which Applicant anticipated receiving from offshore Louisiana. Applicant states that due to changes in delivery conditions the flow of gas to its Centerville Station has been substantially reduced and Applicant, therefore, has no present use for and does not anticipate any future use for the subject compressor facilities at the present location.[1] The application states that upon abandonment the compressor unit will be transferred to gas plant held for future use by Applicant. Applicant also intends to return to Ingersoll-Rand Company a standby compressor unit at the Centerville Station.

Applicant states that the cost involved in the return of the compressor unit is $166,500 and the estimated cost of retiring the other unit is $125,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 12, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene if filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[Docket No. E-8652]

CONNECTICUT LIGHT AND POWER CO.

Proposed Rate Schedule

MARCH 20, 1974.

Take notice that Connecticut Light and Power Company (CL&P), on March 6, 1974, tendered for filing a proposed Emergency Transmission Agreement, dated February 22, 1974, between CL&P, the City of Norwich, the Town of Wallingford, and the Second Taxing District, City of Norwalk.

The proposed rate schedule, CL&P alleges, provides for emergency transmission service to the municipal electric systems of the City of Norwich, Town of Wallingford and Second Taxing District, City of Norwalk, from the proposed effective date of February 22, 1974 until July 1, 1974, through CL&P's transmission facilities. CL&P states that this filing is in accordance with Part 35 of the Commission's regulations.

CL&P states that copies of this proposed schedule have been delivered to all those rendering or receiving service under such rate schedule.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 29, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.74-6825 Filed 3-22-74;8:45 am]

[1] Applicant states offshore gas originally planned to be transported to its east lateral supply line is being transported through Applicant's west supply lateral and deliveries from producing fields attached to its east supply lateral are declining.

[Docket No. RP71-137, etc.]

EL PASO NATURAL GAS CO. AND NORTHWEST PIPE LINE CORP.

Order Granting Motion To Be Included as Party Applicant and for Redesignation of Proceedings

MARCH 19, 1974.

On January 18, 1974, Northwest Pipeline Corporation (Northwest) filed a motion before this Commission to be included as a party applicant, in addition to El Paso Natural Gas Company (El Paso), in the proceedings pending in Docket Nos. RP71-137, RP72-151, RP72-154, RP73-109, RP74-23 and RP74-43. Northwest further requested that such proceedings be redesignated to include Northwest as a party applicant effective January 31, 1974, the effective date of divestiture of El Paso's Northwest Division System to Northwest.

In accordance with the terms of divestiture, El Paso will be liable for any rate refund obligations applicable to the period up to divestiture irrespective of the date such refunds arise. Northwest will be liable for rate refund obligations, if any, applicable to the period subsequent to divestiture. Attached to Northwest's motion was an "Agreement and Undertaking" under which Northwest assumes responsibility and liability for any refunds which ultimately may be required in Docket No. RP73-109 applicable to the period subsequent to the date of divestiture.

The Commission finds:

(1) Since both El Paso and Northwest are to benefit by any rate increases that may be granted and are to be liable for refunds relating to their respective periods of ownership which may be required in the rate proceedings listed above, the granting of Northwest's motion to be included as a party applicant and for redesignation of those proceedings is in the public interest.

The Commission orders:

(A) Northwest Pipeline Corporation shall be included as a party applicant in those proceedings at Docket Nos. RP71-137, RP72-151, RP72-154, RP73-109, RP74-23, and RP74-43 effective January 31, 1974 and such proceedings shall be redesignated to reflect such change.

(B) The Secretary of the Commission shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc. 74-6826 Filed 3-22-74;8:45 am]

[Docket No. CP74-230]

GALAXY ENERGIES, INC.

Notice of Application

MARCH 20, 1974.

Take notice that on March 8, 1974, Galaxy Energies, Inc. (Applicant), 8561 Long Point Road, Suite 107, Houston, Texas 77055, filed in Docket No. CP74-230 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Natural Gas Pipeline Company of America (Natural) at Natural's existing meter station in the Willmar Field, Willacy County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell to Natural up to 5,000 Mcf of gas per day with a gross heating value of at least 1,000 Btu per cubic foot on a dry basis for one year at 70.0 cents per Mcf at 14.65 psia within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

Any person desiring to be heard or to make any protest with reference to said application should on or before April 12, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.74-6827 Filed 3-22-74;8:45 am]

[Docket No. CP74-216 etc.]

INTERSTATE TRANSMISSION ASSOCIATES ET AL.

Notice of Applications

MARCH 20, 1974.

Take notice that on February 26, 1974, Interstate Transmission Associates (ITA), 720 N. Eighth Street, Los Angeles, California 90017, filed in Docket Nos. CP74-216 and CP74-217 applications pursuant to section 7(c) of the Natural Gas Act and Executive Order No. 10485, respectively, for a certificate of public convenience and necessity authorizing the construction and operation of facilities to transport natural gas in interstate commerce for the account of Pacific Interstate Transmission Company (PacIn) and authorizing the construction, operation, maintenance, and connection of facilities at the international boundary to effect the importation of natural gas for PacIn from Canada into the United States. Take further notice that on February 26, 1974, PacIn, 720 N. Eighth Street, Los Angeles, California 90017, filed in Docket No. CP74-218 and CP74-219 applications pursuant to sections 7(c) and 3 of the Natural Gas Act, respectively, for a certificate of public convenience and necessity authorizing the sale for resale of imported Canadian natural gas to Northwest Pipeline Corporation (Northwest), El Paso Natural Gas Company (El Paso), and Southern California Gas Company (SoCal) and for an order authorizing the importation of natural gas from Canada into the United States. Take further notice that on February 28, 1974, Northwest, P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP74-221 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities to transport natural gas in interstate commerce and the transportation of gas for PacIn. Take further notice that on March 6, 1974, El Paso, P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP74-228 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities to transport natural gas in interstate commerce and the transportation of natural gas for

V 39158
MAR 25 74
XUM

PacIn. These proposals are more fully set forth in the applications which are on file with the Commission and open to public inspection.

ITA proposes in Docket No. CP74–217 to construct and operate at the international boundary near Kingsgate, British Columbia, and Eastport, Idaho, 2.6 miles of 26-inch O. D. pipeline to connect the Canadian gas supply to its meter station, which is also to be constructed and operated at the Kingsgate import point.

ITA proposes in Docket No. CP74–216 to construct and operate a 26-inch O. D. pipeline of approximately 373 miles in length from a point near Kingsgate, British Columbia, through the states of Idaho and Washington to Rye Valley, Oregon. ITA proposes to construct and operate two 17,500 horsepower compressor stations on said pipeline in Boundary and Bonner Counties, Idaho, and two meter stations on said pipeline at Meacham and Rye Valley, Oregon. ITA requests, pursuant to a February 7, 1974, gas transportation agreement between it and PacIn, authorization to transport through the proposed facilities, commencing on or about November 1, 1974, a maximum of 443,000 Mcf[1] of the imported natural gas to be delivered for the account of PacIn to Northwest's system at the Meacham and Rye Valley meter stations. ITA states that the proposed transportation service will be rendered on a cost-of-service basis to assure recovery of costs. ITA further states that the proposed pipeline is designed to operate at a pressure of 1,680 psig.

ITA estimates that the total cost for the project in Docket Nos. CP74–216 and CP74–217 will be approximately $121,003,000, to be financed by the issuance of $91,664,000, of 8.5 percent first mortgage bonds and the receipt of $30,625,000, of partnership equity contributions.

PacIn in Docket No. CP74–219 seeks authorization to import approximately 402,800 Mcf of gas per day for a period of six years, commencing on or about November 1, 1974. PacIn indicated that it has contracted to purchase from Pan-Alberta Gas, Ltd. (Pan-Alberta), gas which will be produced in Alberta, Canada. PacIn states that it will pay Pan-Alberta 79.3 cents (Canadian) per Mcf at 14.65 psia for 92 percent of the gas delivered and 65.0 cents (Canadian) per Mcf at 14.65 psia for 8 percent of the gas delivered. PacIn states further that the gas will be imported near Kingsgate, British Columbia, through the facilities to be constructed and operated by ITA, and the PacIn will take possession and title to the gas upon importation.

PacIn in Docket No. CP74–218 proposes to sell the following volumes of the Canadian gas to:

(1) an average of 80,000 Mcf of gas per day to Northwest, to be delivered at Meacham and Rye Valley, Oregon;

(2) an average of 210,000 Mcf of gas per day to El Paso, the Btu equivalent of which is to be delivered to El Paso at Ignacio, Colorado; and

(3) an average of 107,500 Mcf of gas per day to SoCal, the Btu equivalent of which is to be delivered to SoCal at the California-Arizona border.

The applications in Docket Nos. CP74–218, CP74–221 and CP74–216 indicate that these deliveries will be made pursuant to existing transportation agreements between PacIn and ITA, as hereinbefore described, and between PacIn and Northwest.

Northwest in Docket No. CP74–221 proposes to construct and operate a total of 49 miles of 30-inch pipeline, looping its existing 22-inch pipeline, in three separate segments in the states of Oregon and Idaho, two new 7,200 horsepower compressor stations in Baker County, Oregon, and Elmore County, Idaho, stations and one new 2,400 horsepower compressor station on its existing pipeline in Twin Falls County, Idaho, 1,000 additional compressor horsepower at its existing Elmore County Compressor station, and 3,500 additional compressor horsepower at its existing Canyon County, Idaho, compressor station. Northwest proposes to utilize these facilities to effectuate the transportation agreement, dated February 7, 1974, in order to receive its own saleable volume of 88,000 Mcf per day of imported gas, as well as the remaining average volume of 317,500 Mcf per day of imported natural gas it has agreed to transport for the account of PacIn to El Paso's system at Ignacio, Colorado. Northwest requests authorization to transport a maximum daily volume of 342,000 Mcf, or such greater amount as it may through its best efforts be capable of transporting through its system. Northwest states that the volumes to be delivered to El Paso will be adjusted for heating value so that the quantity of heating units delivered to El Paso is the same as those which are received from PacIn. Northwest indicates that PacIn will pay Northwest 10.77 cents per Mcf transportation charge for the gas delivered to El Paso.

Northwest estimates that the cost of the facilities to be constructed will be $23,052,000, which will be financed initially from cash on hand, cash generated from operations and short-term borrowing, which borrowing will be refinanced through the issuance of intermediate and long-term debt securities.

El Paso in Docket No. CP74–228 proposes to construct and operate two 3,350 horsepower gas turbine-driven centrifugal compressor units to be located adjacent to El Paso's Blanco Field Plant on the 24-inch Blanco-to-Ignacio pipeline, two 7,800 horsepower gas turbine-driven compressor units at El Paso's Blanco Field Plant, a 16-inch O. D. check meter run with appurtenances at the Blanco Field Plant. El Paso further proposes the relocation of a 24-inch check meter run from the 24-inch Blanco-to-Ignacio pipeline to a point 500 feet from the Blanco-Ignacio pipeline. All the subject construction and relocation is to occur in San Juan County, New Mexico. El Paso proposes to utilize these facilities to effectuate the transportation and sales agreement, dated February 7, 1974, in order to receive its own saleable volumes of 210,000 Mcf per day of imported gas, as well as the remaining average volume of 107,500 Mcf of imported natural gas it has agreed to transport for the account of PacIn to SoCal's system at Topock, Arizona. El Paso indicates that PacIn will pay El Paso 13.58 cents per Mcf transportation charge for the gas delivered to SoCal.

El Paso estimates the cost of the facilities to be $7,122,803, which will be financed from working funds supplemented, as necessary, by short-term borrowing.

PacIn states that the cost of the imported Canadian natural gas delivered over the six-year life of the project will be 104 U.S. cents per Mcf to Northwest, 114 U.S. cents per Mcf to El Paso, and 128 U.S. cents per Mcf to SoCal.

The Applicants assert that these proposals are required to assure adequate service on the systems of Northwest, El Paso and SoCal and to offset curtailments on their systems.

PacIn states that it is a wholly owned subsidiary of Pacific Lighting Corporation, and that it and Northwest Energy Company, a wholly owned subsidiary of Northwest, have entered into a partnership to create ITA. PacIn states that the capital for the partnership is contributed 51 percent by PacIn and 49 percent by Northwest Energy Company.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 9, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on the applications in Docket Nos. CP74–216, CP74–218, and CP74–228 if no petitions to intervene are filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificates is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants in Docket Nos. CP74–216, CP74–218, and CP74–228 to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6840 Filed 3–22–74;8:45 am]

[1] The transportation agreement between ITA and PacIn indicates that a maximum of 443,100 Mcf per day will be transported in the months of November, December, January, February, and March of each year, and in all other months 402,800 Mcf per day will be transported.

[Docket No. CS72–927]

KALDA CO.

Petition of Waiver of Regulations

MARCH 19, 1974.

Take notice that on February 4, 1974, as amended on February 27, 1974, KALDA Company (Petitioner), 308 City National Building, Wichita Falls, Texas 76301, filed a request in Docket No. CS72–927, that the Commission waive in part paragraph (c) of § 157.40 of the regulations under the Naural Gas Act (18 CFR 157.40(c)) so as to permit the sale of natural gas under its small producer certificate in said docket from reserves in place acquired from Skelly Oil Company (Skelly), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Section 157.40(c) provides in part that sales of natural gas may not be made pursuant to a small producer certificate from reserves acquired by a small producer by purchase of developed reserves in place from a large producer. Petitioner states that it acquired from Skelly certain interests in the Bethany-Longstreet Field, DeSoto Parish, Louisiana, and would like to continue the sale of gas therefrom to Arkansas Louisiana Gas Company (Arkla) under its small producer certificate. Petitioner indicates monthly deliveries of gas at approximately 40,000 Mcf from said interest. The present sale of gas by Skelly to Arkla is covered by certificate authorization granted in Docket No. G–4327. Petitioner states that it is willing to accept a price, not in excess of the applicable FPC area ceiling rate, for this sale.

Any person desiring to be heard or to make any protest with reference to said request should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Dockets Nos. E–8394, E–8439]

METROPOLITAN EDISON CO.

Order Amending Prior Order

MARCH 18, 1974.

On January 29, 1974 the Commission issued an order in this Docket denying Metropolitan Edison's applications for rehearing, accepting revisions to its previously tendered agreement and granting waiver of Commission Regulations. In ordering paragraph (B) of the order, in accepting for filing Metropolitan Edison's revised fuel adjustment clause and Exhibits (B) and (B–1) we identified them as being those tendered on December 10, 1973. The correct description is those tendered on December 10, 1973 as amended December 21, 1973. We will order this correction.

The Commission orders:

(A) At ordering paragraph (B) of the Commission order of January 29, 1974 in this Docket, "as amended December 21, 1973" shall be inserted immediately following the words "December 10, 1973".

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6829 Filed 3–22–74;8:45 am]

[Docket No. E–8651]

MINNESOTA POWER & LIGHT CO.

Notice of Application

MARCH 19, 1974.

Take notice that on March 4, 1974, Minnesota Power & Light Company (Applicant) filed an application with the Federal Power Commission seeking an order pursuant to section 204 of the Federal Power Act authorizing the Company to enter into a Power Sales and Interconnection Agreement with Square Butte Electric Cooperative, Inc. (Square Butte) or, in the alternative, determining that the Company, by entering into the Power Sales and Interconnection Agreement is not issuing any security, or any obligation or liability as guarantor endorser, surety or otherwise in respect of any security of any other person, within the meaning of section 204 of the Federal Power Act.

Applicant is incorporated under the laws of the State of Minnesota, with its principal place of business at Duluth, Minnesota, and is engaged in the electric utility business within the State of Minnesota.

Square Butte proposes to construct a steam electric generating unit with a net capability of approximately 400,000 kilowatts, to be located at Center, North Dakota, and, in connection therewith, certain transmission facilities (with interconnecting transmission lines) to be located at Center and Duluth, Minnesota. The generating plant and transmission facilities will be financed by first mortgage bonds issued by Square Butte under an indenture and sold to certain lending institutions and two equipment trusts, covering real and personal property in the States of North Dakota and Minnesota, which trusts will issue certificates evidencing investments therein by certain banks. The total cost of the generating plant and transmission facilities is presently estimated to be $216,400,000.

The Power Sales and Interconnection Agreement will provide for the purchase by Applicant of certain portions of the electric output of Square Butte over an initial term of 30 years. Applicant will make payments to Square Butte in amounts sufficient to cover Square Butte's operating, maintenance and administrative expenses, certain taxes, and the obligations under the indenture and equipment trusts.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. R–474 and RP71–119]

PANHANDLE EASTERN PIPE LINE CO.

Order Denying Petitions

MARCH 19, 1974.

On January 22, 1973, the General Service Customer Group (GSC)[1] and Michi-

[1] The General Service Customer Group consists of the following companies: Associated Natural Gas Company, Battle Creek Gas Company, Bowling Green Gas Company, Central Illinois Light Company, Central Illinois Public Service Company, Central Indiana Gas Company, Inc., Citizens Gas & Coke Utility, Citizens Gas Fuel Company, Illinois Power Company, Indiana Gas Company, Inc., Kokomo Gas and Fuel Company, Missouri Utilities Company, Ohio Gas Company, Richmond Gas Corporation and The Toledo Edison Company. For purposes of this petition, GSC does not include Citizens Gas Fuel Company, Kokomo Gas and Fuel Company and Richmond Gas Corporation.

V 39 I 58 MAR 25 74 XUM

gan Gas Utilities Company (MGU) filed petitions pursuant to § 1.7 of the Commission's rules of practice and procedure requesting that the Commission amend § 2.78(c)[1] of its general policy and interpretations to include propane and other gaseous fuels as alternate fuels within the scope of the definition of "alternate fuel capability" set forth in the latter section.[2] These petitioners request in the alternative that the Commission pursuant to § 1.7(c) of its rules issue a declaratory order in Docket No. RP71–119 requiring that propane be considered as an alternate fuel in order to assure that there is no "firming-up" of a portion of Panhandle's industrial sales. They contend that the exclusion of propane as an alternate fuel by the Commission in Order No. 493–A would in effect be in contravention of certain outstanding certificate orders of this Commission and result, to some extent, in the alteration of the character of the service that was authorized for Panhandle's direct customers.

In Order No. 493–A, Docket No. R–474 issued on October 29, 1973, the Commission noted that the definitions and interpretive comments it had promulgated in that docket were the products of a general rule making proceeding which would not, in the absence of further proceedings, have an effect on any specific person. The Commission prior to issuing this order gave due consideration to the numerous comments tendered by interested parties relating to that proceeding. The aforementioned petitions requesting that we include propane within the scope of our definition "alternate fuel capability" contain no new impelling reason that we had not already considered prior to the promulgation of § 2.78(c) in its present form. The Commission will, therefore, deny GSC's request to amend § 2.78(c) of its general policy and interpretations. However, we will continue to review the alternate fuel situation and, take such future action as may be deemed necessary and appropriate.

These petitioners request in the alternative that the Commission issue a declaratory order pursuant to § 1.7(c) of its rules making § 2.78(c) inapplicable to the curtailment procedures being established for Panhandle in Docket No. RP 71–119. They claim that, if propane is permitted to be included as an alternate fuel within this definition of "alternate fuel capability", a portion of Panhandle's direct industrial sales may be treated as being firm in nature contrary to the Commission's certificate orders relating to such sales.

The proceeding relating to a permanent curtailment plan for Panhandle is presently in formal hearing before a duly designated Administrative Law Judge. The matters raised by GSC are issues that can be raised in the curtailment proceeding and, upon completion of the evidentiary record therein, all issues raised in that proceeding, including the instant issue, will be before us for determination.

Petitioners' contention that our action in essence has amended outstanding certificates lacks merit. The guidelines and definitions promulgated in Order No. 493, as amended, relate to curtailment situations and, therefore, are not in contravention of any outstanding certificate orders, since they do not permanently alter any service certificated by us. Those certificates are and will continue to serve as the basis for the rendition of service by jurisdictional pipelines and are subject to the Commission's continuing scrutiny and supervision. Furthermore, our power and responsibility to meet the public's needs under the conditions of the Nation's present critical shortfall of natural gas supply by means of allocating the available supply on a jurisdictional pipeline's system among its customers has been sustained by the Courts. (*FPC* v. *Louisiana Power and Light Company*, 406 US 621, *American Smelting and Refining Company, et al.* v. *FPC*, D.C. Cir. No. 72–2204 decided January 21, 1974.)

We shall, therefore, deny petitioners request at this time without prejudice. Petitioners may, if they desire, raise this issue in the record being developed in Docket No. RP71–119 relating to an appropriate curtailment plan for Panhandle. If raised therein, we will then review the issue within the context of the record of that proceeding when it comes before us. However, Petitioners have failed to establish in their petitions any appropriate basis which would compel us to prohibit Panhandle, in the implementation of its currently effective curtailment plan, from treating propane and other gaseous fuels in a manner contrary to the definitions and interpretative comments that we have promulgated in Order No. 493, as amended.

The Commission orders:

The petitions filed by the General Service Group customers and Michigan Gas Utilities Company on January 22, 1974, in Docket Nos. R–474 and RP71–119 are hereby denied without prejudice.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.74–6839 Filed 3–22–74;8:45 am]

[Docket No. E–8645]

PUGET SOUND POWER & LIGHT CO.

Filing of Agreement

MARCH 19, 1974.

Take notice that on March 7, 1974 Puget Sound Power and Light Company (PSP) tendered for filing an agreement between PSP and San Diego Gas and Electric Company (SDG). The said Agreement is for the sale of energy by PSP to SDG. The rates for and the amounts of such energy will be established by the parties, but in no event will the rate exceed six mills per kilowatt-hour at the point of delivery, the Oregon-California border.

PSP requests an effective date of March 1, 1974 for this Agreement.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before March 29, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.74–6831 Filed 3–22–74;8:45 am]

[Docket No. E–8251]

NEW ENGLAND POWER CO.

Order Denying Motion for Clarification and Reconsideration

MARCH 19, 1974.

On February 7, 1974, the Commission denied a request of New England Power Company (NEPCO) to assign an effective date of January 1, 1974 to an amendment to its June 1, 1973, rate increase filing to include therein cost adjustment clauses for energy and demand reduction resulting from the national fuel conservation program. The February 7, 1974, order also instituted an investigation pursuant to Section 206 of the Federal Power Act to determine if the proposed amendment is in the public interest and if such clause should be given prospective effect. Finally, this order permitted the intervention of Congressman Michael J. Harrington.

On February 19, 1974, Congressman Harrington filed with the Commission testimony which was accompanied by a Motion wherein Congressman Harrington objects to, and requests clarification of, the "limitation placed on (his) rights as an intervenor in the Commission order of February 7, 1974." Such limitations, according to Congressman Harrington, do not permit the full protection of his rights and the rights of his constituents, particularly as to the presentation of any right to appeal future Commission orders.

Ordering paragraph (E) of the February 7, 1974, Commission order provides, among other things, that the participation of Congressman Harrington (1) "shall be limited to matters affecting rights and interests specifically set forth in his petition to intervene" and that (2) "the admission of such intervenor shall not be construed as recognition by the Commission that it may be aggrieved because of any order or orders issued by the Commission in this proceeding."

With respect to (1), *supra*, this requirement is for the purpose of giving all parties to the proceeding adequate notice as to what rights and interests are represented by the intervening party. We do not believe that such a requirement in any way restricts Congressman Harrington in protecting his rights and the rights of his constituents.

With respect to (2), *supra*, this requirement merely directs that the admission of an intervenor does not constitute recognition by the Commission that such intervenor may be aggrieved because of any order the Commission should issue in this proceeding. This does not restrict Congressman Harrington's right to appeal, pursuant to section 313 (b) of the Federal Power Act, any future Commission orders which may aggrieve him. Therefore, we shall deny Congressman Harrington's motion for clarification of our February 7, 1974 order.

On February 20, 1974, Rhode Island Consumers' Council (Council) filed with the Commission a motion for reconsideration of the February 7, 1974 order. Council stated that since the proposed amendment is a request for a new rate, the Commission must either accept, reject or suspend the rate pursuant to section 205 of the Federal Power Act, or the rate would go into effect without being subject to refund. Therefore, Council requested that the proposed amendment be rejected.

Council is incorrect in assuming that we accepted NEPCO's proposed amendment as a new rate filing pursuant to section 205 of the Federal Power Act. To the contrary, the Commission, in instituting a section 206 investigation upon its own motion, declined to waive the provision in § 35.17(b) of the Commission's regulations which prohibits a change in a rate schedule which has been suspended. Council, or any other interested party, is not prejudiced by the action taken by this Commission in our February 7, 1974, order since the cost adjustment clause proposed by NEPCO may only be placed in effect prospectively if it is found to be in the public interest upon issuance of a final Commission order and the conclusion of the section 206 investigation and the hearings conducted thereunder. Therefore, we shall deny Council's motion for reconsideration of our February 7, 1974, order.

The Commission orders:

(A) Congressman Harrington's motion for clarification of our February 1, 1974, order is hereby denied.

(B) Council's motion for reconsideration of our February 7, 1974, order is hereby denied.

(C) The Secretary of the Commission shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc. 74–6832 Filed 3–22–74;8:45 am]

[Docket No. RI74–78]

NUTT, T. L.

Order Granting Special Relief

MARCH 18, 1974.

On November 5, 1973, T. L. Nutt (Nutt), a small producer[1] filed a petition for special relief pursuant to Section 2.76 of the Commission's general policy and Interpretations as adopted in Commission Order No. 481.[2] Concurrently Nutt filed a Notice of Independent Producer Rate Change and an Agreement dated October 22, 1973, which amended a gas purchase contract dated May 29, 1957. The initial contract is on file with the Commission as Sun Oil Company FPC Gas Rate Schedule No. 339 and supplements thereto. Nutt is a successor in interest to this contract in an assignment dated April 28, 1972, accepted for filing effective May 1, 1972, and designated as Supplement No. 11 to the Sun FPC Gas Rate Schedule No. 339. As a small producer, Nutt does not have rate schedule on file at the Commission. Sales are made to Northern Natural Gas Company (Northern).

Notice of Nutt's application was issued December 12, 1973, and published in the FEDERAL REGISTER on December 21, 1973 (38 FR 35053). Petitions to intervene were due on or before December 27, 1973. No petitions to intervene were filed with the Commission.

Nutt shows that at the current sales rate of 16.5 cents per Mcf the lease cannot remain economically feasible as the result of an increase in the sales line pressure from 350 psig to 460 psig. The cost of installation, maintenance, and operation of compression facilities necessary to recover the 471,000 Mcf estimated remaining reserves is $31,675, a cost of 6.7 cents per Mcf. The request for a rate increase from 16.5 cents to 22.5 cents per Mcf, a 6.0 cents increase, is cost justified in order to prevent early abandonment of the wells.

On the purchase of Sun's interest in the wells covered by this petition, Nutt was granted a waiver, in part, of § 157.40 (c)[3] to sell the gas from leases acquired from Sun to Northern under a small producer certificate at a rate not to exceed the applicable area rate which in the Hugoton-Anadarko Area is 18.5 cents per Mcf for gas sold under contracts dated prior to November 1, 1969. It is just and reasonable to now waive § 157.40(e)[4] of the Regulations Under the Natural Gas Act and to permit the sale of natural gas at the rate of 22.5 cents per Mcf by Nutt to Northern.

Section 2.76 of the Commission's general policy and interpretations was promulgated by the Commission " • • • in order to promote the optimum recovery of gas reserves • • • " We find that the instant petition is consistent with the purposes of § 2.76 and that the petition sets forth adequate economic justification for approval of Nutt's request for a rate increase of 6 cents per Mcf from 16.5 cents to 22.5 cents per Mcf.

The Commission finds:

The petition for special relief filed by T. L. Nutt meets the criteria set forth in § 2.76 of the Commission's general policy and interpretations.

The Commission orders:

(A) For the above-stated reasons, the petition for special relief of T. L. Nutt is hereby granted. Nutt may collect a rate of 22.5 cents per Mcf for all gas subject to the amended contract referred to herein.

(B) The prescribed rate will be made effective upon Nutt filing of a sworn statement signed by Northern Natural Gas Company that the compression facilities as described in the application are installed and made operative.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket No. CP73–129]

TENNESSEE GAS PIPELINE CO.

Petition To Amend and Request for Waiver of Regulations

MARCH 18, 1974.

Take notice that on March 1, 1974, Tennessee Gas Pipeline Company, a Division of Tenneco (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP73–129 a petition to amend the order of the Commission issued in said docket on March 27, 1973 (51 FPC ——), pursuant to section 7(c) of the Natural Gas Act and § 157.7(b) of the Regulations thereunder, to waive the total project cost limitation of $7,000,000 contained therein, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By the order issued March 27, 1973, a budget-type certificate of public convenience and necessity was issued authorizing the construction during the calendar

[1] 18 CFR 2.78(c).

[2] Order 493A excluded propane or other gaseous fuel from the definition of "alternate fuel capability," when the use was for plant protection, feedstock, or process uses. The exclusion was not applicable when the use was for other purposes

[1] A small producer certificate was granted Nutt on June 22, 1971 in Docket No. CS71–140 (lead Docket No. CS71–59, *et al.*).

[2] Policy With Respect To Sales Where Reduced Pressures, Need For Reconditioning, Deeper Drilling, Or Other Factors Make Further Production Uneconomical At Existing Prices, Docket No. R–458, 49 FPC ---- (issued April 12, 1973), as amended by Order Amending Order No. 481 And Granting And Denying Petitions For Rehearing, 49 FPC ---- (issued June 8, 1973).

[3] 18 CFR 157.40(c); Regulations Under the Natural Gas Act.

[4] 18 CFR 157.40(e).

V 39 158 MAR 25 74 XUM

year 1973 and the operation of certain natural gas facilities to enable Petitioner to take into its certificated main pipeline system natural gas purchased from producers thereof. Said order limits the total expenditures for facilities to $7,000,000 and limits the maximum expenditure for single onshore and offshore projects to $1,000,000 and $1,750,000, respectively.

Petitioner states that it has exceeded the $7,000,000 total project cost limitation by $85,195, which is primarily attributable to the Bay Lizette project. Inasmuch as these expenditures are in excess of the certificate-imposed expenditures for facilities, Petitioner requests waiver of said limitation.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 9, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6834 Filed 3-22-74;8:45 am]

[Docket No. RI74-143]

TEXAS ENERGIES, INC.

Order Granting Petition for Special Relief

MARCH 18, 1974.

On January 31, 1974, Texas Energies, Inc. (Texas Energies), a small producer,[1] filed a petition for special relief pursuant to § 2.76 of the Commission's general policy and interpretations as adopted in Commission Order No. 481.[2] Concurrently Texas Energies filed a motion asking the Commission to declare that no petition under Order No. 481 was required of small producers.

Notice of Texas Energies' application was issued February 4, 1974, and published in the FEDERAL REGISTER on February 8, 1974 (39 FR 4956). Petitions to intervene were due on or before February 20, 1974. No petitions to intervene were filed with the Commission.

In the instant petition Texas Energies seeks special relief for the economic expenditures for the installation of retreatment and water disposal equipment at its Peter's No. 1 well in Seward County, Kansas (Hugoton-Anadarko Area). The natural gas is currently sold to Panhandle Eastern Pipeline Company (Panhandle) under a contract dated December 19, 1960. In an amendment to the contract dated December 10, 1973,[3] Panhandle agreed to increase the purchase price from 16 cents per Mcf to 35 cents per Mcf provided that Texas Energies perform the necessary remedial work.

Texas Energies shows that an investment in the retreatment and water disposal equipment of $17,190.23 and operating expenses (excluding taxes) of $13,350.00 will enable it to produce an additional 90,000 Mcf over the next two and one-half years. Without the remedial work only 30,000 Mcf from the estimated reservoir of 120,000 Mcf allegedly could be recovered.

Staff studies, which employed the cost evidence provided by Texas Energies, indicate that the proposed 35 cents increase is proper. Since Texas Energies filed its petition pursuant to Order No. 481, its motion requesting the Commission to declare that a small producer need not make such a filing under Order No. 481 to increase its rate to the contract level is not dispositive herein. However, we deem it advisable to state that Texas Energies' point is well taken, and if it were necessary to grant its motion to decide this matter we would do so.

Section 2.76 was promulgated by the Commission "* * * in order to promote the optimum recovery of gas reserves * * * ." We find that the instant petition is consistent with the purpose of § 2.76 and sets forth adequate economic justification for approval.

The Commission finds:

The petition for special relief of Texas Energies, Inc. meets the criteria set forth in § 2.76 of the Commission's general policy and interpretations.

The Commission orders:

(A) For the reasons stated above, the petition for special relief of Texas Energies is hereby granted. Texas Energies may collect a rate of 35 cents per Mcf at 14.65 psia, for all gas subject to the contract, as amended, referred to herein.

(B) The prescribed rate will be made effective on the first day of the month following submittal by Panhandle, in accordance with the parties' contract, of proof that Texas Energies has completed the proposed capital improvements described in said petition for special relief.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6835 Filed 3-22-74;8:45 am]

[Docket No. RP71-100]

TRUNKLINE GAS CO.

Order Granting Interventions, Denying Motion by Customer, Providing for Additional Intervention Setting Date for the Filing of Evidence and Hearing Date

MARCH 19, 1974.

On April 9, 1971, Trunkline Gas Company (Trunkline) filed tariff sheets to implement its proposed pro-rata curtailment plan. These tariff filings were suspended until July 12, 1971, by order issued May 10, 1971. Trunkline has been curtailing continuously since November 1971, under this plan which assesses curtailments pro-rata on its jurisdictional customers purchasing under Rate Schedules P and G contract demand.

Not included in Trunkline's curtailment program are minor sales, mostly to small general service customers, which represents 1.8 percent of 1972 system sales.

On November 2, 1973, Consumers Power Company (Consumers), a major customer of Trunkline's, filed a motion for an order directing Trunkline to make immediate tariff filings implementing an end-use curtailment plan in compliance and conformity with the end-use priorities contained in § 2.78 of the Commission's rules and that the order make such tariff filings effective immediately. Consumers argues that Trunkline is required to file an end-use plan consistent with § 2.78, and that Trunkline is the only major pipeline which has not filed such a plan despite increasing gas supply deficiencies. However, Order No. 467-B, which implemented § 2.78, is merely a policy statement setting forth our views on curtailment for guidance and does not require pipeline companies to file any conforming tariff sheets.

Accordingly, we decline to order Trunkline to replace its existing pro-rata curtailment plan with an end-use plan implementing Order No. 467-B guidelines, at least until the merits of the Trunkline plan have been considered. But we shall direct that Trunkline file as part of its direct presentation system-wide end-use data for our consideration. In this regard, we adhere to our views set forth in our order issued February 1, 1974 in Texas Eastern Transmission Corporation[1] in which we stated that the failure of a pipeline company to submit data of this nature has as its unsatisfactory result the placing of the burden of proof on the customers of the pipeline and on the Commission Staff. It is our intent that a pipeline company has the burden of showing through detailed testimony and exhibits the manner in which an Order No. 467-B type end-use plan might or might not be implemented on its system. Such a submission is obviously without prejudice to any position it may take on the just and reasonable plan to be implemented on its system.

The following petitions to intervene have been filed:

[1] A small producer certificate was granted Texas Energies on February 3, 1972, in Docket No. CS72-428 (lead Docket No. CS68-15, *et al.*).

[2] Policy With Respect To Sales Where Reduced Pressures, Need For Reconditioning, Deeper Drilling, Or Other Factors Make Further Production Uneconomical At Existing Prices, Docket No. R-458, 49 FPC ---- (issued April 12, 1973), as amended by Order Amending Order No. 481 And Granting And Denying Petitions For Rehearing, 49 FPC ---- (issued June 8, 1973).

[3] Texas Energies is successor in interest to this contract.

All of the above petitions should be granted. However, in view of the elapsed time since the filing of the Trunkline Plan, and in view of the subsequent issuance of Order No. 467-B, the present interests of intervenors and potential intervenors may vary significantly from their interests in 1971. Accordingly, it is desirable that an opportunity be afforded for additional intervention, and we shall so order.

The Commission finds:

(1) It is desirable and in the public interest to allow all of the above-named petitioners to intervene in order that they may establish the facts and the law from which the nature and validity of their alleged rights may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

(2) The Motion of Consumers Power Company to require a refiling by Trunkline should be denied.

(3) It is necessary and appropriate that the proceeding in Docket No. RP71-100 be set for hearing and that the procedures for that hearing be established as hereinafter ordered.

The Commission orders:

(A) The above-named petitioners are permitted to intervene in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* that the participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in said petition for leave to intervene, and provided, further, that the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) Trunkline Gas Company shall file and serve on or before June 3, 1974, testimony and exhibits in support of its position and, as part of its presentations, shall present evidence on system-wide end-use data.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act (particularly sections 4, 5, and 15 thereof), and the Commission's rules of practice and procedure, a hearing will be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426 on July 16, 1974, at 10:00 a.m., concerning the matters involved in and the issues presented by the Trunkline curtailment plan.

(D) Pursuant to § 2.64(c) of the Commission's rules of practice and procedure, Trunkline shall serve copies of their filings upon all intervenors promptly, unless such service has already been effected pursuant to Part 157 of the Regulations of the Natural Gas Act.

(E) The Motion of Consumers that Trunkline be required to refile its curtailment plan is denied.

(F) All interested persons desiring to be heard in this proceeding who are not already parties may file appropriate petitions to intervene on or before April 9, 1974.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. CP74-231]

UNITED GAS PIPE LINE CO.

Notice of Application

MARCH 19, 1974.

Take notice that on March 8, 1974, United Gas Pipe Line Company (Applicant), 1500 Southwest Tower, Houston, Texas 77002, filed in Docket No. CP74-231 an application pursuant to section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued operation of a 3.4-mile segment of 6-inch pipeline in the Ship Shoal Area, offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization for the continued operation of 3.4 miles of 6-inch pipeline which extends from a point in Block 186, Ship Shoal Area, offshore Louisiana, to a point of interconnection with Transcontinental Gas Pipe Line Corporation's (Transco) 26-inch pipeline located in Block 185, Ship Shoal Area, offshore Louisiana. The application states the facilities were constructed, under the belief that they were authorized under the budget-type certificate issued in Docket No. CP73-103 under § 157.7(b) of the regulations under the Natural Gas Act (18 CFR 157.7(b)), to allow Applicant to receive certain volumes of natural gas available to it in Block 186 from Penzoil Producing Company (Penzoil) pursuant to the terms of a sales agreement dated August 28, 1973, between Penzoil and Applicant. Under the terms of this contract Applicant agrees to purchase and Penzoil to sell quantities of gas for delivery at a point on Consolidated Gas Supply Corporation's production platform located in Block 186. Applicant states that it had no facilities in the area of Block 186 and therefore, in order to receive such gas constructed the facilities for which authorization is sought herein to connect such supply with Transco's 26-inch pipeline in Block 185. Applicant entered into an agreement with Transco dated October 26, 1973, whereby Transco would transport said gas from Block 185 through its system and redeliver the gas to Applicant onshore in Terrebonne Parish, Louisiana.

Applicant states that the total cost of the facilities proposed herein was $452,530 which cost Applicant has financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, hearings will be held without further notice before the Commission on these applications if no petitions to intervene are filed within the time required herein, if the Commission on its own review of the matters finds that grants of the certificates are required by the public convenience and necessity. If petitions for leave to intervene are timely filed, or if the Commission on its own motion believes that formal hearings are required, further notice of such hearings will be duly given.

Under the procedure herein provided for, unless other otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearings.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6837 Filed 3-22-74;8:45 am]

[Docket No. E-8656]

UTAH POWER & LIGHT CO.

Filing of Rate Schedule

MARCH 19, 1974.

Take notice that on March 8, 1974 Utah Power and Light Company (Utah) tendered for filing Service Schedule C-1, submitted as Supplement 3 to its Rate Schedule FPC No. 108, in Interconnection Agreement dated May 19, 1971 between Utah and Sierra Pacific Power Company (Sierra). Utah also tendered for filing Twelfth Revised Sheet No. 1 and Eighth Revised Sheet No. 15 to its FPC Electric Tariff, Original Volume No. 1. Utah requests a retroactive effective

V 39 I 58 MAR 25 74 XUM

date of October 1, 1973 for said Schedule and Revised Sheets.

Utah states that Service Schedule C–1 was signed as part of the Interconnection Agreement but was not submitted for filing at that time because Utah had no rate schedule to cover Firm Power Service nor was such service expected to be utilized until October 1, 1974. Utah further states that Sierra began to take firm power service in October, 1973. The rates for such service by Utah were submitted as its FPC Tariff Schedule RS–3 for filing in Docket No. E–8379 which is now pending acceptance of the filing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 29, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

FEDERAL TRADE COMMISSION

CIGARETTE TESTING RESULTS

Tar and Nicotine Content

The Federal Trade Commission's laboratory has determined the "tar" (dry particulate matter) and total alkaloid (reported as nicotine) content of 128 varieties of domestic cigarettes. The laboratory utilized the Cambridge filter method with the specifications set forth in the Commission's announcement dated July 31, 1967 (32 FR 11178). The varieties are arranged in alphabetical order with tar values rounded to the nearest whole milligram and nicotine values rounded to the nearest tenth of a milligram.

Tar [1] and nicotine [2] content of one-hundred twenty-eight (128) varieties of domestic cigarettes, Federal Trade Commission, March 1974

Brand	Type	TPM dry tar [1] (milligrams per cigarette)	Nicotine [2] (milligrams per cigarette)

INTERIM COMPLIANCE PANEL (COAL MINE HEALTH AND SAFETY)

LEWIS COAL CO. AND JACK COAL CO.

Applications for Initial Permits Electric Face Equipment Standard; Opportunity for Public Hearing

Applications for Initial Permits for Noncompliance with the Electric Face Equipment Standard have been received for items of equipment in the underground coal mines listed below.

(1) ICP Docket No. 4230–000, LEWIS COAL COMPANY, A Mine, Dante Hollow, Mine ID No. 44 01843 0, Dante, Virginia.

(2) ICP Docket No. 4279–000, JACK COAL COMPANY, Mine No. 1, Mine ID No. 15 02296 0, Mallie, Kentucky.

In accordance with the provisions of section 305(a)(2) (30 U.S.C. 865(a)(2)) of the Federal Coal Mine Health and Safety Act of 1969 (83 Stat. 742, et seq., Public Law 91–173), notice is hereby given that requests for public hearing as to an application for an initial permit may be filed on or before April 9, 1974. Requests for public hearing must be filed in accordance with 30 CFR Part 505 (35 FR 11296, July 15, 1970), as amended, copies of which may be obtained from the Panel upon request.

A copy of each application is available for inspection and requests for public hearing may be filed in the office of the Correspondence Control Officer, Interim Compliance Panel, Room 800, 1730 K Street, NW., Washington, D.C. 20006

C. DONALD NAGLE,
Vice Chairman,
Interim Compliance Panel.

NATIONAL ENDOWMENT FOR THE HUMANITIES

PUBLIC PROGRAMS PANEL

Notice of Meetings

MARCH 14, 1974.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463) notice is hereby given that a meeting of the Public Programs Panel will meet at Washington, D.C. on April 4 and 5, 1974.

The purpose of the meeting is to review Museum Program applications submitted to the National Endowment for the Humanities for possible grant funding.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call Area Code 202–382–2031.

JOHN W. JORDAN,
Advisory Committee
Management Officer.

OFFICE OF THE FEDERAL REGISTER

SUBMISSION OF NEW AND SEPARATELY PUBLISHED MATERIAL FOR PUBLICATION

Guidelines for Prior Consultation

In order to control operating costs more effectively and to provide more efficient service to the Government and the public, the Office of the Federal Register urges Federal agencies to comply with the following guidelines. They deal with the publication in the FEDERAL REGISTER of bodies of material that is to be published separately as well as in the FEDERAL REGISTER.

(1) Whenever an agency acquires responsibility for publishing an extensive amount of new material in the FEDERAL REGISTER (whether by statute, Presidential directive, or otherwise), the agency should consult with the Office of the Federal Register while the material is being prepared and well in advance of submission for publication. In this consultation the Office of the Federal Register and the agency can set up a production schedule for the material and if necessary a FEDERAL REGISTER format.

(2) Whenever an agency submits material to the Government Printing Office for separate printing prior to FEDERAL REGISTER publication, the agency should inform its Government Printing Office representative that the material will also be published in the FEDERAL REGISTER. The intent to publish in the FEDERAL REGISTER can be indicated by a notation to that effect in the information portion of the Printing and Binding Requisition (Standard Form 1). This knowledge will enable the Government Printing Office to print the material in a form suitable also for FEDERAL REGISTER publication.

Compliance with these guidelines will give the Office of the Federal Register and the Government Printing Office the opportunity to coordinate typography, format, and distribution in accordance with legal requirements and the needs of the affected public. Thus, unnecessary duplication and waste will be avoided and the public interest served.

Dated: March 20, 1974.

FRED J. EMERY,
Director of the Federal Register.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

Lists of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on March 20, 1974 (44 USC 3509). The purpose of publishing this list in the Federal Register is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, (202–395–4529).

NEW FORMS

DEPARTMENT OF AGRICULTURE

Farmer Cooperative Service, Local Cooperative Grain Elevator Survey (Oklahoma and Texas), Form ----, Single Time, Lowry, Local Co-op Elevator Managers in Oklahoma and Texas.

COST OF LIVING COUNCIL

FOOD INDUSTRY WAGE AND SALARY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212(f) of the Economic Stabilization Act, as amended, section 4(a)(iv) of Executive Order 11695, and Cost of Living Council Order No. 14, will meet on Thursday, March 28, 1974. The meeting will be open to the public on a first-come, first-served basis at 10 A.M., in Conference Room 8202, 2025 M Street NW., Washington, D.C.

The agenda will consist of a discussion of policy questions involving food industry wage matters, and if circumstances permit, of food industry wage cases pending before the Cost of Living Council.

The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business.

Issued in Washington, D.C. on March 22, 1974.

JAMES A. WILKINSON,
Deputy Executive Secretary, Cost of Living Council.

[FR Doc.74–7034 Filed 3–22–74;11:44 am]

VETERANS ADMINISTRATION

ADVISORY COMMITTEE ON CEMETERIES AND MEMORIALS

Notice of Meeting

The Veterans Administration gives notice that a meeting of the Administrator's Advisory Committee on Cemeteries and Memorials, authorized by section 1001, title 38, United States Code, will be held at the Veterans Administration Central Office, 810 Vermont Avenue, NW, Washington, D.C., on April 3 and 4, 1974, at 9 am. The meeting will be held to conduct routine business.

The meeting will be open to the public up to the seating capacity of the conference room which is about 40 persons. Because of the limited seating capacity and the need for building security, it will be necessary for those wishing to attend to contact Mrs. Charlotte Withers in the office of the Director, National Cemetery System, Veterans Administration Central Office (phone 202–389–5211) prior to April 3, 1974.

Any interested person may attend, appear before, or file statements with the Committee—which statements, if in written form, may be filed before or after the meeting. Oral statements and/or reports from the public will be heard only between 3 p.m. and 5 p.m. on April 4, 1974, due to the number of items on the agenda for the meeting.

Dated: March 19, 1974.

By direction of the Administrator.

[SEAL] R. L. ROUDEBUSH,
Deputy Administrator.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[V–74–15]

WEST BEND CO.

Application for Variance

Notice of application. Notice is hereby given that The West Bend Company, 400 E. Washington Street, West Bend, Wisconsin 53095 has made application pursuant to section 6(d) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655), and 29 CFR 1905.11 for a variance from the standards prescribed in 29 CFR 1910.252(c)(2)(iii) concerning locks and interlocks on resistance welding machines (non-portable).

The addresses of the places of employment that will be affected by the application are as follows:

The West Bend Company
400 E. Washington Street
West Bend, Wisconsin 53095

The West Bend Company
Sheridan Division
RFD #1
Sheridan, Arkansas 72150

The West Bend Company
Ogden Division
Weber Industrial Park
2700 North 1515 West
Ogden, Utah 84404

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by 29 CFR 1910.252(c)(2)(iii) which requires that all doors and access panels of non-portable resistance welding machines and control panels be kept locked and interlocked to prevent access, by unauthorized personnel, to live portions of the equipment.

The applicant utilizes non-portable resistance welding equipment in the manufacture of cookware and home comfort accessories. The applicant states that this equipment conforms to the N.E.C. and OSHA requirements with the exception of the interlock clause cited above. They also conform to ANSI Z49.1–1973 5.1.7.1 which calls for locks or interlocks. On all new equipment, the disconnect switch built into the control panel provides the interlock feature called for in 29 CFR 1910.252(c)(2)(iii). On models purchased prior to 1966, the disconnect switch is accessible to the operator and, therefore, mounted separate from the control panel. All control panels and access doors have been locked with specially keyed padlocks. The keys for these locks are accessible only to the qualified electricians who service the welding equipment.

Furthermore, all control panels and access doors have been marked as follows: "Danger High Voltage, Authorized Personnel Only." Through the above physical and administrative controls, the applicant contends that it is providing a place of employment as safe as that required by 29 CFR 1910.252(c)(2)(iii).

A copy of the application will be made available for inspection and copying upon request at the Office of Compliance Programming, U.S. Department of Labor, 1726 M Street NW., Room 526, Washington, D.C. 20210, and at the following Regional and Area Offices:

U.S. Department of Labor
Occupational Safety and Health Administration
Federal Building—Room 15010
P.O. Box 3588,
1961 Stout Street
Denver, Colorado 80202

U.S. Department of Labor
Occupational Safety and Health Administration
7th Floor—Texaco Building
1512 Commerce Street
Dallas, Texas 75201

U.S. Department of Labor
Occupational Safety and Health Administration
300 South Wacker Drive
Room 1201
Chicago, Illinois 60606

U.S. Department of Labor
Occupational Safety and Health Administration
Suite 309
Executive Building
455 East 4th South
Salt Lake City, Utah 84111

U.S. Department of Labor
Occupational Safety and Health Administration
Room 303—Donaghey Building
103 E. 7th Street
Little Rock, Arkansas 72201

U.S. Department of Labor
Occupational Safety and Health Administration
Clark Building—Room 400
633 West Wisconsin Avenue
Milwaukee, Wisconsin 53203

All interested persons, including employers and employees, who believe they would be affected by the grant or denial of the application for a variance are invited to submit written data, views and arguments relating to the pertinent application no later than April 25, 1974. In addition, employers and employees who believe they would be affected by a grant or denial of the variance may request a hearing on the application no later than April 25, 1974, in conformity with the requirements of 29 CFR 1905.15. Submission of written comments and requests for a hearing should be in quadruplicate, and must be addressed to the Office of Compliance Programming at the above address.

Signed at Washington, D.C., this 19th day of March, 1974.

JOHN STENDER,
Assistant Secretary of Labor.

[Notice No. 38]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 13, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

No. MC 45544 (Sub-No. 4 TA), filed March 5, 1974. Applicant: SILVER LINE, INC., 196 Stanton Street, New York, N.Y. 10002. Applicant's representative: William D. Traub, 10 East 40th Street, New York, N.Y. 10016. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Piece goods, cut materials and trimmings, thread, and wearing apparel and materials* used in the manufacture and shipping of wearing apparel, between Wilkes-Barre, Pa., and West Pittston, Pa., on the one hand, and, on the other, West Deptford, N.J., for 180 days. SUPPORTING SHIPPER: C. F. Hathaway Company, 90 Park Avenue, New York, N.Y. 10016. SEND PROTESTS TO: Paul W. Assenza, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 26 Federal Plaza, Room 1807, New York, N.Y. 10007.

No. MC 66462 (Sub-No. 15 TA), filed March 4, 1974. Applicant: THE WILLETT COMPANY, 700 South Des Plaines Street, Chicago, Ill. 60607. Applicant's representative: Thomas F. McFarland, Jr., 20 North Wacker Drive, Chicago, Ill. 60606. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Acid*, spent, liquid in bulk, in tank vehicles, from Burns Harbor, Ind., to points in Michigan, for 180 days. SUPPORTING SHIPPER: P. A. DeWitt, Industrial Engineer, Reiss Envirochem, Inc., 1011 South 8th Street, Sheboygan, Wis. 53081. SEND PROTESTS TO: William J. Gray, Jr., District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 S. Dearborn Street, Room 1086, Chicago, Ill. 60604.

No. MC 82841 (Sub-No. 139 TA), filed March 1, 1974. Applicant: HUNT TRANSPORTATION, INC., 10770 "I" Street, Omaha, Nebr. 68127. Applicant's representative: Donald L. Stern, Suite 530 Univac Building, 7100 W. Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Tractors* (except truck tractors), *industrial, construction, excavating, and material-handling equipment;* and (2) *cabs, attachments, and parts* for (1) above, originating at the plantsites and storage facilities of J. I. Case Company at or near Burlington, Iowa, to points in Arizona, California, Nevada, Oregon, and Washington, for 180 days. SUPPORTING SHIPPER: J. I. Case Company, R. L. Henderson, Manager—Corporate Traffic, 700 State Street, Racine, Wis. 53404. SEND PROTESTS TO: District Supervisor Carroll Russell, Bureau of Operations, Interstate Commerce Commission, Suite 620, Union Pacific Plaza, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 110563 (Sub-No. 129 TA), filed March 1, 1974. Applicant: COLDWAY FOOD EXPRESS, INC., P.O. Box 747, Ohio Building, Sidney, Ohio 45365. Applicant's representative: John L. Maurer (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Margarine and dairy products*, from the plant sites and warehouse facilities utilized by Land O'Lakes at or near Chicago, Ill., to points in Connecticut, Maine, Vermont, Massachusetts, New Hampshire, Rhode Island, New York, New Jersey, Delaware, Maryland, District of Columbia, Virginia, West Virginia, and Pennsylvania, for 180 days. SUPPORTING SHIPPER: Land O' Lakes, Inc., 1325 W. 15th Street, Chicago, Ill. 60608. SEND PROTESTS TO: District Supervisor Keith D. Warner, Bureau of Operations, Interstate Commerce Commission, 313 Federal Office Building, 234 Summit Street, Toledo, Ohio 43604.

No. MC 113908 (Sub-No. 303 TA) (Amendment), filed February 14, 1974, published in the FR issue of March 5, 1974, and republished as amended this issue. Applicant: ERICKSON TRANSPORT CORPORATION, 2105 East Dale Street, Glenstone Station, P.O. Box 3180, Springfield, Mo. 65804. Applicant's representative: B. B. Whitehead (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Neutral and distilled spirits* and *alcohol*, in bulk, from Lake Alfred, Fla., to Rogers, Ark., Kansas City, Mo., Charlotte, N.C., Memphis, Tenn., and Houston, Tex., for 180 days.

NOTE.—The purpose of this republication is to indicate the amended commodity description. SUPPORTING SHIPPER: Spcas Company, 2400 Nicholson Avenue, Kansas City, Mo. 64120. SEND PROTESTS TO: John V. Barry, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 600 Federal Office Building, 911 Walnut Street, Kansas City, Mo. 64106.

No. MC 114312 (Sub-No. 28 TA), filed March 4, 1974. Applicant: ABBOTT TRUCKING, INC., Box 74, Route 3, Delta, Ohio 43515. Applicant's representative: A Charles Tell, Columbus Center, 100 E. Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal feed*, from Chicago, Ill., to points in Michigan, for 180 days. SUPPORTING SHIPPER: Falstaff Brewing Corporation, 5050 Oakland Avenue, St. Louis, Mo. 63166. SEND PROTESTS TO: Keith D. Warner, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 313 Federal Office Building, 234 Summit Street, Toledo, Ohio 43604.

No. MC 115651 (Sub-No. 22 TA), filed March 1, 1974. Applicant: KANEY TRANSPORTATION, INC., 7222 Cunningham Road, Rockford, Ill. 61102. Applicant's representative: Robert D. Higgins (same address as above). WATER CARRIER APPLICATION

No. W-723 (Sub-No. 4 TA), filed March 1, 1974. Applicant: PATTON-TULLY TRANSPORTATION COMPANY, 1252 No. 2nd, P.O. Box 28, Memphis, Tenn. 38101. Applicant's representative: John W. Slater, Jr., Suite 705, Union Planters Bank Building, Memphis, Tenn. 38103. Applicant, PATTON-TULLY TRANSPORTATION COMPANY, presently holds authority to operate as a *contract carrier by water* under a permit issued July 15, 1948, in Docket Number W-723, as follows: The Patton-Tully Transportation Company is hereby, authorized to continue operations as a *contract carrier by water*, in interstate or foreign commerce, (1) by non-self-propelled vessels with the use of separate towing vessels in the transportation of *forest products*, and by towing vessels in the towage of *forest products* between ports and points along the Mississippi River from St. Louis, Mo., to Vidalia, La., and Natchez, Miss., inclusive; and (2) at Memphis, Tenn., in the furnishing for compensation (under charter, lease, or other agreement) of *boats*, without crews, to persons dealing in or engaged in the production of *lumber and forest products* for use by such persons in the transportation of their own property, subject, however, to such terms, conditions and limitations as are now, or may hereinafter be, attached to the exercise of such authority by this Commission. By its present application, the applicant requests that the Commission extend the southern boundry of its present permit from Vidalia, La., and Natchez, Miss., to the St. Francisville Paper Company Mill, St. Francisville, La., and to amend its permit to read as follows: The Patton-Tully Transportation Company is hereby authorized to continue operations as a *contract carrier by water*, in interstate or foreign commerce, (1) by non-self-propelled vessels with the use of separate towing vessels in the transportation of *forest products*, and by towing vessels in the towage of *forest products* between ports and points along the Mississippi River from St. Louis, Mo., to the St. Francisville Paper Company Mill, St. Francisville, La., inclusive; and (2) at Memphis, Tenn., in the furnishing for compensation (under charter, lease, or other agreement) of towing vessels, non-self-propelled *barges, and derrick boats*, without crews, to persons dealing in or engaged in the production of *lumber and forest products*, for use by such persons in the transportation of their own property, subject, however, to such terms, conditions, and limitations as are now, or may hereinafter be, attached to the exercise of such authority by this Commission, for 180 days. SUPPORTING SHIPPER: Crown Zellerbach Corporation, One Bush Street, Room 926, San Francisco, Calif. 94119. SEND PROTESTS TO: Floyd A. Johnson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 435 Federal Office Building, 167 North Main Street, Memphis, Tenn. 38103.

By the Commission.

[Notice No. 39]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 15, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67, (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

Accounting and Reporting for Emergency Fuel Surcharge and Adjustment of Compensation for Equipment Leased

MARCH 19, 1974.

Recently the Commission issued two decisions in its efforts to alleviate the financial impact of rising fuel prices on motor carriers of property and certain lessors of equipment to motor carriers. These decisions affect amounts collected by carriers from shippers and amounts paid by carriers for leased equipment where the lessor supplies the fuel. Questions as to proper accounting have resulted from the orders concerning these additional receipts and payments.

Special Permission No. 74–2525, "Emergency Fuel Surcharge for Line-Haul Transportation Charges & Other Charges—Motor Common Carriers", authorizes the increase in freight rates up to 6 percent by supplementing the affected tariffs. Inasmuch as this surcharge becomes a part of the published tariffs and is designed to increase revenues, it should be considered revenue and credited to the appropriate revenue account. The nature of the increase as revenue is not altered by the fact that the surcharge may only be justified by higher fuel costs or might be subsequently passed through to owner-operators, agents, etc.

Correspondingly, the fuel charge adjustment paid to lessors under Ex Parte No. 43 (Sub-No. 2), "Adjustment of Compensation for Equipment Leased by Motor Carriers of Property Because of Rising Fuel Costs", should be treated as an additional cost of purchased transportation and charged along with rentals to the appropriate expense accounts.

In order that the Commission can evaluate the effects of these decisions, it will be necessary to augment data presently available from the system of accounts by segregating the following: (1) Amounts received under Special Permission No. 74–2525, (2) amounts paid pursuant to Ex Parte No. 43 (Sub-No. 2), and (3) number of gallons of fuel consumed. This information shall be enclosed in the quarterly and annual reports in the form of a footnote or an attachment along with fuel expense (accounts 4510/6110) and fuel tax expense (accounts 4710/8450 and 4760/8440).

Also, the necessary supporting documentation shall be maintained and available for inspection by authorized Commission representatives.

[SEAL] JOHN A. GRADY, *Director.*

REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

NAVY DEPARTMENT—Regulations regarding duty, responsibility, authority, distinctions, and relationships of various commands, officials and individuals..... 7135; 2–25–74

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Contents

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Title 3—The President

PROCLAMATION 4277

Loyalty Day, 1974

By The President of the United States of America

A Proclamation

Loyalty has never been a word of easy definition because loyalty is a state of mind, a condition of the heart. Loyalty is something we feel in our deepest convictions. It is not a banner to be waved so much as a quality to be demonstrated by our deeds.

Just as healthy differences exist in the ways that Americans seek progress for our Nation, loyalty to our Nation means different things to different people. But regardless of how it is manifested, a common strain runs through our loyalty and has made it a distinctly profound part of our national heritage.

Loyalty includes a sense of deep patriotism. It is patriotism which calls upon all of us to make personal sacrifices when our Nation is challenged from within or without.

Loyalty means allegiance to the country which has maintained our liberties, blessed us with an abundance of material well-being and spiritual freedom, and provided us all with opportunities which no civilization in history has ever before matched.

A little over a year ago as our returning Vietnam prisoners of war gave all Americans a sense of joyous celebration, one of those courageous men came forth holding up a small American flag. His words were simple, but moving: "* * * we never lost faith in the American people, and we knew that these colors wouldn't run."

It might not have been a dictionary definition, but those words represent loyalty as well as any free American could ever hope.

V 39 59 MAR 26 74 XUM

In recognition of the need to set aside a day to pay tribute to the quality of loyalty, the Congress by a joint resolution of July 18, 1958, designated May 1 of each year as Loyalty Day and requested the President to issue a proclamation inviting the people of the United States to observe such a day with appropriate ceremonies.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do call upon the people of the United States and upon all patriotic, civic and educational organizations to observe Wednesday, May 1, 1974 as Loyalty Day, with appropriate ceremonies in which all may join.

I call also upon appropriate officials of the Government to display the flag of the United States on all Government buildings on that day as an expression of our loyalty to the Nation symbolized by that flag.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of March, in the year of our Lord nineteen hundred seventy-four and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

[FR Doc.74-7158 Filed 3-25-74;12:14 pm]

PROCLAMATION 4278

World Trade Week, 1974

By the President of the United States of America

A Proclamation

As we approach the midpoint of the nineteen seventies there are many problems which command the attention of the world's peoples.

Large and small, nations around the globe seek solutions to unprecedented problems of energy. How we and they react could have a lasting impact on international commercial relations. Moreover, the need for thoroughgoing reform of the international economic system has never been more acute.

The challenges are thus great, but the opportunities are even greater.

To meet those challenges and realize these opportunities, we need to move rapidly and confidently forward with a series of interrelated negotiations, of which those on trade reform are of vital importance.

World trade is important not only to the United States but to all nations. Fair open trade can contribute importantly to stability and harmony in the world, reducing the causes of international friction.

World Trade Week is an opportunity to recall this importance to all Americans and to renew our sense of national dedication to the success of this effort.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby proclaim the week beginning May 19, 1974, as World Trade Week, and I call upon all Americans to cooperate in observing that week by participating with the business community and all levels of government in activities that emphasize the importance of world trade to the United States economy and to our relations with other nations.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of March, in the year of our Lord nineteen hundred seventy-four, and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 9—Animal and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 4—RULES OF PRACTICE GOVERNING PROCEEDINGS UNDER ANIMAL WELFARE ACT

Miscellaneous Amendments

Pursuant to the Act of August 24, 1966, as amended (7 U.S.C. 2131 et seq.), the rules of practice governing proceedings under that Act (9 CFR Part 4) are hereby amended and revised to change the title of "Hearing Examiner" to "Administrative Law Judge" in accordance with the Civil Service Commission's amendment to Subpart B, Part 930, Title 5, Code of Federal Regulations (37 FR 16787); to provide for the issuance of initial decisions and the disposition of appeals therefrom in adjudications that are subject to the provisions of sections 556 and 557 of Title 5, United States Code; and to make amendments to the definitions in the rules of practice to conform them to the definitions in the regulations issued under the Act, as amended.

The amendments and revisions are as follows:

1. The table of contents is amended to read as follows:

* * * * *

Sec.
4.16 Procedure upon denial of any material fact.

* * * * *

Sec.
4.19–8 Proposed findings of fact, conclusions, orders and reply.
4.19–9 Judge's Decision.
4.19–10 Appeal of decision.
4.20 Appeal procedure and transmittal of record.
4.20–1 Filing of appeal.
4.20–2 Content of appeal.
4.20–3 Response to appeal.
4.20–4 Failure to file response.
4.20–5 Orders denying appeal after review.
4.20–6 Transmittal of record.
4.20–7 Oral argument.
4.20–8 Decision of the Secretary.

* * * * *

2. Section 4.2 is revised to read as follows:

§ 4.2 Definitions.

As used in this part, the terms as defined in Part 1 of Title 9, Code of Federal Regulations, shall apply to this Part 4 with equal force and effect. In addition, and except as may be provided otherwise in this part:

(a) "Act" means the Act of August 24, 1966 (Pub. L. 89–544), commonly known as the Laboratory Animal Welfare Act, as amended by the Animal Welfare Act of 1970 (Pub. L. 91–579) (7 U.S.C. 2131, et seq.), and any legislation amendatory thereof.

(b) "Regulations" means the regulations promulgated pursuant to the Act.

(c) "Hearing" means that part of the proceeding which involves the submission of evidence and means either an oral or written hearing.

(d) "Judge" means any Administrative Law Judge appointed pursuant to 5 U.S.C. 3105 (the Administrative Procedure Act) and assigned to the proceeding involved.

(e) "Decision" means the judge's initial decision made in accordance with the provisions of 5 U.S.C. 556 and 557, and includes the Judge's (1) findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (2) order, and (3) rulings on proposed findings, conclusions and orders submitted by the parties.

(f) "Hearing Clerk" means the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250.

(g) "Administrator" means the Administrator, Animal and Plant Health Inspection Service, United States Department of Agriculture, or any officer or employee to whom authority has heretofore or may hereafter be delegated to act in his stead in connection with the function involved.

(h) "Moving paper" means any formal complaint or other document by virtue of which a proceeding under the Act is instituted.

(i) "Complainant" means the party upon whose moving paper the proceeding is instituted.

(j) "Respondent" means the party proceeded against.

(k) "Proceeding" means any action arising under the Act, in which it is required by law that the order or other determination be made only after notice and opportunity for hearing, and if hearing be held, only upon the basis of a record made in the course of such hearing.

(l) "Summary action" means action taken by the Administrator to suspend a license under the Act temporarily.

3. Section 4.3 is amended to read as follows:

§ 4.3 Scope and applicability of this part.

The rules of practice in this part shall be applicable to the procedure governing proceedings and summary action for the suspension or revocation of the license of a person licensed under the Act and the regulations governing proceedings to determine if a person should not be granted a license under the Act and regulations; and governing proceedings for the issuance of cease and desist orders concerning any person subject to the Act.

§ 4.11–3 [Amended]

4. Section 4.11–3 is amended by deleting the period at the end thereof and inserting the following:
", if the Judge determines that such an adjournment is necessary to avoid prejudice to the respondent."

§ 4.12–2 [Amended]

5. Section 4.12–2 is amended by deleting the last sentence and inserting the following in lieu thereof:

If the complainant recommends that the order consented to by the respondent not be issued, the respondent shall file an answer within ten days from the service of such recommendation upon him in accordance with §§ 4.12–1 and 4.12–2 (a) or (b). The answer may contain a request for oral hearing or an express waiver of such hearing.

§§ 4.13–1, 4.13–4, 4.13–5, 4.17, 4.18, 4.18–1, 4.18–2, 4.18–3, 4.18–4, 4.18–5, 4.19–2, 4.19–3, 4.19–4, 4.19–5, 4.19–6, 4.25 and 4.27 [Amended]

6. The terms "Judge(s)," "decision(s)" and "appeal(s)" are substituted for the terms "examiner(s)" "report(s)", and "exception(s)", respectively, wherever the term "examiner(s)", "report(s)", and "exception(s)" appear in these sections of the rules of practice:

7. Section 4.14 is amended to read as follows:

§ 4.14 Consent order.

At any time after the institution of a proceeding, the respondent may file an answer or amended answer consenting to an order as set forth in § 4.12–2(c). Within 15 days after service of such an answer, the complainant shall file his recommendation. If the complainant recommends that the order consented to by the respondent be issued, the Judge may enter such order which shall have the same force and effect as a decision issued by the Judge.

§§ 4.15–1, 4.15–2 and 4.15–3 [Deleted]

8. Sections 4.15–1, 4.15–2 and 4.15–3 are deleted and a new § 4.15 is issued to read as follows:

§ 4.15 Procedure upon admission of facts.

The admission, in the answer or by failure to file an answer, of all the material allegations of fact contained in the

V 39 59 MAR 26 74 XUM

moving paper shall constitute a waiver of hearing. Upon such admission of facts, the complainant shall file, in triplicate, a proposed decision along with a motion for adoption thereof, which motion and proposed decision shall be served upon the respondent by the Hearing Clerk. Within ten days after service of such motion and proposed decision upon him, respondent may file with the Hearing Clerk, objections thereto, and the Judge shall issue a decision without further procedure or hearing. Absent a waiver by the parties of service of the Judge's decision, it shall be served upon them in the manner provided in § 4.25. The parties shall be given an opportunity to file appeals to the decision, to file briefs in support of such appeals, and to make oral argument before the Secretary in accordance with § 4.20. Unless the initial decision is appealed under § 4.20, it shall become final and effective without further procedure 35 days after service thereof upon the respondent.

9. Section 4.16 is amended to read as follows:

§ 4.16 Procedure upon denial of any material fact.

In the event the respondent denies any material fact and fails to request a hearing within the time specified in the complaint, the matter shall be set down for hearing by the Judge, upon motion of the complainant in accordance with § 4.19–1.

10. Paragraphs (d) and (f) of § 4.18–4 are amended to read as follows:

§ 4.18–4 Powers.

* * * * *

(d) Summon and examine witnesses and receive evidence;

* * * * *

(f) Hear oral argument on facts or law or both.

* * * * *

11. Section 4.19–1 is amended to read as follows:

§ 4.19–1 Time and place of hearing.

If and when the proceeding has reached the stage when a hearing is to be held, the Judge, not less than ten days after service on all parties of a motion by any of the parties, jointly or individually, stating that the matter is at issue and is ready for hearing, shall set a time and place of hearing, giving careful consideration to the convenience of the parties, and shall file with the Hearing Clerk a notice stating the time and place of hearing, which shall be served upon the parties. If any change in the time or place of the hearing is made, the Judge shall file with the Hearing Clerk a notice of such change, which notice shall be served upon the parties, unless it is made during the course of the hearing and made a part of the transcript.

§ 4.19–4 [Amended]

12. The period at the end of paragraph (a) of § 4.19–4 is deleted and the following is added thereto:

: *Provided*, That the moving paper may be issued by the Administrator, the Judge, or the Secretary.

13. Paragraphs (b), (d) and (f) of § 4.19–6 is amended to read as follows:

§ 4.19–6 Evidence.

* * * * *

(b) *Objections.* If a party objects to the admission or exclusion of any evidence or to the limitation of the scope of any examination or cross-examination, or to any other ruling of the Judge, he shall briefly state the grounds for such objection, whereupon an automatic exception will follow which may be pursued in any appeal pursuant to § 4.20 hereof by the party adversely affected by the ruling of the Judge. The transcript need not include argument or debate thereon except as may be ordered by the Judge. The ruling of the Judge on any objection shall be a part of the transcript. Only objections made before the Judge may subsequently be relied upon in the proceeding.

* * * * *

(d) *Exhibits.* Except where the Judge finds that the furnishing of copies is impracticable, sufficient copies of each exhibit, in addition to the original and two copies, shall be filed with the Judge for the use of the other party to the proceeding. A true copy of an exhibit may be substituted for the original.

* * * * *

(f) *Offer of proof.* Whenever evidence is excluded from the record, the party offering such evidence may make an offer of proof, which shall be included in the transcript. The offer of proof shall consist of a brief statement describing the evidence excluded. If the evidence consists of a brief oral statement or of an exhibit, it shall be inserted into the transcript in toto. In such event, it shall be considered part of the transcript and record if the Secretary, upon appeal, decides the Judge's ruling excluding the evidence was erroneous and prejudicial and that treating it as evidence will not be unduly prejudicial. The Judge shall not allow the insertion of such excluded evidence in toto, if the taking of such evidence will consume considerable time at the hearing. In this latter event, if the Secretary decides the Judge's ruling excluding the evidence was both erroneous and prejudicial, the hearing may be reopened to permit the taking of such evidence.

14. Paragraph (a) of § 4.19–7 is amended to read as follows:

§ 4.19–7 Transcripts.

(a) *Filing and certification.* Oral hearings shall be stenographically reported and transcribed. As soon as practicable after the close of the hearing, and within the time provided by the reporting contract, the reporter shall transmit to the Hearing Clerk the original of the transcript of testimony and the original copies of exhibits introduced or offered in evidence at the hearing, and as many copies of the transcript as required and officially requested. Upon receipt of the original and copies of the transcript and exhibits, the Hearing Clerk shall send to the Judge the original transcript and exhibits. At such time as the Judge may specify, but not later than the time fixed for filing proposed findings of fact, conclusions and order, or briefs, as the case may be, the parties may file with the Judge proposed corrections to the transcript. As soon as practicable, the Judge shall file with the Hearing Clerk his certificate indicating any corrections to be made in the transcript, and stating that, to the best of his knowledge and belief, the transcript, as corrected, is a true, correct, and complete transcript of the testimony given at the hearing and that the exhibits are all the exhibits properly a part of the hearing record. The original of such certificate shall be attached to the original transcript, and a copy of such certificate shall be served upon each of the parties by the Hearing Clerk who shall also enter onto the transcript (without obscuring the text) any corrections noted in the certification.

15. Section 4.19–8 is revised to read as follows:

§ 4.19–8 Proposed findings of fact, conclusions, and order; reply.

(a) Within such time as the Judge may prescribe, each party may file with the Hearing Clerk proposed findings of fact, conclusions, and order, based solely on the record, and a brief in support thereof. A copy of each such document filed by a party shall be served upon all other parties by the Hearing Clerk.

(b) Within twenty (20) days after service upon him of the proposed findings of fact, conclusions, and order, or within such other time as the Judge may prescribe, each party may file a reply in writing with the Hearing Clerk, to the proposed findings of fact, conclusions, and order, and any brief in support thereof of the opposing party.

(c) Within the same periods of time, either party may file with the Hearing Clerk a brief statement in writing concerning each of the objections taken to the action of the Judge at the hearing, as set out in § 4.19–6(b), upon which the party wishes to rely, referring, where relevant to the pages of the transcript.

16. Section 4.19–9 is amended to read as follows:

§ 4.19–9 Judge's decision.

(a) The Judge, within a reasonable time after the termination of the period allowed to the parties for the filing of the proposed findings of fact, conclusions, and order, and briefs in support thereof, and replies threto, shall prepare on the basis of the record and shall file with the Hearing Clerk, his decision. A copy of such decision shall be served by the Hearing Clerk upon each of the parties.

(b) Such decision shall become final and effective without further proceedings thirty-five (35) days after service thereof upon the respondent, unless there is an appeal to the Secretary by a party to the proceeding: *Provided, however*, That no decision shall be final for purposes of judicial review except a final decision issued by the Secretary pursuant to an appeal by a party to the proceeding.

17. Section 4.19–10 is amended to read as follows:

§ 4.19–10 Appeal of decision.

Any party who disagrees with the Judge's decision, or any part thereof, may file on appeal in writing to the Secretary in the manner specified in § 4.20.

§ 4.19–11 [Deleted]

18. Section 4.19–11 is deleted.

19. Sections 4.20, 4.20–1, 4.20–2, and 4.20–3 are revised to read as follows:

§ 4.20 Appeal procedure and transmittal of record.

§ 4.20–1 Filing of appeal.

Any party to the proceeding who desires to appeal a decision of the Judge shall file his appeal in writing with the Hearing Clerk within thirty (30) days after service of said decision upon him.

§ 4.20–2 Content of appeal.

Each issue shall be separately numbered and plainly and concisely stated. The same point shall not be restated in repetitive discussions of an issue. Each issue shall be supported by detailed citations of the record, statutes, regulations or principal authorities relied upon. A brief may be filed in support of the appeal simultaneously with the appeal.

§ 4.20–3 Response to appeal.

Within twenty (20) days after service of a copy of an appeal on the other party, said other party may file with the Hearing Clerk a response in support of or in opposition to the appeal.

§ 4.20–4 Failure to file response.

If appellee fails to file his response to the appeal as provided in § 4.20–3, he shall be deemed to have waived his right to file a response.

§ 4.20–5 Orders denying appeal after review.

If the Secretary decides on appeal, after reviewing the entire record, that no change or modification of the Judge's decision is warranted, he may adopt the Judge's decision as the final decision of the Secretary, preserving any right of the party bringing the appeal to seek judicial review of such decision in the proper forum.

§ 4.20–6 Transmittal of record.

Immediately following filing of an appeal, the Hearing Clerk shall transmit to the Secretary the record of the proceeding. Such record shall include: The pleadings; motions and requests filed, and rulings thereon; the transcript of the testimony taken at the hearing, together with the exhibits filed therein; any documents or papers filed in connection with prehearing conferences; such proposed findings of fact, conclusions, and orders, and briefs in support thereof, and replies, as may have been filed in connection with the proceeding; the Judge's initial decision; and such exceptions, statements of objections, and briefs in support thereof, as may have been filed in the proceeding.

§ 4.20–7 Oral argument.

(a) *Request for oral argument.* Within the time allowed for filing of an appeal and brief in support thereof, appellant may request in writing opportunity for oral argument before the Secretary. Within the time allowed for filing a response, appellee may file a request in writing for opportunity for such oral argument. Failure to make such request in writing shall be deemed a waiver of oral argument. The Secretary in his discretion, may grant, refuse, or limit any request for oral argument on appeal. Except where the Secretary determines that argument on additional issues would be helpful, argument shall be limited to the issues raised by the appeal(s).

(b) *Scope of argument.* Argument to be heard on appeal, whether oral or on brief, shall be limited to the issues raised by the appeal, except that if the Secretary determines that additional issues should be argued, the parties shall be given reasonable notice of such determination, so as to permit preparation of adequate arguments on all issues to be argued.

(c) *Notice of argument; postponement.* The Hearing Clerk shall advise all parties of time and place at which oral argument will be heard. A request for postponement of the argument must be made by motion filed a reasonable amount of time in advance of the date fixed for argument.

(d) *Order and content of argument.* The appellant is entitled to open and conclude the argument. The opening argument shall include a concise statement of the case.

(e) *Cross and separate appeals.* A cross or separate appeal shall be argued with the initial appeal at a single argument, unless the Secretary otherwise directs. If a case involves a cross-appeal, the Administrator shall be deemed the appellant unless the parties otherwise agree or the Secretary otherwise directs. If separate appellants support the same argument, care shall be taken to avoid duplication of argument.

(f) *Submission on briefs.* By agreement of the parties, an appeal may be submitted for decision on the briefs, but the Secretary may direct that the appeal be argued orally.

§ 4.20–8 Decision of the Secretary.

(a) As soon as practicable after oral argument, or in case there is no oral argument, as soon as practicable after the filing of the appeal and grounds therefor and any response thereto, the Secretary shall issue his decision in the proceeding, which shall include findings of fact, conclusions, order and rulings on motions, exceptions, statements of objections, and proposed findings, conclusions, and orders submitted by the parties not theretofore ruled upon; unless he issues an order denying the appeal as provided for in § 4.20–5 herein.

(b) The decision, prepared as described in paragraph (a) of this section, shall be issued and served upon the parties as the final decision in the proceeding without further procedure.

§§ 4.22, 4.22–1, and 4.22–2 [Amended]

20. "Order" is deleted and "Secretary's decision" is inserted wherever "order" appears in §§ 4.22, 4.22–1, and 4.22–2.

21. Paragraph (a) of § 4.22–1 is amended by deleting "to the Secretary" and adding the following sentence thereto:

"Any such petition filed prior to an appeal being filed shall be ruled upon by the Judge, and any such petition filed after an appeal is filed shall be ruled upon by the Secretary."

22. Section 4.22–2 is amended by deleting the words "by the Secretary" in the fourth sentence therein and by amending the second sentence therein to read as follows:

"As soon as practicable thereafter, the Judge or the Secretary, as the case may be, shall announce his decision whether to grant or deny the petition."

§§ 4.23–1, 4.23–2, and 4.23–3 [Amended]

23. The words "under the Act" are inserted in place of "as a dealer" wherever the words "as a dealer" appear in §§ 4.23–1 and 4.23–2.

24. The word "person" is inserted in place of "dealer" wherever the term "dealer" appears in § 4.23–3.

25. Section 4.24 is amended to read as follows:

§ 4.24 Filing; number of copies.

Except as is provided otherwise in this section, all documents or papers required or authorized by the rules in this part to be filed with the Hearing Clerk shall be filed in triplicate: *Provided*, That, where there are more than two parties to the proceeding, a sufficient number of copies shall be filed so as to provide for service upon all the parties to the proceeding. Any document or paper, required or authorized under the rules in this part to be filed with the Hearing Clerk, shall, during the course of an oral hearing, be filed with the Judge.

(Sec. 21, 80 Stat. 353, (7 U.S.C. 2151); 37 FR 28464, 28477; 38 FR 19141)

Effective date. The foregoing amendments and revisions shall become effective March 26, 1974.

Done at Washington, D.C. this 21st day of March 1974.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.74–6890 Filed 3–25–74;8:45 am]

V 39 59 MAR 26 74 XUM

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

Change in Disease Status of France Because of Existence of African Swine Fever

Statement of considerations. The purpose of this amendment is to add France to the list of countries in § 94.8 where African swine fever is known to exist. This action which restricts the importation of pork and pork products into the United States from France is necessary to protect the livestock of the United States from the threat of introduction or dissemination of African swine fever.

Accordingly, Part 94, Title 9, Code of Federal Regulations is hereby amended as follows:

In § 94.8, in the introductory paragraph, the name of France is added after the reference to "Cuba."

(Sec. 2, 32 Stat. 792, as amended; (21 U.S.C. 111); 37 FR 28464, 28477; 38 FR 19141.)

Effective date. The foregoing amendment shall become effective March 21, 1974, except with respect to intransit shipments of pork and pork products that are on board a carrier moving to the United States at the time of issuance hereof. Such intransit shipments shall upon arrival in the United States be allowed entry only under such specific requirements or be disposed of in such manner as the Administrator may determine in each specific case to be necessary and adequate to safeguard against the introduction or dissemination of African swine fever into the United States.

The restrictions imposed by this amendment must be made effective immediately to protect the livestock industry of the United States against the introduction of African swine fever from France. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 21st day of March 1974.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services Animal and Plant Health Inspection Service.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER A—GENERAL

[74-222]

PART 511—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Statements of Employment and Financial Interests

MARCH 19, 1974.

The Federal Home Loan Bank Board considers it desirable to amend Part 511 of the General Regulations of the Federal Home Loan Bank Board (12 CFR Part 511) governing employee responsibilities and conduct.

Sections 511.735-35, -38 and -50 of the Board's General Regulations have heretofore required statements of employment and financial interest (Forms 511A and 511B) to be submitted to and reviewed by a Member of the Board designated by the Chairman. The Board now considers it desirable to have these statements submitted to the Director of the Personnel Management Division for review by the Board's General Counsel.

Section 511.735-36 of the General Regulations of the Federal Home Loan Bank Board designates those employees required to submit statements of employment and financial interests. The Board considers it desirable to revise the list of employees designated to submit statements in accordance with the criteria established by 5 CFR 735.403. The revised section provides an exception for employees classified below GS-13. Because the positions of Hearing Officer and Office Services Manager no longer exist, they have been deleted from the section. Positions that have been added to § 511.735-36 are: the Chief of the Special Services Branch, the Director of the Holding Companies Section, a Field Supervisor, a Chief Analyst, a Regional Director, a Regional Supervisor, an Assistant Regional Director or Supervisor and an Appraiser.

Section 511.735-36 also provides for exclusion of employees from the reporting requirements under certain circumstances. The section had provided for exclusion from those requirements when the Board determines that the duties of such person are at such a level of responsibility that the submission of such a statement is not necessary because of the degree of supervision and review over such person and the inconsequential effect on the integrity of the Agency and the Government.

The Civil Service Commission Regulations (5 CFR 735.404) permit a further exclusion from the reporting requirements when the duties of a position are such that the likelihood of the incumbent's involvement in a conflicts-of-interest situation is remote. The Board considers it desirable to adopt such further exclusion from the reporting requirements permitted by 5 CFR 735.404. To accomplish this, § 511.735-36 is revised to incorporate the additional ground for excluding employees from the reporting requirements.

Sections 511.735-38 and -39 state the time and place for submission of employee statements and supplementary statements. The Board considers it desirable to change the dates for such submissions and to include procedural provisions concerning these submissions.

Accordingly, the Board hereby amends said Part 511 by amending §§ 511.735-35, -36, -38, -39 and -50 thereof to read as set forth below.

Since the above amendments involve matters relating to Board management and personnel, the Board hereby finds that notice and public procedure with respect to said amendments are unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and since publication of said amendments for the 30-day period specified in 12 CFR 508.14 and 12 U.S.C. 553(d) prior to the effective date of said amendment would in the opinion of the Board be unnecessary because said amendments relate to personnel matters and relieve restrictions as to such matters, the Board hereby provides that said amendments shall become effective as hereinbefore set forth. These amendments were approved by the Civil Service Commission on March 7, 1974, and are effective on March 26, 1974.

§ 511.735-35 Filing and review of statements of employment and financial interests.

(a) Each employee required to do so by § 511.735-36 shall complete and file Form 511A[1] in accordance with § 511.735-38. Each special Government employee shall complete and file Form 511B[1] in accordance with § 511.735-44.

(b) All Forms 511A and 511B shall be filed with the Director of the Personnel Management Division who shall submit them for review by the General Counsel of the Board to determine whether there are any conflicts of interest or other violations of law or this part. Information obtained from other sources shall be treated as if it were contained in the forms.

(c) All reports, forms, papers and the information contained therein, filed pursuant to this section shall be confidential, except as the Board or the Civil Service Commission may determine for good cause shown.

(d) To insure the confidentiality of the information contained in Forms 511A and 511B and attachments, such forms and attachments shall only be accessible to the Chairman, Board Members, the Director of the Personnel Management Division, the General Counsel, the Counselor and Deputy Counselors referred to in § 511.735-4 and such other persons as the General Counsel or the Director of the Personnel Management Division may, from time to time, deem appropriate or necessary. They shall be responsible for

[1] Forms 511A and 511B filed as part of the original document.

maintaining the statements in confidence and shall not allow access to or allow information to be disclosed from such forms and attachments to such forms except to carry out the purpose of this part and for good cause shown.

§ 511.735-36 Employees required to submit statements.

Except as provided in § 511.735-37 of this part, statements of employment and financial interests on Form 511A shall be filed by each employee of the Board classified at GS-13 or above, or at a comparable pay level, who is a Director, Deputy Director, Associate Director, or Assistant Director of a Division or an Office (regardless of the specific title), an Adviser or Assistant to the Board, an Assistant to the Chairman or Member of the Board, the Chief of the Special Services Branch, the Director of the Holding Companies Section, a Chief Examiner, an Assistant Chief Examiner, a Field Supervisor, a Chief Analyst, a Regional Director, a Regional Supervisor, an Assistant Regional Director or Supervisor, an Appraiser and an Examiner serving as Examiner-in-Charge. However, employees described in this paragraph may be excluded from the reporting requirement when the General Counsel, subject to the concurrence of the Chairman of the Board, determines that:

(a) The duties of a position are such that the likelihood of the incumbent's involvement in a conflicts-of-interest situation is remote; or

(b) The duties of a position are at such a level of responsibility that the submission of a statement of employment and financial interests is not necessary because of the degree of supervision and review over the incumbent or the inconsequential effect on the integrity of the Agency and the Government.

§ 511.735-38 Time and place for submission of employees' statements.

(a) An employee required to submit a Form 511A under this part shall submit that form to the Director of the Personnel Management Division by the later of:

(1) May 31, 1974, if employed on or before May 1, 1974; or

(2) Thirty days after his entrance on duty; or

(3) Thirty days after the inclusion of his position in § 511.735-36.

(b) Prior to December 31 of each year, the Director of the Personnel Management Division shall furnish the appropriate form to each employee required to submit a supplementary statement under § 511.735-39. Each employee shall submit the completed form to the Director of the Personnel Management Division not later than January 31 of the following year.

(c) The Director of the Personnel Management Division shall promptly report to the General Counsel any failure to submit Form 511A as required by this section or of failure to submit a supplementary statement as required by § 511.735-39.

§ 511.735-39 Supplementary statements.

Changes in, or additions to, the information contained in an employee's Form 511A shall be reported in a supplementary statement as of December 31 each year. If no changes or additions occur, a negative report is required. Notwithstanding the filing of the annual report required by this section, each employee shall at all times avoid acquiring a financial interest that could result, or take an action that could result, in a violation of the conflict-of-interest provisions of section 208 of title 18 U.S.C. or Subpart B of this part.

§ 511.735-50 Reporting unresolved conflicts of interest.

When conflicts of interest or other violations or apparent violations of this part cannot be resolved or explained to the satisfaction of the General Counsel, he shall report the matter to the Chairman of the Board.

(E.O. 11222 of May 8, 1965, 30 FR 6469, 3 CFR, 1965, Supp.; 5 CFR 734-104.)

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,
Assistant Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 72-NE-21]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Control Zone; Correction

On October 9, 1973, FR Doc. 73-21410 was published in the FEDERAL REGISTER (38 FR 27820) designating a new Hartford, Connecticut Control Zone. A review of the language of the document revealed that the new control zone was inadvertently referred to as the East Hartford, Connecticut Control Zone instead of the Hartford, Connecticut Control Zone. Accordingly, action is taken herein to correct this minor error.

Since this amendment is editorial in nature and no substantive change in the regulation is effected, notice and public procedure thereon are unnecessary, and good cause exists for making this amendment effective in less than thirty (30) days notice.

In view of the foregoing, FR Doc. 73-21410 (38 FR 27820) is amended by deleting the phrase "East Hartford" in paragraph 1 of the amendment and inserting the word "Hartford" in lieu thereof.

(Sec. 307(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a)]; sec. 6(c) of the Department of Transportation Act [49 U.S.C. 166(c)])

Issued in Burlington, Massachusetts on March 13, 1974.

FERRIS J. HOWLAND,
Director, New England Region.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46) Interpret or apply sec. 5, 38 Stat. 719, as amended, 82 Stat. 146, 147; (15 U.S.C. 45, 1601-1605) [Cease and desist order, W. T. Grant Company, New York, N.Y. Docket 8931, Feb. 8, 1974]

In the Matter of W. T. Grant Company, a Corporation.

Consent order requiring a nationwide retail chain headquartered in New York City, among other things to cease using deceptive tactics to sell its coupon book credit plan; selling property insurance in a deceptive manner; and selling credit life and credit accident and health insurance in such a way as to violate the Truth in Lending Act.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent W. T. Grant Company, a corporation, and respondent's agents, representatives, employees and successors and assigns, directly or through any corporate or other

V 39 59 MAR 26 74 XUM

device, in connection with the advertising, offering for sale, sale or distribution of merchandise or services in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Misrepresenting, directly or by implication, that:

a. The coupon book contract is an agreement for the extension of open end credit;

b. Coupon books are devices issued pursuant to an agreement for the extension of open end credit; or

c. A consumer is required to have had a coupon book account before he can obtain open end credit from respondent; *Provided*, That nothing herein contained shall prevent any representation to a consumer who then qualifies only for a coupon book account that he may thereafter qualify for open end credit.

2. Filling in any portion of or presenting a coupon book contract to any consumer for his signature unless, in connection with each such contract, respondent:

a. Prior thereto has presented to the consumer the following statement, printed in a clear and conspicuous manner on one side of a single sheet of paper (the reverse side of which sheet of paper may contain the coupon book contract) without any other language:

[In 16-point bold-faced type]

NOTICE: The Federal Trade Commission requires that we provide this information before we can offer you a coupon book contract:

[In 12-point bold-faced type]

W. T. Grant Company offers two different credit plans to qualified customers—an OPEN END CHARGE ACCOUNT and a COUPON BOOK PLAN. The Coupon Book Plan is NOT an open end or revolving credit plan. Some of the differences are:

1. *The kind of credit*—A CHARGE ACCOUNT is open end or revolving credit. The COUPON BOOK PLAN is installment credit. Once you use the first coupon, you would pay for the entire book in the same way you would pay for a small installment loan.

2. *Your payments*—Under the COUPON BOOK PLAN, after you use your first coupon, you pay each month part of the full price of the coupon book, which includes all finance charges, whether you have exchanged all the coupons for specific merchandise or not. When you have a CHARGE ACCOUNT, you pay only for the merchandise you have actually purchased, plus finance charges if you don't pay the entire balance each month.

3. *Computing finance charges*. Finance charges on a CHARGE ACCOUNT are computed on specific merchandise purchased up to that point in time. But COUPON BOOK PLAN finance charges are computed on the total price of the coupon book and not just on the coupons already exchanged.

4. *How to avoid finance charges*. You can avoid finance charges when you have a CHARGE ACCOUNT by paying the entire balance each month. You can only avoid finance charges on the COUPON BOOK PLAN by paying for the entire book within 30 days after you use the first coupon or by paying for the coupons used within 30 days after exchanging the first one and returning all unused coupons to Grant's. You may return coupons at any time and receive full credit for the unused portion.

[as applicable]

You may choose either Grant's open end charge account or its coupon book plan [or] at this time, you are only eligible for the coupon book plan.

[In 16-point bold-faced type]

I received and read the above statement before any coupon book contract was filled in or presented to me to sign.

Signed ---------- Date ----------

b. Prior thereto has obtained an acknowledgment, signed and dated by the consumer, of his having received and read the aforesaid statement; and

c. Provides the consumer with a copy which he may retain of the aforesaid statement, printed in the manner set forth in subparagraph (a) of this paragraph, which copy shall be on the reverse side of the coupon book contract.

3. Adding on the existing coupon book obligation of any consumer who had not previously been eligible for open end credit from respondent unless respondent has:

a. Obtained and scored a credit application from said consumer within the previous twelve months, which requirement can be fulfilled by updating and rescoring a credit application previously submitted to respondent by the consumer, and

b. Complied with the requirements of Paragraph Two hereof.

4. Offering or presenting to any consumer optional or voluntary property insurance written in connection with any credit sale unless respondent has:

a. Read and presented to the consumer the following statement, printed in a clear and conspicuous manner in 12-point bold-face type on one side of a single sheet of paper which does not contain the credit agreement:

Property insurance is entirely optional. You are not required to buy it to get credit.

b. Obtained from the consumer, on the same document as the aforesaid statement, an acknowledgment, signed and dated by the consumer, of his having received and had read to him the aforesaid statement.

5. Checking the box next to the statement "I wish Property" on the retail installment contract, or otherwise making any mark, designation, or indication on any document in connection with any similar statement respecting the selection of voluntary or optional property insurance; *Provided*, That nothing herein contained shall prevent respondent from setting forth the cost of such insurance, as permitted by § 226.4(a)(6) of Regulation Z (12 CFR Part 226) of the Truth in Lending Act (Pub. L. 90-321, 15 U.S.C. 1601 et seq.): *Provided further*, That the cost of such insurance shall not be filled in as part of the "amount financed" on the disclosure statement required by Regulation Z in advance of the consumer's free and independent selection of such insurance.

6. Requesting any consumer to sign any document which purports to indicate the consumer's desire for optional or voluntary property insurance without orally disclosing to the consumer that his credit has already been approved, that property insurance is not required in connection with the extension of credit, that he need not buy such insurance, and that his signature is being requested in connection with an election of voluntary or optional property insurance.

7. Misrepresenting, orally or otherwise, directly or by implication, that voluntary or optional property insurance is required as a condition of obtaining credit from respondent.

8. Discouraging, by misrepresentation, oral or otherwise, directly or by implication, the declination of voluntary or optional property insurance.

II. *It is further ordered*, That respondent W. T. Grant Company, a corporation, and respondent's agents, representatives, employees, and successors and assigns, directly or through any corporate or other device, in connection with the extension of consumer credit, as "consumer credit" is defined in Regulation Z (12 CFR Part 226) of the Truth in Lending Act (Pub. L. 90-321, 15 U.S.C. 1601 et seq.), do forthwith cease and desist from:

1. Failing to include and to itemize the amount of premiums for credit life and credit accident and health insurance as part of the finance charge, unless the amount of such premiums is excluded from the finance charge because of appropriate exercise of the option available pursuant to § 226.4(a)(5) of Regulation Z.

2. Offering or presenting to any consumer optional or voluntary credit life and/or credit accident and health insurance in connection with any credit transaction unless respondent has:

a. Read and presented to the consumer the following statement, printed in a clear and conspicuous manner in 12-point bold-faced type on one side of a single sheet of paper which does not contain the credit agreement:

Credit life and/or credit accident and health insurance are entirely optional. You are not required to buy them to get credit.

b. Obtained from the consumer, on the same document as the aforesaid statement, an acknowledgment, signed and dated by the consumer, of his having received and had read to him the aforesaid statement.

3. Checking the box next to the statement "I wish Credit Life and Accident and Sickness" in the retail installment contract, or otherwise making any mark, designation or indication on any document in connection with any similar statement respecting the selection of voluntary or optional credit life insurance and/or credit accident and health insurance; provided that nothing herein contained shall prevent respondent from disclosing the cost of such insurance, as permitted by § 226.4(a)(5)(ii) of Regulation Z: *Provided further*, That the cost of such insurance shall not be filled in as part of the "amount financed" on the disclosure statement required by Regulation Z before the consumer has given affirmative written indication that he desires such insurance coverage.

4. Requesting any consumer to sign any document which purports to indicate the consumer's desire for optional or voluntary credit life and/or credit accident and health insurance without orally disclosing to the consumer that his credit has already been approved, that credit life and/or credit accident and health insurance are not required in connection with the extension of credit, that he need not buy such insurance and that his signature is being requested in connection with an election of optional credit life and/or credit accident and health insurance.

5. Misrepresenting, orally or otherwise, directly or by implication, that credit life and/or accident and health insurance are required as a condition of obtaining credit from respondent.

6. Discouraging, by misrepresentation, oral or otherwise, directly or by implication, the declination of optional or voluntary credit life and/or credit accident or health insurance.

7. Failing to compute and disclose accurately the finance charge, as required by §§ 226.4 and 226.8 of Regulation Z.

8. Failing to compute and disclose accurately the annual percentage rate to the nearest quarter of one percent, as required by §§ 226.5 and 226.8 of Regulation Z.

9. Failing, in any consumer credit transaction or advertisement, to make all disclosures, determined in accordance with §§ 226.4 and 226.5 of Regulation Z, in the manner, form and amount required by §§ 226.6, 226.7, 226.8 and 226.10 of Regulation Z.

It is further ordered, That respondent shall retain a detailed description of the procedures used by it in the preceding three (3) years to determine whether a consumer has qualified for a coupon book account only or has also qualified for open end credit from respondent.

It is further ordered, That respondent shall, one (1) year after the date upon which this order becomes final and one (1) year thereafter, file with the Commission a report, in writing, which shall include the following information, with respect to those states in which respondent offers coupon books:

1. The number of coupon book contracts and open end credit agreements signed in the previous year;

2. The number of consumers who have qualified for open end credit from respondent but chose to sign a coupon book contract during the previous year;

3. The number of consumers who qualified during the prior year for a coupon book account only and did not sign a coupon book contract;

4. The number of consumers during the previous year who, having previously been ineligible for open end credit from respondent, became eligible for and chose such credit.

It is further ordered, That respondent deliver a copy of this order to cease and desist to all present and future personnel of respondent engaged in the making of respondent's policy concerning consumer credit, in the preparation or placement of advertisement offering to extend consumer credit, in the consummation of any extension of consumer credit, or in the offering of property, credit life or credit accident and health insurance in connection with any consumer credit transaction, and that respondent secure a signed statement from each such person acknowledging that he has received and read this order.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That respondent shall retain for two (2) years following its execution the original of any statement or disclosure the receipt of which must be acknowledged by any consumer pursuant to this order.

It is further ordered, That respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth, in detail, the manner and form in which it has complied with the order to cease and desist contained herein.

Issued: February 8, 1974.

By the Commission.

[SEAL] CHARLES A. TOBIN, *Secretary.*

[FR Doc.74-6904 Filed 3-25-74;8:45 am]

Title 24—Housing and Urban Development

SUBTITLE A—OFFICE OF THE SECRETARY

[Docket No. R-74-245]

PART 81—REGULATIONS GOVERNING OPERATIONS OF THE FEDERAL NATIONAL MORTGAGE ASSOCIATION

Issuance and Custody of FNMA Securities

On December 14, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 34473) stating that the Department of Housing and Urban Development was considering the request of Federal National Mortgage Association for the proposed adoption in regulation form of a book-entry system to govern the issuance and custody of FNMA securities.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No written objections have been received and the proposed regulations are hereby adopted without change as follows:

§§ 81.15, 81.16, 81.17 [Redesignated]

1. Sections 81.6, 81.7 and 81.8 are redesignated as §§ 81.15, 81.16 and 81.17 respectively.

2. The following new entries are added to the table of sections:

Sec.
81.6 Definition of terms.
81.7 Authority of Reserve bank.
81.8 Scope and effect of book-entry procedure.
81.9 Transfer or pledge.
81.10 Withdrawal of FNMA securities.
81.11 Delivery of FNMA securities.
81.12 Registered bonds and notes.
81.13 Servicing book-entry FNMA securities; payment of interest; payment at maturity or upon call.
81.14 Treasury Department regulations; applicability to the corporation.

3. New §§ 81.6 through 81.14 are added to read as follows:

§ 81.6 Definition of terms.

In this part, unless the context otherwise requires or indicates:

(a) "Reserve bank" means a Federal Reserve Bank and its branches acting as Fiscal Agent of the corporation and when indicated acting in its individual capacity or as Fiscal Agent of the United States.

(b) "FNMA security" means any obligation of the corporation (except short-term discount notes and obligations convertible into shares of common stock) issued under 12 U.S.C. 1719 (b), (d), and (e) in the form of a definitive FNMA security or a book-entry FNMA security.

(c) "Definitive FNMA security" means a FNMA security in engraved or printed form.

(d) "Book-entry FNMA security" means a FNMA security in the form of an entry made as prescribed in this part on the records of a Reserve bank.

(e) "Pledge" includes a pledge of, or any other security interest in, FNMA securities as collateral for loans or advances or to secure deposits of public monies or the performance of an obligation.

(f) "Date of call" is with respect to FNMA securities issued under 12 U.S.C. 1719 (d) and (e), the date fixed in the authorizing resolution of the Board of Directors of the corporation on which the obligor will make payment of the security before maturity in accordance with its terms, and, with respect to FNMA securities issued under 12 U.S.C. 1719(b), the date fixed in the offering notice issued by the corporation.

(g) "Member bank" means any national bank, State bank, or bank or trust company which is a member of a Reserve bank.

§ 81.7 Authority of Reserve bank.

Each Reserve bank is hereby authorized, in accordance with the provisions of this part, to:

(a) Issue book-entry FNMA securities by means of entries on its records which shall include the name of the depositor, the amount, the loan title (or series) and maturity date;

(b) Effect conversions between book-entry FNMA securities and definitive FNMA securities;

(c) Otherwise service and maintain book-entry FNMA securities; and

(d) Issue a confirmation of transaction in the form of a written advice (serially numbered or otherwise) which

V 39 59 MAR 26 74 XUM

specifies the amount and description of any securities, that is, loan title (or series) and maturity date, sold or transferred, and the date of the transaction.

§ 81.8 Scope and effect of book-entry procedure.

(a) A Reserve bank as Fiscal Agent of the corporation may apply the book-entry procedure provided for in this part to any FNMA securities which have been or are hereafter deposited for any purpose in accounts with it in its individual capacity under terms and conditions which indicate that the Reserve bank will continue to maintain such deposit accounts in its individual capacity, notwithstanding application of the book-entry procedure to such securities. This paragraph is applicable, but not limited, to securities deposited:

(1) As collateral pledged to a Reserve bank (in its individual capacity) for advances by it;

(2) By a member bank for its sole account;

(3) By a member bank held for the account of its customers;

(4) In connection with deposits in a member bank of funds of States, municipalities, or other political subdivisions; or

(5) In connection with the performance of an obligation or duty under Federal, State, municipal, or local law, or judgments or decrees of courts.

The application of the book-entry procedure under this paragraph shall not derogate from or adversely affect the relationships that would otherwise exist between a Reserve bank in its individual capacity and its depositors concerning any deposits under this paragraph. Whenever the book-entry procedure is applied to such FNMA securities, the Reserve bank is authorized to take all action necessary in respect of the book-entry procedure to enable such Reserve bank in its individual capacity to perform its obligations as depositary with respect to such FNMA securities.

(b) A Reserve bank as Fiscal Agent of the corporation may apply the book-entry procedure to FNMA securities deposited as collateral pledged to the United States under Treasury Department Circulars Nos. 92 and 176, both as revised and amended, and may apply the book-entry procedure, with the approval of the Secretary of the Treasury, to any other FNMA securities deposited with a Reserve bank, as Fiscal Agent of the United States.

(c) Any person having an interest in FNMA securities which are deposited with a Reserve bank (in either its individual capacity or as Fiscal Agent of the United States) for any purpose shall be deemed to have consented to their conversion to book-entry FNMA securities pursuant to the provisions of this part, and in the manner and under the procedures prescribed by the Reserve bank.

(d) No deposits shall be accepted under this section on or after the date of maturity or call of the securities.

§ 81.9 Transfer or pledge.

(a) A transfer or pledge of book-entry FNMA securities to a Reserve bank (in its individual capacity or as Fiscal Agent of the United States), or to the United States, or to any transferee or pledgee eligible to maintain an appropriate book-entry account in its name with a Reserve bank under §§ 81.6 through 81.13 of this part, is effected and perfected, notwithstanding any provision of law to the contrary, by a Reserve bank making an appropriate entry in its records of the securities transferred or pledged. The making of such an entry in the records of a Reserve bank shall:

(1) Have the effect of a delivery in bearer form of definitive FNMA securities;

(2) Have the effect of a taking of delivery by the transferee or pledgee;

(3) Constitute the transferee or pledgee a holder; and

(4) If a pledge, effect a perfected security interest therein in favor of the pledgee. A transfer or pledge of book-entry FNMA securities effected under this paragraph shall have priority over any transfer, pledge, or other interest, theretofore or thereafter affected or perfected under paragraph (b) of this section or in any other manner.

(b) A transfer or a pledge of transferable FNMA securities, or any interest therein, which is maintained by a Reserve bank (in its individual capacity or as Fiscal Agent of the United States) in a book-entry account under §§ 81.6 through 81.13 of this part, including securities in book-entry form under § 81.8 (a) (3), is effected, and a pledge is perfected, by any means that would be effective under applicable law to effect a transfer or to effect and perfect a pledge of the FNMA securities, or any interest therein, if the securities were maintained by the Reserve bank in bearer definitive form. For purposes of transfer or pledge hereunder, book-entry FNMA securities maintained by a Reserve bank shall, notwithstanding any provision of law to the contrary, be deemed to be maintained in bearer definitive form. A Reserve bank maintaining book-entry FNMA securities either in its individual capacity or as Fiscal Agent of the United States is not a bailee for purposes of notification of pledges of those securities under this paragraph, or a third person in possession for purposes of acknowledgment of transfers thereof under this paragraph. Where transferable FNMA securities are recorded on the books of a depositary (a bank, banking institution, financial firm, or similar party, which regularly accepts in the course of its business FNMA securities as a custodial service for customers, and maintains accounts in the names of such customers reflecting ownership of or interst in such securities) for account of the pledgor or transferor thereof and such securities are on deposit with a Reserve bank in a book-entry account hereunder, such depositary shall, for purposes of perfecting a pledge of such securities or effecting delivery of such securities to a purchaser under applicable provisions of law, be the bailee to which notification of the pledge of the securities may be given or the third person in possession from which acknowledgment of the holding of the securities for the purchaser may be obtained. A Reserve bank will not accept notice or advice of a transfer or pledge effected or perfected under this paragraph, and any such notice or advice shall have no effect. A Reserve bank may continue to deal with its depositor in accordance with the provisions of this part, notwithstanding any transfer or pledge effected or perfected under this paragraph.

(c) No filing or recording with a public recording office or officer shall be necessary or effective with respect to any transfer or pledge of book-entry FNMA securities or any interest therein.

(d) A Reserve bank shall, upon receipt of appropriate instructions, convert book-entry FNMA securities into definitive FNMA securities and deliver them in accordance with such instructions; no such conversion shall affect existing interests in such FNMA securities.

(e) A transfer of book-entry FNMA securities within a Reserve bank shall be made in accordance with procedures established by the Reserve bank not inconsistent with this part. The transfer of book-entry FNMA securities by a Reserve bank may be made through a telegraphic transfer procedure.

(f) All requests for transfer or withdrawal must be made prior to the maturity or date of call of the securities.

§ 81.10 Withdrawal of FNMA securities.

(a) A depositor of book-entry FNMA securities may withdraw them from a Reserve bank by requesting delivery of like definitive FNMA securities to itself or on its order to a transferee.

(b) FNMA securities which are actually to be delivered upon withdrawal may be issued either in registered or in bearer form.

§ 81.11 Delivery of FNMA securities.

A Reserve bank which has received FNMA securities and effected pledges, made entries regarding them, or transferred or delivered them according to the instructions of its depositor is not liable for conversion or for participation in breach of fiduciary duty even though the depositor had no right to dispose of or take other action in respect of the securities. A Reserve bank shall be fully discharged of its obligations under this part by the delivery of FNMA securities in definitive form to its depositor or upon the order of such depositor. Customers of a member bank or other depositary (other than a Reserve bank) may obtain FNMA securities in definitive form only by causing the depositor of the Reserve bank to order the withdrawal thereof from the Reserve bank.

§ 81.12 Registered bonds and notes.

No formal assignment shall be required for the conversion to book-entry FNMA securities of registered FNMA securities held by a Reserve bank (in either its individual capacity or as Fiscal Agent of the United States) on the effective date of this part for any purpose specified in § 81.8(a). Registered FNMA securities deposited thereafter with a Reserve bank for any purpose specified in § 81.8 shall be assigned for conversion to book-entry FNMA securities. The assignment, which shall be executed in accordance with the provisions of Subpart F of 31 CFR Part 306, so far as applicable shall be to "Federal Reserve Bank of _____ as Fiscal Agent of the Federal National Mortgage Association for conversion to book-entry FNMA securities."

§ 81.13 Servicing book-entry FNMA securities; payment of interest; payment at maturity or upon call.

Interest becoming due on book-entry FNMA securities shall be charged to the general account of the Treasurer of the United States on the interest due date and remitted or credited in accordance with the depositor's instructions. Such securities shall be redeemed and charged to the general account of the Treasurer of the United States on the date of maturity, call or advance refunding, and the redemption proceeds, principal and interest, shall be disposed of in accordance with the depositor's instructions.

§ 81.14 Treasury Department regulations; applicability to the corporation.

The provisions of Treasury Department Circular No. 300, 31 CFR Part 306 (other than Subpart O), as amended from time to time, shall apply insofar as appropriate to obligations of the corporation for which a Reserve bank shall act as Fiscal Agent of the corporation and to the extent that such provisions are consistent with agreements between the corporation and the Reserve banks acting as Fiscal Agents of the corporation. Definitions and terms used in Treasury Department Circular No. 300 should read as though modified to effectuate the application of the regulations to the corporation.

(Sec. 7(d), Department of HUD Act; (42 U.S.C. 3535(d)))

Effective date. These amendments are effective as of April 25, 1974.

JAMES T. LYNN,
Secretary of Housing and Urban Development.

CHAPTER IX—OFFICE OF INTERSTATE LAND SALES REGISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-74-228]

PART 1710—LAND REGISTRATION

Exemptions and State Filings; Effective Date

On March 11, 1974, the Department of Housing and Urban Development published regulations (39 FR 9431 and 9432) amending §§ 1710.13 and 1710.26 of the Interstate Land Sales Regulations. The published effective date of those amendments was April 1, 1974. However, § 1720.-25 of the Interstate Land Sales Regulations provides that the effective date of any rule or regulation shall not be less than thirty days after the date of publication unless the Secretary specifies an earlier effective date for good cause found and published with the rule or regulation. There having been no publication of cause to specify an earlier effective date and the published effective date being less than thirty days after the date of publication, the effective date is hereby extended to conform with the requirements in § 1720.25.

Accordingly, the effective date of §§ 1710.13 and 1710.26, as amended, shall be May 1, 1974.

(Sec. 7(d), Department of Housing and Urban Development Act, 79 Stat. 670 (42 U.S.C. 3535 (d), 1419, 82 Stat. 593), (15 U.S.C. 1718), Secretary's delegation of authority published at 37 FR 5071, March 9, 1972)

Issued at Washington, D.C., March 20, 1974.

GEORGE K. BERNSTEIN,
Interstate Land Sales Administrator.

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-224]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
Maryland	Wicomico	Salisbury, city of				Mar. 20, 1974, Emergency.
Massachusetts	Bristol	Norton, town of				Do.
Minnesota	Clay	Dilworth, city of				Do.
Do.	Morrison	Unincorporated areas.				Do.
Do.	Yellow Medicine	Porter, city of				Do.
New York	Herkimer	Mohawk, village of				Do.
Pennsylvania	Perry	Liverpool, borough of				Do.
Vermont	Caledonia	Lyndon, town of, also Lyndonville, village of.				Do.
Washington	Douglas	Unincorporated areas.				Do.
Wisconsin	Kenosha	Silver Lake, village of.				Do.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (secs. 408-410, Pub. L. 91-152, Dec. 24, 19 69), 42 U.S.C. 4001-4127; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969)

Issued: March 19, 1974.

[Docket No. FI-226]

PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

The Federal Insurance Administrator finds that comment and public procedure and the use of delayed effective dates in identifying the areas of communities which have special flood or mudslide hazards, in accordance with 24 CFR Part 1915, would be contrary to the public interest. The purpose of such identifications is to guide new development away from areas threatened by flooding. Since this publication is merely for the purpose of informing the public of the location of areas of special flood hazard and has no binding effect on the sale of flood insurance or the commencement of construction, notice and public procedure are impracticable, unnecessary, and contrary to the public interest. Inasmuch as this publication is not a substantive rule, the identification of special hazard areas shall be effective on the date shown. Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of identification of areas which have special flood hazards
Arizona	Maricopa	Goodyear, town of.	H 04 013 0220 01	Arizona State Land Department, 1624 West Adams, room 400, Phoenix, Ariz. 85007. Arizona Department of Insurance, P.O. Box 7098, 718 West Glenrosa, Phoenix, Ariz. 85011.	Mayor, Town Hall, 119 North Litchfield, Goodyear, Ariz. 85338.	Mar. 15, 1974.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Revised S.O. No. 1174]

PART 1033—CAR SERVICE

Distribution of Boxcars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 19th day of March 1974.

It appearing, That an acute shortage of plain boxcars exists on the Illinois Central Gulf Railroad Company; that shippers located on lines of this carrier are being deprived of such cars required for loading, resulting in a severe emergency; that present rules, regulations, and practices with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of boxcars owned by this railroad are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1174 Service Order No. 1174.

(a) *Distribution of boxcars.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) Return to owner empty, except as otherwise authorized in paragraphs (3) or (12) herein, all plain boxcars which are listed in the Official Railway Equipment Register, I.C.C. R.E.R., No. 390, issued by W. J. Trezise, or reissues thereof, as having mechanical designation XM, bearing reporting marks issued to the Illinois Central Gulf Railroad Company (ICG).

(2) Deliver to the ICG empty, or in the manner provided in paragraph (4) herein, all plain boxcars which are listed in the Official Railway Equipment Register, I.C.C. R.E.R. No. 390, issued by W. J. Trezise, or reissues thereof, as having mechanical designation XM, owned by, or bearing reporting marks issued to any of the following railroads. (See exceptions, paragraphs (4) and (12)):

Atlantic and Western Railway (except ATW 3001–3022) Reporting marks: ATW
Roscoe, Snyder and Pacific Railway Company Reporting marks: RSP
Wellsville, Addison & Galeton Railroad Corporation Reporting marks: WAG
Pickens Railroad Company, Richmond, Fredericksburg and Potomac Railroad Company, and Vermont Railway, Inc., eliminated.

(3) Boxcars described in paragraph (1) herein may be loaded only to stations on the lines of the car owner or to any station which is a junction with the car owner. After unloading at a junction with the car owner, such cars shall be delivered to the car owner at that junction, either loaded or empty.

(4) Boxcars described in paragraph (2) herein may be used for loading to any station on the lines of the ICG, or for loading to any station on the lines of the car owner, or for the movement of any traffic routed via the car owner. After unloading at a junction with the ICG, such cars shall be delivered to the ICG at that junction, either loaded or empty. After unloading at a junction with the car owner, such cars shall be either delivered to the car owner at that junction or forwarded to the ICG in the manner provided herein, as directed by the car owner.

(5) Empty plain boxcars owned by any railroad listed in paragraph (2) which are located on lines other than the car owner and which cannot be loaded in the manner prescribed in paragraph (4) shall be handled as follows:

(i) If located on a line which has a direct connection with the ICG:

Deliver empty to the ICG.

(ii) If located on a line which does not have a direct connection with the ICG and which is not listed in the index to Special Car Order No. 90 as defined in Car Service Rule 2 prescribed by the Commission in Ex Parte No. 241:

Deliver to the line designated to receive empty plain boxcars owned by the ICG. Such designated line shall accept and move these cars to the ICG in the manner provided herein.

(6) Empty plain boxcars described in paragraph (2) herein which are located on the lines of the car owner may be loaded to any destination.

(7) Plain boxcars described in paragraph (1) include both plain boxcars in general service and plain boxcars assigned to the exclusive use of a specified shipper.

(8) The return to the owner or delivery to the ICG of a boxcar described in paragraph (1) or (2) herein shall be accomplished when it is delivered to the car owner or to the ICG, either empty or loaded.

(9) Junction points and connections with the car owner or with the ICG shall be those listed by the car owner in its specific registration in the Official Railway Equipment Register, I.C.C. R.E.R., No. 390, issued by W. J. Trezise, or successive issues thereof, under the heading "Freight Connections and Junction Points."

(10) No common carrier by railroad subject to the Interstate Commerce Act shall accept from shipper any loaded boxcar for movements contrary to the provisions of subparagraph (3), (4), or (6) of this paragraph.

(11) Plain boxcars described in paragraph (2) herein are exempt from the provisions of Car Service Rules 1 and 2 prescribed by the Commission in Ex Parte No. 241 while subject to the provisions of this order or when located on the lines of the ICG.

(12) *Exception:* To alleviate hardships or inequities, exceptions to this order may be authorized to the carrier by the Railroad Service Board, Interstate Commerce Commission, Washington, D.C. Requests for such exceptions may be made only by carriers.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(c) *Effective date.* This order shall become effective at 11:59 p.m., March 24, 1974.

(d) *Expiration date.* This order shall expire at 11:59 p.m., April 30, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

[MC–C–6748]

PART 1061—LIMITATION OF SMOKING ON INTERSTATE PASSENGER CARRIER VEHICLES

Smoking by Passengers and Operating Personnel on Interstate Buses

MARCH 21, 1974.

Upon consideration of the record in the above-entitled proceeding, and of:

V 39 59 MAR 26 74 XUM

(1) Petition of National Association of Motor Bus Owners, intervener in opposition, filed March 2, 1974, for postponement of the effective date of the order entered on November 8, 1971;

(2) Reply by Action on Smoking and Health, intervener in support, filed March 18, 1974;

and good cause appearing therefor:

It is ordered, That the effective date of the order of November 8, 1971, be, and it is hereby, extended and fixed as April 22, 1974.

It is further ordered, That the petition in all other respects, be, and it is hereby, denied.

It is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

Dated at Washington, D.C., this 20th day of March 1974.

By the Commission, Chairman Stafford.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Ch. I]

[Docket No. 13579; Notice 74-12]

TWO-SEGMENT ILS NOISE ABATEMENT APPROACH

Advance Notice of Proposed Rule Making

The Federal Aviation Administration is considering proposing regulations that would require aircraft landing at specified airports to use a two-segment instrument landing system (ILS) approach in order to reduce the noise impact on persons and property underlying the approach path.

This advance notice of proposed rule making is being issued in accordance with the FAA's policy for the early institution of public proceedings in actions related to rule making. An advance notice is issued to invite early public participation in the identification and selection of a course or alternate courses of action with respect to a particular rule-making problem.

Interested persons are invited to participate in this rule-making action by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before June 30, 1974, will be considered by the Administrator before taking action with respect to the subject matter. All comments will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

I. *Relation to overall FAA noise abatement program.* The two-segment ILS approach procedure is one component of FAA's overall program to reduce aircraft noise. Its ultimate effectiveness is directly related to the other elements of this comprehensive program that are in various stages of completion. Public comment is invited, not only with respect to the limited subject of the two-segment approach itself, but also with respect to potential ways in which its effectiveness can be increased through its combined use with the other elements of this program. For example, the two-segment approach could be combined with retrofit of older technology turbojet aircraft since the noise reduction from both actions would be additive. Additional components of the FAA's overall program are:

1. Advanced notice of proposed rule making "Civil Airplane Fleet Noise Level (FNL) Requirements" issued on January 24, 1973, which would require all civil transport category and turbojet airplanes to comply with Part 36, "Noise Standards: Aircraft Type and Airworthiness Certification."

2. Prohibition of civil aircraft sonic boom. Regulation issued on March 23, 1973.

3. Notice of proposed rule making issued on October 10, 1973, to establish noise standards for the type certification and future production of propeller driven small airplanes.

4. Prohibition of continued production of old technology transport category and turbojet airplanes unless they meet Part 36. Regulation issued on October 26, 1973.

5. Advance notice of proposed rule making issued on December 28, 1973 to establish noise standards for VTOL, STOL, and RTOL aircraft.

6. Advisory Circular issued on January 18, 1974 recommending noise abatement takeoff and departure procedures for civil turbojet powered airplanes.

7. Advisory Circular issued on August 7, 1972 providing guidance material for VFR flight near noise sensitive areas.

8. FAA Order "Aircraft Sound Description System," issued on August 10, 1973 which establishes criteria to be used in aircraft noise analyses.

9. Standardization of standard (single segment) ILS glidescope angle at 3°.

10. Air traffic procedures designed to minimize the time that jet aircraft spend at low altitudes (keep 'em high policy).

11. Comprehensive engineering and development activities including retrofit feasibility studies, core engine noise control, development and evaluation of improved noise abatement approach and departure procedures, compatible land use development studies (and related studies of aircraft noise characteristics), and evaluation of propeller-driven aircraft noise.

II. *The two-segment approach: Background.* The two-segment noise abatement approach technique has been under development over the past several years and has progressed from the engineering and development phase to operational evaluation under actual operating conditions in the national airspace system. Several variations of the two-segment approach have been examined and one airline has adopted a noninstrumented two-segment approach procedure under VFR conditions. The government and industry groups involved in the development of the ILS two-segment approach have determined that a noninstrumented or dead-reckoning two-segment approach may be acceptable under certain conditions but that the development of a guidance system is needed before a regulatory requirement for implementation can be issued. Accordingly, the main development effort has been directed at an instrumented two-segment ILS noise abatement approach that could be used for both IFR or VFR approaches. An FAA/NASA research program now nearing completion has developed airborne flight control display and guidance systems, and related technology that appears to be adequate to accomplish two-segment approaches during IFR conditions.

A contract was awarded to an air carrier in 1971 for flight evaluation of a navigation system designated to define the upper segment of a two-segment approach procedure. The contract specified development of the airborne flight control display and guidance system, and procedures necessary to make the two-segment approach operationally acceptable and compatible with the National Airspace System.

The study included obtaining enough pilot participation to evaluate the airborne hardware and validate the operational concept. An extensive engineering test phase was conducted to optimize the airborne avionics and develop a suitable flight profile. The remainder of the flying was used to expose a broad sample of pilots to the experimental two-segment approach in a controlled test environment. The conclusions derived from this exploratory test program identified the two-segment approach as a feasible method of reducing noise levels under airport approach paths without a degradation in flight safety. Although limited in scope, the test data were useful in identifying those areas needing further exploration and refinement before the airborne equipment and flight profiles could be considered for commercial service.

In 1972, another air carrier was awarded a contract to develop an aircraft landing procedure using two-segment approach technology. The engineering flight test and offline pilot evaluation considered profile variations, noise level optimization, and system abnormalities such as abused approaches (including excessive flight path, airspeed deviations, and missed approaches). This resulted in optimized flight procedures and a standardized profile for later inservice evaluations.

V 39 59 MAR 26 74 XUM

The inservice evaluation began on the West Coast in April 1973 and has been completed. Approximately 40 flight crews participated in the six-month evaluation, flying over 500 two-segment approaches at Los Angeles, San Francisco, Portland and other selected airports.

Data analysis and final report conclusions indicate general pilot acceptance and few equipment or procedural problems or ATC environment limitations. A review of over 400 air traffic control evaluation questionnaires revealed negligible impact on ATC system capacity. However, more experience in high density areas will be required to determine the total effect on the National Airspace System. A dynamic simulation to analyze ATC effects is being developed.

Another flight test phase involves the use of a jet aircraft equipped with a modified area navigation (RNAV) system for evaluating the two-segment approach procedure. The aircraft's 3-dimensional RNAV capability will be used for providing the upper glide slope segment of the two-segment profile. This program has begun and will be concluded in late 1974. If successful, it will provide another avionic option for conducting two-segment approaches.

In addition to the operational flight evaluations, analytical studies have been conducted that indicate the capability of the turbojet fleet to accomplish two-segment approaches. These studies indicate that the procedure is generally compatible with the airline turbojet performance capabilities.

III. *Estimated costs and benefits.* It is estimated that the two-segment ILS noise abatement approach will provide from 5 to 15 decibel dB(A) reductions in aircraft noise depending on the type of aircraft and the approach altitudes. The two-segment ILS approach procedure proposed in this Notice should provide the most benefit at distances 3 to 8 miles from the landing runway along the ILS approach path. Analysis of the 90 EPNdB noise contours of aircraft using the two-segment approach indicates that the area on the ground that a typical 4-engine turbojet exposed to 90 EPNdB or more on approach will be reduced from approximately 18 square miles to 3.7 square miles. A typical three-engine turbojet approach noise test showed a reduction from 4.7 square miles to 1.5 square miles. For a new technology large jet meeting Part 36, the reduction was from 1.1 square miles to .8 square mile. If similar reductions were achieved for the 100 approaches at the 58 airports now being considered for use of the two-segment approach (see discussion below), it is estimated that adoption of the two-segment approach would bring significant noise relief to hundreds of thousands of persons.

Since power requirements are reduced on the two-segment approach, a fuel savings is also possible. In addition, co-located ILS/DME (distance measuring equipment) on the ground should provide increased cockpit intelligence, thereby providing a safety benefit.

As far as costs are concerned, adoption of the two-segment ILS noise abatement approach will result in significant economic impact in the air and on the ground. On the ground, it is anticipated that colocated ILS/DME, with the DME located at the glide slope transmitter, will be the basic ground navigation equipment for the two-segment approach. Of the over 100 ILS approaches that are candidates for this procedure, very few have colocated DME. This equipment will be installed by FAA and operating on or before the effective date of the regulation. U.S. Government (FAA) costs for 100 DME installations at $50,000 per unit would amount to $5 million.

The cost of airborne equipment would be borne by the aircraft operator and is also estimated to be substantial. Avionics of the type used in one of the tests are estimated at $35,000 per aircraft (dual installation) including labor, parts and spares. Assuming this is the nominal cost figure, and that all air carrier turbojet aircraft (1800) would require the Avionics refit, air carrier costs would amount to $66.6 million. An equivalent amount is estimated for general aviation turbojet aircraft.

IV. *The regulatory proposal.* As now contemplated by the FAA, the two-segment ILS approach regulation would require the following: An ILS approach would be conducted. It would consist of a two-part descent with the upper segment glide angle flown at 5° to 6°, depending on the type of aircraft, and with the second segment being flown using the existing ILS glide slope angle. Transition between upper and lower segments would be accomplished far enough from touchdown to allow stabilized conditions by 700 feet AGL. Normally, the transition would begin approximately three nautical miles from touchdown and be completed by two nautical miles from touchdown. The regulation would allow a stable, controlled approach down to the Category I weather minimums in the standard instrument approach procedures issued under Part 97 of the Federal Aviation Regulations. The regulation would apply to all civil turbojet airplanes.

As stated above, the regulation would commit FAA to procure and install DME equipment, as necessary, at the designated ILS runways. Affected aircraft operators would be required to equip aircraft with approved avionics capable of executing two-segment approaches. The compliance date would be 24 months from the effective date of the regulation.

The regulation would apply to over 100 designated ILS approaches to 58 airports. These approaches were selected by the FAA since they all involve airport neighborhood situations in which a noise sensitive community or area exists from 3 to 8 miles from the runway under the approach path. This is the zone where the perceived noise relief from the two-segment approach is expected to be the greatest.

The following airports are now under consideration for implementation of the two-segment noise abatement approach (listed by State):

Arizona [Sky Harbor (Phoenix), Tucson International];
California [Fresno Air Terminal (Hollywood-Burbank, Lindberg Field (San Diego), Long Beach, Los Angeles International, Oakland International, Ontario International, Orange County (Santa Ana), San Jose Municipal, San Francisco International];
Colorado [Stableton International (Denver)];
Connecticut [Bradley International (Windsor Locks)];
Florida [Miami International, Tampa International];
Georgia [Atlanta Hartsfield International];
Illinois [Chicago-Midway, Chicago-O'Hare International];
Iowa [Des Moines Municipal];
Kentucky-Ohio [Greater Cincinnati, Standiford Field (Louisville)];
Louisiana [New Orleans International];
Maine [Bangor International, Portland International];
Massachusetts [Barnstable Municipal (Hyannis), Logan International (Boston)];
Michigan [Detroit—Wayne County Metropolitan];
Minnesota [Minneapolis-St. Paul International];
Missouri [Lambert International (St. Louis)];
Nebraska [Eppley Airfield (Omaha)];
New Jersey [Atlantic City, Mercer County (Trenton), Morristown Municipal, Newark];
New York [Albany County, J. F. Kennedy International (New York), La Guardia (New York), Stewart (Newburgh) Westchester County (White Plains)];
Ohio [Cleveland-Hopkins International, Dayton Municipal, Port Columbus International];
Oklahoma [Tulsa International, Will Rogers World (Oklahoma City)];
Pennsylvania [Philadelphia International];
Rhode Island [T. F. Green (Providence)];
Texas [Dallas-Ft. Worth Regional, Houston Intercontinental, San Antonio International];
Vermont [Burlington International];
Virginia [Dulles International (D.C.), Washington National (D.C.)];
Washington [Lewiston Nez Perce, Seattle-Tacoma International];
Wisconsin [Madison Municipal].

V. Issues for public comment.

The factors that will be considered by the FAA in determining whether to require use of the two-segment noise abatement ILS approach at the airports listed above involve safety, economics, and environmental effectiveness. These factors include:

1. Effectiveness in reducing noise (individually and in relation to the other elements of the FAA noise abatement program discussed in Section I above.

2. Compatibility of the system with various aircraft types, considering—

a. Flight safety aspects;

b. Weather aspects (such as wind, icing, and turbulence); and

c. Engine performance degradation, if any.

3. Wake turbulence (a joint FAA/NASA program is being conducted at present to determine whether turbulence hazards are introduced by the two-segment approach).

4. Impact on ATC system capacity, particularly in the terminal areas of the 58 listed airports.

5. Flight acceptance (pilot workload and functional characteristics).

6. Total system adequacy and redundancy (ground and air).

7. Cost effectiveness considering the cost of additional airborne avionics requirements and the immediate and long term ground navaid costs.

AUTHORITY: [Sections 307(c), 313(a), 601, and 611, Federal Aviation Act of 1958 (49 U.S.C. 1348(c), 1354(a), 1421, 1431 (as amended by the Noise Control Act of 1972 (Pub. L. 92-574)); section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Title I, National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.); and Executive Order 11514, March 5, 1970].

Issued in Washington, D.C., on March 20, 1974.

[14 CFR Part 39]

[Airworthiness Docket No. 73-NW-17-AD]

BOEING MODEL 727 SERIES AIRPLANES

Proposed Inspection and/or Replacement Requirement

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Boeing Model 727 Series Airplanes. There have been failures of the nose and main landing gear actuator feeder tubes on Boeing 727 Series Airplanes that could result in loss of the capability (hydraulically or manually) to extend the affected landing gear. A failure of the landing gear to fully extend could result in a serious airplane accident during landing roll. Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed airworthiness directive would require inspection and/or, as necessary, replacement of the aluminum nose landing gear actuator feeder tube, P/N 69-14198-1 and aluminum main landing gear actuator feeder tube, P/N 65-17971-1, on Boeing Model 727 Series Airplanes.

The Boeing Company has issued a telegraphic message No. 6-2750-15205 dated December 18, 1973, and Service Letter M-7020-021 dated January 23, 1974, pertaining to this service problem. About March 15, 1974, Boeing published Service Bulletin No. 727-32-218 with recommended corrective action pertaining to this problem. Replacement steel feeder tubes (P/N 69-14198-2 and 65-17971-2) are expected to become available in limited quantities about May 30, 1974.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Northwest Region, Attention: The Regional Counsel, Airworthiness: Rules Docket, FAA Building Boeing Field, Seattle, Washington 98108. All communications received on or before June 15, 1974, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423, and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

BOEING: Applies to all Model 787 Series Airplanes certificated in all categories.

Compliance required as indicated unless already accomplished.

To prevent failure of the nose and main landing gear actuator aluminum feeder tubes which could prevent complete extension of the landing gear and the possible loss of aircraft control during landing roll, inspect or replace, as necessary, the nose landing gear actuator aluminum feeder tube P/N 69-14198-1, and each main landing gear actuator aluminum feeder tube, P/N 65-17971-1, in accordance with the following:

PART I—COMPLIANCE TIME DETERMINATION

A. Applies to all main landing gear actuator assemblies listed in Boeing Service Bulletin 727-32-218 having a P/N 65-17971-1 aluminum feeder tube.

The main landing gear actuator feeder tubes must be inspected or replaced, as applicable, in accordance with PART II (A), (B), (C), or (D) of this AD within the number of landings determined below.

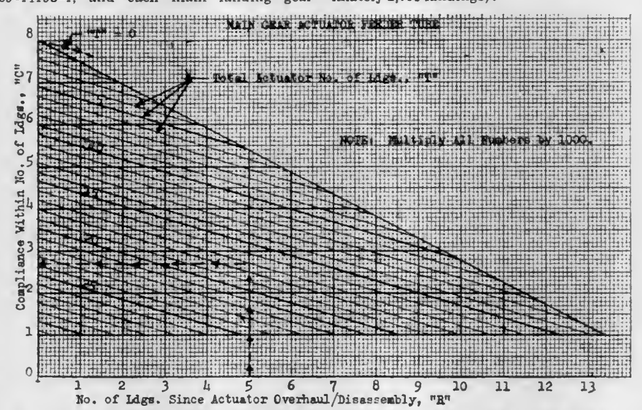
Compliance time (in number of landings) for main landing gear actuator feeder tubes must be determined at the effective date of this AD in accordance with the following equation:

$$"C" = 8000 - (0.3R) - (0.22T)$$

Where. (1) "C" is the number of landings within which compliance must be accomplished, however, it shall not be required that "C" be less than 1000 landings and shall not be greater than 8000 landings for any actuator.

(2) "R" is the number of landings since the actuator was initially overhauled or disassembled.

(3) "T" is the total number of landings since the actuator was new.



NOTE: The following graph may be used to determine the approximate number of landings remaining until compliance is required.

Example. Total number of landings on actuator (T) is 17,000. Number of landings on actuator since overhaul (R) is 5,000.

Step 1. Locate the number of landings since overhaul on the R axis (5,000).

Step 2. Follow the vertical line up to where it is intercepted by the sloping total number of actuator landings (17,000).

Step 3. Using a straight edge guide, follow horizontally to the left and read the number of landings within which compliance with this AD must be accomplished (Approximately 2,700 landings).

B. Applies to all nose landing gear actuator assemblies listed in Boeing Service Bulletin 727-32-218 having a P/N 69-14198-1 aluminum feeder tube.

Nose landing gear actuator feeder tubes must be inspected or replaced, as applicable, in accordance with Part II (A), (B), (C), or (D) of this AD within the number of landings listed in the following schedule.

NOSE GEAR ACTUATOR FEEDER TUBE

Total No. of Landings on Actuator Feeder Tubes	*Compliance Required Within Next No. of Landings*
0–8,000	14,000
8,000–14,000	8,000
14,000–18,000	5,000
More than 18,000	4,000

V 39 59 MAR 26 74 XUM

C. Applies to nose landing gear actuator assemblies with aluminum feeder tubes, P/N 69–14198–1, and main landing gear actuators with aluminum feeder tubes, P/N 65–17971–1, which have been inspected or replaced in accordance with Part II (A) or (B) of this AD, as applicable.

(1) Nose landing gear and main landing gear actuator feeder tubes must be inspected at periodic intervals not to exceed 1000 landings, in accordance with Part II (A) of this AD; or

(2) Nose landing gear and main landing gear actuator feeder tubes must be replaced within 1000 landings in accordance with Part II(B), (C), or (D) of this AD.

D. Applies to nose landing gear actuator assemblies with new aluminum feeder tubes, P N 69–14198–1, and main landing gear actuators with new aluminum feeder tubes, P/N 65–17971–1, which were installed in accordance with the installation instructions contained in Boeing Service Bulletin 727–32–218 (issued on or about March 15, 1974).

(1) Main landing gear actuator feeder tubes must be inspected or replaced within 14,000 landings, in accordance with Part II (A), (B), (C), or (D) of this AD.

(2) Nose landing gear actuator feeder tubes must be inspected or replaced within 18,000 landings, in accordance with part II (A), (B), (C), or (D) of this AD.

E. For the purpose of complying with this AD, the number of landings may be determined by actual count or, subject to approval by the FAA assigned maintenance inspector, by dividing the airplane time in service by the operator's fleet average time per flight.

PART II—COMPLIANCE METHODS

(A) Inspect for evidence of cracks in the area of the "O" ring groove and the areas around the multiple orifice holes in the necked down portions of the nose and main landing actuator feeder tube in accordance with Boeing Service Bulletin 727–32–218 (issued on or about March 15, 1974) or an equivalent inspection method approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, FAA, Northwest Region, and then comply with Part I–C. If evidence of cracking is found replace feeder tube in accordance with Part II (B), (C), or (D) of this AD; or

(B) Replace the aluminum feeder tube, P N 69–14198–1 (nose gear), and P/N 65–17971–1 (main gear) with a serviceable used aluminum feeder tube, as determined per Part II (A) of this AD, of the same part number in accordance with Boeing Service Bulletin 727–32–218 (issued on or about March 15, 1974) and then comply with Part I–C of this AD as applicable; or

(C) Replace the aluminum feeder tube, P N 69–14198–1 (nose gear) and P/N 65–17971–1 (main gear) with a new aluminum feeder tube of the same part number in accordance with Boeing Service Bulletin 727–32–218 (issued on or about March 15, 1974) and then comply with Part I–D of this AD as applicable; or

(D) As terminating action for this AD, replace the aluminum feeder tubes, P/N 69–14198–1 (nose gear) and P/N 65–17971–1 (main gear) with steel feeder tubes, P/N 69–14198–2 (nose gear) and P/N 65–17971–2 (main gear) in accordance with Boeing Service Bulletin 727–32–218 (issued on or about March 15, 1974).

Issued in Seattle, Washington, on March 15, 1974.

J. H. TANNER,
Acting Director,
Northwest Region.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 2]

[Docket No. 19973]

BANDS FOR TERRESTRIAL SERVICES

Allocation Provisions

Amendment of Part 2 of the Commission's Rules to provide allocations in the 40 GHz to 300 GHz bands for terrestrial Services.

1. Notice of proposed rule making in the above entitled matter is hereby given.

2. Prior to 1971 the frequencies above 40 GHz were essentially unallocated. On June 7 of that year a World Administrative Radio Conference for Space Telecommunications (WARC–ST) was convened in Geneva, Switzerland, by the International Telecommunications Union (ITU). The WARC–ST was convened for the purpose of allocating frequencies for space radio services and radio astronomy. Among the frequencies allocated were a number of bands between 40 GHz and 275 GHz. In its Report and Order of February 14, 1973 (38 FR 5562, March 1, 1973; FCC 73–169), terminating the proceedings in Docket No. 19547, the Commission amended the Table of Frequency Allocations (§ 2.106 of its Rules and Regulations) to conform as nearly as was practicable to the ITU Regulations as revised by the WARC–ST. With the exception of adding one footnote relating to radio astronomy and of making an interim allocation to the amateur and experimental services in bands not allocated to space services, the Commission adopted the same allocations above 40 GHz as had the WARC–ST.

3. The proceedings in Docket No. 19547 made allocations only as necessary to accommodate space services and radio astronomy, and, since the whole of the 40 to 300 GHz band had previously been unallocated (except for a small band for radio astronomy), there are currently no allocations in the band for regular terrestrial services. Although there is now little demand for frequencies above 40 GHz, a general allocation table up to 300 GHz including terrestrial services is desirable for future planning purposes and orderly growth as technology develops. In its Notice of Proposed Rule Making of July 14, 1972 (37 FR 15714, August 4, 1972; FCC 72–629), initiating the proceedings in Docket 19547 the Commission stated that it intended at some future time to initiate rule making to develop allocations for terrestrial services in this band. This proceeding is hereby initiated to make such allocations.

4. The proposed allocation table (see Appendix) was developed in coordination with the IRAC of the Office of Telecommunications Policy, and, as was generally the case for space services in this range, the proposed terrestrial allocations will be shared co-equally between Government and non-Government services. The allocations for space services will not be changed from those currently in force. With certain exceptions, bands presently allocated to space services are being allocated on a shared basis [1] to their terrestrial service counterparts. For example, aeronautical mobile is being added to aeronautical mobile-satellite bands, fixed to fixed-satellite bands, etc. Exceptions to this general rule include bands allocated to the inter-satellite service, for which there is no direct terrestrial counterpart, and bands allocated to the broadcasting-satellite service. In both of these cases, we are proposing to add the terrestrial fixed and mobile services to the bands involved. Also, terrestrial mobile as well as fixed is being added to fixed-satellite bands. No terrestrial radiocommunications services are being proposed in bands allocated to earth exploration-satellite and space research or in passive (receive-only) bands allocated to space research and radio astronomy. Some of the bands not currently allocated to space services are being proposed for allocation to the radiolocation service in response to specific Government needs. In keeping with our general sharing philosophy, these radiolocation bands will also be allocated to the non-Government radiolocation service and to the amateur service on a secondary basis. The remaining bands above 40 GHz which are not presently allocated to space services are to be allocated to the terrestrial fixed and mobile services.

5. The format described in § 2.105 of the existing rules has been used in presenting the proposed amendments to the Allocation Table as set forth below. Not shown in the appendix are columns 1 through 4 of the Table which pertain to international allocations and which are unaffected by this proceeding. Columns 5 through 11 show the national allocations as amended by Docket No. 19547 and as proposed herein. Where services are named in the Table in column 8, capital letters (FIXED) denote primary services and lower-case letters (amateur) denote secondary services. In column 6 the symbol "G" means that assignments may be made to stations belonging to the Federal Government; the symbol "NG" means that stations under the Commission's jurisdiction may be assigned frequencies in the band. Shared bands are therefore designated "G, NG". No changes in footnotes to the Allocation Table are being proposed.[2]

6. This proposal to amend the Commission's Rules is issued under the authority of sections 4(i) and 303(c) of the Communications Act of 1934, as amended.

7. Comments in support of or in opposition to the proposed amendments may be filed on or before April 29, 1974. Reply comments may be filed on or before May 10, 1974. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

8. In accordance with the provisions of § 1.419(b) of the Commission's Rules, an original and 14 copies of all statements, briefs, or comments filed shall be furnished the Commission.

9. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C.

Adopted: March 13, 1974.

Released: March 19, 1974.

FEDERAL COMMUNICATIONS COMMISSION.

[SEAL] VINCENT J. MULLINS,
Secretary.

Part 2 of 47 CFR Chapter I is amended as follows:

§ 2.106 [Amended]

United States			Federal Communications Commission			
Band (GHz)	Allocation	Band (GHz)	Service	Class of station	Frequency (GHz)	Nature of SERVICES (of stations

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 505]

[No. 74–77]

ACCESS TO RECORDS

Notice of Proposed Rulemaking

FEBRUARY 6, 1974.

The Federal Home Loan Bank Board considers it advisable to propose amendments to Part 505 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.4 (a) and (d)) in order to provide for public access, retrieval and production of certain computerized information. Accordingly, the Board hereby proposes to amend said Part 505 by adding a new sentence at the end of § 505.4(a) and a new sentence at the end of § 505.4(d), as set forth below:

Paragraph 505.4(a) states the Board's general rule that records are to be made available to any person for inspection and copying, subject to the limitations found in §§ 505.5 and 505.6, even though such records may, in the Board's discretion, be exempted from disclosure under the Freedom of Information Act, section 552 of Title 5 of the United States Code. However, a request for information which requires special computer programming is in effect a request for the Board's staff to perform a research project, and this type of information is not considered to be a form of "identifiable records" within the meaning of section 552(a)(3). Information which can be produced by computer processing and which does not involve special processing is considered a form of "identifiable records". The additional language to § 505.4(a) therefore provides that computerized information which can be produced only by special processing, although not required to be provided, will be made publicly available in accordance with the policy guidelines now set forth in the paragraph, to the extent that it is not otherwise exempt from disclosure and its retrieval and production are not unduly burdensome.

Paragraph 505.4(d) sets out the procedures for inspection and copying of public records and the costs of searching, preparing for inspection and copying. The costs of retrieval and production of computerized materials (whether special processing is required or not) do not fit within the given payment schedule of $5 per research hour, 10¢ per page. The Board proposes to require payment of the full cost of such retrieval and production, as determined by the Director of the Board's Information Systems Division or his designate and with the concurrence of the Director of the Board's Office of Economic Research or his designate. Provision is also made for a waiver of costs in certain cases involving unnecessary hardship and the advancement of the public interest.

Interested persons are invited to submit written data, views and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue, NW., Washington, D.C. 20552, by April 10, 1974, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

§ 505.4 Access to records.

(a) *General rule.* All records of the Board are made available to any person for inspection and copying in accordance with the provisions of this section and subject to the limitations stated in §§ 505.5 and 505.6. It is the policy of the Board to disclose its records to the public, even though such records may, in the Board's discretion, be exempted from disclosure by section 552 of title 5 of the United States Code or by § 505.6 wherever such disclosure can be made without resulting in injury to a public or private interest intended to be protected by the foregoing statute or in a significant interference with the statutory responsibilities of the Board and the national interest. Requests for information which can be produced only by processing through an information systems programs specially designed for that purpose are not regarded as requests for identifiable records that must be disclosed pursuant to section 552 of Title 5 of the United States Code; but it is the policy of the Board to make such information available if it is not otherwise exempt from disclosure, provided that the retrieval or production of such information does not unduly burden or interfere with the functioning of the Board.

* * * * *

(d) *Obtaining access to records.* Records of this Board subject to this section are available for public inspection or copying during regular business hours on regular business days at the offices of the Federal Home Loan Bank Board Building, 101 Indiana Avenue, NW., Washington, D.C. 20552. Any person requesting access to, or copying of, such records shall submit such request in writing to the Secretary to the Board. The request shall state the full name and address of the person requesting access to, or copying of, such records and a description of the records sought that is reasonably sufficient to permit their identification without undue difficulty. Wherever possible requests should be submitted in advance of the date inspection or copying is desired, preferably by mail. A person requesting access to or copies of particular records shall pay the costs of searching, preparing for inspection, or copying such records at the rate of $5 per hour for searching and preparing and 10 cents per page for copying. The Secretary or an Assistant Secretary designated by the Secretary is authorized to waive such payment in instances in which total charges are less than $2 or in which unnecessary hardship would be inflicted upon the requesting person or in which waiver would serve the public interest. With respect to information obtainable only by processing through an information systems program, which has been made available under paragraph (a) of this section, a person requesting such information shall pay a fee equal to the full cost of retrieval and production of the information requested; and the Director, Information Systems Division, or such person or persons as he may designate, with the concurrence of the Director, Office of Economic Research, or such person or persons as he may designate, is authorized to determine the cost of such retrieval and production, and to waive such payment in instances in which unnecessary hardship would be inflicted upon the requesting person or in which waiver would serve the public interest.

(Secs. 11, 17, 47 Stat. 733, 736, as amended (12 U.S.C. 1431, 1437). Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1947 Supp.)

FEDERAL SAVINGS AND LOAN SYSTEM

Proposed Amendments Relating to Employment Contracts

FEBRUARY 19, 1974.

The Federal Home Loan Bank Board considers it desirable to propose to amend Parts 544 and 545 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR Parts 544, 545) for the purpose of removing certain restrictions regarding the authority of Federal savings and loan associations to make employment contracts relating to the employment of certain officers of such associations. By a companion Resolution (Resolution No. 74–126), the Board proposes to amend Parts 563, 570 and 571 of the rules and regulations for Insurance of Accounts (12 CFR Parts 563, 570, 571) regarding employment contracts between State-chartered institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation and the officers of such institutions.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend said Part 544 by adding a new paragraph (k) immediately following paragraph (j) of § 544.6 and to amend Part 545 by adding a new § 545.25–1 immediately following § 545.25, to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, D.C. 20552 by April 30, 1974, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise

V 39 59 MAR 26 74 XUM

disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

1. The proposed amendment to said Part 544 provides for the addition of a new optional bylaw (§ 544.6(k)) authorizing a Federal association's board of directors to enter into an employment contract with any officer of such association "in accordance with regulations of the Federal Home Loan Bank Board". Also, this bylaw provides that "no such contract shall impair the right of the board of directors to remove any officer at any time". A Federal association adopting such new optional bylaw would substitute such bylaw for section 5 of the bylaws prescribed in § 544.5 of said Part 544.

2. The proposed amendment to said Part 545 provides for the addition of a new section (§ 545.25–1) containing the following principal points:

(a) After a Federal association has adopted the new optional bylaw mentioned in paragraph number 1, above, the association may enter into employment contracts with certain of its officers and provide in such contracts for original terms of not in excess of 3 years (and for renewal, at the association's option, for terms of not in excess of one year) if such contracts are made or assumed in connection with:

(1) A conversion of the Federal association to a stock type State-chartered institution;

(2) A merger, purchase of bulk assets or similar transaction and the person employed pursuant to such contract was an officer of an association whose assets are acquired by such Federal association upon completion of such merger, purchase of bulk assets or similar transaction; or

(3) An eligible "new officer" as specified in proposed paragraph (b)(1) of this new section.

It is noted that a person is not an eligible "new officer" if he is a close relative (as defined in said paragraph (b)(1)) of an officer or director of the employing association or if he has been employed by such association during the immediately preceding 12-month period.

(b) Each such employment contract for any term shall provide in substance that:

(1) The officer's employment may be terminated at any time, with or without cause. If such employment is terminated "for cause", the officer will have no right to receive under such contract any compensation or other benefit for any period subsequent to such termination; and the term "for cause" is defined (see the last sentence of § 545.25–1(c)(2) of the proposed amendment for this definition which is a principal provision in the proposed amendment). If such employment is terminated other than "for cause", such termination shall not prejudice the rights of the officer to receive compensation or other benefits under the employment contract.

(2) If the officer's employment is suspended and/or the officer is temporarily prohibited from participating in the conduct of the association's business pursuant to the Board's regulatory prescribed enforcement procedures under section 5 of the Home Owners' Loan Act of 1933, as amended, or section 407 of the National Housing Act, as amended, all obligations of the association under the employment contract shall be suspended. In the event the charges against the officer are dismissed, the association, in its discretion, may pay the officer all or any part of the compensation or other benefits withheld during the period of suspension and/or prohibition.

(3) All obligations of all parties to an officer-Federal association employment contract shall terminate immediately if the association "defaults" (as defined in section 401(d) of the National Housing Act, as amended).

(c) An officer of a Federal association shall not have an employment contract concerning such officer's employment as an officer of such association with any other person or entity such as a service corporation.

Section 544.6 is amended by reserving paragraphs (k)(1) through (k)(4) and by adding paragraph (k)(5) as follows:

PART 544—BYLAWS

§ 544.6 Amendment to bylaws.

* * * * *

(k) *Officers, employees and agents.* Substitute the following for section 5 of the bylaws prescribed in § 544.5:

(1)–(4) [Reserved]

(5) *Officers, employees and agents.* Annually at the meeting of the board of directors of the association next following the annual meeting of the members of the association, the board of directors shall elect a president, one or more vice presidents, a secretary, and a treasurer. The offices of secretary and treasurer may be held by the same person, and a vice president may also be either the secretary or the treasurer. The board of directors may appoint such additional officers and such employees and agents as it may from time to time determine. The term of office of all officers shall be one year or until their respective successors are elected (or appointed) and qualified. However, the board of directors may authorize the association to enter into an employment contract with any officer in accordance with regulations of the Federal Home Loan Bank Board; but no such contract shall impair the right of the board of directors to remove any officer at any time. In the absence of designation from time to time of powers and duties by the board of directors, officers shall have such powers and duties as generally pertain to their respective offices.

PART 545—OPERATIONS

Section 545.25–1 is added to read as follows:

§ 545.25–1 Employment contracts.

(a) *General.* A Federal association which has bylaws that include the provisions contained in paragraph (k) of § 544.6 of this chapter may, upon specific approval of its board of directors, enter into employment contracts with officers of the association, in accordance with the provisions of this section.

(b) *Limitations as to term.* (1) Except as is otherwise provided in paragraph (b)(1) of this section, no such employment contract may be made for a term in excess of one year. Such an employment contract may be for an initial term not in excess of three years if: (i) Such employment contract is made in connection with a conversion of the association pursuant to the provisions of Part 563b of this chapter; (ii) in connection with a merger, purchase of bulk assets or similar transaction, such employment contract is entered into or assumed by the resulting association (as defined in § 546.1 of this chapter) with a person who, immediately prior to such transaction, was an officer of the association being acquired and who, after such transaction, will be an officer of the resulting association; or (iii) such employment contract is made between a Federal association and a new officer of such association who is not a close relative of an officer or director of such association. A person who has served as a director, officer or employee of the employer-Federal association or its predecessor during any part of the immediately preceding 12-month period shall not be deemed to be a new officer. As used in paragraph (b)(1)(iii) of this section, the term "close relative" of a person means a relative by blood, marriage, or adoption who is a father, mother, brother, sister, son, daughter, or spouse of such person or such a relative of the spouse of such person.

(2) An employment contract may provide for renewal at the option of the association upon expiration of the initial term or any renewal thereof, but no such renewal may be for a term in excess of one year.

(c) *Required provisions.* Each such employment contract shall provide:

(1) That the employment of the officer may be terminated at any time by the association's board of directors, but any such termination, other than termination for cause, shall be without prejudice to the rights of the officer to receive compensation or other benefits under the contract.

(2) That in the event of termination for cause, the officer shall have no right to receive any compensation or other benefit for any period subsequent to such termination. For the purposes of this section, a termination of employment by the association shall be considered to be a termination for cause if such termination is by reason of the officer's personal dishonesty, incompetence, willful misconduct, breach of a fiduciary duty involving personal profit, intentional failure to perform stated duties, willful violation of any law, rule, regulation or final cease-and-desist order, or material breach of any provision of such contract.

(3) (i) That any suspension of the officer from office and/or temporary prohibition from participation in the conduct of the affairs of the association, pursuant to a notice served by the Board under § 550.4 or § 550.5 of this chapter, or by the Federal Savings and Loan Insurance Corporation under § 566.4 or § 566.5 of this chapter, unless stayed by appropriate proceedings, shall suspend, as of the date of such service, all obligations of the association under such contract.

(ii) That, in the event the charges specified in a notice served as provided in paragraph (c)(3)(i) of this section are dismissed, the association may, in its discretion, (*a*) pay the officer all or any part of the compensation withheld from such officer pursuant to the suspension of the association's obligations as required in said paragraph (c)(3)(i) of this section and (*b*) reinstate any or all (in whole or in part) of the obligations suspended as required in said paragraph (c)(3)(i) of this section.

(4) That any removal of the officer from office and/or permanent prohibition from participation in the conduct of the affairs of the association, pursuant to an order issued by the Board under § 550.3 or § 550.5 of this chapter, or by the Federal Savings and Loan Insurance Corporation under § 566.3 or § 566.5 of this chapter, shall terminate, as of the effective date of such order, all obligations of the association under such contract.

(5) That, in the event of default of the association (as the term "default" is defined in section 401(d) of the National Housing Act, as amended), all obligations of all parties to such contract shall terminate as of the date of such default.

(d) *Contracts with other entities or persons.* An officer of a Federal association shall not have any employment contract or any other written or oral agreement concerning such officer's employment as an officer of such association with any entity or person other than such association.

(Sec. 5, 48 Stat. 132, as amended; (12 U.S.C. 1464.) Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp. p. 1071)

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Proposed Amendments Relating to Employment Contracts

FEBRUARY 19, 1974.

The Federal Home Loan Bank Board, as the operating head of the Federal Savings and Loan Insurance Corporation, considers it desirable to propose to amend Parts 563, 570, and 571 of the Rules and Regulations for Insurance of Accounts (12 CFR Parts 563, 570, 571) for the purpose of prescribing certain restrictions regarding employment contracts between insured institutions and officers of such institutions. By a companion Resolution (Resolution No. 74–125), the Board proposes to amend Parts 544 and 545 of the Rules and Regulations for the Federal Savings and Loan System (12 CFR Parts 544, 545) regarding employment contracts between Federal savings and loan associations and the officers of such associations.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend said Parts 563, 570 and 571 as follows:

1. Said Part 563 would be amended by adding a new § 563.39, immediately following § 563.38 thereof, to read as set forth below; (2) said Part 570 would be amended by rescinding paragraph (b) of § 570.2 thereof; and (3) Part 571 would be amended by adding a new § 571.7–1, immediately following § 571.8 thereof, to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue, NW., Washington, D.C. 20552 by April 30, 1974, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

1. The proposed amendment to said Part 563 would add a new section (§ 563.39) containing the following principal points:

(a) As to employment contracts between State-chartered insured institutions and their officers, such contracts must comply with applicable State law; and, in addition, if the proposed amendment is adopted as a final regulation, a maximum term of three years will be prescribed for such contracts or renewals of such contracts.

(b) Each such employment contract shall provide in substance that:

(1) The officer's employment may be terminated at any time, with or without cause. If such employment is terminated "for cause", the officer will have no right to receive under such contract any compensation or other benefit for any period subsequent to such termination; and the term "for cause" is defined (see the last sentence of § 563.39(b)(2) of the proposed amendment for this definition which is a principal provision in the proposed amendment). If such employment is terminated other than "for cause", such termination shall not prejudice the rights of the officer to receive compensation or other benefits under the employment contract.

(2) If the officer's employment is suspended and or the officer is temporarily prohibited from participating in the conduct of the association's business pursuant to the Board's regulatory prescribed enforcement procedures under section 407 of the National Housing Act, as amended, all obligations of the association under the employment contract shall be suspended. In the event the charges against the officer are dismissed, the association, in its discretion, may pay the officer all or any part of the compensation or other benefits withheld during the period of suspension and/or prohibition.

(3) All obligations of all parties to an officer-insured institution employment contract shall terminate immediately if such insured institution "defaults" (as defined in section 401(d) of the National Housing Act, as amended).

(c) An officer of an insured institution shall not have an employment contract concerning such officer's employment as an officer of such institution with any other person or entity such as a service corporation or savings and loan holding company.

2. The proposed amendment to said Part 570 would rescind the following paragraph (b) of § 570.2 (a Board Ruling stating certain principles governing pension, retirement and deferred compensation plans and contracts):

(b) *Employment contract.* There should be no provision which, either by prohibition or by imposing economic sanction, places any obstruction in the way of free exercise by the board of directors of the duty or discretion provided by law, charter, bylaw or regulation as to the employment or termination of employment of any officer or employee of the institution.

3. The proposed amendment to said Part 571 would add a new Board statement of policy (§ 571.7–1) providing, in substance, that an employment contract between a mutual type, or a closely-held stock type, insured institution and an officer of such institution will be examined with care and may afford a basis for supervisory objection by the Board if such contract is entered into or assumed by the insured institution other than in connection with (1) a mutual-to-stock type conversion, (2) a merger, purchase of bulk assets or similar transaction and the person employed pursuant to such contract was an officer of an institution whose assets are acquired upon completion of such merger, purchase of bulk assets or similar transaction, or (3) a hiring of an eligible "new officer". It is noted that a person is not an eligible "new officer", as this term is used in the proposed policy statement, if such person is a close relative (as defined in the proposed policy statement) or if he has been employed by employer-institution during the immediately preceding 12-month period.

PART 563—OPERATIONS

Section 563.39 is added to read as follows:

§ 563.39 Employment contracts.

(a) *General.* A State-chartered insured institution, to the extent authorized by applicable State law, may, upon

V 39 59 MAR 26 74 XUM

specific approval of its board of directors, enter into employment contracts with officers of the institution for terms not in excess of three years, subject to the requirements of this section.

(b) *Required provisions.* Each such employment contract shall provide:

(1) That the employment of the officer may be terminated at any time by the insured institution's board of directors, but any such termination, other than termination for cause, shall be without prejudice to the rights of the officer to receive compensation or other benefits under the contract.

(2) That in the event of termination for cause, the officer shall have no right to receive any compensation or other benefit for any period subsequent to such t rmination. For the purposes of this section, a termination of employment by the insured institution shall be considered to be a termination for cause if such termination is by reason of the officer's personal dishonesty, incompetence, willful misconduct, breach of a fiduciary duty involving personal profit, intentional failure to perform stated duties, willful violation of any law, rule, regulation or final cease-and-desist order, or material breach of any provision of such contract.

(3) (i) That any suspension of the officer from office and/or temporary prohibition from participation in the conduct of the affairs of the insured institution, pursuant to a notice served by the Corporation under § 566.4 or § 566.5 of this chapter, or by the Board under § 550.4 or § 550.5 of this chapter, unless stayed by appropriate proceedings, shall suspend, as of the date of such service, all obligations of the insured institution under such contract.

(ii) That, in the event the charges specified in a notice served as provided in paragraph (b)(3)(i) of this section are dismissed, the insured institution may, in its discretion, (*a*) pay the officer all or any part of the compensation withheld from such officer pursuant to the suspension of the insured institution's obligations as required in said paragraph (b)(3)(i) of this section and (*b*) reinstate any or all (in whole or in part) of the obligations suspended as required in said paragraph (b)(3)(i) of this section.

(4) That any removal of the officer from office and/or permanent prohibition from participation in the conduct of the affairs of the insured institution, pursuant to an order issued by the Corporation under § 566.3 or § 566.5 of this chapter, or by the Board under § 550.3 or § 550.5 of this chapter, shall terminate, as of the effective date of such order, all obligations of the insured institution under such contract.

(5) That, in event of default of the insured institution (as the term "default" is defined in section 401(d) of the National Housing Act, as amended), all obligations of all parties to such contract shall terminate as of the date of such default.

(c) *Contracts with other entities or persons.* An officer of an insured institution shall not have any employment contract or any other written or oral agreement concerning such officer's employment as an officer of such institution with any entity or person other than such institution.

PART 570—BOARD RULINGS

§ 570.2 [Amended]

Section 570.2 is amended by rescinding paragraph (b) in its entirety.

PART 571—STATEMENTS OF POLICY

§ 571.7–1 Employment contracts.

To the extent authorized by applicable State law, State-chartered insured institutions are permitted, under § 563.39 of this chapter, to enter into employment contracts with their officers, subject to the limitations and requirements of that section. As a matter of policy, however, the Corporation does not consider it necessary or desirable for mutual insured institutions or closely-held stock insured institutions to use employment contracts having a term in excess of one year except in connection with (a) a mutual-to-stock conversion (under Part 563b of this chapter), (b) a merger, purchase of bulk assets or similar transaction and the person employed pursuant to such contract was an officer of the institution being acquired and who, after such transaction, will be an officer of the resulting association, or (c) a hiring of a "new officer" who is not a close relative of an officer or director of such insured institution. A person who has served as a director, officer or employee of the employer-insured institution or its predecessor during any part of the immediately preceding 12-month period shall not be deemed by the Corporation to be a "new officer" of the employer-insured institution. As used in this section, the term "close relative" of a person means a relative by blood, marriage or adoption who is a father, mother, brother, sister, son, daughter or spouse of such person or such a relative of the spouse of such person. Therefore, if such an insured institution should enter into employment contracts having a term in excess of one year otherwise than in connection with one of the above specified exceptions, such contracts will be examined with particular care to determine whether the expense or obligation incurred by the institution under such contracts is unreasonable in light of all relevant circumstances or whether the duty or discretion of the board of directors is unduly hampered by the terms of such contracts or other conditions contained therein, so as to afford a basis for supervisory objection.

(Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

VETERANS ADMINISTRATION

[38 CFR Part 3]

VETERANS BENEFITS

Severance of Service Connection

The Administrator of Veterans' Affairs proposes a regulatory change to decentralize to field stations full authority to effect severance of service connection.

Under current regulatory provisions when a case is encountered where service connection was previously granted for the veteran's disability (or disabilities) and the evidence indicates the grant of service connection was clearly and unmistakably erroneous, the field station prepares a rating decision proposing severance of service connection for the disability. The case is then submitted to VA Central Office for review and approval or disapproval of the proposal. If the proposal is approved by Central Office the field station notifies the veteran of the proposed action and gives him 60 days in which to present additional evidence to maintain service connection. If such evidence is not submitted the field station completes rating action severing service connection and terminates the award of disability compensation.

The provision for submitting proposals to sever service connection to Central Office for review was intended to ensure that the severance was not in violation of statutory or regulatory provisions. Current experience indicates submission of these proposals is no longer necessary or desirable and the provision should be eliminated. To accomplish this it is proposed to amend Part 3 of the Code of Federal Regulations as set forth below.

In addition minor editorial changes have been made in §§ 3.105 (e) and (f) and 3.106(a) designed to reflect agency policy to avoid any appearance of seeming to preclude benefits for female veterans, dependents, or beneficiaries. No substantive change affecting benefits is involved.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (27H), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. All relevant material received before April 25, 1974, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Notice is given that the change to § 3.105(d) would be effective the date of final approval.

1. In § 3.105, paragraphs (d), (e) and (f) are amended to read as follows:

§ 3.105 Revision of decisions.

* * * * *

(d) *Severance of service connection.* Subject to the limitations contained in §§ 3.114 and 3.957, service connection will be severed only where evidence establishes that it is clearly and unmistakably erroneous (the burden of proof being upon the Government). (Where service connection is severed because of a change in or interpretation of a law or Veterans Administration issue, the provisions of § 3.114 are for application.) A change in diagnosis may be accepted as a basis for severance action if the examining physician or physicians or other proper medical authority certifies that, in the light of all accumulated evidence, the diagnosis on which service connection was predicated is clearly erroneous. This certification must be accompanied by a summary of the facts, findings, and reasons supporting the conclusion. When severance of service connection is considered warranted, a rating proposing severance will be prepared setting forth all material facts and reasons. The claimant will be notified at his or her latest address of record of the contemplated action and furnished detailed reasons therefor and will be given 60 days for the presentation of additional evidence to show that service connection should be maintained. If additional evidence is not received within that period, rating action will be taken and the award will be discontinued effective the last day of the month in which the 60-day period expired. (38 U.S.C. 3012(b)(6).)

(e) *Reduction in evaluation; compensation.* Where the reduction in evaluation of a service-connected disability or employability status is considered warranted and the lower evaluation would result in a reduction or discontinuance of compensation payments currently being made, rating action will be taken. The reduction will be made effective the last day of the month in which a 60-day period from date of notice to the payee expires. The veteran will be notified at his or her latest address of record of the action taken and furnished detailed reasons therefor, and will be given 60 days for the presentation of additional evidence. (38 U.S.C. 3012(b)(6)).

(f) *Reduction in evaluation; pension.* Where a reduction in evaluation is considered warranted because of a change in non-service-connected disability or employability and the lower evaluation would result in a reduction or discontinuance of pension payments currently being made, the award will be reduced or discontinued effective the last day of the month in which reduction or discontinuance of the award is approved. The veteran will be notified at his or her latest address of record of the action taken and furnished detailed reasons therefor, and the conditions under which his claim may be reopened. (38 U.S.C. 3012(b)(5)).

2. In § 3.106, paragraph (a) is amended to read as follows:

§ 3.106 Renouncement.

(a) Any person entitled to pension, compensation, or dependency and indemnity compensation under any of the laws administered by the Veterans Administration may renounce his or her right to that benefit but may not renounce less than all of the component items which together comprise the total amount of the benefit to which the person is entitled nor any fixed monetary amounts less than the full amount of entitlement. The renouncement will be in writing over the person's signature. Upon receipt of such renouncement in the Veterans Administration, payment of such benefits and the right thereto will be terminated, and such person will be denied any and all rights thereto from such filing. (38 U.S.C. 3106(a)).

* * * * *

Approved: March 15, 1974.

By direction of the Administrator.

FEDERAL ENERGY OFFICE

[10 CFR Part 211]

SUPPLIER/PURCHASER RELATIONSHIPS FOR CIVIL AIR CARRIERS

Notice of Proposed Rulemaking

The Federal Energy Office hereby gives notice of a proposal to amend Title 10 of the Code of Federal Regulations, Part 211, concerning supplier/purchaser relationships for aviation fuel.

The current regulations of the FEO governing supplier/purchaser relationships for aviation fuel require the civil air carriers to obtain their supplies for any month from their suppliers in the corresponding month of 1972. By coordinating the supplier/purchaser relationship with the base period utilized for determining allocation levels, the regulations have simplified and expedited the allocation process.

The adoption of 1972 supplier/purchaser relationships, however, has disrupted existing contractual relationships and has significantly limited the amount of contractual protection which various carriers have concerning price and price escalation terms. Because of the regulations some carriers have reportedly been forced to use suppliers with which they have no contracts or less desirable contracts even though the carrier would be entitled absent the supplier/purchaser rule to volumes from other suppliers at lower prices. Removal of this contract protection has reportedly resulted in significant financial hardship to the affected carriers.

The proposed regulations would permit carriers to utilize those suppliers with which they have supply contracts by certifying their requirements to those suppliers. Volumes to which a carrier is entitled in excess of those contracted for would be supplied by the supplier in the base period.

The regulations would not increase the level of allocation to any carrier. The regulations would, however, call for exchanges between refiners having allocation fractions greater than one and those with allocation fractions less than one in order to equalize the amounts actually provided individual carriers.

It is expected that this change would eliminate the contractual problems created by the present regulations and would conform more closely to the Congressional mandate to minimize "economic distortion, inflexibility and unnecessary interference with market mechanisms." In addition the certification process for determining the base period volumes for particular suppliers would facilitate the ability to make allocations on a quarterly basis if that becomes feasible or desirable.

This change is to apply only to the civil air carriers. The much larger number of purchasers and suppliers and the differing industry practices and contractual arrangements in general aviation would appear to make a similar change for general aviation inadvisible.

Persons commenting on the proposed regulations are asked to address themselves particularly to the following questions:

1. To what extent have the present regulations deprived purchasers of contractual protection and to what extent has this created significant hardships?

2. To what extent would the proposed rule result in an actual change of suppliers or a change in the volume provided by particular suppliers and what difficulties would be caused by such a shift?

3. What circumstances are peculiar to the civil air carriers which make it appropriate to treat them differently from general aviation in this regard?

4. If civil air carriers and general aviation are treated differently, i.e., general aviation continues to be supplied by its 1972 suppliers, what difficulties will this create in the allocation program?

5. If it becomes desirable to utilize this system on a quarterly basis, how could this best be done?

Interested persons are invited to participate in the rulemaking by submitting written data, views or arguments with respect to the proposed regulations set forth in this notice to the Executive Secretariat, Federal Energy Office, Box AE, Washington, D.C. 20461. Comments should be identified on the outside envelope and on the documents submitted to the Federal Energy Office Executive Secretariat with the designation "Proposed Aviation Fuel Supplier/Purchaser Rule." Fifteen copies should be submitted. All comments received by April 10, 1974, and all other relevant information will be considered by the Federal Energy Office before final action is taken on the proposed regulation.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, E.O. 11748, 38 FR 3575; Economic Stabilization Act of 1970; as amended, Pub. L. 92–210, 85 Stat. 743; Pub. L. 93–28, 87 Stat. 27; E.O. 11730, 38 FR 19345; Cost of Living Council Order 47, 39 FR 24)

V 39 I 59 MAR 26 74 XUM

In consideration of the foregoing, it is proposed to amend Part 211 Chapter 2, Title 10 of the Code of Federal Regulations as set forth below.

Issued in Washington, D.C., March 15, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

1. Section 211.144 is amended to read as follows:

§ 211.144 Supplier/Purchaser Relationships.

(a) All suppliers of aviation fuel used by civil air carriers shall supply civil air carriers in accordance with § 211.146.

(b) All suppliers of aviation fuels shall supply their wholesale purchasers of record as of the base period excepting civil air carriers supplied in accordance with paragraph (a) above.

(c) All suppliers of aviation fuel used in general aviation shall supply their end use customers of record in the base period.

(d) Unless otherwise specified, the provisions of § 211.13 and § 211.24 apply to this subpart.

2. The first sentence of § 211.145(a) is amended to read as follows:

§ 211.145 Method of allocation.

(a) Suppliers of wholesale purchasers other than civil air carriers shall allocate fuel in accordance with the provisions of § 211.11(b). * * *

* * * * *

3. A new section 211.146 is added to read as follows:

§ 211.146 Method of Allocation—Civil Air Carriers.

Notwithstanding any other provision of this subpart, suppliers of aviation fuels shall supply civil air carriers and assist other suppliers to meet their obligations in the following manner:

(a) Not later than thirty (30) days prior to the beginning of each allocation month, each civil air carrier shall determine its allocation level pursuant to § 211.143(b) in accordance with information furnished by suppliers under § 211.12 as adjusted in accordance with these regulations.

(b) Not later than thirty (30) days prior to the beginning of each allocation month, each civil air carrier shall certify to suppliers with which the carrier has a contract to provide aviation fuels the amount of aviation fuels to be delivered by each such supplier pursuant to the terms of these contract during each allocation month: *Provided*, That the amount so certified by any civil air carrier to any supplier under this paragraph (b) shall not exceed the less of the obligation of all applicable contracts or the allocation level determined under paragraph (a) of this section, and *Provided further*, That the total amount certified by any civil air carrier to all suppliers shall not exceed the allocation level determined under paragraph (a) of this section.

(c) Not later than thirty (30) days prior to the beginning of each allocation month, each civil air carrier which has issued certificates under paragraph (b) of this section in an amount less than its allocation level determined under paragraph (a) of this section, may certify to its suppliers of record during the base period an amount less than or equal to the difference between its allocation level and the total of certificates issued under paragraph (b) above. *Provided* that each carrier issuing certificates under this paragraph (c) shall allocate to each base period supplier of record an amount which bears the same relation to the total amount certificated under this subsection as the amount furnished by that supplier in the base period bears to the total amount supplied to such carrier in the base period.

(d) (1) Each supplier of aviation fuels to civil air carriers shall determine its total allocable supply of aviation fuels which shall be equal to the sum of its estimated production, imports, purchases and exchanges (including those pursuant to paragraph (d)(3) of this section) and its inventory adjustments for aviation fuel.

(2) Suppliers shall allocate their total allocable aviation fuels supply among their whoesale purchasers, incuding civil air carriers in proportion to their wholesale purchaser's base period volumes, adjusted base period volumes (where applicable), or certificated volumes in the case of civil air carriers.

(i) A supplier's allocation fraction for aviation fuels shall be equal to his total allocable supply divided by the sum of applicable base period volumes, adjusted base period volumes and certificated volumes.

(ii) Each wholesale purchaser's base period volume (or adjusted base period volume) for aviation fuels shall be equal to its base period purchases of aviation fuels as adjusted under these regulations.

(iii) The volume of aviation fuels allocated to a wholesale purchaser shall be the sum of the volumes allocated to it from each of its suppliers. The volume supplied to a wholesale purchaser of aviation fuels, other than a civil air carrier, by each of its suppliers shall equal the part of the wholesale purchaser's base period volume (or adjusted base period volume) purchased from that supplier multiplied by that supplier's allocation fraction. The volume of aviation fuels supplied to a civil air carrier by each of its suppliers shall equal the certificated requirements issued to each supplier multiplied by that supplier's allocation fraction.

(iv) Suppliers shall adjust their allocation fractions on a monthly basis to reflect adjustments in their own or their purchasers' base period volumes or certificated volumes and in their allocable supply.

(v) In allocating allocable supplies of aviation fuels among wholesale purchasers, no supplier may use an allocation fraction greater than one (1.0) without approval of FEO. If a supplier's total allocable supply of aviation fuels is of sufficient magnitude that the allocation fraction exceeds one (1.0) the supplier shall make allocations based on an allocation fraction of one (1.0), shall immediately offer the volume of surplus product available to other suppliers whose allocation fractions are below one (1.0) and shall separately report by certified mail to the National FEO and the appropriate regional FEO, the volume of any such surplus aviation fuels available The National FEO may direct that the product be sold to designated wholesale purchasers or end users, or be accumulated in inventory. If the reporting supplier is not notified to the contrary by the FEO within fifteen (15) days of reporting to the FEO, it may distribute these volumes at its discretion.

(3) Not later than 20 days prior to the beginning of each allocation month, each supplier shall make an estimate of the sum of its estimated production, imports, purchases and inventory adjustments for aviation fuels, and shall also estimate the sum of its wholesale purchasers base period volumes (or adjusted base period volumes) or certificated volumes as applicable. If the allocation fraction derived by any supplier on the basis of such estimates shall be less than one (1.0) for any applicable distribution point or area, such supplier shall contact all other suppliers which distributed aviation fuels to the deficit point or area in the base period or thereafter and such supplier shall, to the maximum extent feasible, obtain by purchase or exchange sufficient additional volume of aviation fuels to achieve an allocation fraction of one (1.0). If the allocation fraction derived by any supplier on the basis of such estimates exceeds one (1.0), for any applicable distribution area, such supplier shall immediately contact all other suppliers who distributed aviation fuels to the affected point or area in the base period or thereafter and such supplier shall offer for purchase or exchange the estimated surplus volume of aviation fuels.

(4) Nothing in this subpart shall affect the right of end users of aviation fuels, including civil air carriers, to make normal business exchanges among themselves.

4. Section 211.146 is renumbered § 211.147 and a new paragraph (d) is added to read as follows:

§ 211.147 Procedure and Reporting Requirements.

* * * * *

(d) Suppliers of aviation fuels to civil air carriers or other end-users shall maintain records on FEO forms, subject to FEO audit, which demonstrate the basis for distribution of allocable supplies among their various customers. These records shall contain the following information for each customer on a monthly basis, as appropriate.

(1) Customer identification.
(2) Base period volume.
(3) Adjusted base period volume.
(4) Certificated volume (civil air carriers only).
(5) Allocation level.
(6) Allocation requirements (item (3) or (4) multiplied by supplier's allocation fraction).
(7) Customer's share of allocable supply (item (6) multipled by supplier's allocation fraction).
(8) Actual volume supplied.

[10 CFR Parts 211, 212]

ALLOCATION AND PRICING OF NON-BONDED AVIATION FUEL FOR INTERNATIONAL CARRIERS

Notice of Proposed Rulemaking

The Federal Energy Office hereby gives notice of a proposal to amend Title 10 of the Code of Federal Regulations, Parts 211 and 212, concerning the allocation of non-bonded aviation fuel to international carriers in certain circumstances.

On March 5 of this year, the Federal Energy Office proposed regulations to substantially equalize the price of jet fuel used by domestic and international air carriers. This would have been accomplished by including bonded aviation fuel within the allocation and price control regulations.

In order to prevent substantial inequality in costs paid by domestic and international carriers, the regulation would have removed the exemption of bonded aviation fuels from price control. It also would have required suppliers to provide 95 percent of the international carriers' base-period use by supplying (1) bonded fuels to the maximum extent possible; (2) non-bonded naphtha-based jet fuel to make up shortfalls to the extent practicable, and (3) domestically produced aviation fuel or imported kerosene-based fuel only as a last resort to reach the allocation level.

Many comments were received from carriers, suppliers, shippers and aviation organizations, indicating that the proposed regulations could have other effects aside from equalizing new contract prices for domestic and international jet fuel. Fears were expressed by some that the proposal would result in raising domestic fuel prices and could reduce bonded supplies and cause an undue drain on domestic supplies. Some comments indicated that subjecting bonded fuel to the allocation and price control regulations could violate international agreements and draw retaliation from other countries. Comments from the maritime industry suggested it be made clear that the regulation was not intended to apply to bunker fuel.

After reviewing the comments and evaluating the prospects for increased supply of fuel in light of the lifting of the Arab oil embargo, the FEO has decided to propose new regulations to accomplish the goal of ensuring adequate supplies of reasonably priced aviation fuel to international carriers without directly allocating and controlling the price of bonded fuel.

Under the proposed regulations international carriers would be allocated non-bonded aviation fuels (including naphtha-based fuel) to cover shortfalls of bonded aviation fuels. Such non-bonded aviation fuels would be available to an international carrier upon its certification to its base period supplier that it is unable to obtain bonded aviation fuels for a month at a price which does not exceed the lawful price which that supplier may charge for non-bonded aviation fuel. The lawful price would be computed under the ordinary price control rules and would be computed on a station-by-station basis.

The amount of non-bonded aviation fuels which a supplier would provide to an international air carrier would be an amount which, when added to the bonded aviation fuel available to a carrier, would result in a total volume available to the carrier sufficient to bring it to parity with domestic carriers. Thus, total supplies of aviation fuels (both bonded and non-bonded) available to international carriers would be comparable to fuel supplies available to domestic, supplemental, and scheduled cargo air carriers. If a carrier which had certified the need for a particular amount of non-bonded fuel during a month, finds within the same month, that bonded fuel is available at the base period supplier's lawful price for non-bonded fuel, the carrier is required to amend its certification to take into account the increased amounts of bonded fuel available at such price.

In order to ensure that the proposed regulation does not adversely affect the supplies of fuel available to domestic carriers, FEO is extending the current adjustment factor for kero-jet fuels under the Refinery Yield Program. The extension of the adjustment factor, coupled with the increased availability of crude fuel due to the lifting of the Arab oil embargo, will guarantee sufficient supplies to allow international carriers access to non-bonded fuel without increasing the cost of such fuel.

If it is subsequently determined that sufficient supplies of kerojet fuels were not being made available to civil air carriers, FEO could increase the adjustment factor, require the removal from bond of bonded supplies, or order inventory adjustments as might be appropriate.

Part 212 would be amended to provide that aviation fuel uplifted in the United States for international flights would not be considered an export for pricing purposes.

Interested persons are invited to participate in the rulemaking by submitting written data, views or arguments with respect to the proposed regulations set forth in this notice to the Executive Secretariat, Federal Energy Office, Box AD, Washington, D .C.20461.

Comments should be identified on the outside envelope and on the documents submitted to the Federal Energy Office Executive Secretariat with the designation "Proposed Allocation of Non-bonded Aviation Fuel Regulation." Fifteen copies should be submitted. All comments received by March 29, 1974, and all other relevant information will be considered by the Federal Energy Office before final action is taken on the proposed regulations.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, E.O. 11748; 38 FR 33575; Economic Stabilization Act of 1970 as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 92-28, 87 Stat. 27; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 47, 39 FR 24)

In consideration of the foregoing, it is proposed to amend Parts 211 and 212, Chapter 2, Title 10 of the Code of Federal Regulations as set forth below.

Issued in Washington, D.C., March 25, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

1. Section 211.142 is amended to add definitions of "adjusted allocable supply", "base period supplier" and "base period volume" to read as follows:

§ 211.142 Definitions.

* * * * *

"Base period supplier" means for an international air carrier its base period supplier of bonded or non-bonded aviation fuel or its supplier as assigned by FEO.

"Base period volume" means for an international air carrier the volume of bonded and non-bonded aviation fuels purchased by an international air carrier during a base period.

* * * * *

"Adjusted allocable supply" means the source of a supplier's allocable supply for a month plus the total volume of bonded aviation fuel available to the supplier's international air carrier purchasers from all sources for the month as certified to the supplier by such international air carriers.

2. Section 211.143(b)(2)(ii) is revised to read as follows:

§ 211.143 Allocation levels.

* * * * *

(b) * * *
(2) * * *
(ii) International air carriers.

* * * * *

3. Section 211.145 is amended to read as follows:

§ 211.145 Method of allocation.

* * * * *

(c)(1) International air carriers which have traditionally used bonded aviation fuel for international flights shall be allocated non-bonded aviation fuels (including naphtha-base jet fuel) by their base period suppliers to reduce their shortages of bonded aviation fuel. Upon certification by an international carrier to its base period supplier that the carrier is unable to purchase or obtain sufficient bonded aviation fuel for a month at prices which do not exceed the lawful price of the base period supplier for similar volumes of non-bonded aviation fuel at the desired location (the certification shall indicate the volumes which can be obtained at such prices), the base period supplier shall provide non-bonded aviation fuel (including naphtha-base jet fuel) to that carrier. Unless the international air carrier certifies that it can not utilize naphtha-base jet fuel, the base period supplier may to the extent of the carrier's

V 39 59 MAR 26 74 XUM

capability to use such fuel allocate non-bonded naphtha-base jet fuel prior to allocating other non-bonded aviation fuels to the international carrier under this paragraph. International air carriers which do not have base period suppliers shall apply to FEO for assignment of suppliers of non-bonded aviation fuels.

(2) Suppliers of non-bonded aviation fuel shall allocate supplies to international air carriers as follows:

(i) The allocation fraction for providing aviation fuel pursuant to this paragraph shall be equal to the supplier's adjusted allocable supply divided by its base period volume or adjusted base period volume, including therein the base period volume bonded and non-bonded, of the international air carrier to be supplied.

(ii) For each international air carrier to be supplied, the supplier shall multiply the international air carrier's allocation level times the supplier's allocation fraction as adjusted in this paragraph. The resulting volume minus the amount of bonded fuel available to the international air carrier from all sources shall be the amount of non-bonded aviation fuel allocated by the supplier to the international air carrier for that month. *Provided,* That the amount of non-bonded fuel allocated each month to any international carrier when added to the bonded aviation fuel available to that carrier, shall not exceed the volume of aviation fuel which the carrier would receive if the carrier were to use only non-bonded aviation fuels to meet its base period use and if bonded fuel had been subject to allocation. *Provided,* further That if within a month bonded fuel becomes available to a carrier at the lawful price for non-bonded fuel, the carrier shall file an amended certification with its base period supplier, providing for a downward adjustment of the carrier's non-bonded fuel needs in that month.

4. Section 212.53 is amended to read as follows:

§ 212.53 Exports and imports.

* * * * *

(c) Fuel uplifted in the United States for international flights departing from the United States (whether bonded or non-bonded) shall not be considered an export for the purposes of this part.

CERAMIC WALL TILE FROM THE UNITED KINGDOM

Notice of Tentative Determination To Modify or Revoke Dumping Finding

A finding of dumping with respect to ceramic wall tile from the United Kingdom was made in Treasury Decision 71-129 which was published in the FEDERAL REGISTER on May 18, 1971 (36 FR 9009).

After due investigation, I find that ceramic wall tile from the United Kingdom is no longer being, nor likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) by Pilkington's Tiles Sales Ltd., Manchester, England. Sales of ceramic wall tile by Pilkington's Tiles Sales Ltd. since October 1970 have been at not less than fair value, and that firm has given assurances that future sales of ceramic wall tile to the United States will not be made at less than fair value. Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to ceramic wall tile from the United Kingdom to exclude this ceramic wall tile produced and sold by Pilkington's Tiles Sales Ltd., Manchester, England, from the finding.

Prior to the issuance of the proposed modification, consideration will be given to any relevant data, views, or arguments which are submitted in writing by interested persons to the Commissioner of Customs, 2100 K Street, NW., Washington, D.C. 20229, and received not later than April 25, 1974.

This notice is published pursuant to section 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

Dated: March 21, 1974.

[SEAL] JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

[Public Debt Series—No. 4-74]

TREASURY NOTES OF SERIES H-1976

Notice Regarding Bidding and Sale

I. INVITATION FOR TENDERS

MARCH 21, 1974.

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites tenders at a price not less than 99.76 percent of their face value for $1,500,000,000, or thereabouts, of notes of the United States, designated Treasury Notes of Series H-1976. The interest rate for the notes will be publicly announced by the Secretary of the Treasury on March 27, 1974. Tenders will be received up to 1:30 p.m., Eastern Daylight Saving Time, Thursday, March 28, 1974, under competitive and noncompetitive bidding, as set forth in Section III hereof.

II. DESCRIPTION OF NOTES

1. The notes wil be dated April 9, 1974, and will bear interest from that date, payable on a semiannual basis on September 30, 1974, March 31 and September 30, 1975, and March 31, 1976. They will mature March 31, 1976, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached, and notes registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000 and $1,000,000. Provision will be made for the interchange of notes of different denominations and of coupon and registered notes, and for the transfer of registered notes, under rules and regulations prescribed by the Secretary of the Treasury.

5. The notes will be subject to the general regulations of the Department of the Treasury, now or hereafter prescribed, governing United States notes.

III. TENDERS AND ALLOTMENTS

1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to the closing hour, 1:30 p.m., Eastern Daylight Saving time, Thursday, March 28, 1974. Each tender must state the face amount of notes bid for, which must be $1,000 or a multiple thereof, and the price offered, except that in the case of noncompetitive tenders the term "noncompetitive" should be used in lieu of a price. In the case of competitive tenders, the price must be expressed on the basis of 100, with two decimals, e.g., 100.00. Tenders at a price less than 99.76 will not be accepted. Fractions may not be used. Noncompetitive tenders from any one bidder may not exceed $500,000.

2. Commercial banks, which for this purpose are defined as banks accepting demand deposits, may submit tenders for account of customers provided the names of the customers are set forth in such tenders. Others than commercial banks will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from banking institutions for their own account. Federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon and Government accounts. Tenders from others must be accompanied by payment of 5 percent of the face amount of notes applied for.

V 39 59 MAR 26 74 XUM

3. Immediately after the closing hour tenders will be opened, following which public announcement will be made by the Department of the Treasury of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. In considering the acceptance of tenders, those at the highest prices will be accepted to the extent required to attain the amount offered. Tenders at the lowest accepted price will be prorated if necessary. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, including the right to accept less than $1,500,000,000 of tenders, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for $500,000 or less without stated price from any one bidder will be accepted in full at the average price [1] (in two decimals) of accepted competitive tenders.

4. All bidders are required to agree not to purchase or sell, or to make any agreements with respect to the purchase or sale or other disposition of any notes of this issue at a specific rate or price, until after 1:30 p.m., Eastern Daylight Saving time, Thursday, March 28, 1974.

5. Commercial banks in submitting tenders will be required to certify that they have no beneficial interest in any of the tenders they enter for the account of their customers, and that their customers have no beneficial interest in the banks' tenders for their own account.

IV. PAYMENT

1. Settlement for accepted tenders in accordance with the bids must be made or completed on or before April 9, 1974, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226, in cash or other funds immediately available by that date. Payment will not be deemed to have been completed where registered notes are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. In every case where full payment is not completed, the payment with the tender up to 5 percent of the amount of notes allotted shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make such allotments as may be prescribed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of notes on full-paid tenders allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at an time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] GEORGE P. SHULTZ,
Secretary of the Treasury.

[FR Doc.74-6926 Filed 3-25-74;8:45 am]

[1] Average price may be at, or more or less than 100.00.

Department of the Army

ADVISORY COMMITTEE FOR NATIONAL DREDGING STUDY

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given of the eighth meeting of the Advisory Committee for National Dredging Study to be held April 9-10, 1974. The meeting will begin at 9:00 a.m. in the Delta Ballroom, Delta Tower Hotel, 1732 Canal Street, New Orleans, Louisiana.

The purposes of the meeting are to have the Contractor, Arthur D. Little, Inc., present a briefing on the accomplishments of the study and discuss the proposed operations during the next several months and to permit port authorities, dredging contractors, waterway users and other interested parties to present their views with respect to how the future dredging requirements of the area may be best accomplished, including the division of work between Government and contractor dredge equipment.

Within the facilities available (about 125 persons) the meeting will be open to the public. Upon conclusion of the report of the Contractor, local interested parties may present their views. Such presentations should be in writing, preferably in ten copies each and oral presentations limited to a brief summary of the material presented. In any event, the Chairman will restrict oral discussion to the prescribed purposes with duration to be controlled by the number requesting speaking time.

Inquiries may be addressed to the Designated Federal Representative, Mr. Eugene B. Conner, DAEN-CWO-M, Office Chief of Engineers, U.S. Army, Washington, D.C. 20314.

Dated: March 20, 1974.

For the Chief of Engineers.

JAMES L. KELLY,
Brigadier General, USA, Deputy Director of Civil Works.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

EUGENE DISTRICT ADVISORY BOARD

Notice of Meeting

Notice is hereby given that the Eugene District Advisory Board will meet on April 17, 1974, commencing at 1:30 p.m., in the Eugene District Office, Bureau of Land Management, 1255 Pearl Street, Eugene, Oregon. The agenda for the meeting includes election of chairman and vice-chairman, consideration of the Eugene District's proposed timber sale plan for fiscal year 1975, off-road vehicle regulations, small business set-aside timber sale program, and accomplishments during fiscal year 1974.

The meeting will be open to the public. It is to be held in a room accommodating 50 people. In addition to discussion of agenda topics by board members, there will be time for brief statements by nonmembers. Persons wishing to make oral statements should so advise the chairman or co-chairman prior to the meeting, to aid in scheduling the time available. Any interested person may file a written statement for consideration by the board by sending it to the chairman, in care of the co-chairman: Eugene District Manager, P.O. Box 10226, Eugene, Oregon 97401.

JAMES E. HART,
Eugene Acting District Manager.

MARCH 15, 1974.

UTAH

Competitive Lease Offer of Oil Shale Lands

Notice is hereby given that on April 9, 1974, Utah TRACT U-b, as hereafter described in paragraph 1, will be offered for oil shale lease by sealed bids to the qualified bidder submitting the highest amount per acre as bonus for the privilege of leasing the lands in accordance with the provisions of the Mineral Leasing Act of February 25, 1920 (41 Stat. 437), as amended (30 U.S.C. 181-263), and the general Notice of Sale of Oil Shale Leases published in the FEDERAL REGISTER of November 30, 1973.

1. TRACT U-b:

T. 10 S., R. 24 E., S.L.M.,
Sec. 12, S½, S½N½;
Sec. 13, All;
Sec. 14, All;
Sec. 23, All;
Sec. 24, All;
Sec. 25, W½W½;
Sec. 26, All.
T. 10 S., R. 25 E., S.L.M.,
Sec. 18, All;
Sec. 19, All.
The area described aggregates 5,120.00 acres.

2. *Lease terms.* The lease will be issued on a form the full text of which is published as Appendix "A" to the general notice of sale published in the FEDERAL REGISTER on November 30, 1973. The lease will be issued for a period of 20 years and so long thereafter as production is had in commercial quantities, subject to readjustment of terms at the end of each 20-year period. The lessee will be required to pay royalty on production in the amount and manner prescribed in section 7 of the lease, and to maintain a bond as provided in section 9.

3. *Minimum Royalty.* Section (7)(e)(1) of the lease form requires the payment of a minimum royalty for the sixth and each succeeding year which shall for this tract be based upon the following production rate and oil shale grade:

Tract	Shale grade (gallons per ton)	6th year production rate (tons per year)	15th year production rate (tons per year)
Tract U-b..	30	227,000	2,270,000

4. *Bidding procedures:* The lease will be offered competitively through sealed bidding. A lease will be issued only to the qualified bidder submitting the highest amount per acre as a bonus for the privilege of leasing the lands. No specific form of bid is required but all bids must identify the lease sale and must show the total amount bid, the amount bid per acre, and the amount submitted with the bid. Oil and Gas Bid Form No. 3120-17 may be adapted for this purpose. No telephonic or telegraphic bids will be accepted, and no oil payment, overriding royalty, logarithmic, or sliding scale bid will be considered. Bids shall not be modified after they have been submitted. Bids must be for the full tract described in this Notice of Sale. Bids must be submitted in sealed envelopes plainly marked "Sealed Bid for Oil Shale Lease. Not to be opened before 10 a.m., m.d.t. on April 9, 1974." Bids may be mailed or delivered in person until 10 a.m., m.d.t. April 9, 1974, to the State Director, Utah State Office, Bureau of Land Management, Room 8103, Federal Building, 125 South State Street, P.O. Box 11505, Salt Lake City, Utah 84111. Bids received after that time will be returned unopened. Bidders are warned against violation of section 1860 in Title 18 U.S.C. prohibiting unlawful combination or intimidation of bidders.

5. *Payment of bonus and advance rental.* All bids must be accompanied by a certified check, cashier's check, bank draft, money order, or cash for one-fifth of the bonus bid payable to the Bureau of Land Management, which amount shall be returned to the bidder after the lease sale should he be an unsuccessful bidder. If the bidder, after being notified that his bid has been accepted and that he will be awarded a lease, fails to comply with the applicable regulations or the terms of this notice, or if he fails to execute the lease within 15 days after receiving the lease form, his deposit will be forfeited.

Each bid must also be accompanied by a certified check, cashier's check, bank draft, money order, or cash for the first year's annual rental of $2,560,000. This amount shall be returned to all unsuccessful bidders after the lease sale.

6. *Evidence of qualifications.* Each bid must be accompanied by a statement over the bidder's signature or that of his authorized agent with respect to his qualifications. The statement shall contain the following information:

(a) If the bidder is an individual, a statement as to whether native born or naturalized; if an association, it must submit a certified copy of the articles of association and a statement by its members as to their citizenship. If the bidder is a corporation, it must submit statements showing: (i) The State in which it is incorporated; (ii) that it is authorized to hold leases for oil shale deposits, and the names of the officers authorized to act in such matters in behalf of the corporation; (iii) the percentage of the corporate voting stock and of all the stock owned by aliens or those having addresses outside the United States; and (iv) the name, address, and citizenship of any stockholder owning or controlling 20 percent or more of the corporate stock of any class. If more than 10 percent of the stock is owned or controlled by or in behalf of aliens, or persons who have addresses outside the United States, the corporation must give their names and addresses, the amount and class of stock held by each, and to the extent known to the corporation or which reasonably can be ascertained by it, the facts as to the citizenship of each. The bid of a corporation also shall be accompanied by a copy either of the minutes of the meeting of the board of directors or of the by-laws indicating that the person signing the bid has authority to do so, or, in lieu of such a copy, a certificate by the Secretary of the corporation to that effect, over the corporate seal, or appropriate reference to the record of the Bureau of Land Management in connection with which such articles and authority have been furnished previously; and

(b) The certification required by 41 CFR 60-1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375, on Form 1140-8 (November 1973) and Form 1140-7 (December 1971).

7. *Bid Opening.* The bids will be opened at 10:15 a.m., m.d.t. April 9, 1974, in Suites "A" and "B" at the Salt Palace, 100 SW Temple, Salt Lake City, Utah 84101. The opening of the bids is for the purpose of publicly announcing and recording bids received and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, m.d.t. April 9, 1974, that bid will be returned unopened to the bidder as soon thereafter as possible.

8. *Acceptance or rejection of bids:* No bid for this tract will be accepted and no lease for this tract will be awarded to any bidder unless the bidder has complied with all requirements of this Notice, his bid is the highest for the offered tract, and the amount of the bonus bid has been determined to be adequate by the United States. The Government reserves the right to reject any or all bids. Any cash, checks, drafts, or money orders submitted with the bid may be deposited in an unearned escrow account in the Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bids on behalf of the United States.

9. *Preliminary Development Plan.* Within forty-eight hours after being informed that his bid has been accepted and that a lease will be issued to him, the successful bidder must transmit a preliminary development plan, in duplicate, to the Officer conducting the lease sale. This plan will be made public upon issuance of the lease, and, therefore, confidential information relative to the lessee's operations should not be included in the submission. Confidential information should be submitted in the same manner, but under separate cover. The submission or acceptance of these plans will not be binding on the lessee or lessor and will not authorize any action by the lessee, but the plan is required for the lessor's guidance in establishing initial supervision of the lessee's activities. The preliminary development plan should include the method of development, the proposed location of on and off-site facilities, the schedule for development, and monitoring programs to determine environmental criteria.

10. *Interests of the State of Utah.* The State of Utah claims that it is entitled to lands offered for lease by this sale and to any bonus and royalty monies that may result therefrom. The claim is based upon the State's right under R.S. 2275 and 2276, as amended (43 U.S.C. 851-852), to make selections of public lands in lieu of other lands lost to it by virtue of Federal withdrawals and for other reasons. Applications for transfer of the lands to the State of Utah are presently pending before the Secretary but have not been approved. On March 4, 1974, the State filed an action in the United States District Court for the District of Utah, Central Division, to determine its right to the lands. In addition, the State has agreed, by the execution of an appropriate document by its Governor and Board of State Lands, that in the event it acquires title to the lands offered for lease by this sale, whether by action of the Secretary, court order, or otherwise, subsequent to the issuance of an oil shale lease by the United States on those lands, the State will succeed the United States as lessor under that lease and will fully honor all terms and conditions of the lease.

11. *Further Information.* Information concerning this oil shale lease sale may be obtained from the Chief, Division of Upland Minerals, Bureau of Land Management, Room 7146, Interior Building, 18th & C Streets, NW., Washington, D.C. 20240; and the State Director, Utah State Office, Bureau of Land Management, Federal Building, 125 South State Street, Salt Lake City, Utah 84138.

CURT BERKLUND,
Director Bureau of Land Management.

National Park Service

INDEPENDENCE NATIONAL HISTORICAL PARK ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Independence National Historical Park Advisory Commission will be held at 10:30 a.m. on April 10, 1974, at 313 Walnut Street, Philadelphia, Pennsylvania.

V 39159 MAR 26 74 XUM

The Commission was established by Public Law 80–795 to render advice on such matters relating to the park as may from time to time be referred to them for consideration.

The members of the Commission are as follows:

Mr. Arthur C. Kaufmann (Chairman), Philadelphia, Pa.
Mr. John P. Bracken, Philadelphia, Pa.
Hon. Michael J. Bradley, Philadelphia, Pa.
Hon. James A. Byrne, Philadelphia, Pa.
Hon. Edwin O. Lewis, Philadelphia, Pa.
Mr. Filindo B. Masino, Philadelphia, Pa.
Mr. Frank C. P. McGlinn, Philadelphia, Pa.
Mr. John B. O'Hara, Philadelphia, Pa.
Mr. Howard D. Rosengarten, Villanova, Pa.
Mr. Charles R. Tyson, Philadelphia, Pa.

Matters to be considered at this meeting include the following:

1. Status of Liberty Bell Pavilion.
2. Graff House drawings.
3. Visitor Center film.
4. Legislative Review.
5. Superintendent's Progress Report.

The meeting will be open to the public. Any person may file with the Commission a written statement concerning the matters to be discussed. Persons desiring further information concerning this meeting, or who wish to submit written statements, may contact Hobart G. Cawood, Superintendent, Independence National Historical Park, Philadelphia, Pennsylvania, at 215–597–7120.

Minutes of the meeting shall be available for inspection two weeks after the meeting at the office of the Independence National Historical Park, 313 Walnut Street, Philadelphia, Pennsylvania.

Dated: March 13, 1974.

ROBERT M. LANDAU,
Liaison Officer, Advisory Commissions, National Park Service.

Office of the Secretary

ASSATEAGUE ISLAND WILDERNESS AREA, MARYLAND-VIRGINIA

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Pub. L. 91–190, the Department of the Interior has prepared a draft environmental statement for the proposed Assateague Island Wilderness Area, Maryland-Virginia, and invites written comments within 45 days of this notice.

The proposal recommends that 1,300 acres of Assateague Island in Accomack County, Virginia, and 5,200 acres of Assateague Island in Worcester County, Maryland, be designated as wilderness within the National Wilderness Preservation System. Of the total acreage involved in this proposal approximately 4,782 acres are under the administration of the National Park Service, the remainder, approximately 1,718 acres are administered by the Bureau of Sport Fisheries and Wildlife.

Copies of the draft statement are available for inspection at the following locations:

Bureau of Sport Fisheries and Wildlife
John W. McCormack Post Office and Courthouse
Boston, Massachusetts 02109

Headquarters
Chincoteague National Wildlife Refuge
Box 62
Chincoteague, Virginia 23336

Mid-Atlantic Regional Office
National Park Service
143 South Third Street
Philadelphia, Pennsylvania 19106

Superintendent
Assateague Island National Seashore
Route 2, Box 294
Berlin, Maryland 21811

Bureau of Sport Fisheries and Wildlife
Office of Environmental Coordination
Department of the Interior
Room 2246
18th and "C" Streets, NW.
Washington, D.C. 20240

Single copies may be obtained by writing the Chief, Office of Environmental Coordination, Bureau of Sport Fisheries and Wildlife, Department of the Interior, Washington, D.C. 20240. Comments concerning the proposed action should also be addressed to the Chief, Office of Environmental Coordination. Please refer to the statement number above.

Dated: March 20, 1974.

ROYSTON C. HUGHES,
Assistant Secretary, Program Development and Budget.

DRAFT FACILITY LOCATION SUPPLEMENTS

Availability of Additional Environmental Statements

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bonneville Power Administration has prepared two additional Draft Facility Location Supplements to its Fiscal Year 1975 Environmental Statement. These Draft Supplements cover proposals for Maple Valley 500-kV Reinforcement and the Richland Area Electrical Service.

The proposal for the Maple Valley 500-kV Reinforcement consists of the construction of approximately 16 miles of double-circuit 500-kV transmission line. Of this total length 2.5 miles will require new right-of-way easement, 8.25 miles would parallel existing transmission lines, and 7.25 would occur on existing right-of-way. In addition, a new substation will also be required southwest of Snoqualmie, Washington.

The proposal for Richland Area Service involves the construction of 35.2 miles of 230-kV and 3.6 miles of 115-kV transmission line as well as the associated construction of three substation facilities.

Copies of the Draft Supplements are available for inspection in the library of the Headquarters Office of BPA, 1002 NE. Holladay Street, Portland, Oregon 97232; the Washington, D.C., Office in the Interior Building, Room 5600; and at the Seattle Area Office, 415 1st Avenue North, Room 250, Seattle, Washington 98109, and the Walla Walla Area Office, West 101 Poplar, Walla Walla, Washington 99362.

A limited number of copies are also available and may be obtained by writing to the Environmental Office, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208 or to the Seattle Area Manager or Walla Walla Area Manager at the above addresses. Comments on the Supplements should be sent to the Environmental Office on or before May 10, 1974.

Dated: March 20, 1974.

ROYSTON C. HUGHES,
Assistant Secretary of the Interior.

DEPARTMENT OF AGRICULTURE

Forest Service

MULTIPLE USE PLAN—CUBE IRON-SILCOX PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for implementation of a revised Multiple Use Plan for the Cube Iron-Silcox Planning Unit, Lolo National Forest, Sanders and Flathead Counties, State of Montana; Forest Service report number USDA–FS–DES (Adm) R1–74–10.

The environmental statement concerns a proposed Multiple Use Plan intended to provide the District Ranger with general management guidance for the Cube Iron-Silcox Planning Unit. The planning unit is subdivided into 12 management units having similar resource potentials and problems.

This draft environmental statement was filed with CEQ on March 18, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3231
12th St. & Independence Ave., SW
Washington, DC 20250

USDA, Forest Service
Northern Region
Federal Building
Missoula, MT 59801

USDA, Forest Service
Lolo National Forest
Building 24, Forest Missoula
Missoula, MT 59801

A limited number of single copies are available upon request to Forest Supervisor Jackson D. Large, Lolo National Forest, Building 24, Fort Missoula, Missoula, Montana 59801.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from state and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Jackson D. Large, Lolo National Forest, Building 24, Fort Missoula, Missoula, Montana 59801. Comments must be received by May 17, 1974 in order to be considered in the preparation of the final environmental statement.

KEITH M. THOMPSON,
Acting Regional Forester, Northern Region, Forest Service.

MULTIPLE-USE PLAN—NORTH FORK PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the proposed Multiple-Use Plan, North Fork Planning Unit, Report Number USDA–FS–DES (Adm) R1–74–11.

The environmental statement concerns a proposed management plan for about 224,130 acres of National Forest land on the Glacier View Ranger District of the Flathead National Forest, Flathead County, Montana. The proposed plan provides the District Ranger with management direction and guidance for each of the seven management units within the total planning area.

This draft environmental statement was filed with CEQ on March 18, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave., SW.
Washington, D.C. 20250

USDA, Forest Service
Region 1—Northern Region
200 East Broadway
Missoula, Montana 59801

USDA, Forest Service
Flathead National Forest
290 North Main
Kalispell, Montana 59901

USDA, Forest Service
Glacier View Ranger Station
Columbia Falls, Montana 59912

A limited number of single copies are available upon request to Edsel L. Corpe, Forest Supervisor, Flathead National Forest, 290 North Main, Kalispell, Montana 59901.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Edsel L. Corpe, Forest Supervisor, Flathead National Forest, 290 North Main, Kalispell, Montana 59901. Comments must be received by May 17, 1974, in order to be considered in the preparation of the final environmental statement.

KEITH M. THOMPSON,
Acting Regional Forester, Northern Region, Forest Service.

Packers and Stockyards Administration

INDIANAPOLIS LIVESTOCK MARKET, INDIANAPOLIS, INDIANA, ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, United States

V 39 59 MAR 26 74 XUM

Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

IN–152 Indianapolis Livestock Market, Indianapolis, Indiana.
IA–250 Montezuma Sale Company, Montezuma, Iowa.
MN–164 Winger Livestock Sales, Winger, Minnesota.
MS–152 Davis Livestock Commission Company, Ecru, Mississippi.
MO–237 Cattlemen Auction Co., Inc., Humansville, Missouri.
MO–236 Mid-West Livestock Market, Inc., Nevada, Missouri.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, United States Department of Agriculture, Washington, D.C. 20250, by April 10, 1974.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 21st day of March, 1974.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

[FR Doc.74–6943 Filed 3–25–74;8:45 am]

Rural Electrification Administration

ALABAMA ELECTRIC COOPERATIVE

Draft Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration intends to prepare a Draft Environmental Impact Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 in connection with an anticipated request to provide a combination of a loan guarantee and insured loan funds for Alabama Electric Cooperative, Inc., P.O. Box 550, Andalusia, Alabama 36420, which will provide for new generation facilities and related transmission lines and terminal facilities.

The proposed generating facilities consist of two coal fire units of approximately 200 MW each. A tentative proposed location for these units is the site of the existing 66 MW Tombigbee power plant of Alabama Electric Cooperative located on the Tombigbee River in Washington County near Jackson, Alabama.

Transmission facilities for movement of bulk power from these units into the existing transmission grid will be required. The location and degree of transmission facilities is under study, however, if the plant should be located at the above site, one tentative line consists of approximately 100 miles of 230,000 volt transmission line originating at the proposed site in Washington County and extending in an easterly direction thru parts of Washington County, Monroe County, Conecuh County and terminating in Covington County at an existing substation which would be expanded. This transmission line, for most of the way, would be on existing right of way. Some additional rights-of-way would be required.

Additional transmission lines originating at the proposed site and terminating in Washington County and Escambia County, along with other possible routings and terminal points, are under active consideration by Alabama Electric Cooperative.

Additional information may be obtained at the borrower's office during regular business hours.

Interested parties are invited to submit comments which may be helpful in preparing the Draft Environmental Impact Statement.

Comments should be forwarded to the Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, with a copy to the borrower whose address is given.

Dated at Washington, D.C., this 19th day of March, 1974.

DAVID A. HAMIL,
Administrator,
Rural Electrification Administration.

[FR Doc.74–6889 Filed 3–25–74;8:45 am]

BIG RIVERS ELECTRIC CORP.

Draft Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration intends to prepare a Draft Environmental Impact Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 in connection with an anticipated request for insured loan funds for Big Rivers Electric Corporation, P.O. Box 24, Henderson, Kentucky 42420, which will provide for the installation of a combustion turbine.

The proposed facilities consist of the installation of a combustion turbine, approximately 65 W, on the site of the existing Robert Reid Station, 2.5 miles northeast of Sebree, Kentucky. The primary fuel for this unit will be No. 2 distillate fuel oil.

The primary purpose of this installation is to provide standby generation for use during emergencies and as an alternate generation source for use during pollution episodes.

Additional information may be obtained at the borrower's office during regular business hours.

Interested parties are invited to submit comments which may be helpful in preparing the Draft Environmental Impact Statement.

Comments should be forwarded to the Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, with a copy to the borrower whose address is given.

Dated at Washington, D.C., this 20th day of March, 1974.

GEORGE P. HERZOG,
Acting Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Office of the Secretary

[Dept. Organization Order 10–3, Amdt. 1]

ASSISTANT SECRETARY FOR DOMESTIC AND INTERNATIONAL BUSINESS

Delegation of Authority and Functions

This order, effective March 14, 1974, amends the material appearing at 38 FR 33624 of December 6, 1973.

Department Organization Order 10–3, dated November 11, 1973, is hereby amended as follows:

1. SECTION 4. *Delegation of Authority.* In paragraph .01, subparagraphs s, t, and y, are deleted, and subparagraphs u, v, w, and x, are redesignated as s, t, u, and v, respectively.

2. SEC. 5. *Functions.* Subparagraph c is revised to read as follows:

c. Conduct Commerce programs involving: the expansion of international commerce, including research, analysis and the development of policy initiatives in the areas of international trade, finance and investment; the expansion of East-West trade and other commercial relations; promotion of business-consumer relations; competitive assessment; energy programs; import quota administration; export administration; trade adjustment assistance; the collection, analysis, and dissemination of selected information on various industries, commodities, and markets; the preparation and execution of plans for industrial mobilization readiness; and participation in domestic trade fairs;

HENRY B. TURNER,
Assistant Secretary for Administration.

[FR Doc.74–6945 Filed 3–25–74;8:45 am]

[Dept. of Organization Order 10–7]

ASSISTANT SECRETARY FOR TOURISM

Tourism and Functions

This order, effective March 14, 1974, supersedes the material appearing at 35 FR 18887 of December 11, 1970.

SECTION 1. *Purpose.* This order prescribes the scope of authority of the Assistant Secretary for Tourism and the functions of the United States Travel Service.

SEC. 2. *Status and Line of Authority.* .01 Pursuant to the authority vested in the Secretary by law, the United States Travel Service is continued as a primary operating unit of the Department of Commerce.

.02 As provided by Pub. L. 91–477 of October 21, 1970, the Assistant Secretary for Tourism (the "Assistant Secretary"), who is appointed by the President by and with the advice and consent of the Senate, shall be the head of the United States Travel Service.

.03 The Assistant Secretary shall be assisted principally by: a. A Deputy Assistant Secretary for Tourism who shall serve as the principal assistant of the Assistant Secretary and shall perform the functions of the Assistant Secretary in his absence; and

b. A Deputy Assistant Secretary for Bicentennial Affairs, who shall advise and assist the Assistant Secretary on all matters associated with the Department's plans and programs relative to the Nation's Bicentennial celebration.

SEC. 3. *Delegation of Authority.* .01 Subject to such policies and limitations as the Secretary of Commerce may prescribe, the Assistant Secretary for Tourism is hereby delegated the authority of the Secretary of Commerce under:

a. The International Travel Act of 1961, as amended (the "Act") (22 U.S.C. 2121 et seq.);

b. The Trade Fair Act of 1959 (19 U.S.C. 1751–1756), relating to the certification and promotion of domestic trade fairs;

c. The Act of May 27, 1970 (22 U.S.C. 2801 et seq.), relating to participation of the United States in international expositions;

d. The Acts of February 19, 1966 (Pub. L. 89–555) and October 27, 1966 (P.L. 89–697) regarding the Inter-American Cultural and Trade Center in Dade County, Florida ("Interama"); and

e. The Act of July 19, 1940 (54 Stat. 773; 16 U.S.C. 18–18d), relating to Domestic Travel Promotion.

.02 The Assistant Secretary may exercise other authorities of the Secretary as applicable to performing the functions assigned in this order.

.03 The Assistant Secretary may redelegate his authority to any employee of the United States Travel Service, subject to such conditions in the exercise of such authority as he may prescribe.

SEC. 4. *Functions.* The Assistant Secretary shall have primary responsibility for promoting travel to the United States by residents of foreign countries to improve the U.S. balance of payments and to promote friendly understanding and good will among peoples of foreign countries and of the United States. In carrying out this responsibility, the Assistant Secretary shall:

a. Develop, plan and carry out a comprehensive program designed to stimulate and encourage travel to the United States for the purpose of study, culture, recreation, business and other activities;

b. Encourage the development of tourist facilities, low cost unit tours, and other arrangements within the United States for meeting the requirements of foreign visitors;

c. Foster and encourage the widest possible distribution of the benefits of travel at the cheapest rates between foreign countries and the United States consistent with sound economic principles;

d. Encourage the simplification, reduction, and elimination of barriers to travel, and the facilitation of international travel generally;

e. Collect, publish, and provide for the exchange of statistics and technical information, including schedules of meetings, fairs, and other attractions, relating to international travel and tourism;

f. Utilize the facilities and services of Federal agencies to the fullest extent possible;

g. Consult and cooperate with individuals, businessmen, and organizations engaged in or concerned with international travel, including local, State, Federal and foreign governments and international agencies;

h. Obtain the advice and services of qualified professional organizations and personnel;

i. Make grants or proposals for contracts for projects designed to carry out the purposes of the Act, subject to the provisions of section 3(a) (5) and (6) of the Act;

j. Provide, according to such policies, standards, criteria and procedures as he may establish, incentives to travel agents and tour operators in foreign countries for the promotion of travel to the United States; and

k. Conduct the Commerce program involving Federal recognition of and participation in international expositions and trade fairs.

HENRY B. TURNER,
Assistant Secretary for Administration.

[FR Doc.74–6947 Filed 3–25–74;8:45 am]

[Dept. Administrative Order 205–12, Revised Appendix B]

PUBLIC INFORMATION

Domestic and International Business Administration

Appendix B to Department Administrative Order 205–12 of July 4, 1967, as amended and appended, is hereby revised.

Attached is the revised Appendix B, "Public Information Services of the Domestic and International Business Administration," dated June 26, 1973. It supersedes the following two appendices which were issued on April 10, 1972, and which were individually dated as indicated:

B, 2/25/72, Bureau of Domestic Commerce.
E, 3/13/72, Bureau of International Commerce.

HENRY B. TURNER,
Assistant Secretary for Administration.

This revised appendix, effective 7/16/73, further amends the material appearing at 32 FR 9734 of July 4, 1967; 35 FR 6601 of April 24, 1970; and 36 FR 19096 of September 28, 1971.

In addition, it supersedes, in part, material published under 37 FR 9679 of May 16, 1972, (namely Appendices B and E, each of which is individually identified and dated, as indicated).

APPENDIX B

PUBLIC INFORMATION SERVICES OF THE DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION

JUNE 26, 1973.

A. *Purpose.* The purpose of this Appendix is to describe, in general, the public information services of the Domestic and International Business Administration, (DIBA); to describe the places at which, and the methods whereby, the public may obtain information; to inform the public as to the availability of its statistical reports, data files, unpublished materials, special tabulations, rules, regulations, procedures, instructions, forms, or other requirements established by the Domestic and International Business Administration which affect the public and otherwise to comply with the requirements of 5 U.S.C. 552 (Pub. L. 90–23, 81 Stat. 54).

B. *Public Information Services.* .01 The Domestic and International Business Administration collects, analyzes, and disseminates to business and industry a wide range of information on domestic and international business, industry and trade, domestic and foreign markets, business opportunities and imports; administers various statutory programs delegated to DIBA; and develops and operates programs to promote international trade and investment and to promote progressive business policies and growth. Included is information on:

BUREAU OF INTERNATIONAL COMMERCE (BIC)

For all countries except Union of Soviet Socialist Republics (U.S.S.R.), East European Countries, and People's Republic of China (PRC).[1]

Foreign trade statistics
Foreign market potentials
Information developed from country statistics
Country market research
Product market research
Tariffs, taxes, quotas, and customs regulations of foreign countries
Patent, trademark, and copyright laws of foreign countries
Transportation systems
Insurance activities
Foreign government procurement in the U.S.
Government export financing facilities
Insurance against commercial and political risks abroad
U.S. foreign direct investment
Domestic and International Sales Corporations (DISC's)
Documentation and shipping requirements for U.S. exports
Foreign trade opportunities
Procedures for obtaining import protection and reductions in trade restrictions of foreign countries
Procedures for participation of U.S. industries in export promotion events abroad
Rules and regulations for corporations organized under the China Trade Act of 1922
Procedures for certification of domestic trade fairs under the Trade Fair Act of 1959

[1] See the Bureau of East-West Trade (BEWT) for information on these excepted countries.

V 39 59 MAR 26 74 XUM

Rules and regulations governing Federal participation in international expositions held in the U.S. and its territories

BUREAU OF COMPETITIVE ASSESSMENT AND BUSINESS POLICY (BCABP)

Market analyses and trends
Industry reports
Analyses of data on production, sales, employment, profits and distribution
Industrial outlook reports
Analysis on the competitive position of the United States

BUREAU OF RESOURCES AND TRADE ASSISTANCE (BRTA)

International trade in primary commodities
International trade in industrial products
Fiber, textile and apparel data
Information on Foreign-Trade Zones and Foreign-Trade Zones Board activity
Procedures concerning the importation of scientific, educational and cultural material (Florence Agreement); the Foreign Excess Property Program and the Watch Quota Program
Textile market and textile import analyses guidelines
Implementation of trade adjustment assistance provisions for firms under the Trade Adjustment Assistance Act of 1962
Energy programs

BUREAU OF EAST-WEST TRADE (BEWT)

For Albania, Bulgaria, Czechoslovakia, East Germany, Estonia, Hungary, Latvia, Lithuania, Outer Mongolia, People's Republic of China and Union of Soviet Socialist Republics.[2]

Foreign trade statistics
Economic trends and conditions
Foreign market potentials and opportunities and export market surveys
Market data and product information
Tariffs, quotas, laws, regulations, and administrative and procedural provisions governing trade and doing business
Texts, summaries and supporting documents pertaining to bilateral agreements between the U.S. and state-controlled economy countries
Activities of the Joint Commercial Commissions
Patents, trademarks and copyright laws
Insurance activities including insurance of U.S. business against commercial and political risks
Commercial arbitration
Accreditation and business representation
Business facilities
Taxation and fees
Export financing facilities

Conditions of and opportunities for joint ventures, including U.S. foreign investments
Documentation and shipping requirements for U.S. exports
Procedures for the participation of U.S. industries in export promotion events abroad

For all countries:

Rules and Regulations under the Export Administration Act of 1969, as amended governing export control

.02 Publications of the Domestic and International Business Administration are listed in the Annual Supplement to U.S. Department of Commerce Publications, and the weekly Business Services Checklist which are available from the District Offices of the Office of Field Operations (OFO), Department of Commerce, or the Department of Commerce, Washington, D.C. 20230.

[2] See the Bureau of International Commerce (BIC) for information on other countries.

.03 The Bureau of International Commerce publishes the Checklist of International Business Publications which can be obtained through the District Offices and from the U.S. Department of Commerce.

.04 The Office of Field Operations publishes the Commerce Business Daily through which it disseminates all proposed U.S. Government procurement actions over $10,000 in value for defense and over $5,000 for civilian purposes. The purpose is to advise all interested U.S. firms of such procurement opportunities and thereby reduce procurement costs through expanded competitive bidding. The publication also contains a listing of government contract awards including subcontracting leads, government surplus property sales and foreign business opportunities. Commerce Business Daily is published daily except Saturdays, Sundays and Government holidays. Subscriptions are available through Department of Commerce District Offices or the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402 at an annual subscription rate of $40.00. Airmail service is an additional $30.25 annually.

C. *Guide to Published Rules and Regulations.* .01 *Defense Production Act.* Public orders and regulations issued in implementation of Title I (priorities and allocation powers) under the Defense Production Act of 1950, as amended, (64 Stat. 798; 50 U.S.C. 2061 et seq.) are found in Title 32A, Code of Federal Regulations, Chapter VI. Appeals procedures under these orders and regulations are through the normal Department of Commerce appeals procedures.

.02 *National Defense Executive Reserve.* Departmental responsibilities for the National Defense Executive Reserve, as exercised by the Bureau of Competitive Assessment and Business Policy and the Bureau of East-West Trade are outlined in Department Administrative Orders 210-4 and 210-8 (30 FR 12957). Applications for participation in the NDER must be made on Form CD-174, which is available from the Director, Office of Industrial Mobilization, Bureau of Competitive Assessment and Business Policy, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230 or from the Director, Office of Export Control, Bureau of East-West Trade, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

.03 *Automotive Products Trade.* Rules, procedures and criteria for determination of bona-fide motor vehicle manufacturers under the Automotive Products Trade Act of 1965 (79 Stat. 1023; 19 U.S.C. 3032) are found in 19 CFR 301.

.04 *Export Promotion Programs.* Applications, procedures, selection criteria, and other rules and regulations pertaining to trade and industrial exhibits, Trade Centers, trade development centers, catalog fairs, Joint Export Establishment Promotions (JEEPs) and trade missions abroad which are directed toward stimulation of the domestic community to export may be obtained from the Office of International Marketing, BIC, Domestic and International Business Administration, Department of Commerce, Washington, D.C. 20230 with regard to countries within the cognizance of the Bureau of International Commerce's export promotion activities and from the Office of East-West Trade Development, BEWT, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230, with regard to countries within the cognizance of Bureau of East-West Trade's export promotion activities. (See page 4 for listing of countries.)

.05 *China Trade Act.* Rules and regulations for corporations organized under the China Trade Act (42 Stat. 854; 15 U.S.C. 141-62) are found in 15 CFR 863.

.06 *Export Control.* Rules and regulations issued under the Export Administration Act of 1969, as amended, (50 U.S.C. App. 2401, et seq.) are contained in Title 15, Chapter 3, Subpart B, "Export Regulations", which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from the Office of Export Control, Bureau of East-West Trade, Room 1605, Department of Commerce Building, 14th and "E" Streets, NW, Washington, D.C. 20230. Additionally, lists of parties subject to restrictions in exporting or dealing in U.S.-origin commodities or technical data, are included in the Export Control Regulations. Amendments to the current rules and regulations are published in the FEDERAL REGISTER and in Export Control Bulletins which may be obtained from the above sources or District Offices of the DIBA Office of Field Operations.

.07 *Foreign Excess Property.* Rules, procedures, and criteria for importation of Foreign Excess Property are found in 44 CFR 401. Information on the activity and application forms may be obtained from the Foreign Excess Property Officer, Office of Import Programs, Bureau of Resources and Trade Assistance, DIBA, U.S. Department of Commerce, Washington, D.C. 20230.

.08 *Florence Agreement—Importation of Scientific Instruments or Apparatus by Nonprofit Educational and Research Institutions.* Rules, regulations and procedures concerning the processing by the Departments of Commerce and Treasury of applications for duty-free entry of scientific instruments or apparatus are published in the FEDERAL REGISTER at 37 FR 3892 et seq. They are issued pursuant to the Educational, Scientific and Cultural Importation Act of 1966 (80 Stat. 697; 19 U.S.C. 1202). The public may secure information and copies of the Regulations and application forms relating to the program from the Director, Office of Import Programs, Bureau of Resources and Trade Assistance, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230. However, applications for duty-free entry of scientific instruments should be filed as prescribed in the Act and the above referred Regulations with the Bureau of Customs, Attention: Tariff Classification Rulings, Washington, D.C. 20226.

.09 *Allocation of Quotas for the Duty-Free Importation into the United States of watches and watch movements* among producers located in the Virgin Islands, Guam and American Samoa. (19 U.S.C. 1202) added by Pub. L. 89-805, November 10, 1966. Requests for information concerning this activity may be obtained from the Director, Office of Import Programs, Bureau of Resources and Trade Assistance, DIBA, U.S. Department of Commerce, Washington, D.C. 20230.

.10 *Foreign-Trade Zones* are authorized by the Foreign Trade Zone Board under its authority given in the FTZ Act of 1934, as amended (19 U.S.C. 80). The Board's rules and regulations are found at 15 CFR Part 400. Bureau of Customs regulations on zones are at 19 CFR Part 146. Information on zone operations and activities are published in the Board's annual report to Congress.

D. *Submission of Requests and Applications.* .01 The public may make submittals, applications, or requests concerning matters discussed in section C of this Appendix as provided in the respective rules and regulations which are cited.

.02 DIBA's information address and telephone are: Domestic and International Business Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230. Phone: (202) 967-5418. Information may also be obtained from Field Operations District Offices located in principal cities throughout the country.

.03 Forms affecting the public in export control matters are identified in the Code of Federal Regulations and facsimiles of these forms are reproduced as a supplement to the Export Control Regulations. Actual forms may be obtained from the Office of Export Control, or as otherwise provided in the regulations. The regulations also describe procedures to be followed in submitting forms and documents.

E. *Final Delegations of Authority.* The officials and employees of DIBA to whom there has been delegated or redelegated the authority to take final actions, or make final decisions, with respect to requirements, submissions or other matters arising under published rules and regulations are identified in the following materials:

1. Department Organization Order 10-3 (37 FR 25555, December 1, 1972), which is the basic delegation of authority from the Secretary of Commerce to the Assistant Secretary for Domestic and International Business; and

2. DIBA Organization and Function Orders in the DIBA Manual of Administrative Instructions which set forth all redelegations of authority to officials and employees of DIBA and which are available for public inspection and copying in the Office of Management and Systems, Directorate of Administrative Management, DIBA, U.S. Department of Commerce, Room 3100, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230 (Telephone: Area Code 202-967-5436) or in the Central Reference and Records Inspection Facility of the Department of Commerce, Room 7043.

F. *Inspection and Copying of Opinions and Orders.* All final opinions and orders made in the adjudication of cases, statements of policy and interpretations not published in the FEDERAL REGISTER, administrative staff manuals and instructions to staff that effect a member of the public; and any other materials required to be made available for public inspection and copying under section 552 (a)(2), Title V, U.S. Code, are made available for such purposes in the Central Reference and Records Inspection Facility of the Department of Commerce, Room 7043, Main Commerce Building, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230. Rules concerning the use of this facility are contained in Part 4, Subtitle A, Title 15, Code of Federal Regulations, or may be obtained from the Facility.

G. *Inspection of Records.* Rules for persons desiring, pursuant to section 552(a)(3), to inspect records not available to the public as a part of the regular public information services of the Domestic and International Business Administration are contained in Part 4, Subtitle A, Title 15, Code of Federal Regulations. Applications are available from the Central Reference and Records Inspection Facility or from the Office of Field Operations' District Offices.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[FAP 4B2977]

GOODYEAR TIRE AND RUBBER CO.

Notice of Withdrawal of Petition for Food Additives

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b), 72 Stat. 1786; (21 U.S.C. 348(b))), the following notice is issued:

In accordance with § 121.52 Withdrawal of petitions without prejudice of the procedural food additive regulations (21 CFR 121.52), The Goodyear Tire and Rubber Co., Akron, OH 44316, has withdrawn its petition (FAP 4B2977) notice of which was published in the FEDERAL REGISTER of January 23, 1974 (39 FR 2617) proposing that § 121.2566 (21 CFR 121.2566) be amended to provide for the safe use of hexylated p-cresol as an antioxidant and/or stabilizer in ploymers that contact food.

Dated: March 19, 1974.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

[FR Doc.74-6900 Filed 3-25-74;8:45 am]

[GRASP 4G0037]

MORTON SALT CO.

Notice of Filing of Petition for Affirmation of GRAS Status

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1786; 21 U.S.C. 321(s), 348, 371(a)) and the regulations for affirmation of GRAS status (21 CFR 121.40), published in the FEDERAL REGISTER of December 2, 1972 (37 FR 25705), notice is given that a petition (GRASP 4G0037) has been filed by Morton Salt Co., 110 North Wacker Drive, Chicago, IL 60606, and placed on public display at the office of the Hearing Clerk, Food and Drug Administration, proposing affirmation that sodium hypochlorite in an aqueous solution (up to 200 ppm available chlorine) for intermittent spraying of beef, lamb, and hog carcasses during the cooler-chilling process is generally recognized as safe (GRAS).

Interested persons may, on or before May 28, 1974, review the petition and/or file comments (preferably in quintuplicate) with the Hearing Clerk, Food and Drug Administration, Rm. 6-86, 5600 Fishers Lane, Rockville, MD 20852. Comments should include any available information that would be helpful in determining whether the substance is, or is not, generally recognized as safe. A copy of the petition and received comments may be seen in the office of the Hearing Clerk, address given above, during working hours, Monday through Friday.

Dated: March 18, 1974.

VIRGIL D. WODICKA,
Director, Bureau of Foods.

Health Resources Administration

HOSPITAL AND NURSING HOME SERVICES

Payments to States Participating in Expenditure Review Program

Pursuant to section 1122(c) of the Social Security Act, the Secretary is required to pay States participating in the capital expenditure review program of section 1122 for the reasonable costs of performing the functions specified in section 1122(b). The procedure for calculating the amounts of such payments is set forth at 42 CFR 100.110. Section 100.110 (a)(3) states that "The percentage for each State obtained by dividing the total amount of Federal expenditures for hospital and nursing home services under Title V, XVIII, and XIX of the Act in such State by the total amount of all expenditures for hospital and nursing home services in such State for each fiscal year will be published in the FEDERAL REGISTER as soon as practicable following the beginning of such fiscal year." Although the States have not yet entered into agreements to implement section 1122, these calculations have been made for fiscal year 1974. The percentages so obtained for such fiscal year are set forth below.

Dated: March 6, 1974.

Office of Education

FULBRIGHT-HAYS TRAINING GRANTS

Notice of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2452), applications are being accepted from institutions of higher education for Fulbright-Hays Training Grants.

Applications must be received by the Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. 20202 (mailing address: Office of Education, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202), on or before April 29, 1974.

An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than the fifth calendar day prior to the closing date (or if such fifth calendar day is a Saturday, Sunday, or Federal holiday, not later than the next following business day), as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will reply on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the Office of Education.)

(Catalog of Federal Domestic Assistance Programs: 13.438 Fulbright-Hays Training Grants—Faculty Research Abroad; 13.439 Fulbright-Hays Training Grants—Foreign Curriculum Consultants; 13.440 Fulbright-Hays Training Grants—Group Projects Abroad; 13.441 Fulbright-Hays Training Grants—Doctoral Dissertation Research Abroad.)

Dated: February 20, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

FULBRIGHT-HAYS TRAINING GRANTS

Proposed Criteria for Funding of Applications for Fiscal Year 1974

Pursuant to the authority contained in section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2452), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to issue the criteria set forth below as the basis on which applications submitted under section 102(b)(6) (22 U.S.C. 2452) will be judged. Section 102(b)(6) authorizes programs to promote modern foreign language and area studies training in the United States by supporting research and study in foreign countries by teachers and prospective teachers, and by financing visits by foreign teachers to the United States to participate in foreign language and area studies programs at U.S. educational institutions.

Four separate programs are supported under the authority of section 102(b)(6). The programs and the proposed criteria for each read as follows:

1. *Doctoral Dissertation Research Abroad program.* Under this program the Commissioner, with the approval of the Board of Foreign Scholarships, will select applications to be funded on the basis of the following criteria:

(a) Academic qualifications of the candidate;

(b) Soundness and feasibility of the project;

(c) Preference will be given to foreign languages and areas that are critical to the national interest, for which adequate instruction has not been widely available in the United States, and for which there exists a shortage of trained personnel.

2. *Faculty Research Abroad program.* Under this program the Commissioner, with the approval of the Board of Foreign Scholarships, will select applications to be funded on the basis of the following criteria:

(a) Relevance of the proposed project to the U.S. educational institution's educational goals and to its plans for developing programs in foreign languages and area studies;

(b) The project's potential impact on foreign languages and area studies in American education;

(c) The project's relevance to contemporary issues and problems significantly related to the national interest;

(d) Scholarly qualifications of the candidate, and his previous opportunities for research abroad;

(e) The extent to which direct experience abroad is necessary to complete the project and the effectiveness with which host country resources would be utilized;

(f) Soundness and feasibility of the project.

3. *Group Projects Abroad program.* Under this program the Commissioner, with the approval of the Board of Foreign Scholarships, will select applications to be funded on the basis of the following criteria:

(a) The potential impact of the project on the development of foreign language and area studies programs in American education;

(b) The project's relevance to the applicant institution's educational goals and its relationship to the institution's program development in foreign languages and area studies;

(c) The extent to which direct experience abroad is necessary to achieve the project's objectives and the effectiveness with which host country resources would be utilized;

(d) Preference to projects concerning foreign languages and geographic areas which are of special concern to the national interest and for which adequate instruction has not been widely available in the United States.

4. *Foreign Curriculum Consultants program.* Under this program the Commissioner, with the approval of the Board of Foreign Scholarships, will select applications to be funded on the basis of the following criteria:

(a) Potential impact on the applicant institution's plans for developing its foreign language and area studies programs;

(b) Potential effective use of the results of the consultant's work following the completion of the project;

(c) Appropriateness of the consultant's duties and the approximate allocation of time among the duties;

(d) Number of faculty, students, and members of the relevant community who are expected to be affected by the consultant's activities;

(e) Likelihood that educational institutions other than the grantee will share in the consultant's services and the extent to which such institutions have participated in helping define the nature of these services;

(f) Adequacy of the arrangements made for coordinating the consultant's work under the supervision of a project director.

(22 U.S.C. 2452(b)(6))

Interested persons are invited to submit written comments, suggestions, or objections regarding these criteria to the International Studies Branch, Division of International Education, Office of Education, ROB 3, Room 3923, 7th and D Streets SW., Washington, D.C. 20202. Comments received in response to this notice will be available for public inspection at the above office on Mondays through Fridays between 8:30 a.m. and 4:30 p.m. All relevant material received on or before April 10, 1974 will be considered.

STATE POSTSECONDARY EDUCATION COMMISSIONS

Closing Date for Receipt of Information Concerning Establishment

In order for a State to receive funds appropriated during fiscal year 1974 to support comprehensive statewide planning for postsecondary education as authorized under section 1203 of the Higher Education Act of 1965 (Pub. L. 89-329, as amended), it must (a) establish a State Postsecondary Education Commission which, as required by section 1202(a), is "broadly and equitably representative of the general public and public and private nonprofit and proprietary institutions of postsecondary education in the State including community colleges, junior colleges, postsecondary vocational schools, area vocational schools, technical institutes, four year institutions of higher education and branches thereof"; and (b) submit the following information to the U.S. Commissioner of Education by April 25, 1974:

(1) Which of the following three options for establishing a section 1202 State Commission the State has chosen to follow: (i) Creation of a new Commission, (ii) designation of an existing State agency or State Commission, or (iii) expanding, augmenting or reconstituting the membership of an existing State agency or State Commission.

(2) Which, if any of the following State-administered program authorities contained in the Higher Education Act of 1965 has the State chosen to assign to the section 1202 State Commission:

(i) Community Services and Continuing Education (HEA Section 105);

(ii) Equipment for Undergraduate Instruction (HEA Section 603); and

(iii) Grants for Construction of Undergraduate Academic Facilities (HEA Section 704).

(3) The official name, address and telephone number of the State Commission.

(4) The names, mailing addresses and terms of office of the members of the State Commission.

(5) The name, title, mailing address and telephone number of the principal staff officer of the State Commission.

(6) A letter, signed by the Governor, explaining how the membership of the State Commission meets the "broadly and equitably representative" requirements of section 1202(a), and what provisions have been made to ensure continuing compliance with these requirements of the law.

The above information sent by mail will be considered to be received on time by the Cimmissioner if:

(a) The information was sent by registered or certified mail not later than the fifth calendar day prior to the closing date (or if such fifth calendar day is a Saturday, Sunday, or Federal holiday, not later than the next following business day), as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(b) The information is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education). This information should be addressed to the U.S. Commissioner of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

(20 U.S.C. 1142b)

(Catalog of Federal Domestic Assistance Number 13.550; State Postsecondary Education Commissions)

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

CITIZENS' ADVISORY COMMITTEE ON TRANSPORTATION QUALITY

Notice of Open Meeting

The Citizens' Advisory Committee on Transportation Quality of the Department of Transportation will hold an open meeting on Monday and Tuesday, April 1 and 2, 1974. The theme for the two-day session will be the adequacy and quality of public transportation in the United States.

The Citizens' Advisory Committee on Transportation Quality is made up of 21 citizens from various parts of the United States who represent, as far as possible, a cross-section of the Nation's citizenry.

Members of the general public planning to attend should call, in advance, Mr. Joseph DelVecchio, Executive Director of the Committee, at 202/426-4283, so that seating arrangements can be provided and so that they can be informed of any subsequent changes in arrangements. The meeting will convene at the Management Information Center of the Department of Transportation, 400 Seventh Street SW., Room 10214 (10th Floor—South side of the Nassif Building).

The agenda is as follows:

MONDAY, APRIL 1, 1974

9:30 a.m.	*Committee discussion:* Committee discussion on general public transportation goals and possible means for achieving them.
12:15 p.m.	*Lunch.*
2:00 p.m.	*Round table discussion:* Committee members and invited round table participants will discuss the major public transportation concerns of the Committee developed during the morning session.
4:00 p.m.	*Administrative matters.*
4:30 p.m.	*Adjournment.*

TUESDAY, APRIL 2, 1974

9:00 a.m.	*Committee meeting:* Discussion on actions to be taken including possible drafting of recommendations emanating from Committee and round table discussions.
12:15 p.m.	*Lunch.*
2:00 p.m.	*Committee meeting:* Completion of morning's business, Committee administrative matters, and plans for next meeting.
4:00 p.m.	*Adjournment.*

This notice is given pursuant to Section 10 of the Federal Advisory Committee Act (Pub. L. 92-463).

Issued in Washington, D.C., on March 21, 1974.

BENJAMIN O. DAVIS, JR.,
Assistant Secretary for Environment, Safety, and Consumer Affairs.

[FR Doc.74-6955; Filed 3-25-74;8:45 am]

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS WORKING GROUP ON PEAKING FACTORS

Notice of Meeting

MARCH 22, 1974.

In accordance with the purposes of Section 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Working Group on Peaking Factors will hold a meeting on April 10, 1974 in Room 1062, 1717 H Street, N.W., Washington, D.C. The subject scheduled for discussion is a Regulatory Staff working paper on light water reactor power distribution.

The Subcommittee is meeting with their consultants and Regulatory Staff participants to formulate recommendations to the full ACRS regarding the above subject.

I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that the meeting will be to discuss a document which falls within exemption (5) of 5 U.S.C. 552(b) and will consist of an exchange of opinions, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b), and in addition privileged material will be discussed which falls within exemption (4) of 5 U.S.C. 552(b). It is essential to close this meeting to protect such privileged information and to protect the free interchange of interval views and to avoid undue interference with agency or Committee operation.

JOHN C. RYAN,
Advisory Committee Management Officer.

[Docket Nos. 50-450 and 50-451]

DELMARVA POWER AND LIGHT CO.

Availability of AEC Draft Environmental Statement for Summit Power Station

Pursuant to the National Environmental Policy Act of 1969 and the United States Atomic Energy Commission's regulations in Appendix D to 10 CFR Part 50, notice is hereby given that a Draft Environmental Statement prepared by the Commission's Directorate of Licensing related to the proposed Summit Power Station Units 1 and 2, to be constructed by Delmarva Power and Light Company in New Castle County, Delaware is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. and in the Newark Free Library, Elkton Road and Delaware Ave-

V 39 59 MAR 26 74 XUM

nue, Newark, Delaware 19711. The Draft Statement is also being made available at the Department of Natural Resources and Environmental Control, Tatnall Building, Dover, Delaware 19901. Copies of the Commission's Draft Environmental Statement may be obtained by request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

The Applicant's Environmental Report, as supplemented, submitted by Delmarva Power and Light Company is also available for public inspection at the above-designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on August 31, 1973 (38 FR 23546).

Pursuant to 10 CFR Part 50, Appendix D, interested persons may submit comments on the Applicant's Environmental Report, as supplemented, and the Draft Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Applicant's Environmental Report and the Draft Environmental Statement (local agencies may obtain these documents upon request). Comments are due by May 20, 1974. Comments by Federal, State, and local officials, or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. and the Newark Free Library, Elkton Road and Delaware Avenue, Newark, Delaware 19711. Upon consideration of comments submitted with respect to the draft environmental statement, the Regulatory staff will prepare a final environmental statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Environmental Statement from interested members of the public should be addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 22nd day of March 1974.

For the Atomic Energy Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch No. 1, Directorate of Licensing.

[FR Doc.74-6985 Filed 3-25-74;8:45 am]

REGULATORY GUIDES

Notice of Issuance and Availability

The Atomic Energy Commission has issued four new guides in its Regulatory Guide series. This series has been developed to describe and make available to the public methods acceptable to the AEC regulatory staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The new guides are in Division 1, "Power Reactor Guides." Regulatory Guide 1.70.3, "Additional Information—Radioactive Materials Safety for Nuclear Power Plants," identifies information related to radioactive materials safety that the AEC Regulatory staff has often found to be missing from final safety analysis reports. Regulatory Guide 1.70.4, "Additional Information—Fire Protection Considerations for Nuclear Power Plants," identifies information related to fire protection in nuclear power plants that the AEC Regulatory staff has often found to be missing from safety analysis reports. Regulatory Guide 1.74, "Quality Assurance Terms and Definitions," identifies quality assurance terms and acceptable definitions that are important to the understanding of quality assurance requirements for the design, construction, and operation of nuclear power plants. Regulatory Guide 1.75, "Physical Independence of Electric Systems," describes an acceptable method of complying with the Commission's requirements with respect to the physical independence of the circuits and electric equipment comprising or associated with the Class IE power system, the protection system, systems actuated or controlled by the protection system, and auxiliary or supporting systems.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. Comments and suggestions in connection with improvements in the guides are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff. Requests for single copies of issued guides or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director of Regulatory Standards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Telephone requests cannot be accommodated. Regulatory Guides are not copyrighted and Commission approval is not required to reproduce them.

Other Division 1 Regulatory Guides currently being developed include the following:

Availability of Electric Power Sources.
Requirements for Instrumentation to Assess Nuclear Power Plant.
Conditions During and Following an Accident for Water-Cooled Reactors.
Shared Emergency and Shutdown Power Systems at Multi-Unit Sites.
Isolating Low Pressure Systems Connected to the Reactor Coolant Pressure Boundary.
Assumptions for Evaluating a Control Rod Ejection Accident for Pressurized Water Reactors.
Assumptions for Evaluating a Control Rod Drop Accident for Boiling Water Reactors.
Requirements for Collection, Storage, and Maintenance of Quality Assurance Records for Nuclear Power Plants.
Requirements for Assessing Ability of Material Underneath Nuclear Power Plant Foundations to Withstand Safe Shutdown Earthquake.
Fire Protection Criteria for Nuclear Power Plants.
Protective Coatings for Nuclear Reactor Containment Facilities.
Inservice Surveillance of Grouted Prestressing Tendons.
Seismic Input Motion to Uncoupled Structural Model.
Primary Reactor Containment (Concrete) Design and Analysis.
Preservice Testing of In-Situ Components.
Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Equipment and Systems.
Quality Assurance Requirements for Installation, Inspection, and Testing of Structural Concrete and Structural Steel.
Fracture Toughness Requirements for Vessels Under Overstress Conditions.
Material Limitations for Component Supports.
Protection Against Postulated Events and Accidents Outside of Containment.
Design Basis Tornado for Nuclear Power Plants.
Requirements for Auditing of Quality Assurance Programs for Nuclear Power Plants.
Assumptions used for Evaluating the Potential Radiological Consequences of a Boiling Water Reactor Gas Holdup Tank Failure.
Quality Assurance Requirements for Procurement of Equipment, Materials, and Services.
Quality Assurance Requirements for Lifting Equipment.
Maintenance and Testing of Batteries.
Qualification of Class I Electrical Equipment.
Type Tests for Class I Cables and Connectors Installed Inside the Containment.
Seismic Qualification of Class I Electric Equipment.
Fracture Toughness Requirements for Materials for Class 2 and 3 Components.
Maintenance of Water Purity in PWR Secondary Systems.
Main Steam Line Sealing System Design Guidelines for Boiling Water Reactors.
Criteria for Heat-up and Cool-down Procedures.
Effects of Residual Elements on Predicted Radiation Damage.
Inservice Inspection and Testing of Steam Generators.
Component Design Criteria for Elevated Temperature Reactors.
Preoperational Testing of Emergency Core Cooling Systems for Pressurized Water Reactors.
Fuel Oil Supplies for Standby Diesel-Generators.
Assumptions Used for Evaluating the Habitability of a Nuclear Power Plant Control Room During a Postulated Toxic Chemical Release.
Assumptions Used for Evaluating the Potential Radiological Consequences of a Liquid Radioactive Waste System Accident.
Code Case Acceptability for ASME Section III Materials.
Sumps for Engineered Safety Systems.
Surveillance, Inspection, and Testing of Fuel Rods.
Elevated Temperature Inservice Surveillance Tests for HTGR Plants.
Design Load Combinations for Component Supports.
Termination of Nuclear Reactor Operating Licenses.
Preoperational Testing of Instrument Air Systems.

(5 U.S.C. 522(a))

Dated at Bethesda, Maryland this 7th day of March, 1974.

For the Atomic Energy Commission.

LESTER ROGERS,
Director of Regulatory Standards.

FEDERAL MARITIME COMMISSION

PORT OF OAKLAND AND MARINE TERMINALS CORP.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW, Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 15, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

J. Kerwin Rooney, Port Attorney
Port of Oakland
66 Jack London Square
P.O. Box 2064
Oakland, California 94607

Agreement No. T-2913, between the Port of Oakland (Oakland) and Marine Terminals Corporation (Terminals) provides for the 2-year nonexclusive preferential assignment (with year-to-year renewal options) to Terminals of certain premises in the "Port Area" of Oakland, California, for the purpose of docking, loading, and unloading vessels. Oakland reserves the right to make temporary assignments of the space to other parties wherever such use will not unduly interfere with the use of the premises by Terminals. As compensation, Terminals will pay Oakland 75 percent of revenue from dockage, wharfage, wharf demurrage, etc., except Terminals will pay 90 percent of revenue received on military cargo when Terminals does not perform service and obtain revenue from the service and facilities charges. Oakland is guaranteed a minimum annual compensation of $250,000. Terminals may not use more than 25 percent of the leased premises for storage without the prior consent of Oakland. Terminals' charges shall conform with charges appearing in Oakland's Port Tariff, and shall be subject to review and control by Oakland. Terminals' tariff shall be filed with Oakland or, in lieu thereof, Terminals may elect to use and be bound by Oakland's tariff. The rate control exercised by Oakland does not include the charge designated as "Service and Facilities Charge."

Dated: March 21, 1974.

By Order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

[Docket No. CI61-1437 and CI74-496]

COLORADO OIL AND GAS CORP.

Notice of Applications

MARCH 20, 1974.

Take notice that on March 5, 1974, Colorado Oil and Gas Corporation (Applicant), c/o H. Glen Van Horn, Five Greenway Plaza East, Houston, Texas 77046, filed in Docket No. CI74-496 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the sale of natural gas from the Table Rock Field, Sweetwater County, Wyoming, under Applicant's Rate Schedule No. 66 to Colorado Interstate Gas Company, a division of Colorado Interstate Corporation (CIG), and filed in Docket No. CI61-1437 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to continue the sale of the subject gas to CIG from its Patrick Draw Plant under Applicant's Rate Schedule No. 49, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Applicant proposes in Docket No. CI74-496 to abandon service under its Rate Schedule No. 66 which provides for the sale of gas from the Table Rock Field to CIG at 15.0 cents per Mcf at 14.65 psia. Applicant states that due to a decline in the pressure in its Table Rock I-24 well the subject gas will no longer enter the Table Rock lateral, a high pressure line connecting the Table Rock gas filed with CIG's transmission facilities. Applicant states further that it is more economical to connect said well to its Patrick Draw Plant, located six miles northwest of the well, through an available low pressure line than to install compressor facilities. Applicant, therefore, proposes to continue the sale of the subject gas to CIG, estimated to be 3,200 Mcf per month, from the outlet of its Patrick Draw Plant under Applicant's Rate Schedule No. 49, which covers such plant outlet sales, at 23.16 cents per Mcf at 14.65 psia.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 12, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to

V 39 59 MAR 26 74 XUM

intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6882 Filed 3-25-74;8:45 am]

[Docket No. CP70-97 (Phase I)]

COLUMBIA GAS TRANSMISSION CORP.

Petition To Amend

MARCH 20, 1974.

Take notice that on March 8, 1974, Columbia Gas Transmission Corporation (Petitioner), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP70-97 (Phase I) a petition to amend the order of the Commission issuing a certificate of public convenience and necessity in said docket on June 19, 1970 (43 FPC 919), pursuant to section 7(c) of the Natural Gas Act by authorizing Petitioner to increase the maximum inventory of stored gas in its Donegal Storage Field from 8,800,000 Mcf to 9,500,000 Mcf at an average shut-in wellhead pressure not to exceed 1260 psig, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By the order issued June 19, 1970, Petitioner was authorized,[1] inter alia, to increase the average shut-in well-head pressure of its Donegal Storage Field in Washington County, Pennsylvania from 1,000 psig to 1260 psig and to increase its inventory of stored gas in the Donegal Field to 8,800,000 Mcf of gas at 1260 psig. Petitioner states that on October 5, 1973, it commenced emergency injections in the Donegal Storage Field in excess of the volumetric limitation of 8,800,000, in view of anticipated curtailment of deliveries to its customers during the 1973-74 winter season.

Petitioner states that additional data and information obtained from a shut-in pressure test conducted on November 8, 1973, reveal that, at an average shut-in wellhead pressure of 1232 psig, the actual volume in storage is 9,278,831 Mcf.

Petitioner estimates that the appropriate maximum inventory of stored gas in the Donegal Field is approximately 9,500,000 Mcf at an average shut-in well-head pressure of 1260 psig. Accordingly, Petitioner requests the Commission amend its order of June 19, 1970 so as to increase the maximum inventory of stored gas from 8,800,000 Mcf to 9,500,000 Mcf at an average shut-in wellhead pressure not to exceed 1260 psig.

[1] Applicants in said proceeding were the Manufacturers Light and Heat Company and Home Gas Company, predecessor companies of Petitioner.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 12, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6881 Filed 3-25-74;8:45 am]

EL PASO NATURAL GAS CO.

[Docket Nos. RP72-155 and RP73-104]

Alternative Tariff Sheet Filing

MARCH 20, 1974.

Take notice that El Paso Natural Gas Company (El Paso) on March 11, 1974, tendered for filing alternative tariff sheets respecting its notice of change in rates filed with the Commission on February 14, 1974. Said notice of change is applicable to certain special rate schedules contained in El Paso's FPC Gas Tariff, Third Revised Volume No. 2 and Original Volume No. 2A and is proposed to become effective April 1, 1974.

El Paso states that the purpose of the alternative tariff sheets is to establish a single statement of rates tariff sheet concept applicable to said notice of change and are proposed to be made effective April 1, 1974, in lieu of the tariff sheets tendered as a part of the subject notice of change.

Further, El Paso states that the instant tender is mechanical in nature in that no change in rates is involved and only tariff sheet format changes are required. El Paso has requested that waiver be granted of all applicable rules and regulations of the Commission, including the notice requirements of § 154.22 of said regulations, as may be necessary to allow the alternative tariff sheets attached hereto to be accepted for filing and to become effective on April 1, 1974, for the purposes under the conditions herein described. Inasmuch as the alternative tariff sheets contain rates pending final determination, El Paso has requested that such tariff sheets should be accepted subject to final determination in the proceeding at Docket Nos. RP72-150, RP72-155 and RP73-104.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 26, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. El Paso's proposed alternative tariff sheets and rate filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Rate Schedule 83]

PHILLIPS PETROLEUM CO.

Notice of Rate Change Filing

MARCH 20, 1974.

Take notice that the producer listed in the Appendix A attached hereto has filed a proposed increase rate to the applicable area new gas ceiling based on the interpretation of vintaging concepts set forth by the Commission in its Opinion No. 639, issued December 12, 1972.

The information relevant to this is listed in the Appendix.

Any person desiring to be heard or to make any protest with reference to said filing should on or before April 9, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

Notice of Rate Change Filings

MARCH 20, 1974.

Take notice that the producers listed in the Appendix A attached hereto have filed proposed increased rates to the applicable area new gas ceiling based on the interpretation of vintaging concepts set forth by the Commission in its Opinion No. 639, issued December 12, 1972.

The information relevant to each of these sales is listed in the Appendix.

Any person desiring to be heard or to make any protest with reference to said filings should on or before April 1, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

TECHNICAL ADVISORY COMMITTEE ON THE IMPACT OF INADEQUATE ELECTRIC POWER SUPPLY

Notice of Meeting

Agenda for a meeting of the Technical Advisory Committee on the Impact of Inadequate Electric Power Supply of the National Power Survey to be held at the Federal Power Commission Offices, 825 North Capitol Street NE, Washington, D.C., 10:00 a.m., April 8, 1974, Room 5200.

1. Meeting opened by FPC Coordinating Representative.
2. Objectives and purposes of meeting.
   a. Correction and additions to minutes of previous meeting.
   b. Further discussion of the goals and objectives of the Advisory Committee.
   c. Other business.
   d. Set date of next meeting.
3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP74-73]

TENNESSEE GAS PIPELINE CO.

Filing of Proposed Research and Development Rate Adjustment Provision

MARCH 20, 1974.

In the matter of Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

Take notice that on March 11, 1974, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing proposed changes to Ninth Revised Volume No. 1 of its FPC Gas Tariff, to be effective on April 11, 1974, consisting of the following tariff sheets:

Original Sheet Nos. 213L, 213M and 213N
First Revised Sheet No. 213K
Third Revised Sheet Nos. 12A and 12B

Tennessee states that the sole purpose of such revised tariff sheets is to include a research and development (R&D) rate adjustment provision in Tennessee's tariff applicable to jurisdictional gas sales and to make necessary conforming changes in the form of tariff Sheet Nos. 12A and 12B. Such provision is set forth in a new Article XXV added to the general terms and conditions of Ninth Revised Volume No. 1. Tennessee further states that its proposed R&D rate adjustment provision is in full accord with § 154.38(d)(5)(b) of the Commission's regulations, except, perhaps for two provisions as to which the regulations are silent, but which are necessary and appropriate for the reasons set forth in the filing. Tennessee requests that the Commission grant such waivers as it may deem necessary for the acceptance of the filing.

Tennessee states that copies of its filing have been mailed to all of its affected customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 1, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6887 Filed 3-25-74;8:45 am]

[Docket Nos. RP72-133 and RP74-20]

UNITED GAS PIPE LINE CO.

Proposed Rate Changes

MARCH 20, 1974.

Take notice that United Gas Pipe Line Company (United), on February 15, 1974, tendered for filing as part of its First Revised Volume No. 1, FPC Gas Tariff, Substitute Fifteenth Revised Sheet No. 4 (Substitute Sheet) with a proposed effective date of April 6, 1974. United states that the substitute sheet replaces Fifteenth Revised Sheet No. 4, which was filed with the Commission on September 21, 1973, in Docket No. RP74-20, and suspended until April 6, 1974, by order of November 6, 1973. United further states that the substitute sheet also replaces Substitute Fourteenth Revised Sheet No. 4 as well as Substitute Revised Sheet No. 4a, both of which were filed on November 14, 1973, in Docket No. RP72-133 and accepted by the Commission on January 4, 1974.

United states that subsequent to the filing of the above-mentioned tariff sheets in the respective dockets, certain events have occurred materially affecting the rates reflected thereon. United indicates that the substitute sheet reflects changes necessitated by the (1) Commission's new cost allocation embodied in Order No. 671, (2) an increase in Louisiana Severence Tax, (3) a current adjustment to the average unit cost of purchased gas, and (4) a surcharge adjustment.

V 39159
MAR 26 74
XUM

United states that copies of the Substitute Sheet will be mailed to United's jurisdictional customers, interested state commissions, and other parties to the proceeding in Docket No. RP74–20.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 1, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6886 Filed 3–25–74;8:45 am]

FEDERAL RESERVE SYSTEM

ATLANTIC BANCORP.

Order Denying Acquisition of Bank

Atlanta Bancorporation, Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire not less than 80 percent of the voting shares of Bank of New Smyrna, New Smyrna Beach, Florida (Bank).

By order of November 22, 1972, the Board of Governors denied the application of Atlantic Bancorporation to acquire Bank (37 FR 25571).[1] On May 24, 1973, the Board granted Applicant's Request for Reconsideration. The request for reconsideration, filed pursuant to § 262.3(g)(5) of the Board's rules of procedure (12 CFR 262.3(g)(5)), was granted because the request presented relevant facts (concerning the market in which Bank operates) that, for good cause shown, were not previously presented to the Board, and reconsideration otherwise appeared appropriate.

Notice of the Board's order granting Applicant's request for reconsideration of its application to acquire Bank has been given (38 FR 14727) and the time for filing comments and views has expired and none has been timely received. The Board has reconsidered this application and supplemental material received in connection therewith in light of the factors set forth in section 3(c) of the Act.

Atlantic, the sixth largest banking organization and bank holding company in Florida, controls 30 banks with aggregate deposits of approximately $1.2 billion, representing about 5.1 percent of deposits in commercial banks in the State.[2] Acquisition of Bank ($29.7 million in deposits) would not represent a significant increase in Applicant's share of total deposits in the State.

At the request of the Board, the Federal Reserve Bank of Atlanta conducted a survey in the New Smyrna area and the results of this survey indicate that the two New Smyrna Beach banks, Bank and First National Bank ($12.7 million in deposits), operate in a local banking market[3] which adjoins, but is separate from the Daytona Beach banking market.

Applicant presently operates two banking subsidiaries in the Daytona Beach banking market and is the second largest banking organization in that market with nearly 20 percent of market deposits. Bank, located in the adjacent New Smyrna Beach market, is the dominant commercial banking institution in New Smyrna Beach, controlling over 70 percent of market deposits. The other commercial bank in New Smyrna Beach, First National Bank, is less than half the size of Bank.

Bank and Applicant's Daytona Beach banking subsidiaries are in separate banking markets; however, there is some slight competitive overlap between these banks with respect to certain banking services. Nonetheless, in viewing the total product market of commercial banking, the amount of competition eliminated is not significant.

In the Board's view, Applicant is one of the most likely entrants into the New Smyrna Beach banking market in light of the facts of record; namely, its capabilities for entry, the proximity of New Smyrna Beach to an area where Applicant has a significant presence (Daytona Beach), its expansion policy, and its expressed interest in the New Smyrna Beach market. Moreover, the New Smyrna Beach market appears to be capable of supporting new entry. If Applicant entered the New Smyrna Beach banking market de novo, or through the acquisition of a smaller bank, the effect would likely be procompetitive and in the public interest. Given the present concentration of the New Smyrna Beach banking market, the adverse effect consummation of this proposal would have upon the prospects for increased competition and deconcentration in the relevant market, the probability of Applicant as a future entrant into that market, and the opportunity for an alternative means of entry into New Smyrna Beach, the Board concludes that consummation of the transaction would have a substantially adverse effect on potential competition.

The financial condition and managerial resources and future prospects of Applicant, its subsidiary banks and Bank are regarded as satisfactory. Thus, banking factors are consistent with approval but provide no significant support for such action. There is no evidence in the record that the banking needs of the residents of the New Smyrna Beach area are not being adequately met at the present time. Moreover, consummation of the proposed transaction would have little impact on the convenience and needs of banking customers in the area since Applicant proposes no meaningful new service not already being offered. Accordingly, the Board finds that the anticompetitive effects inherent in Applicant's proposal are not outweighed by considerations relating to the convenience and needs of the community to be served.

On the basis of the record in this case and for the reasons set forth in this order, the Board's order of November 22, 1972, is hereby affirmed and the subject application is denied.

By order of the Board of Governors,[4] effective March 18, 1974.[5]

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74–6864 Filed 3–25–74;8:45 am]

BANK OF UTAH

Order Approving Application for Merger of Banks

Bank of Utah, Ogden, Utah (Utah Bank), a member State bank of the Federal Reserve System, has applied for the Board's approval pursuant to the Bank Merger Act (12 U.S.C. 1828(c)) of the merger of that bank with Bank of Ben Lomond, Ogden, Utah (Lomond Bank), under the charter and title of Utah Bank. As an incident to the merger, the present head office of Lomond Bank and its Pleasant View branch would become branches of the resulting bank.

As required by the Act, notice of the proposed merger, in form approved by the Board, has been published, and the Board has requested reports on competitive factors from the Attorney General, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation. The Board has considered the application and all comments and reports received in the light of the factors set forth in the Act.

Utah Bank ($36 million deposits),[1] a subsidiary of Tennessee Homestead Company, Ogden, Utah, operates five offices in the Ogden, Utah, banking market wherein it is the third largest of the six banks with 15.8 percent of the total commercial bank deposits represented in the market. Lomond Bank ($7 million deposits) operates its main office in Ogden and a branch in the nearby community of Pleasant View, and holds 3.2 percent of total deposits of the Ogden banking market. The two largest competing banks, in terms of deposits, hold 39 and 36 percent, respectively, of total market deposits. The closest offices of Utah Bank and Lomond Bank are four miles apart. The banks have been closely affiliated since the Lomond Bank was organized in 1957 by stockholders of the Bank of Utah. At the present time stockholders owning 88 percent of Bank of Utah also own 76 percent of the stock of Lomond Bank. There are nine common directors who represent a majority on the boards of each bank. There is no meaningful existing competition between the banks, and it is unlikely that any significant amount of potential competition would be foreclosed by the merger of the two institutions in view of their common ownership. It further appears that the proposed merger would effect only a corporate reorganization of the two banks without having any adverse effects on competition in the relevant areas.

The financial and managerial resources of Bank of Utah and Lomond Bank are generally satisfactory, and prospects for the resulting bank appear favorable. Banking factors, therefore, are consistent with approval of the application. Consummation of the proposed merger would enable customers of Lomond Bank to benefit from larger credit lines and the expansion of other banking services. It is the Board's judgment that consummation of the proposal would be in the public interest, and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the date of this order or (b) later than three months after the date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors,[2] effective March 15, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74–6865 Filed 3–25–74;8:45 am]

BANK OF VIRGINIA CO.

Proposed Acquisition of Harold Loan and Finance Corp.

Bank of Virginia Company, Richmond, Virginia, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's regulation Y, for permission to acquire voting shares of Harold Loan and Finance Corp., Braddock, Pennsylvania, through its wholly owned subsidiary, General Finance Service Corporation, Huntingdon, Pennsylvania. General Finance Service Corporation, is owned directly by BVA Credit Corporation, Richmond, Virginia, a wholly owned subsidiary of Bank of Virginia Company. Notice of the application was published on February 25, 1974, in the Pittsburgh Post-Gazette, a newspaper circulated in Pittsburgh, Pennsylvania.

Applicant states that the proposed subsidiary would engage in the activities of making loans or extensions of credit such as would be made by a finance company and acting as agent for credit life, accident and health insurance directly related to extensions of credit by its subsidiaries, and also multi-peril insurance written to protect collateral on such loans during the period of credit extension. Such activities have been specified by the Board in § 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 12, 1974.

Board of Governors of the Federal Reserve System, March 15, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74–6871 Filed 3–25–74;8:45 am]

CHASE MANHATTAN CORP.

Proposed Acquisition of Dial Financial Corporation

The Chase Manhattan Corporation, New York, New York, has re-applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's regulation Y, for permission to acquire voting shares of Dial Financial Corporation, (DFC), Des Moines, Iowa. Its original application was denied by the Board by order dated January 30, 1974, for reasons expressed in that order (39 FR 4814, February 7, 1974). Notice of the application was published on various dates in newspapers circulated in the communities in which the approximately 471 offices of subsidiaries of DFC are located. Those offices are located in every State other than Alaska, Arkansas, Delaware, Maine, Maryland, Montana, New Hampshire, New Jersey, New York, North Dakota, South Dakota, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and Wyoming.

Applicant states that the proposed subsidiary would engage through its subsidiaries in the activities of making direct consumer installment loans, secured and unsecured, to individuals in most instances by direct customer contact, in some instances, by mail; selling declining balance credit life (including joint credit life in certain circumstances) and credit health and accident insurance policies to those individuals; underwriting (in Missouri only) or re-insurance of such insurance; the sale to those individuals of insurance on items (other than automobiles) in which a subsidiary of DFC has a security interest; the sale of other insurance, premiums from which would not exceed five percent of aggregate premium income per State; purchasing installment sales finance contracts from retailers; providing data processing services, including computerized general accounting services, computerized billing services, and computerized delinquent list preparation, and the use of computer time, to its subsidiaries and other consumer credit companies. Such activities have been specified by the Board in § 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). Consumer loan, insurance sales, and sales finance operations are conducted by DFC subsidiaries operating under the names, Dial Finance Company, Dial Financial Corporation, Inc., Dial Loan and Investment Company, Dial Industrial Finance Company, Dial Credit Company, Dial Consumer Discount Company, Dial Finance Acceptance Company, Dial Industrial Loan Company, and variations thereof. The insurance underwriting and reinsurance activities of DFC are conducted by its wholly-owned subsidiary Consumers Life Insurance Company from DFC's home office in Des Moines, Iowa. The data processing service operations are conducted by DFC from its home office in Des Moines, Iowa.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at

[1] Board denial was in part premised on the fact that acquisition of Bank would further increase the concentration of banking resources in the Daytona Beach banking market since the New Smyrna Beach area was considered a part of that market.

[2] All banking data are as of June 30, 1973, and reflect bank holding company acquisitions and formations approved by the Board through December 31, 1973.

[3] The New Smyrna Beach banking market is defined as that portion of Volusia County including New Smyrna Beach south to the county line.

[4] Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, Sheehan, Bucher, and Holland. Absent and not voting: Governor Daane.

[5] Board action was taken while Governor Daane was a Board member.

[1] All banking data are as of June 30, 1972.

[2] Voting for this action: Chairman Burns and Governors Brimmer, Sheehan, and Holland. Absent and not voting: Governors Mitchell, Bucher, and Wallich.

V 39 59 MAR 26 74 XUM

the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 5, 1974.

Board of Governors of the Federal Reserve System, March 18, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6872 Filed 3-25-74;8:45 am]

CURRY BAN CORP.

Formation of Bank Holding Company and Continuation of Insurance Agency Activities

Curry Ban Corporation, Massena, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 percent or more of the voting shares of the Farmers Savings Bank, Massena, Iowa ("Bank"). At the same time, Applicant has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's regulation Y for permission to continue to engage in the activities of a general insurance agency in a community with a population not exceeding 5,000 persons. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(9)(iii)(a)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with sections 3 and 4 of the Act (39 FR 2308). The time for filing comments and views has expired and none has been timely received. The Board has considered the applications in light of the factors set forth in section 3(c) of the Act, and the considerations specified in section 4(c)(8) of the Act.

Applicant is a recently formed Iowa corporation, operating as an insurance agency on Bank's premises, and organized for the purposes of becoming a bank holding company through acquisition of Bank. Prior to the formation of Applicant, the insurance agency activities, now conducted by Applicant, were conducted on Bank's premises by an individual who is also the principal stockholder and president of Bank. Thus, there has been a close association between Bank and the insurance agency. Approval of the proposal herein will continue this association and thereby assure the availability of insurance to the community. There is no evidence in the record indicating that continuation of Applicant's insurance activities would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices or other adverse effects in the public interest.

Bank, with deposits of $4.0 million,[1] representing less than 1 percent of the total deposits in commercial banks in the State, is the third largest of five banking organizations in the Greenfield banking market,[2] controlling approximately 15 percent of total deposits in commercial banks therein. Bank is the only bank in Massena. Since the proposal represents a restructuring of Bank's ownership and Applicant has no banking subsidiaries, acquisition of Bank by Applicant would not eliminate any existing competition, nor would it appear to have any adverse effect on other banks or on the development of future competition in any relevant area. Accordingly, competitive considerations are consistent with approval of the applications.

The financial and managerial resources and future prospects of Applicant and Bank are generally satisfactory and consistent with approval. Although Applicant will incur debt in acquiring Bank, it appears that income from Bank and Applicant's insurance agency activities will provide sufficient revenue to service the debt adequately without impairing the financial condition of Bank.

Acquisition of Bank by Applicant may enhance Bank's ability to serve the banking needs of the local community because Applicant intends to provide Bank with additional capital, thereby permitting Bank to accept additional customer deposits. Therefore, considerations relating to the convenience and needs of the community lend some weight toward approval. It is the Board's judgment that consummation of the transaction would be in the public interest and that the application to acquire Bank should be approved.

Based on the foregoing and other considerations reflected in the record, the Board has determined that the factors under section 3(c) and the balance of public interest factors the Board is required to consider under section 4(c)(8) favor approval of Applicant's proposal. Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this order; and neither the acquisition of Bank nor the continuation of insurance activities shall be made later than three months after the effective date of this order. However, such periods may be extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority. The determination as to insurance agency activities is subject to the conditions set forth in § 225.4(c) of regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[3] effective March 15, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6873 Filed 3-25-74;8:45 am]

[1] All banking data are as of June 30, 1973.

[2] The Greenfield banking market is approximated by portions of Cass County and Adair County, Iowa.

FASCO INTERNATIONAL HOLDING S.A.

Formation of Bank Holding Company

Fasco International Holding S.A., Luxembourg Ville, Luxembourg, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of an additional 9.7 percent of the outstanding common stock of Franklin New York Corporation, New York City, New York, a bank holding company by virtue of its ownership of all of the voting shares (except for directors' qualifying shares) of Franklin National Bank, New York City, New York. Fasco International Holding S.A. presently holds 21.7 percent of the outstanding common stock of Franklin New York Corporation, as well as 51.8 percent of the outstanding voting shares of Talcott National Corporation, which shares of Talcott National Corporation would be exchanged for the additional shares of Franklin New York Corporation, for acquisition of which Fasco International Holding S.A. now seeks the prior approval of the Board. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of New York. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 16, 1974.

Board of Governors of the Federal Reserve System, March 19, 1974.

FIRST UNION INC.

Proposed Acquisition of Preferred Life Insurance Company

First Union Incorporated, St. Louis, Missouri, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's regulation Y, for permission to acquire voting shares of Preferred Life Insurance Company, St. Louis, Missouri. Notice of the application was published on (1) February 15, 1974, in the St. Louis Globe Democrat, a newspaper circulated in St. Louis, Missouri, and (2) the Arizona Weekly Gazette, a newspaper circulated in Phoenix, Arizona.

Applicant states that the proposed subsidiary would engage in the activity of acting as an underwriter for credit life and credit accident and health insurance which is directly related to extensions of credit by the bank holding company system. Such activities have been specified by the Board in § 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 16, 1974.

Board of Governors of the Federal Reserve System, March 19, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6876 Filed 3-25-74;8:45 am]

FROSTBANK CORP.

Order Approving Acquisition of Bank

FrostBank Corporation, San Antonio, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of Peoples National Bank, San Antonio, Texas (Bank), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the tenth largest banking organization in Texas, presently controls four banks with aggregate deposits of approximately $542 million, representing 1.6 percent of the total deposits in commercial banks in Texas.[1] Since Bank is a proposed new bank, consummation of the proposed acquisition would not immediately increase Applicant's share of commercial bank deposits in the State.

Bank is to be located in northern San Antonio, which is part of the San Antonio SMSA banking market. Applicant presently has three subsidiary banks (one of which is a recently acquired de novo bank) in the relevant market and controls 24.6 percent of the total commercial bank deposits in the market. Since Bank is a proposed new bank, Applicant's acquisition of Bank would not have any immediate effect on Applicant's share of commercial bank deposits in the San Antonio SMSA banking market; nor would it have any significant adverse effects on existing or potential competition with respect to the San Antonio SMSA banking market. In reaching this conclusion, the Board recognizes that continual de novo expansion by the market's largest banking organization within a particular area of the market could reduce the prospects for market deconcentration by pre-empting viable sites for de novo entry by other banking organizations not already represented in the market. However, with regard to this case, the evidence indicates that the northern San Antonio area is experiencing rapid and substantial growth and can support additional entries by other banking organizations. Accordingly, competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are regarded as satisfactory. Bank, as a proposed new bank, has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable. Considerations relating to the banking factors are consistent with approval of the application. The addition of a new banking alternative in the rapidly growing San Antonio market will provide greater convenience to a segment of the population in this market. In addition, Bank's affiliation with Applicant will enable it to provide its customers with access to Applicant's specialized services, expertise, and financial resources. Accordingly, considerations relating to convenience and needs of the community to be served lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after that date, and (c) Peoples National Bank, San Antonio, Texas, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors[2] effective March 18, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6877 Filed 3-25-74;8:45 am]

INDUSTRIAL NATIONAL CORP.

Acquisition of Mortgage Associates, Inc.

Industrial National Corporation, Providence, Rhode Island, a bank holding company within the meaning of the Bank Holding Company Act, as applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's regulation Y, to acquire the assets of Mortgage Associates, Inc., Milwaukee, Wisconsin ("MAI"), a company that engages in the following activities: (1) Origination and sale of residential and commercial mortgages; (2) origination and sale of loans for the purchase of mobile homes; (3) consumer finance; (4) servicing of mortgage loans and mobile home loans; and (5) operation of an insurance agency with respect to certain types of insurance. Such activities have

V 39 59 MAR 26 74 XUM

been determined by the Board to be closely related to banking (12 CFR 225.4 (a) (1), (3), and (9)). MAI is also engaged in real estate development and property management activities. The Board has previously determined that such activities are not closely related to banking;[1] and Applicant has committed itself to phasing out these activities, if the proposed acquisition is approved.

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 28115). The time for filing comments and views has expired, and the Board has considered all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)).[2]

Applicant, a one bank holding company, controls Industrial National Bank of Rhode Island, Providence, Rhode Island ("Bank"), the largest commercial bank in Rhode Island, with deposits of approximately $1.3 billion, representing about 56 percent of total deposits in commercial banks in the State.[3] Bank engages in both consumer finance and mortgage banking operations. Bank's portfolio of $288 million in residential mortgages (as of June 30, 1973) is confined to loans on property in Rhode Island, Connecticut, and Massachusetts. Applicant also controls several nonbanking subsidiaries which engage in the following activities: real estate investment and development[4] mortgage banking, data processing, investment advisor, personal property leasing, factoring, and consumer finance. Applicant's consumer finance subsidiary operates in Georgia, Florida, North Carolina, South Carolina, and Tennessee; and Applicant's mortgage banking subsidiary makes only interim and short-term real estate loans for its own account.

The primary business activity of MAI is mortgage banking. It originates, sells, and services both residential and commercial mortgages. MAI's residential mortgages are derived from 12 States,[5] while its commercial mortgages are derived from three States.[6] Of more than $219 million in mortgages originated by MAI in fiscal 1973, approximately 71 percent were residential mortgages, while the remaining 29 percent were commercial mortgages. Based on a mortgage servicing portfolio of about $957 million, MAI ranks as the sixteenth largest mortgage banking firm in the United States. MAI is also engaged in consumer finance activities in the States of Wisconsin and Illinois, where it has approximately $12 million in consumer loans outstanding. In addition, MAI engages in the origination and servicing of loans on mobile homes; and insurance agency activities with regard to certain types of insurance.

As a threshold matter, the Board believes that the acquisition of the 16th largest mortgage banking firm in the United States and the 6th largest independent mortgage banking company, deserves special scrutiny to insure that the proposal does not raise concern with respect to the question of undue concentration of resources. The Board has in the past closely examined acquisitions of such size. In the case at hand Applicant's primary subsidiary, Industrial National Bank of Rhode Island, while having resources of approximately $1.5 billion, ranked only 63rd among commercial banking organizations in the country (as of June 30, 1973). While Applicant is engaged in a number of nonbanking activities such as leasing, factoring, and consumer finance, Applicant is not a substantial factor nationwide in any of these activities. The Board therefore believes that the question of undue concentration of resources need not be accorded significant weight in the case at hand.

Although MAI and some of Applicant's subsidiaries engage in the same activities, all operate in separate geographic markets and there does not appear to be any significant existing competition between them in either their mortgage banking, consumer finance, or mobile home financing activities. Furthermore, it does not appear likely that any significant competition would develop between these institutions in the future due to the distances which separate their respective markets. Accordingly, it is the Board's judgment that considerations relating to the competitive aspects of the proposed acquisition are consistent with approval of the application.

Approval of the proposed acquisition would give MAI access to the financial resources of Applicant, and it is anticipated that such increase in the availability of funds will enable MAI to expand the volume of its mortgage banking activities as well as broaden the geographic markets it serves. For example, the volume of MAI's home improvement loans has declined over the past three years from about $25 million to $11 million, as the company was unable to obtain funds. Applicant proposes to increase this pool of lendable funds by $10 million and, in addition, assist MAI in the origination of over $100 million in loans on mobile homes in the next 15 months. Applicant also proposes to finance MAI's expansion within the next three years into five geographical markets in which it is not presently represented, including parts of the Southeastern section of the country. It is the Board's judgment that consummation of the proposed transaction would bring positive benefits to the public and that such benefits outweigh any possible adverse effects.

There is no evidence in the record indicating that consummation of the proposed transaction would result in undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects. Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(2) is favorable. Accordingly, the application is hereby approved subject to the condition that Applicant terminate MAI's real estate development and property management activities at the earliest possible date, but in no event later than one year from the date of consummation of the proposed acquisition. This determination is additionally subject to the conditions set forth in § 225.4(c) of regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston.

By order of the Board of Governors,[7] effective March 15, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[1] See: 1972 BULLETIN 429; and 12 CFR 225.126(d) and (e).

[2] The National Association of Insurance Agents, Inc., and related parties filed a petition on July 31, 1973, objecting to approval of the application and requesting a hearing be held on this application. Subsequently, the objections and related request for a hearing were withdrawn.

[3] All banking data are as of June 30, 1973.

[4] Applicant relies upon section 4(c)(12) of the Act to continue to engage in this activity.

[5] Arizona, Florida, Illinois, Indiana, Michigan, Minnesota, Missouri, Nevada, Oklahoma, Ohio, Texas, and Wisconsin.

[6] Illinois, Minnesota, and Wisconsin.

[7] Voting for this action: Chairman Burns and Governors Brimmer, Sheehan, and Holland. Absent and not voting: Governors Mitchell, Bucher and Wallich.

MARCO CAPITAL CORP.

Formation of Bank Holding Company

Marco Capital Corporation, Wilmington, Delaware, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding Company through acquisition of 100 percent of the voting shares (less directors' qualifying shares) of Marshall County Bank & Trust Company, Plymouth, Indiana. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than April 15, 1974.

Board of Governors of the Federal Reserve System, March 18, 1974.

GENERAL SERVICES ADMINISTRATION

EXECUTIVE BRANCH POSITION ON COMMISSION ON GOVERNMENT

Procurement Recommendations A-37 and D-3

Notice is given that official agency views on interagency Task Group proposals for an executive branch position relative to Commission on Government Procurement (COGP) Recommendations A-37 and D-3 have been obtained and are considered to constitute a consensus for adopting the general thrust of these COGP recommendations.

The two recommendations concern the following matters.

A-37. The COGP recommended establishment of a Government-wide policy for the review and approval of cost-type prime contractor procurement systems and transactions. The executive branch consensus is to adopt in the Federal Procurement Regulations the Armed Services Procurement Regulation's Contractor Procurement System Review Program and "Subcontracts" contract clauses as appropriate.

D-3. The COGP recommended limiting the development of new Federal specifications for commercial-type products to those that can be specifically justified. The executive branch consensus is to adopt Government-wide the thrust of this recommendation by promulgation of an appropriate policy statement in the Federal Property Management Regulations.

Agency coordination and private sector comments will be sought on the draft regulations implementing the subject policies.

Dated at Washington, D.C., on March 19, 1974.

WILLIAM W. THYBONY,
Acting Associate Administrator, Office of Federal Management Policy.

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in a gas and electric rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Kentucky Public Service Commission in a proceeding (Case No. 5982) involving the application of the Louisville Gas and Electric Company for a rate increase.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

ARTHUR F. SAMPSON,
Administrator of General Service.

MARCH 19, 1974.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for Clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on March 21, 1974 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395—4529).

NEW FORMS

INTERSTATE COMMERCE COMMISSION

[Notice 472]

ASSIGNMENT OF HEARINGS

MARCH 21, 1974.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 108340 Sub-25, Haney Truck Line, now assigned April 3, 1974, at Portland, Oregon, is cancelled and application dismissed.

MC 26396 Sub 102, Popelka Trucking Company, Dba the Waggoners, application is dismissed.

MC-120981 Sub 15, Bestway Express, Inc., now being assigned continued hearing May 13, 1974 (1 week), at Charleston, West Virginia, in a hearing room to be later designated.

MC 73165 Sub-331, Eagle Motor Lines, Inc., now assigned April 22, 1974, at *Dallas, Texas*, is cancelled and reassigned April 22, 1974, at *Houston, Texas*, in the Texas State Hotel, 720 Fannin.

MC 107295 Sub 664, Pre-Fab Transit Co., now being assigned hearing June 3, 1974 (2 weeks), at Chicago, Ill., in a hearing room to be later designated.

MC-C-8217, Advance Leasing, Inc., Marilyn Diver, Oral Lee Diver, Douglas Ray Diver, James L. Baker, Earl Baker, James W. Rains, Jim Tatman's Mobile Homes, Inc., and Golden West Mobile Homes, Inc.—Investigation of Operations and Practices—now assigned April 25, 1974, at Dallas, Tex., will be held in Room 5A15-17, New Federal Building, 1100 Commerce Street.

I&S No. 8910, Motor-Rail Grain Rates, Montana to Oregon & Washington, now assigned March 25, 1974, at St. Paul, Minn., is cancelled.

I&S-M-27554, Automobile Parts or Accessories, Between Points in Central States, now being assigned hearing May 7, 1974, at the Offices of the Interstate Commerce Commission, Washington, D.C.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.74-6935 Filed 3-25-74;8:45 am]

[No. AB-7 (Sub-No. 9)]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD CO.

Abandonment Between Dryad Junction and Raymond, In Lewis and Pacific Counties, Wash.

Upon consideration of the record in the above-entitled proceeding and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued because in this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.); and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Lewis and Pacific Counties, Wash., within 15 days of the date of service of this order, and to certify to this Commission that this has been accomplished.

It is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 13th day of March, 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD,
Secretary.

The Interstate Commerce Commission hereby gives notice that by order dated March 13, 1974, it has been determined that the proposed abandonment by the Chicago, Milwaukee, St. Paul and Pacific Railroad Company of a line of railroad between Dryad Junction and Raymond, in Lewis and Pacific Counties, Wash., a distance of approximately 28.5 miles, if approved by the Commission, would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), and that preparation of a detailed impact statement will not be required under section 4332(2)(c) of the NEPA.

It was concluded, among other things, that inasmuch as no rail service has been provided over the line for several months, there are no identifiable prospects for a demand for service over the line in the foreseeable future, and the Chicago, Milwaukee, St. Paul and Pacific Railroad Company is providing substantially the same service by operating pursuant to trackage rights over a roughly parallel line, the impact of the proposed abandonment on the area's transportation scheme would be minimal. The determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request at the Interstate Commerce Commission, Office of Proceeding, Washington, D.C. 20423; telephone 202-343-6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before April 10, 1974.

[FR Doc.74-6932 Filed 3-25-74;8:45 am]

[Notice 49]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 15, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-75009. By order of March 19, 1974, the Motor Carrier Board approved the transfer to Doric Distributors, Inc., New York, N.Y., of that portion of the operating rights in Certificate No. MC-83833 issued August 9, 1956, to Maat's Trucking Co., Inc., Paterson, N.J., authorizing the transportation of general commodities, usual exceptions, between New York, N.Y., and points in Nassau County, N.Y., on the one hand, and, on the other, points in Bergen, Hudson, Essex, and Passaic Counties, N.J. Bert Collins, Suite 6193, 5 World Trade Center, New York, N.Y. 10048, and George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306, Registered Practitioners for applicants.

No. MC-FC-75015. By order of March 19, 1974, the Motor Carrier Board approved the transfer to Hi-Way Towing Service, Inc., Worth, Ill., of Certificate No. MC-117064 issued to Francis W. Mahaffay, dba Hi-Way Towing Service, Worth, Ill., authorizing the transportation of: Tractors and trailers as replacement vehicles, disabled vehicles, in a wrecker type service, between points in Illinois, Iowa, Indiana, Michigan, and Wisconsin. Edward J. De Pree, Attorney, 135 So. LaSalle St., Chicago, Ill. 60603.

No. MC-FC-75025. By order entered March 19, 1974, the Motor Carrier Board approved the transfer to Edward D. Pohutsky, doing business as Pohutsky Movers, Eynon, Pa., of the operating rights set forth in Certificates Nos. MC-123616 and MC-123616 (Sub-No. 1), issued by the Commission February 23, 1962, and August 8, 1966, respectively, to Stanley L. Shiflet, doing business as Shiflet's Transfer, Gassaway, W. Va., authorizing the transportation of household goods, as defined by the Commission, from points in Nicholas County, W. Va., to points in Virginia, North Carolina, South Carolina, Georgia, and Florida; and between points in Braxton and Nicholas Counties, W. Va., on the one hand, and, on the other, points in Ohio, Virginia, Pennsylvania, Kentucky, and West Virginia; and such merchandise as is dealt in by wholesale, retail and chain grocery and food business houses, and in connection therewith, equipment, materials and supplies used in the conduct of such business, between Gassaway and Richwood, W. Va. Robert B. Pepper, 168 Woodbridge Ave., Highland Park, N.J. 08904, practitioner for applicants.

No. MC-FC-75029. By order of March 19, 1974, the Motor Carrier Board approved the transfer to Donald Marske, doing business as Marske Trucking, Westport, S.D., of the operating rights in Certificate No. MC-85955 (Sub-No. 8), issued October 5, 1970, to Crawford Freight Lines, Inc., Aberdeen, S.D., authorizing the transportation of general commodities, with exceptions, over regular routes between Aberdeen and Faith, S.D., serving certain specified intermediate and off route points. James R. Becker, 412 West Ninth St., Sioux Falls, S.D. 57104 Attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice 41]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 21, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also held in field office to which protests are to be transmitted.

No. MC 2202 (Sub-No. 460 TA), filed March 12, 1974. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Akron, Ohio 44309. Applicant's representative: William Slabaugh (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the facilities of The Tappan Company at or near Oberling, Ohio, as an off-route point, for 180 days.

NOTE.—Applicant states that he does intend to tack with his authority in MC-2202 and subs thereto and will affect interchange at all points served. No. MC 138512 (Sub-No. 5 TA), filed March 5, 1974. Applicant: ROLAND'S TRANSPORTATION SERVICE, INC., DBA WISCONSIN PROVISIONS EXPRESS, 3383 E. Layton Ave., Cudahy, Wis. 53110. Applicant's representative: Allan J. Morrison (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cheese and cheese products, and equipment, materials, and supplies*, used in the manufacture and display of cheese and cheese products, between Green Bay, Wis., Carthage, Mo., and Logan, Utah. RESTRICTION: Restricted against the transportation of commodities in bulk, and restricted to transportation originating at or destined to plants and facilities utilized by the L. D. Schreiber Cheese Co., Inc. SUPPORTING SHIPPER: L. D. Schreiber Cheese Co., Inc., 246 No. Main, Green Bay, Wis. 54305. SEND PROTESTS TO: John E. Ryden, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 135 West Wells Street, Room 807, Milwaukee, Wis. 53203.

No. MC 138882 (Sub-No. 8 TA), filed March 12, 1974. Applicant: WILEY SANDERS, INC., 212 Oak Street, Troy, Ala. 36081. Applicant's representative: John W. Cooper, 1314 City Federal Building, Birmingham, Ala. 35203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Nonferrous metal scrap*, between the plant site of Southeast Red Metals Company, Inc., located at or near Troy, Ala., on the one hand, and, on the other, points in the United States lying east of Montana, Wyoming, Colorado, and New Mexico; (2) *scrap batteries*, from points in the United States lying east of Montana, Wyoming, Colorado, and New Mexico (except Florida, Georgia, South Carolina, and North Carolina), to the plant site of Sanders Lead Company, Inc., at or near Troy, Ala.; and (3) *pallets*, from the plant site of Troy Box & Pallet, Inc., at or near Troy, Ala., to points in Mississippi and Louisiana, for 180 days.

NOTE.—Applicant states that he does intend to tack with his authority to interline at Dallas, Fort Worth, Oklahoma City, Kansas City, Memphis, Tenn., and St. Louis, Mo., for traffic to the State west of the territory applied for. SUPPORTING SHIPPERS: Troy Box & Pallet, Inc., P.O. Box 112, Troy, Ala. 36081; Sanders Lead Company, Inc., P.O. Box 161, Troy, Ala. 36081; and Southeast Red Metals Company, Inc., Henderson Road, Troy, Ala. 36081. SEND PROTESTS TO: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 814, 2121 Building, Birmingham, Ala. 35203.

No. MC 139163 (Sub-No. 1 TA), filed March 11, 1974. Applicant: ELECTRONIC RIGGERS OF FLORIDA, INC., 1701 Directors Row, Orlando, Fla. 32809. Applicant's representative: M. Craig Massey, 202 East Walnut Street, P.O. Drawer J, Lakeland, Fla. 33802. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Commodities* manufactured, used, sold, or dealt in by the Xerox Corporation between Atlanta, Ga., and its Commercial Zone, on the one hand, and, on the other, points in Florida, for 180 days. SUPPORTING SHIPPER: Xerox Corporation, 3636 McKinney Avenue, Dallas, Tex. 75204. SEND PROTESTS TO: District Supervisor G. H. Fauss, Jr., Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 W. Bay St., Jacksonville, Fla. 32202.

No. MC 139511 (Sub-No. 1 TA), filed March 5, 1974. Applicant: AIM CARTAGE & LEASING, INC., 2515 W. 25th Street, Chicago, Ill. 60608. Applicant's representative: Muriel B. Newman (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cellulose film foil, hot stamp foil, paint, machinery, and machine parts, and equipment, materials and supplies* used in the conduct of business of the Thermark Corporation, between plant and warehouse facilities of Thermark Corporation and its subsidiaries located at Schererville, Ind., and points in Indiana bounded on the east by U.S. Highway 35 and on the south by U.S. Highway 24, on the north by the shores of Lake Michigan and Illinois-Michigan State line, and on the west by the Illinois-Indiana State line, and points in Illinois bounded as follows, on the south by U.S. Highway 24, on the west by Illinois Highway 47, on the north by the Illinois-Wisconsin State line, and on the east by the shores of Lake Michigan, for the account of the Thermark Corp., Schererville, Ind., for 180 days. SUPPORTING SHIPPER: Thermark Corporation, 650 West 67th Place, Schererville, Ind. 46375. SEND PROTESTS TO: District Supervisor Richard K. Shullaw, Interstate Commerce Commission, Bureau of Operations, Everett McKinley Dirksen Building, 219 S. Dearborn Street, Room 1086, Chicago, Ill. 60604.

No. MC 139454 (Sub-No. 1 TA), filed March 4, 1974. Applicant: AGRI TRUCKING, INC., 910 South Dexter Street, Denver, Colo. 80222. Applicant's representative: Charles J. Kimball, 2310 Colorado State Bank Building, Denver, Colo. 80202. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Bloodmeal, bonemeal, meatmeal, and meat scraps*, (1) from Nampa, Idaho, to points in Arizona, Montana, Iowa, Minnesota, Kansas, and Nebraska; (2) from Greeley, Colo., to points in Utah, Nevada, Idaho, California, Washington, and Oregon; (3) from Clovis, Albuquerque, and Roswell, N. Mex., to points in Utah, Arizona, and Colorado; (4) from Hereford and Pampa, Tex., to points in Oklahoma, Kansas, Missouri, and Nebraska; and (5) from Memphis, Tenn., to points in Arkansas, Missouri, Oklahoma, and Texas, for 180 days. SUPPORTING SHIPPER: Wellens & Co., Inc., 6700 France Avenue South, Minneapolis, Minn. 55435. SEND PROTESTS TO: District Supervisor Herbert C. Ruoff, Interstate Commerce Commission, Bureau of Operations, 2022 Federal Building, Denver, Colo. 80202.

No. MC 139592 TA, filed March 12, 1974. Applicant: COSMOPOLITAN TOURS, INC., 315 Old National Building, Spokane, Wash. 99201. Applicant's representative: James L. Connell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in charter operations when in groups of 10 or less, in vehicles, to be operated by Hostess/Guide (bi-lingual on request) driver, between points in Washington, Oregon, Idaho, Montana, and Wyoming, for 180 days. SUPPORTING SHIPPERS: Expo '74, P.O. Box 1974, Spokane, Wash. 99210; Convention & Visitors Bureau of the Spokane Chamber of Commerce, P.O. Box 2147, Spokane, Wash. 99210; and Cosmopolitan Tours, Inc., 315 Old National Building, Spokane, Wash. 99201. SEND PROTESTS TO: L. D. Boone, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 6049 Federal Office Building, Seattle, Wash. 98104.

No. MC 139593 TA, filed March 11, 1974. Applicant: CLIFFORD T. GLENN, doing business as TOWN & COUNTRY EMPLOYMENT AGENCY, 1107 East Yandell Street, El Paso, Tex. 79902. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers* (industrial workers) restricted to two pieces of regular baggage per passenger in each vehicle, special and charter operations, restricted to a maximum of 17 passengers per vehicle (two drivers excluded), from El Paso, Tex., to St. James, Minn., Harrisonburg, Va., Temple, Pa., Glassboro, N.J., Mentone, Ind., Glyndon, Md., Shenandoah, Iowa, Siloam Springs, Ark., Spanish Fork, Utah, Sheridan, Wyo., and Missoula, Mont., for 180 days. SUPPORTING SHIPPERS: There are approximately 10 statements of support attached to the application, which may be examined here at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. SEND PROTESTS TO: Haskell E. Ballard, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Box H-4395, Herring Plaza, Amarillo, Tex. 79101.

No. MC 139594 TA, filed March 11, 1974. Applicant: WILLIAM E. HASHBARGER, P.O. Box 261, Jennings, Okla. 74038. Applicant's representative: T. M. Brown, 600 Leininger Building, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Livestock feed* (except in bulk) and *salt blocks*, from points in Kansas to points in Noble, Osage, Pawnee, Creek, and Payne Counties, Okla., for 180 days. SUPPORTING SHIPPERS: Richard McGuinn, Box 48, Hallett, Okla. 74034; Pat Kilpatrick, RR 2, Box 113B, Jennings, Okla.; Bert L. Harshbarger, Box 60, Hallett, Okla. 74034; Kent W. Walker, Box 106, Cleveland, Okla. 74020; Vic Bassett, Rt. 1, Box 210, Terlton, Okla.; and William H. Turner, Rt. #2, 1F, Jennings, Okla. SEND PROTESTS TO: C. L. Phillips, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 240, Old Post Office Building, 215 NW. Third, Oklahoma City, Okla. 73102.

No. MC 139600 (Sub-No. 1 TA), filed March 11, 1974. Applicant: LA CRESTA, INC., doing business as CALIFORNIA BULK EXPRESS, 12912 Camino Del Valle, Poway, Calif. 92064. Applicant's representative: Fred E. Caldwell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ore concentrates*, in bulk, or in bins, *sand*, in bulk, or in bags, and *stone, natural marble or granite* between points in Arizona, California, Nevada, and New Mexico, for 180 days. SUPPORTING SHIPPERS: La Cresta, Inc., P.O. Box 934, Tonopah, Nev. 89049; Crystal Silica Company, P.O. Box 1280, Oceanside, Calif. 92054; and Federal Resources Corporation, 1370 South 400 West, Salt Lake City, Utah 84115. SEND PROTESTS TO: District Supervisor Philip Yallowitz, Interstate Commerce Commission, Bureau of Operations, 300 N. Los Angeles Street, Room 7708, Los Angeles, Calif. 90012.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[No. AB-12 (Sub-No. 10)]

SOUTHERN PACIFIC TRANSPORTATION CO. AND ATCHISON, TOPEKA AND SANTA FE RAILWAY CO.

Abandonment Portion Oil City Branch Between Maitha and Oil City, in Kern County, Calif.

Upon consideration of the record in the above-entitled proceeding and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act

V 39 59 MAR 26 74 XUM

of 1969, (42 U.S.C. 4321 et seq.); and good cause appearing therefor:

It is ordered, That applicant be, and is hereby, directed to publish the appended notice in a newspaper of general circulation in Kern County, Calif., within 15 days of the date of service of this order, and certify to this Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 14th day of March, 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

The Interstate Commerce Commission hereby gives notice that by order dated March 14, 1974, it has been determined that the proposed abandonment of the line of the Southern Pacific Transportation Company and The Atchison, Topeka and Santa Fe Railway Company between mileposts 312.500 and 314.087 in Kern County, Calif., a distance of approximately 1.587 miles, if approved by the Commission, would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), (42 U.S.C. 4321, et seq.), and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that there has been no traffic over this line since January 1972 and the abandonment would be consistent with local land use plans. The determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request at the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C., 20423, on or before April 10, 1974.

[FR Doc.74-6934 Filed 3-25-74;8:45 am]

[AB-26 (Sub-No. 3)]

SOUTHERN RAILWAY CO.

Abandonment Between Barnwell and Furman, Allendale and Hampton Counties, S.C.

Upon consideration of the record in the above-entitled proceeding and of a staff-prepared threshold assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued in this proceeding, because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.); and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in newspapers of general circulation in Allendale and Hampton Counties, S. Car., within 15 days of the date of service of this order, and certify to this Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 14th day of March, 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

The Interstate Commerce Commission hereby gives notice that by order dated March 14, 1974, it has determined that the proposed abandonment in the above-entitled proceeding by the Southern Railway Company of a line of railroad between Barnwell and Furman, S. Car., if approved by the Commission, would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, et seq.), and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that traffic originating at or destined to points along the line is not substantial. Nearby alternative rail access is available and motor carrier service in the area is adequate. Potential economic development efforts will, therefore, not be seriously impaired. The determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public upon request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423, telephone 202-343-6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before April 10, 1974.

CONSUMER PRODUCT SAFETY COMMISSION

USE OF SAMPLING PLANS IN AND ENFORCEMENT OF MANDATORY SAFETY STANDARDS

Notice of Change of Date and Location of Public Hearing

In the FEDERAL REGISTER of March 5, 1974 (39 FR 8376), notice was given that CPSC would hold a public hearing on Wednesday, April 3, 1974, at 9:30 a.m. in the hearing room, 6th floor, CPSC, 1750 K Street NW., Washington, D.C., to obtain information and views concerning the use of sampling plans in mandatory safety standards issued by the Commission and in the enforcement of such mandatory safety standards.

Notice is given that the subject public hearing will be held instead on Thursday and Friday, April 4 and 5, 1974, at 10 a.m. in the General Services Administration Auditorium, 18th and F Streets NW., Washington, D.C.

Dated: March 21, 1974.

SADYE E. DUNN, *Secretary, Consumer Product Safety Commission.*

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Contents

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES
Notices
Agency Organization and Personnel Committee; meeting 11326

AGRICULTURAL MARKETING SERVICE
Rules and Regulations
Cotton Research and Promotion Act; miscellaneous and technical amendments to rules of practice 11253
Handling of peaches grown in Utah; termination of marketing order 11253
Proposed Rules
Milk in North Texas and certain other marketing areas; partial recommended decision and opportunity to file written exceptions on amendments to tentative marketing agreement and order 11275

AGRICULTURE DEPARTMENT
See Agricultural Marketing Service; Animal and Plant Health Inspection Service; Farmers Home Administration; Federal Crop Insurance Corporation; Food and Nutrition Service.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE
Rules and Regulations
Scables in cattle; release of areas quarantined 11254
Proposed Rules
Importation and inspection of containers for certain animals, poultry, and products; requirements for use of import quarantine facilities 11295

ATOMIC ENERGY COMMISSION
Notices
Advisory Committee on Reactor Safeguards; meeting 11328
Delmarva Power & Light Co. and Philadelphia Electric Co.; notice of prehearing conference 11326
LMFBR Base Program; determination regarding pending preparation of NEPA impact statement 11326
New York State Atomic Space and Development Authority; amendment of license 11329
Oklahoma State University; order terminating facility license 11328
Public Service Electric and Gas Co.; construction permits and facility licenses 11329

BONNEVILLE POWER ADMINISTRATION
Notices
Draft supplement to the fiscal year 1975 program statement; meeting 11315

CIVIL AERONAUTICS BOARD
Notices
Hearings, etc.:
American Airlines, Inc 11330
Laker Airways Ltd 11331
Southern Airways, Inc 11331

CIVIL SERVICE COMMISSION
Rules and Regulations
Excepted service; Administrative Office of the United States Courts 11247
Proposed Rules
Merit system of personnel administration; administration of standards 11304
Notices
Federal Employees Pay Council; meeting 11332
Grants and revocations of authority to make noncareer executive assignments:
Agriculture Department (2 documents) 11331
Army Department (2 documents) 11331
Health, Education and Welfare Department (2 documents) 11332
Housing and Urban Development Department (3 documents) 11332
Interior Department (3 documents) 11332
Justice Department (2 documents) 11332
Office of Economic Opportunity (2 documents) 11333
Veterans Administration 11333
President, Federal City College; listing of manpower shortage 11333

COAST GUARD
Rules and Regulations
Lifesaving equipment; safety features for handcranking power-driven winches 11273
Security zones; Hampton Roads, James River, Newport News, Va. 11258
Notices
International voyage load lines; implementation of 1973 Act 11325
Towing Industry Advisory Committee; meeting 11326

COMMERCE DEPARTMENT
See Domestic and International Business Administration; Maritime Administration; National Bureau of Standards; National Oceanic and Atmospheric Administration; National Technical Information Service.

CONSUMER PRODUCT SAFETY COMMISSION
Notices
Shock, fire, and other hazards from television receivers; public hearing; correction 11333

COST OF LIVING COUNCIL
Rules and Regulations
Phase IV price regulations:
Health care; corrections and supplemental amendments 11372
Reporting by retail firms 11274

DEFENSE DEPARTMENT
Notices
Defense Science Board; meeting 11315

DISEASE CONTROL CENTER
Notices
Safety and Occupational Health Study Session; meeting 11323

DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION
Notices
Computer Systems Technical Advisory Committee; meeting 11322
Electronic Instrumentation Technical Advisory Committee; meeting 11317

EDUCATION OFFICE
Notices
Drug abuse prevention and early intervention projects; closing date for receipt of applications 11324
Indian elementary and secondary school assistance; closing date for receipt of applications 11324
National Advisory Council on Education Professions Development; meeting 11325

ENVIRONMENTAL PROTECTION AGENCY
Rules and Regulations
Tolerances and exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities; acetic and propionic acids 11268
Proposed Rules
Certification of pesticide applicators; extension of comment period 11305
Shipments of pesticides for experimental use; issuance of permits 11306
Notices
Amchem Products, Inc.; extension of temporary tolerances 11333
BASF Wyandotte Corp.; extension of temporary tolerances 11333
Minnesota Air Quality Implementation Plan; cancellation of public hearing 11338
Motor vehicle exhaust emission retrofit devices; voluntary retrofit evaluation program 11334

FARMERS HOME ADMINISTRATION
Notices
South Carolina; designation of emergency areas 11317

(Continued on next page)

V 39 60 MAR 27 74 XUM

FEDERAL AVIATION ADMINISTRATION
Rules and Regulations
Restricted areas:
Change in using agency; correction 11258
Alteration 11258
Terminal control area at Cleveland, Ohio; designation 11256
VOR Federal airway; extension 11258
Proposed Rules
Civil aircraft fleet noise requirements 11302
Federal airways; alteration 11302
Operating control towers; operation at airports 11301

FEDERAL COMMUNICATIONS COMMISSION
Proposed Rules
Educational broadcasting; order extending time for filing reply comments 11309
Notices
National Industry Advisory Committee Aeronautical Communications Services Subcommittee, meeting 11340
Hearings, etc.:
Juniper Broadcasting, Inc. 11339
Windham Broadcasting Group and Nutmeg Broadcasting Co 11340

FEDERAL CROP INSURANCE CORPORATION
Notices
Canning and freezing peas, Idaho and Utah; extension of closing date for filing of applications for the 1974 crop year 11317

FEDERAL ENERGY OFFICE
Proposed Rules
Puerto Rico; further notice regarding price regulations and hearing 11314

FEDERAL HOME LOAN BANK BOARD
Proposed Rules
Federal Savings and Loan Insurance Corp.; loans in excess of 90 percent of value 11310

FEDERAL INSURANCE ADMINISTRATION
Rules and Regulations
National flood insurance program:
Areas eligible for sale of insurance; status of participating communities 11259
Identification of special hazard areas; list of communities 11259

FEDERAL POWER COMMISSION
Proposed Rules
National rates for future sales of natural gas; issuance of revised staff nationwide cost study and staff study of American Gas Association reserve additions 11310
Notices
Hearings, etc.:
Algonquin Gas Transmission Co. (2 documents) 11341
Arkansas Louisiana Gas Co 11342
Casade Natural Gas Corp 11342
Colorado Interstate Gas Co. and Colorado Oil and Gas Corp. 11342
Delmarva Power and Light Co. 11343
Distrigas Corp. et al 11343
Duke Power Co. (2 documents) 11343
Interstate Power Co 11343
Iowa Public Service Co 11344
LVO Corp 11344
Maine Yankee Atomic Power Co 11345
Niagara Mohawk Power Corp. 11345
Public Service Co. of Oklahoma 11345
Rumford Falls Power Co 11345
Jessie I. Smith 11346
Southern California Edison Co. 11346
Vanceburg, Kentucky, and Vanceburg Light, Heat and Power System 11346

FEDERAL RESERVE SYSTEM
Rules and Regulations
Bank holding companies; nonbanking activities (2 documents) 11254
Notices
First Jersey National Corp. 11348
Order approving formation of Bank Holding Co. and acquisition of certain assets:
Adair Corp 11347
Byers State Bankshares, Inc. 11347
Chemical Financial Corp 11348
McNee, Inc 11349

FOOD AND DRUG ADMINISTRATION
Proposed Rules
Biological products; revision of general safety test 11301
Diethylstilbestrol (DES) in edible tissues of cattle and sheep; revocation of test methods for determination of residue levels 11299
Labeling and misbranding of drugs; misleading proprietary or trade names 11298
Notices
Certain antihistaminic drugs used in allergy; drug efficacy study implementation; followup notice; reevaluation, correction 11323
Diesthylstilbestrol (DES) for use in cattle and sheep; notice to holders of new animal drug applications 11323
Vineland Chemical Co.; filing of petition for food additive 11324

FOOD AND NUTRITION SERVICE
Rules and Regulations
Availability of information to the public; transfer of Puerto Rico and Virgin Islands from Southeast to Northeast region 11253
General nutrition information; food stamp program 11252
National school lunch program; requirements for meals 11247
Realignment of regional boundaries:
Donation of foods for use in the U.S., territories, and possessions 11252
National school lunch program 11247
School breakfast and nonfood assistance programs and State administrative expenses 11251
Special food service program for children 11250
Special supplemental food program for women, infants, and children 11252
Proposed Rules
National School Lunch Program and Special Food Service Program for Children; requirements for meals 11296

GENERAL ACCOUNTING OFFICE
Rules and Regulations
Freight transportation services furnished to account of U.S.; acceptance and use of government bill of lading 11273
Notices
Revision of U.S. Government bill of lading and U.S. Government Transit Bill of Lading (GBL) 11349

GENERAL SERVICES ADMINISTRATION
Rules and Regulations
Procurement forms; new edition of standard forms 11268

HEALTH, EDUCATION, AND WELFARE DEPARTMENT
See also Disease Control Center; Education Office; Food and Drug Administration.
Notices
Office for Civil Rights; statement of organization, functions, and delegations of authority 11325

INTERIOR DEPARTMENT
See Bonneville Power Administration; Land Management Bureau.

INTERSTATE COMMERCE COMMISSION
Notices
Assignment of hearings 11363
Missouri Pacific Railroad Co.; exemption of the mandatory car service rules 11363
Motor carrier alternate route deviation notices 11363
Motor carrier applications and certain other proceedings 11364
Motor carrier board transfer proceedings 11368
Northeastern Railroad investigation; review of the Secretary of Transportation's rail service report; correction 11369
Reading Co.; order rerouting or diverting traffic 11369
Texas and Pacific Railway Co.; order to operate trains of National Railroad Passenger Corp. (AMTRAK) 11369

LAND MANAGEMENT BUREAU
Notices
Nevada; proposed withdrawal and reservation of lands 11315
New Mexico; Transwestern Pipeline Co. (3 documents) 11316
Prineville District Advisory Board; meeting 11316
Wyoming; application 11316

MANAGEMENT AND BUDGET OFFICE
Notices
Request for clearance of reports 11350

MARITIME ADMINISTRATION
Notices
List of free world and Polish flag vessels arriving in Cuba since January 1, 1963 11317

NATIONAL BUREAU OF STANDARDS
Notices
Commercial standards; intent to withdraw 11319

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES
Notices
Special Projects Advisory Panel; meeting 11350

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
Notices
Coronado Productions Inc.; final disposition of permit application 11319
Dr. Howard E. Winn; issuance of permit for marine mammals 11320
Lafayette Park Zoo and Saint Paul Como Zoo; receipt of applications for public display permits 11320
Thomas R. Loughlin; receipt of application for scientific research permit 11320

NATIONAL TECHNICAL INFORMATION SERVICE
Notices
Government-owned inventions; availability for licensing 11321

SECURITIES AND EXCHANGE COMMISSION
Proposed Rules
Certain joint transactions involving registered investment companies; exemption from application requirements of Rule 17d–1 11312
Notices
Hearings, etc.:
Braniff International Corp. (3 documents) 11350
Cincinnati Milacron Inc. 11351
GTI Corp. 11351
Metropolitan Edison Co. 11351
National Alfalfa Dehydrating and Milling Co. 11352
Thiokol Corp. (3 documents) 11352

SMALL BUSINESS ADMINISTRATION
Rules and Regulations
Small business size standards; energy crisis provisos for use in determining size of loan applicant adversely affected by shortage of energy or materials 11256
Notices
Assistant Regional Directors for Finance and Investment et al.; delegation of authority (2 documents) 11352
Texas; declaration of disaster loan area 11362

TARIFF COMMISSION
Notices
Conversion of TSUS into format of the Brussels Tariff nomenclature; tentative hearing schedule 11362

TRANSPORTATION DEPARTMENT
See Coast Guard; Federal Aviation Administration.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

DoT/NHTSA—Air brake systems; amendment of standard's effective date, brake actuation times, and road and dynamometer test as they apply to service brake systems and emergency stopping performance of most vehicle types 7966; 3–1–74

EPA—Establishment of a tolerance for combined residues of the insecticide chlordimeform 7929; 3–1–74

FCC—Establishment of private operational-fixed microwave radio service. 7805; 2–28–74

HEW/Education Office—Nationally recognized accrediting agencies and associations; criteria for recognition. 7946; 3–1–74

Treasury Department/Customs Service—Shipments of books; certain information on invoices 7799; 2–28–74

—Vessels in foreign and domestic trades; documents to be filed upon entry and clearance 7799; 2–28–74

Interior Department/National Park Service—Prohibition of pets on trails of Muir Woods National Monument, California 7942; 3–1–74

Justice Department—Anonymous testing by laboratories; modification of order form requirements 7800; 2–28–74

Transportation Department—Lamps, reflective devices, and associated equipment standards 3833; 1–30–74

CLC—Phase IV; price and health care forms 9768; 3–13–74; 9987; 3–15–74

APRIL 3

Department of Agriculture—ASSC proposed determination for 1974–75 Peanut Marketing Year 8165; 3–4–74

SSA—Proposed principles of reimbursement for provider costs and for services by hospital-based physicians under the Federal Health Insurance for the Aged and Disabled 8166; 3–4–74

EPA—Proposed revision of New York Implementation Plan 8175; 3–4–74

APRIL 4

Department of Agriculture—Proposed determinations on 1975 National Allotment for Wheat 8334; 3–5–74

FAA—Proposed rule to revoke west alternate to VOR Federal Airway 37 between Columbia, S.C. and Fort Mill, S.C. 8350; 3–5–74

FAA—Proposed designation of a 700 ft. transition area at Thibodaux, La. 8350; 3–5–74

EPA—Public hearing on California and Arizona compliance schedules. 8351; 3–5–74

APRIL 5

DoT/Coast Guard—Drawbridge operation regulations regarding Savannah River, Georgia 7948; 3–1–74

EPA—Navigable Water Quality Standards; Oregon 4486; 2–4–74

FCC—Antenna structures; high intensity lighting 6130; 2–19–74

USDA/APHIS—Meat products and poultry products; net weight labeling. 33308; 12–3–73

Department of Transportation—Coast Guard proposal concerning the operation of drawbridge at Savannah River, Ga 7948; 3–1–74

HEW—Office of Education proposed rule concerning Supplemental Educational Opportunity Grants Program 8624; 3–6–74

FAA—Proposed alteration of Rockland, Maine 700 ft. transition area 8631; 3–6–74

FAA—Proposed designation of restricted areas adjacent to Fort Polk, La. 8631; 3–6–74

Department of Labor—OSHA extends comment period on roll-over protective structures for agricultural tractors 8633; 3–6–74

ICC—Proposed revision to the uniform system of accounts for all modes of transportation regulated by the Commission 9204; 3–8–74

ICC—Proposed revision of the uniform system of accounts for all modes of transportation regulated by the Commission 9469; 3–11–74

ICC—Accounting for income taxes; interperiod tax allocation (deferred taxes) 9469; 3–11–74

APRIL 6

Justice Department/Immigration and Naturalization Service—U.S. Citizen Identification Cards; issuance procedures 8924; 3–7–74; 9544; 3–12–74

Weekly List of Public Laws

This is a listing of public bills enacted by Congress and approved by the President, together with the law number, the date of approval, and the U.S. Statutes citation. Subsequent lists will appear every Wednesday in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

H.J. Res. 905 Pub. Law 93–252
Extending the filing date of the 1974 Joint Economic Committee report
(March 16, 1974; 88 Stat. 49)

H.R. 8245 Pub. Law 93–253
Reorganization Plan No. 2 of 1973, amendments
(March 16, 1974; 88 Stat. 50)

Next Week's Hearings

APRIL 1

Commission on Revision of the Federal Court Appellate System—Creation of National division of U.S. Court of Appeals; to be held in Washington, D.C. 7983; 3–1–74

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Administrative Office of the United States Courts

Part 213 is amended to show that the position of Assistant Director, Office of the Director, is no longer excepted under Schedule C.

Effective on March 27, 1974, § 213.3372 is revoked.

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.74–6964 Filed 3–26–74; 8:45 am]

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

[Amdt. 17]

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

Realignment of Regional Boundaries

The regulations governing the National School Lunch Program (38 FR 17722) are amended to transfer Puerto Rico and the Virgin Islands are hereby transferred from the Southeast Region to the Northeast Region.

It is impracticable and unnecessary to follow the proposed rulemaking and public participation procedure because this is a technical amendment that is nonsubstantive in nature. Accordingly, the National School Lunch Program regulations are amended as follows:

In § 210.20, paragraphs (a) and (b) are revised to read as follows:

§ 210.20 Program information.

• • • • •

(a) In the States of Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, and West Virginia: Northeast Regional Office, FNS, U.S. Department of Agriculture, 729 Alexander Road, Princeton, New Jersey 08540.

(b) In the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, FNS, U.S. Department of Agriculture, 1100 Spring Street NW., Atlanta, Georgia 30309.

• • • • •

(Catalog of Federal Domestic Assistance Program No. 10.555 National Archives Reference Services)

Effective date. This amendment is effective March 11, 1974.

Dated: March 22, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

[FR Doc.74–7112 Filed 3–26–74; 8:45 am]

NATIONAL SCHOOL LUNCH PROGRAM; SCHOOL BREAKFAST AND NONFOOD ASSISTANCE PROGRAMS AND STATE ADMINISTRATIVE EXPENSES; SPECIAL FOOD SERVICE PROGRAM FOR CHILDREN

Requirements for Meals

On April 12, 1973, there was published in the FEDERAL REGISTER (38 FR 9234), a notice of proposed rulemaking to amend the regulations governing the operations of the National School Lunch Program (7 CFR Part 210), the School Breakfast Program (7 CFR Part 220), and the Special Food Service Program for Children (7 CFR Part 225) to authorize the use of alternate foods to be specified in an appendix "A" to each regulation. Three food items were proposed for use as alternates for food components specified in the respective meal requirements of these regulations. Responses to the proposed amendments and appendices were received from 110 individuals. The principal comments and the action taken on the proposed amendments and appendices are discussed below.

1. A few respondents expressed opposition to the regulation amendments that would authorize use of an appendix procedure as a means of proposing and approving new foods for use in the child nutrition programs. After studying these comments, it appears that these respondents objected to a particular food item proposed for approval, and that this opposition carried over to the entire concept of using an appendix procedure. Consequently, no change was made in the method of proposing and approving new foods.

2. The comments received contained substantial opposition to the use of the three food types proposed for approval. The Department, however, after considering all the comments, "for" and "against," and after weighing all the evidence at its disposal, has ruled in favor of optional use of these foods. One factor in this decision is that the use of these foods by school food authorities is strictly *optional*. No school food authorities are required to use these foods in their food service programs. Another factor is that by permitting use of these foods the Department will be assisting schools to maintain the nutritional quality of meals served, and at the same time will help schools keep meal prices down.

3. The comments on the different foods are discussed below. Paragraphs a, b, and c discuss those comments germane to more than one food type, and paragraphs d, e, and f discuss those comments germane to a specific food type:

a. Some respondents maintained that there was no nutritional need for "textured vegetable protein products" and "enriched macaroni with fortified protein" products in child nutrition programs. The Department does not believe that this contention represents a sufficient showing of cause for not approving the use of these products. Items fabricated in each group of products have been in use on a widespread basis. The "textured vegetable protein products" and the "enriched macaroni with fortified protein" products are each equal to or of greater nutritional value than the several meat alternate food items specified in the meal requirements of the regulations. By permitting the use of these new foods, the Department is expanding its efforts to offer schools flexibility in planning menus by crediting a variety of nutritious foods in meeting meal requirements.

b. A large number of respondents stated that the use of "enriched macaroni with fortified protein" and "formulated grain-fruit products" was incompatible with children's nutrition education. The Department is well aware of the need of nutrition education and consequently has requested each company which manufactures these products to distribute nutrition education materials relating to their product. This information will explain the difference between the fortified product and similar nonfortified products that may be commercially available. Additionally, the Department recommends that each school utilizing an alternate food include information on the product in that school's nutrition education program.

c. A number of respondents made the point that "textured vegetable protein products" and "enriched macaroni with fortified protein" products should be used as supplements to, and not substitutes for, meat components. It is not intended that either of these food items should be used as substitutes for one of the meat or meat alternate food components. If "textured vegetable protein products" or "enriched macaroni with fortified protein" products are used in a meal, they must be served in combination with meat, poultry, or fish. Addi-

V 39 60 MAR 27 74 XUM

tionally, "enriched macaroni with fortified protein" may be served with cheese. "Textured vegetable protein products" cannot exceed 30 percent of the uncooked meat used to fulfill the meat or meat alternate requirement. "Enriched macaroni with fortified protein" products cannot exceed 50 percent of the two-ounce meat or meat alternate requirement. A meal containing any such combination would, therefore, exceed in nutritional value a meal which had as its protein source only one-half cup of cooked dry beans or peas as is presently credited in the regulations.

d. Textured Vegetable Protein Products. Some respondents maintained that there had been no long-term testing results available on the use of these products. In addition, some respondents maintained that potential allergic reactions from these products could have an adverse effect on children. These products have been available to the general public through commercial markets for many years and there has been a large increase in their consumption during the past year. No demonstrable evidence exists that "textured vegetable protein products," when properly processed, are linked to allergic reactions. These fortified protein products have been used in schools since February, 1971, and no adverse effects resulting from their use have been reported. On the other hand, the Department is concerned about the potentiality of adverse effects caused by any products used in its programs. It is strongly recommended, therefore, that any school which plans to use "textured vegetable protein products" in meal preparation should inform parents that such products are being used.

e. Enriched Macaroni with Fortified Protein. The argument was advanced by some durum wheat producers and manufacturers of durum mararoni products that the Department's use of the term "macaroni" in the approved product was deceptive and harmful to that segment of the macaroni industry. The Department has no responsibility for establishing the Standard of Identity for "enriched macaroni products with fortified protein". In setting forth its appendix on "enriched macaroni products with fortified protein," the Department has used a standard identical to the Standard of Identity promulgated for such products by FDA in the Federal Register of September 13, 1972 (37 FR 18525).

f. Formulated Grain-Fruit Products. Many respondents maintained that due to its sugar content this product was basically a snack or dessert-type food that was not a suitable breakfast component for service to children participating in the School Breakfast Program. It is true that several "formulated grain-fruit products" bear some resemblance to a snack food or dessert. On the other hand, doughnuts and sweet rolls are generally considered basic components of breakfast.

Furthermore, the present breakfast program meal requirements (§ 220.8) permit the service of a sweet roll as part of a school breakfast. Certainly, the "formulated grain-fruit products," with additional nutrients and served with milk, are preferable from a nutritive standpoint to the same products without nutrient fortification.

A fear was expressed by some respondents that the "formulated grain-fruit products" would subject children to an excess of chemical vitamins and minerals that could be detrimental to their health. On the contrary, the Department has established guidelines that limit the amount of those vitamins that have been proven hazardous when consumed at high levels. Due to a variety of circumstances, including a lack of food preparation and serving facilities in schools, many American school children, particularly those of needy families, are deficient in the nutrients that one would gain from eating breakfast. Alternatives that might be used to alleviate this problem are: (1) Use of vitamin pills or capsules; (2) use of foods that naturally supply needed vitamins; or (3) use of our present foods fortified with nutrients. The Department deems the first alternative to be unacceptable. The second alternative is preferable and is emphasized in all practicable instances. However, where a real need exists for nutrients normally associated with breakfast, and a regularly prepared meal consisting of conventional foods is not possible, the "formulated grain-fruit products" when served with milk are a reasonable alternative meal which contains the necessary breakfast nutrients.

Some respondents questioned the need for the "formulated grain-fruit products" even in schools with very limited food service facilities. It should be noted that there is a clear legislative mandate to make a food service progam available to all the nation's school children. Use of the "formulated grain-fruit products" in combination with milk in schools without food service facilities has proved successful in its limited test usage over the past two years, because it represented a nutritious meal that could be served conveniently and required only limited preparation facilities. The Department has concluded that the "formulated grain-fruit products" fill a definite nutritional need particularly in schools which do not have adequate facilities to provide a conventional breakfast to children.

4. Several changes in the proposed appendices authorizing "enriched macaroni with fortified protein" and "formulated frain-fruit products" were made as a result of comments received, the major changes being revision of the "enriched macaroni with fortified protein" food component authorization so that the product must conform to the FDA standard of Identity for "enriched macaroni products with fortified protein," and an increase in the Vitamin A and calorie levels of the "formulated grain-fruit products" to take into account the change in the Child Nutrition Program regulations that allow schools to use fluid milks other than fluid whole milk.

5. In view of the comments received, substantial changes are being made to the proposed specifications for "textured vegetable protein products." Consequently, the Department will again seek comments under the proposed rulemaking procedure on the use of "textured vegetable protein products," now renamed "textured meat alternates." The new proposal will be issued shortly.

Accordingly, the National School Lunch Program, School Breakfast Program, and Special Food Service Program for Children program regulations are amended, as follows:

[Amdt. 16]

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

1. In § 210.10, the reference to "CND" in paragraph (g) is hereby deleted and reference to "FNS" is hereby substituted therefor, and the first sentence of paragraph (a)(1) is revised to read as follows:

§ 210.10 Requirements for lunches.

"(a)(1) Except as otherwise provided in this section, and in any appendix to this part, a Type A lunch shall contain, as a minimum, each of the following food components in the amounts indicated: * * *

* * * * *

2. An Appendix A is added to this part, to read as follows:

APPENDIX A; ALTERNATE FOODS FOR MEALS

ENRICHED MACARONI PRODUCTS WITH FORTIFIED PROTEIN

1. Schools may utilize the enriched macaroni products with fortified protein defined in paragraph 3 as a food component in meeting the meal requirements of this part under the following terms and conditions:

(a) One ounce of dry enriched macaroni products with fortified protein may be used to meet not more than one-half of the meat or meat alternate requirements specified in § 210.10 when served in combination with one or more ounces of cooked meat, poultry, fish, or cheese. The size of servings of the cooked combination may be adjusted for various age groups.

(b) Only enriched macaroni products with fortified protein that bear a label containing substantially the following legend shall be so utilized: "One ounce dry weight of this product meets one-half of the meat or meat alternate requirements of lunch or supper of the USDA child nutrition programs when served in combination with one or more ounces of cooked meat, poultry, fish, or cheese."

2. Only enriched macaroni products with fortified protein that have been accepted by the Food and Nutrition Service (FNS) for use in the USDA child nutrition programs may be labeled as provided in paragraph 1(b) above. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, protein efficiency ratio analysis, and such other pertinent data as may be requested by FNS. This information is to be forwarded to: Director, Nutrition and Technical Services Staff, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory.) All laboratories shall retain the "raw" laboratory data for a period of one year. Such information shall be made available to FNS upon request.

3. To be accepted by FNS, enriched macaroni products with fortified protein must conform to the following Standard of Identity, which is prescribed by the Food and Drug Administration in its regulations. The pertinent section (21 CFR 16.15) is as follows:

§ 16.15 Enriched macaroni products with fortified protein; indentity; label statement of ingredients.

(a)(1) Each of the foods for which a standard of identity is prescribed by this section is produced by drying formed units of dough made with one or more of the milled wheat ingredients designated in §§ 16.1(a) and 16.3(a),[1] and other ingredients to enable the finished food to meet the protein requirements set out in subparagraph (2)(i) of this paragraph. Edible protein sources, including food grade flours or meals made from nonwheat cereals or from oilseeds, may be used. Vitamin and mineral enrichment nutrients are added to bring the food into conformity with the requirements of paragraph (b) of this section. Safe and suitable ingredients, as provided for in paragraph (c) of this section, may be added. The proportion of the milled wheat ingredient is larger than the proportion of any other ingredient used.

(2) Each such finished food, when tested by the methods described in the cited sections of the book "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th editiou, 1970, meets the following specifications:

(i) The protein content (Nx6.25) is not less than 20 percent by weight (on a 13 percent moisture basis) as determined by the method in section 14.134. The protein quality is not less than 95 percent that of casein as determined on the cooked food by the method in sections 39.166 through 39.170 of the official methods.

(ii) The total solids content is not less than 87 percent by weight as determined by the method in section 14.125 of the official methods.

(b)(1) Each food covered by this section contains in each pound 5 milligrams of thiamin, 2.2 milligrams of riboflavin, 34 milligrams of niacin or niacinamide, and 16.5 milligrams of iron.

(2) Each pound of such food may also contain 625 milligrams of calcium.

(3) Iron and calcium may be added only in forms which are harmless and assimilable. The enrichment nutrients may be added in a enrichment nutrients may be added in a harmless carrier used only in a quantity necessary to effect a uniform distribution of the nutrients in the finished food. The requirements of subparagraphs (1) and (2) of this paragraph shall be deemed to have been met if reasonable overages, within the limits of good manufacturing practice, are present to assure that the prescribed levels of the vitamins and mineral(s) are maintained throughout the expected shelf life of the food under customary conditions of distribution.

(c) The safe and suitable ingredients referred to in paragraph (a) of this section are ingredients that serve a useful purpose, e.g., to fortify the protein or facilitate production of the food, but they do not include color additives, artificial flavorings, artificial sweeteners, chemical preservatives, or starches. Ingredients deemed suitable for use by this paragraph are added in amounts that are not in excess of those reasonably required to achieve their intended purposes. Ingredients are deemed to be safe if they are not food additives within the meaning of section 201(s) of the Federal Food, Drug, and Cosmetic Act, or in case they are food additives, if they are used in conformity with regulations established pursuant to section 409 of that Act.

(d)(1) The name of any food covered by this section is "Enriched Wheat ---------- Macaroni Product—with Fortified Protein," the blank being filled in with appropriate word(s) such as "Soy" to show the source of any flours or meals used that were made from non-wheat cereals or from oilseeds. In lieu of the words "Macaroni Product" the word "Macaroni," "Spaghetti," or "Vermicelli," as appropriate, may be used if the units conform in shape and size to the requirements of § 16.1(b), (c), or (d).[2]

(2) When any ingredient, not designated in the part of the name prescribed in subparagraph (1) of this paragraph, is added in such proportion as to contribute 10 percent or more of the quantity of protein contained in the finished food, the name shall include the statement "Made with ----------," the blank being filled in with the name of each such ingredient, e.g., "Made with nonfat milk."

(3) When, in conformity with subparagraph (1) or (2) of this paragraph, two or more ingredients are listed in the name, their designations shall be arranged in descending order of predominance by weight.

(4) In the case of a food made to comply with another section of this part, but which also meets the compositional requirements of this section, it may alternatively bear the name set out in that other section.

(e) The common name of each of the ingredients used shall be declared on the label as required by the applicable section of Part 1 of this chapter. Further, the declaration of ingredients as set forth in this paragraph, shall appear in letters not less than one-half the size of that required by § 1.8b of this chapter for the declaration of net quantity of contents, and in no case less than one-sixteenth of an inch in height.

The product should not be designed in such a manner that would require it to be classified as a Dietary Supplement as described by FDA in 21 CFR § 80.1. Any changes that are made in the Standard of Identity for enriched macaroni products with fortified protein (21 CFR § 16.15) will be accepted by FNS.

Note: The reporting and/or record keeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

(Catalog of Federal Domestic Assistance Program No. 10.555, National Archives Reference Services.)

[1] 21 CFR §§ 16.1(a) and 16.3(a) state in part that macaroni products are the class of food each of which is prepared by drying formed units of dough. (Footnote added by USDA.)

[2] 21 CFR §§ 16.1(b), 16.1(c), and 16.1(d) are as follows: § 16.1(b) Macaroni is the macaroni product the units of which are tube-shaped and more than 0.11 inch but not more than 0.2 inch in diameter. § 16.1(c) Spaghetti is the macaroni product the units of which are tube-shaped or cord-shaped (not tubular) and more than 0.06 inch but not more than 0.11 inch in diameter.

§ 16.1(d) Vermicelli is the macaroni product the units of which are cord-shaped (not tubular) and not more than 0.06 inch in diameter. (Footnote added by USDA.)

[Amdt. 18]

PART 220—SCHOOL BREAKFAST AND NONFOOD ASSISTANCE PROGRAMS AND STATE ADMINISTRATIVE EXPENSES

1. In § 220.8, the reference to "CND" in paragraph (f) is hereby deleted and reference to "FNS" is hereby substituted therefor, and the first sentence of paragraph (a) is revised to read as follows:

§ 220.8 Nutritional requirements for breakfasts.

(a) Except as otherwise provided in this section, and in any appendix to this part, a breakfast shall contain, as a minimum, the following food components in the amounts indicated: * * *

* * * * *

2. An Appendix A is added to this part. to read as follows:

APPENDIX A; ALTERNATE FOODS FOR MEALS

FORMULATED GRAIN-FRUIT PRODUCTS

1. Schools may utilize the formulated grain-fruit products defined in paragraph 3 as a food component in meeting the meal requirements of this part under the following terms and conditions:

(a) Formulated grain-fruit products may be used as an alternate to meet the bread/cereal and the fruit/juice requirements in the breakfast pattern specified in § 220.8.

(b) Only individually wrapped formulated grain-fruit products which bear a label conforming to the following legend shall be utilized: "This product conforms to USDA child nutrition program specifications. It meets the breakfast requirements when served with one-half pint of milk. It meets the supplemental food requirements when served with one-half cup of milk, juice, fruit, or vegetable." The product should not be designed in such a manner that would require it to be classified as a Dietary Supplement, as described by FDA in 21 CFR § 80.1.

2. Only formulated grain-fruit products that have been accepted by the Food and Nutrition Service (FNS) for use in the USDA child nutrition programs may be labeled as provided in paragraph 1(b) above. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, protein efficiency ratio analysis, and such other pertinent data as may be requested by FNS. This information shall be forwarded to: Director, Nutrition and Technical Services Staff, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory.) All laboratories shall retain the "raw" laboratory data for a period of one year. Such information shall be made available to FNS upon request.

3. To be accepted by FNS, products must have the following characteristics and meet the following nutritional specifications:

(a) Types—There are two types of products: one is a grain-type product and the other a grain-fruit type product.

(b) Ingredients—A grain-type product shall have grain as its primary ingredient. A grain-fruit type product shall have fruit as its primary ingredient. Both types of products must have at least 25 percent of their weight derived from grain. All ingredients and/or components shall comply with pertinent requirements or standards of the USDA and the Food, Drug, and Cosmetic Act, as amended, and any regulations issued thereunder.

V 39 160 MAR 27 74 XUM

(c) Nutritional specifications—Each serving of the product shall meet the minimum compositional requirements in the following table. The requirements as specified for those nutrients not limited by maximum values will be deemed to have been met if reasonable overages of the vitamins and minerals, within the limits of good manufacturing practice, are present to insure that the required levels are maintained throughout the expected shelf life under customary conditions of distribution and storage. An exception will be made for vitamins or minerals which occur naturally in an ingredient at such concentration that the level specified will be substantially exceeded in the final product. Such excess will be permitted but no label claim of nutritional advantage can be made for overages for any nutrients. Analytical methods employed should be according to the standard procedures defined in the Association of Official Analytical Chemists, 1970, "Official Methods of Analysis," 11th edition, Washington, D.C. or by appropriate analytical procedures FNS considers reliable.

Nutritional levels of grain-fruit products [1]

Nutrient	Unit	Minimum	Maximum
Weight	Ounce	2	4.0
PER	Casein=2.5	2.0	
Moisture	Percent weight		40.0
Fat [2]	do		22.0
Fiber	do		0.8
Protein (Nx6.25).	Gram	5.0	
Energy	Kilocalorie	250	
Vitamin A [3]	International unit.	1,115	1,675.0
Vitamin E	do	5	
Vitamin B12	Microgram	1.25	
Thiamin	Milligram	.26	
Riboflavin	do	.13	
Vitamin B6	do	.26	
Vitamin C	do	20	
Niacin	do	2.65	
Folacin	do	.04	
Iron [4]	do	4.4	
Calcium	do	120	
Phosphorus	do	120	
Magnesium	do	30	

[1] These specifications are based on a nutrient level for acceptable products plus ½ pint of fluid milk (as defined in § 220.2 of the regulations (7 CFR Part 220)) to provide at least 25 percent of the Recommended Dietary Allowances (RDA), 1968, for 10- to 12-year-old boys and girls for specified nutrients except magnesium and kilocalories. Magnesium and kilocalories—at least 13 percent of the RDA.

[2] Although the maximum fat in these specifications is 22 percent, consideration should be given to the development of formulated items containing less fat. Most medical authorities recommend keeping the dietary intake of fats at about ⅓ of the day's calories. At least 5 percent of the total calories shall be from linoleic acid.

[3] Vitamin A levels above the maximum of 1,675 I.U. will be allowed in products containing this nutrient as a natural food, and if the vitamin has not been added to the ingredients or foods.

[4] Recommended sources of iron are ferric ammonium citrate, ferrous fumarate, ferrous sulfates ($FeSO_4$ or $FeSO_4 \cdot 7H_2O$), ferrous gluconate, reduced iron, or other sources known to have a similar relative biological value.

NOTE.—The reporting and/or record keeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

(Catalog of Federal Domestic Assistance Program No. 10.553, National Archives Reference Services.)

[Amdt. 9]

PART 225—SPECIAL FOOD SERVICE PROGRAM FOR CHILDREN

1. In § 225.9, the reference to "CND" in paragraph (g) is hereby deleted and reference to "FNS" is hereby substituted therefor, and the first sentence of paragraph (b) is revised to read as follows:

§ 225.9 Requirements for meals.

• • • • •

(b) Except as otherwise provided in this section, and in any appendix to this part, each meal shall contain, as a minimum, the indicated food components: • • •

• • • • •

2. An Appendix A is added to this part, to read as follows:

APPENDIX A: ALTERNATE FOODS FOR MEALS

ENRICHED MACARONI PRODUCTS WITH FORTIFIED PROTEIN

1. Service institutions may utilize the enriched macaroni products with fortified protein defined in paragraph 3 as a food component in meeting the meal requirements of this part under the following terms and conditions:

(a) One ounce of dry enriched macaroni products with fortified protein may be used to meet not more than one-half of the meat or meat alternate requirements specified in § 225.9 when served in combination with one or more ounces of cooked meat, poultry, fish, or cheese. The size of servings of the cooked combination may be adjusted for various age groups.

(b) Only enriched macaroni products with fortified protein that bear a label containing substantially the following legend shall be so utilized: "One ounce dry weight of this product meets one-half of the meat or meat alternate requirements of lunch or supper of the USDA child nutrition programs when served in combination with one or more ounces of cooked meat, poultry, fish, or cheese."

2. Only enriched macaroni products with fortified protein that have been accepted by the Food and Nutrition Service (FNS) for use in the USDA child nutrition programs may be labeled as provided in paragraph 1(b) above. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, protein efficiency ratio analysis, and such other pertinent data as may be requested by FNS. This information is to be forwarded to: Director, Nutrition and Technical Services Staff, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory.) All laboratories shall retain the "raw" laboratory data for a period of one year. Such information shall be made available to FNS upon request.

3. To be accepted by FNS, enriched macaroni products with fortified protein must conform to the following Standard of Identity, which is prescribed by the Food and Drug Administration in its regulations. The pertinent section (21 CFR § 16.15) is as follows:

§ 16.15 Enriched macaroni products with fortified protein; identity; label statement of ingredients.

(a) (1) Each of the foods for which a standard of identity is prescribed by this section is produced by drying formed units of dough made with one or more of the milled wheat ingredients designated in §§ 16.1(a) and 16.3(a),[1] and other ingredients to enable the finished food to meet the protein requirements set out in subparagraph (2) (i) of this paragraph. Edible protein sources, including food grade flours or meals made from nonwheat cereals or from oilseeds, may be used. Vitamin and mineral enrichment nutrients are added to bring the food into conformity with the requirements of paragraph (b) of this section. Safe and suitable ingredients, as provided for in paragraph (c) of this section, may be added. The proportion of the milled wheat ingredient is larger than the proportion of any other ingredient used.

(2) Each such finished food, when tested by the methods described in the cited sections of the book "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th edition, 1970, meets the following specifications:

(i) The protein content (Nx6.25) is not less than 20 percent by weight (on a 13 percent moisture basis) as determined by the method in section 14.134. The protein quality is not less than 95 percent that of casein as determined on the cooked food by the method in sections 39.166 through 39.170 of the official methods.

(ii) The total solids content is not less than 87 percent by weight as determined by the method in section 14.125 of the official methods.

(b) (1) Each food covered by this section contains in each pound 5 milligrams of thiamin, 2.2 milligrams of riboflavin, 34 milligrams of niacin or niacinamide, and 16.5 milligrams of iron.

(2) Each pound of such food may also contain 625 milligrams of calcium.

(3) Iron and calcium may be added only in forms which are harmless and assimilable. The enrichment nutrients may be added in a harmless carrier used only in a quantity necessary to effect a uniform distribution of the nutrients in the finished food. The requirements of subparagraphs (1) and (2) of this paragraph shall be deemed to have been met if reasonable overages, within the limits of good manufacturing practice, are present to assure that the prescribed levels of the vitamins and mineral(s) are maintained throughout the expected shelf life of the food under customary conditions of distribution.

(c) The safe and suitable ingredients referred to in paragraph (a) of this section are ingredients that serve a useful purpose, e.g., to fortify the protein or facilitate production of the food, but they do not include color additives, artificial flavorings, artificial sweeteners, chemical preservatives, or starches. Ingredients deemed suitable for use by this paragraph are added in amounts that are not in excess of those reasonably required to achieve their intended purposes. Ingredients are deemed to be safe if they are not food additives within the meaning of section 201(s) of the Federal Food, Drug, and Cosmetic Act, or in case they are food additives, if they are used in conformity with regulations established pursuant to section 409 of that Act.

(d) (1) The name of any food covered by this section is "Enriched Wheat_____ Macaroni Product—with Fortified Protein," the blank being filled in with appropriate word(s) such as "Soy" to show the source of any flours or meals used that were made from non-wheat cereals or from oilseeds. In lieu of the words "Macaroni Product" the word "Macroni," "Spaghetti," or "Vermicelli," as appropriate, may be used if the units conform in shape and size to the requirements of § 16.1 (b), (c), or (d).[2]

[1] 21 CFR §§ 16.1(a) and 16.3(a) state in part that macaroni products are the class of food each of which is prepared by drying formed units of dough. (Footnote added by USDA.)

[2] 21 CFR 16.1(b), 16.1(c), and 16.1(d) are as follows: § 16.1(b) Macaroni is the macaroni product the units of which are tube-shaped and more than 0.11 inch but not more than 0.2 inch in diameter. § 16.1(c) Spaghetti is the macaroni product the units of which are tube-shaped or cord-shaped (not tubular) and more than 0.06 inch but not more than 0.11 inch in diameter.

§ 16.1(d) Vermicelli is the macaroni product the units of which are cord-shaped (not tubular) and not more than 0.06 inch in diameter. (Footnote added by USDA.)

(2) When any ingredient, not designated in the part of the name prescribed in subparagraph (1) of this paragraph, is added in such proportion as to contribute 10 percent or more of the quantity of protein contained in the finished food, the name shall include the statement "Made with_____," the blank being filled in with the name of each such ingredient, e.g., "Made with nonfat milk."

(3) When, in conformity with subparagraph (1) or (2) of this paragraph, two or more ingredients are listed in the name, their designations shall be arranged in descending order of predominance by weight.

(4) In the case of a food made to comply with another section of this part, but which also meets the compositional requirements of this section, it may alternatively bear the name set out in that other section.

(e) The common name of each of the ingredients used shall be declared on the label as required by the applicable section of Part 1 of this chapter. Further, the declaration of ingredients as set forth in this paragraph, shall appear in letters not less than one-half the size of that required by § 1.6b of this chapter for the declaration of net quantity of contents, and in no case less than one-sixteenth of an inch in height.

The product should not be designed in such a manner that would require it to be classified as a Dietary Supplement as described by FDA in 21 CFR § 80.1. Any changes that are made in the Standard of Identity for enriched macaroni products with fortified protein (21 CFR § 16.15) will be accepted by FNS.

FORMULATED GRAIN-FRUIT PRODUCTS

1. Service institutions may utilize the formulated grain-fruit products defined in paragraph 3 as a food component in meeting the meal requirements of this part under the following terms and conditions:

(a) Formulated grain-fruit products may be used as an alternate to meet the bread/cereal and the fruit/juice requirements in breakfast pattern specified in § 225.9. It will also meet the full requirement for bread and one-half the requirement for milk, juice, fruit, or vegetable in the supplemental food pattern specified in § 225.9.

(b) Only individually wrapped formulated grain-fruit products which bear a label conforming to the following legend shall be utilized: "This product conforms to USDA child nutrition program specifications. It meets the breakfast requirements when served with one-half pint of milk. It meets the supplemental food requirements when served with one-half cup of milk, juice, fruit, or vegetable." The product should not be designed in such a manner that would require it to be classified as a Dietary Supplement, as described by FDA in 21 CFR § 80.1.

2. Only formulated grain-fruit products that have been accepted by the Food and Nutrition Service (FNS) for use in the USDA child nutrition programs may be labeled as provided in paragraph 1(b) above. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, protein efficiency ratio analysis, and such other pertinent data as may be requested by FNS. This information shall be forwarded to: Director, Nutrition and Technical Services Staff, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory). All laboratories shall retain the "raw" laboratory data for a period of one year. Such information shall be made available to FNS upon request.

3. To be accepted by FNS, products must have the following characteristics and meet the following nutritional specifications:

(a) *Types.* There are two types of products: one is a grain-type product and the other a grain-fruit type product.

(b) *Ingredients.* A grain-type product shall have grain as its primary ingredient. A grain-fruit type product shall have fruit as its primary ingredient. Both types of products must have at least 25 percent of their weight derived from grain. All ingredients and/or components shall comply with pertinent requirements or standards of the USDA and the Food, Drug, and Cosmetic Act, as amended, and any regulations issued thereunder.

(c) *Nutritional specifications.* Each serving of the product shall meet the minimum compositional requirements in the following table. The requirements as specified for those nutrients not limited by maximum values will be deemed to have been met if reasonable overages of the vitamins and minerals, within the limits of good manufacturing practice, are present to insure that the required levels are maintained throughout the expected shelf life under customary conditions of distribution and storage. An exception will be made for vitamins or minerals which occur naturally in an ingredient at such concentration that the level specified will be substantially exceeded in the final product. Such excess will be permitted but no label claim of nutritional advantage can be made for overages for any nutrients. Analytical methods employed should be according to the standard procedures defined in the Association of Official Analytical Chemists, 1970, "Official Methods of Analysis," 11th edition, Washintgon, D.C. or by appropriate analytical procedures FNS considers reliable.

Nutritional levels of grain-fruit producers

Nutrient	Unit	Minimum	Maximum
Weight	Ounce	2	4.0
PER	Casein=2.5	2.0	
Moisture	Percent weight		40.0
Fat [1]	do		22.0
Fiber	do		.8
Protein (Nx6.25).	Gram	5.0	
Energy	Kilocalorie	250	
Vitamin A [2]	International unit.	1,115	1,675.0
Vitamin E	do	5	
Vitamin B12	Microgram	1.25	
Thiamin	Milligram	.26	
Riboflavin	do	.13	
Vitamin B6	do	.26	
Vitamin C	do	20	
Niacin	do	2.65	
Folacin	do	.04	
Iron [3]	do	4.4	
Calcium	do	120	
Phosphorus	do	120	
Magnesium	do	30	

[1] These specifications are based on a nutrient level for acceptable products plus ½ pint of fluid milk (as defined in § 220.2 of the regulations (7 CFR Part 220)) to provide at least 25 percent of the Recommended Dietary Allowances (RDA), 1968, for 10- to 12-year-old boys and girls for specified nutrients except magnesium and kilocalories. Magnesium and kilocalories—at least 13 percent of the RDA.

[2] Although the maximum fat in these specifications is 22 percent, consideration should be given to the development of formulated items containing less fat. Most medical authorities recommend keeping the dietary intake of fats at about ⅓ of the day's calories. At least 5 percent of the total calories shall be from linoleic acid.

[3] Vitamin A levels above the maximum of 1,675 I.U. will be allowed in products containing this nutrient as a natural food, and if the vitamin has not been added to the ingredients or foods.

[4] Recommended sources of iron are ferric ammonium citrate, ferrous fumarate, ferrous sulfates ($FeSO_4$ or $FeSO_4 \cdot 7H_2O$), ferrous gluconate, reduced iron, or other sources known to have a similar relative biological value.

NOTE.—The reporting and/or record keeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

PART 220—SCHOOL BREAKFAST AND NONFOOD ASSISTANCE PROGRAMS AND STATE ADMINISTRATIVE EXPENSES

Realignment of Regional Boundaries

Pursuant to Amendment 14 to the regulations governing the School Breakfast and Nonfood Assistance Programs and State Administrative Expenses (38 FR 17723), Puerto Rico and the Virgin Islands are hereby transferred from the Southeast Region to the Northeast Region.

It is impracticable and unnecessary to follow the proposed rule making and public participation procedure because this is a technical amendment that is nonsubstantive in nature. Accordingly, the School Breakfast and Nonfood Assistance Programs and State Administrative Expenses regulations are amended as follows:

In § 220.29, paragraphs (a) and (b) are revised to read as follows:

§ 220.9 Program information.

• • • • •

(a) In the States of Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, and West Virginia: Northeast Regional Office, FNS, U.S. Department of Agriculture, 729 Alexander Road, Princeton, New Jersey 08540.

(b) In the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, FNS, U.S. Department of Agriculture, 1100 Spring Street NW., Atlanta, Georgia 30309.

• • • • •

(Catalog of Federal Domestic Assistance Program No. 10.553 National Archives Reference Services)

Effective date. This amendment is effective March 11, 1974.

Dated: March 22, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

[Amdt. 10]

PART 225—SPECIAL FOOD SERVICE PROGRAM FOR CHILDREN

Realignment of Regional Boundaries

Pursuant to Amendment 6 to the regulations governing the Special Food

V 39 160 MAR 27 74 XUM

Service Program for Children (38 F.R. 17723), Puerto Rico and the Virgin Islands are hereby transferred from the Southeast Region to the Northeast Region.

It is impracticable and unnecessary to follow the proposed rule making and public participation procedure because this is a technical amendment that is nonsubstantive in nature. Accordingly, the Special Food Service Program for Children regulations are amended as follows:

In § 225.23, paragraphs (a) and (b) are revised to read as follows:

§ 225.23 Program information.

* * * * *

(a) In the States of Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, and West Virginia: Northeast Regional Office, FNS, U.S. Department of Agriculture, 729 Alexander Road, Princeton, New Jersey 08540.

(b) In the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, FNS, U.S. Department of Agriculture, 1100 Spring Street NW., Atlanta, Georgia, 30309.

* * * * *

(Catalog of Federal Domestic Assistance Program No. 10.552, National Archives Reference Services)

Effective date. This amendment is effective March 11, 1974.

[Amdt. 2]

PART 246—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN

Realignment of Regional Boundaries

The regulations governing the operation of the Special Supplemental Food Program for Women, Infants and Children (WIC Program) are amended to transfer Puerto Rico and the Virgin Islands from the Southeast Region to the Northeast Region and to show the current address of the FNS Regional Office for the Northeast Region.

This amendment is of an organizational nature and does not substantially affect the rights or obligations of any members of the public. Therefore, it is impracticable and unnecessary to follow the proposed rulemaking and public participation procedures. Accordingly, this amendment is made effective in less than 30 days following publication in the FEDERAL REGISTER.

In § 246.15, paragraph (b) (1) and (2) is revised as follows:

§ 246.15 Miscellaneous.

(b) * * *

(1) Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, West Virginia: U.S. Department of Agriculture, FNS, Northeast Region, 729 Alexander Road, Princeton, New Jersey 08540.

(2) Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee: U.S. Department of Agriculture, FNS, Southeast Region, 1100 Spring Street, N.W., Atlanta, Georgia 30309.

* * * * *

Effective date. This amendment shall become effective on March 11, 1974.

Signed at Washington, D.C., on March 22, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

[FR Doc.74-7115 Filed 3-26-74;8:45 am]

[Amdt. 25]

PART 250—DONATION OF FOODS FOR USE IN UNITED STATES, ITS TERRITORIES AND POSSESSIONS, AND AREAS UNDER ITS JURISDICTION

Realignment of Regional Boundaries

So that FNS regional boundaries will conform to the standard Federal Regional System, Puerto Rico and the Virgin Islands are, effective March 11, 1974, being transferred from the Southeast Region to the Northeast Region. Therefore, § 250.11 of this part is amended to show the current names and addresses of offices and the alignment of States, Territories, or Possessions as set out below.

This amendment is of an organizational nature and does not substantially affect the rights or obligations of any member of the public. Accordingly, it is found that notice and public procedure concerning this amendment are impracticable and unnecessary.

§ 250.11 Where to obtain information.

Interested persons desiring information concerning the program may make written request to the following Regional Offices:

Northeast Region, Food and Nutrition Service, USDA, 729 Alexander Road, Princeton, New Jersey 08540, for the following States and the District of Columbia: Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virgin Islands, Virginia, and West Virginia.

Southeast Region, Food and Nutrition Service, USDA, 1100 Spring Street N.W., Atlanta, Georgia 30309, for the following States: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

Midwest Region, Food and Nutrition Service, USDA, 536 South Clark Street, Chicago, Illinois 60605, for the following States: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, and Wisconsin.

West-Central Region, Food and Nutrition Service, USDA, 1100 Commerce Street, Room 5-D-22, Dallas, Texas 75202, for the following States: Arizona (Navajo Nation only), Arkansas, Colorado, Louisiana, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, and Wyoming.

Western Region, Food and Nutrition Service, USDA, 550 Kearny Street, Room 400, San Francisco, California 94108, for the following States, Territories, or Possessions: Alaska, American Samoa, Arizona (except the Navajo Nation), California, Guam Hawaii, Idaho, Nevada, Oregon, Trust Territory, and Washington.

This amendment shall become effective on March 11, 1974.

(Catalog of Federal Domestic Assistance Program No. 10.550, National Archives Reference Services.)

Dated: March 22, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

[Amdt. 25]

PART 270—GENERAL INFORMATION AND DEFINITIONS

Food Stamp Program

The purpose of this amendment to the regulations governing the Food Stamp program is to reflect the transfer of administrative responsibility for Puerto Rico and the Virgin Islands from the Southeast Regional Office to the Northeast Regional Office.

It is impracticable and unnecessary to follow the proposed rulemaking and public participation procedure because this is a technical amendment that is nonsubstantive in nature. Accordingly, the Food Stamp regulations are amended as follows:

In § 270.5(b), subparagraphs (1) and (2) are revised to read as follows:

§ 270.5 Miscellaneous provisions.

* * * * *

(b) * * *

(1) For project areas in Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands and West Virginia: Northeast Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 729 Alexander Road, Princeton, New Jersey 08540.

(2) For project areas in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 1100 Spring Street, N.W., Room 200, Atlanta, Georgia 30309.

* * * * *

(Catalog of Federal Domestic Assistance Program No. 10,551, National Archives Reference Services)

Effective date. This amendment shall become effective March 11, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

MARCH 22, 1974.

[FR Doc.74-7114 Filed 3-26-74;8:45 am]

[Amendment 4]

PART 295—AVAILABILITY OF INFORMATION TO THE PUBLIC

The purpose of this amendment to the regulations governing the Availability of Information to the Public is to reflect the transfer of Puerto Rico and Virgin Islands from the Southeast Region to the Northeast Region. Such realignment conforms to the standard Federal regional system.

It is impracticable and unnecessary to follow the proposed rule making and public participation procedure because this is a technical amendment that is nonsubstantive in nature. Pursuant to Title 5, United States Code, section 552 (a) (2), 552(a) (3) and 552(b), paragraph (b), of § 295.10 is revised to read as follows for the Northeast Region and Southeast Region only:

§ 295.10 Addresses of offices.

* * * * *

(b) Requests made to Regional Offices should be addressed to the Regional Administrator of the appropriate Office, as follows:

Northeast Region, Food and Nutrition Service, USDA, 729 Alexander Road, Princeton, NJ 08540, for the following States and the District of Columbia: Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, and West Virginia.

Southeast Region, Food and Nutrition Service, USDA, 1100 Spring Street, NW, Room 200, Atlanta, GA 30309, for the following States: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

The remainder of the paragraph remains the same.

Effective date. This amendment shall become effective March 11, 1974.

Dated: March 20, 1974.

EDWARD J. HEKMAN,
Administrator.

[FR Doc.74-7109 Filed 3-26-74;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 920—HANDLING OF PEACHES GROWN IN UTAH

Termination of Marketing Agreement

This document terminates Marketing Agreement No. 91 and Order No. 920 (7 CFR Part 920) regulating the handling of peaches grown in Utah, hereinafter referred to as "order", effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Notice of rulemaking with respect to termination of said order was published in the January 21, 1974, FEDERAL REGISTER (39 FR 2368). The notice provided that all written data, views, or arguments in connection with the proposed termination be submitted by February 28, 1974. Views were filed by Wayman Fruit Farms, Payson, Utah, favoring the termination of Order No. 920 and none was submitted in favor of its continuance.

STATEMENT OF CONSIDERATION

The program has been inactive for a number of years. The Administrative Committee was last appointed in 1958 for the term beginning May 1, 1958. Regulations were last effective during the 1957 season. Considerable change has taken place within the Utah peach industry in the past 17 years. There has been a shift in importance among growing areas in the State, accompanied by a substantial reduction in production and in the numbers of growers and handlers. These developments have reduced the need for an order, and there is no producer interest in reactivating the order.

The Administrative Committee's assets consist of approximately $1,500 in unexpended assessment funds and interest. The excess assessment funds accrued during the years 1951–54. A total of 546 handlers have equity in the funds. The address of many handlers is not known, the amounts due handlers are small, and in many instances the amount due individual handlers is less than the cost of making a refund. Waivers were secured for individual handler equities of $10 or more from those handlers who could be contacted. Inasmuch as it would be impracticable to try to refund the money pro rata to the handlers, the entire sum should be allocated to the Utah State University of Agriculture and Applied Science, Logan, Utah 84321 for research on peaches.

FINDINGS AND ORDER

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the views expressed by Wayman Fruit Farms, and pursuant to section 8c(16)(A) of the act (7 U.S.C. 608c(16)(A)), it is hereby found that the marketing agreement and order no longer tend to effectuate the declared policy of the act and should be terminated and that postponing the effective date beyond that hereinafter specified is impracticable, unnecessary and contrary to the public interest, and good cause exists for making this termination effective on the date hereinafter set forth. It is also found that the appointment of committee members and alternates should be terminated and the above-indicated funds should be distributed to the Utah State University of Agriculture and Applied Science.

It is therefore, ordered, That (1) Marketing Agreement No. 91 and Order No. 920 (7 CFR Part 920) are hereby terminated, (2) the appointment of Administrative Committee members and alternates is hereby terminated, and said committee members and alternates are hereby discharged and relieved of all further responsibility, and (3) the Administrative Committee's assets consisting of approximately $1,500 in unexpended assessment funds and interest are hereby directed to be disbursed to the Utah State University of Agriculture and Applied Science, Logan, Utah 84321 for research on peaches.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Dated March 22, 1974, to become effective March 29, 1974.

JOHN DAMGARD,
Deputy Assistant Secretary.

[FR Doc.74–7107 Filed 3–26–74;8:45 am]

CHAPTER XI—AGRICULTURAL MARKETING SERVICE; DEPARTMENT OF AGRICULTURE

PART 1205—COTTON RESEARCH AND PROMOTION

Miscellaneous and Technical Amendments

On August 19, 1972, the Civil Service Commission published in the FEDERAL REGISTER (37 FR 16787) a rule changing the title of hearing examiner, as used in 5 CFR Part 930, Subpart B, to administrative law judge. By designation to the Office of Administrative Law Judges dated December 20, 1972 (37 FR 28475), as amended April 27, 1973 (38 FR 10795), the Secretary of Agriculture has provided for the issuance by the administrative law judges of initial decisions in adjudication proceedings subject to sections 556 and 557 of Title 5, United States Code, such decisions to become final without further proceedings unless there is an appeal to the Secretary by a party to the proceeding in accordance with applicable rules of practice: *Provided, however,* That no decision shall be final for purposes of judicial review except a final decision of the Secretary upon appeal. To incorporate these and other technical changes in the Rules of Practice (7 CFR 1205.1–52) under the Cotton Research and Promotion Act (80 Stat. 280 *et seq.*), and pursuant to the authority contained in sections 12(a) and 15, 80 Stat. 284–285, 7 U.S.C. 211(a) and 2114, said Rules of Practices are hereby amended as follows:

Subpart—Rules of Practice and Procedure Governing Proceedings To Formulate Orders Under the Cotton Research and Promotion Act

I. Amend § 1205.2 as follows:

Subparagraph (d) is revised to read as follows:

(d) The term "administrative law judge" or "judge" means any administrative law judge appointed pursuant to 5 U.S.C. 3105, and assigned to the proceeding involved.

Subparagraph (k) is deleted.

II. Amend § 1205.4, § 1205.6, § 1205.7, § 1205.8, § 1205.9, § 1205.10, § 1205.16, and § 1205.19 as follows: Wherever the terms "examiner" or "presiding officer" (or the plural or possessive thereof) appear, the term "judge" (or plural or possessive thereof) is substituted.

III. Amend § 1205.16(d) as follows:

(d) *Computation of time.* Saturdays, Sundays, and Federal holidays shall be included in computing the time allowed for the filing of any document or paper: *Provided,* That, when such time expires

V 39 160 MAR 27 74 XUM

on a Saturday, Sunday or legal holiday, such period shall be extended to include the next following business day.

Subpart—Rules of Practice Governing Proceedings on Petitions To Modify To Be Exempted From Orders

I. Amend § 1205.51 as follows:

Subparagraph (d) is revised, subparagraph (m) is revoked and reserved, and subparagraph (n) is revised.

(d) The term "administrative law judge" or "judge" means any administrative law judge appointed pursuant to 5 U.S.C. 3105, and assigned to the proceeding involved;

(m) (reserved);

(n) The term "decision" means the judge's initial decision in proceedings subject to 5 U.S.C. 556 and 557, and includes the judge's (1) findings of fact and conclusions with respect to all material issues of fact, law or basis thereof, (2) order, (3) rulings on findings, conclusions and order submitted by the parties;

Effective date. The foregoing amendments and revisions shall become effective March 26, 1974.

(Section 12(a) and 15, 80 Stat. 284–285 (7 U.S.C. 2111(a) and 2114))

Done at Washington, D.C., this 21st day of March 1974.

JOHN C. BLUM,
Deputy Administrator, Regulatory Programs.

[FR Doc.74–7028 Filed 3–26–74;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

PART 73—SCABIES IN CATTLE

Release of Areas Quarantined

This amendment releases a portion of Lamb, portions of Parmer, a portion of Hockley, a portion of Lubbock, and a portion of Hansford Counties in Texas from the areas quarantined because of cattle scabies. Therefore, the restrictions pertaining to the interstate movement of cattle from quarantined areas contained in 9 CFR Part 73, as amended, will not apply to the excluded areas, but the restrictions pertaining to the interstate movement of cattle from nonquarantined areas contained in said Part 73 will apply to the excluded areas. No areas in Texas remain under quarantine.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies is hereby amended as follows:

In § 73.1a, paragraph (a) relating to the State of Texas is deleted.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111–113, 115, 117, 120, 121, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

Effective date. The foregoing amendment shall become effective on March 22, 1974.

The amendment relieves restrictions no longer deemed necessary to prevent the spread of cattle scabies and should be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 22d day of March 1974.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc.74–7105 Filed 3–26–74;8:45 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS

[Reg. Y]

PART 225—BANK HOLDING COMPANIES

Nonbanking Activities

By notice of proposed rulemaking published in the FEDERAL REGISTER on December 13, 1972 (37 FR 26534), the Board of Governors proposed to amend § 225.4(a)(6) of Regulation Y to permit bank holding companies to engage in both real and personal property leasing, subject to substantially the same conditions, as an activity closely related to banking or managing or controlling banks under section 4(c)(8) of the Bank Holding Company Act. After considering the comments on such proposal, the Board published a revised proposal for comment and ordered that a public hearing be held on such revised proposal on September 12, 1973. Notice of the revised proposal and the hearing was published in the FEDERAL REGISTER on Wednesday, August 8, 1973 (38 FR 21436). A public hearing was conducted on September 12, 1973, before available members of the Board.

The Board has considered all of the material submitted on the December 13, 1972 proposal, the August 8, 1973 proposal, the record of the September 12, 1973 hearing, and all material submitted subsequent to the hearing that was received by by the Board through October 3, 1973. After considering all relevant aspects of the proposal to amend § 225.4(a)(6) to include both real and personal property leasing among the activities determined to be closely related to banking, the Board has determined to amend § 225.4(a)(6) to permit the leasing of both real and personal property. The Board has determined that separate regulations for real and personal property leasing would allow greater flexibility for innovation and the evolution of bank holding company leasing transactions. Accordingly, the Board is adopting separate regulations with substantially the same provisions which contain certain modifications from the proposal as published for comment.

The modifications with respect to personal property leasing are: the limitation on estimated residual value in computing full-payout recovery has been changed from 10 percent of the acquisition cost of the property to the lessor to 20 percent; and a new provision has been added which permits inclusion in the full-payout recovery formula, in leases of 7 years or less, such additional amount, not exceeding 60 percent of the acquisition cost of the property, as may be be provided by an unconditional guarantee by a lessee, independent third party or manufacturer which has been determined by the lessor to have the financial resources to meet such obligation.

The text of the amendment to § 225.4(a)(6) which supersedes existing § 225.4(a)(6) and 12 CFR 225.123 reads as follows:

§ 225.4 Nonbanking activities.

(a) • • •

(6) (i) Leasing personal property or acting as agent, broker or adviser in leasing such property provided:

(*a*) the lease is to serve as the functional equivalent of an extension of credit to the lessee of the property;

(*b*) the property to be leased is acquired specifically for the leasing transaction under consideration or was acquired specifically for an earlier leasing transaction;

(*c*) the lease is on a nonoperating basis;

(*d*) at the inception of the initial lease the effect of the transaction (and, with respect to governmental entities only, reasonably anticipated future transaction[4]) will yield a return that will compensate the lessor for not less than the lessor's full investment in the property plus the estimated total cost of financing the property over the term of the lease,[5] from: (*1*) Rentals; (2) estimated tax benefits (investment tax credit, net economic gain from tax deferral from accelerated depreciation, and other tax benefits with a substantially similar effect); (3) the estimated residual value of the property at the expiration of the initial term of the lease, which in no case shall exceed 20 percent of the acquisition cost of the property to the lessor; and (*4*) in the case of a lease of not more than 7 years in duration, such additional amount, which shall not exceed 60 percent of the acquisition cost of the property, as may be provided by an unconditional guarantee by a lessee, independent third party or manufacturer, which has been determined by the lessor to have the financial resources to meet such obligation, that will assure the lessor of recovery of its investment and cost of financing;

(*e*) the maximum lease term during which the lessor must recover the lessor's full investment in the property plus the estimated total cost of financing the property shall be 40 years; and

(*f*) at the expiration of the lease (including any renewals or extensions with the same lessee), all interest in the property shall be either liquidated or released on a nonoperating basis as soon as practicable but in no event later than two years from the expiration of the lease,[6] however, in no case shall the lessor retain any interest in the property beyond 50 years after its acquisition of the property.

• • • • •

As an incident to this amendment the footnotes in § 225.4(a) which are denoted by asterisks and numbers are hereby redesignated as follows for clarity and ease of reference: the footnote in § 225.4(a)(1) designated as * to footnote 1; footnotes 1 and 2 in § 225.4(a)(5) to footnotes 2 and 3; footnote 3 in § 225.4(a)(10) to footnote 7; footnote 3a in § 225.4(a)(11) to footnote 8; the footnotes in § 225.4(a)(12) designated as * and ** to footnotes 9 and 10; footnote 1 in § 225.4(b)(1) to footnote 11; and footnote 2 in § 225.4(d) to footnote 12.

Effective date: April 17, 1974.

By order of the Board of Governors, March 18, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74–7017 Filed 3–26–74;8:45 am]

[4] The Board understands that some Federal, State and local governmental entities may not enter into a lease for a period in excess of one year. Such an impediment does not prohibit a company authorized under § 225.4(a) from entering into a lease with such governmental entities if the company reasonably anticipates that such governmental entities will renew the lease annually until such time as the company is fully compensated for its investment in the leased property plus its costs of financing the property. Further a company authorized under § 225.4(a)(6) may also engage in so-called "bridge" lease financing of personal property, but not real property, where the lease is short term pending completion of long term financing, by the same or another lender.

[5] The estimate by the lessor of the total cost of financing the property over the term of the lease should reflect, among other factors, the term of the lease, the modes of financing available to the lessor, the credit rating of the lessor and/or the lessee, if a factor in the financing, and prevailing rates in the money and capital markets.

[6] In the event of a default on a lease agreement prior to the expiration of the lease term, the lessor shall either re-lease such property, subject to all the conditions of this subsection 6(a), or liquidate such property as soon as practicable but in no event later than two years from the date of default on a lease agreement.

[Reg. Y]

PART 225—BANK HOLDING COMPANIES

Nonbanking Activities

By notice of proposed rulemaking published in the FEDERAL REGISTER on December 13, 1972 (37 FR 26534), the Board of Governors proposed to amend § 225.4(a)(6) of Regulation Y to permit bank holding companies to engage in both real and personal property leasing, subject to substantially the same conditions, as an activity closely related to banking or managing or controlling banks under section 4(c)(8) of the Bank Holding Company Act. After considering the comments on such proposal, the Board published a revised proposal for comment and ordered that a public hearing be held on such revised proposal on September 12, 1973. Notice of the revised proposal and the hearing was published in the FEDERAL REGISTER on Wednesday, August 8, 1973 (38 FR 21436). A public hearing was conducted on September 12, 1973, before available members of the Board.

The Board has considered all of the material submitted on the December 13, 1972 proposal, the August 8, 1973 proposal, the record of the September 12, 1973 hearing, and all material submitted subsequent to the hearing that was received by the Board through October 3, 1973. After considering all relevant aspects of the proposal to amend § 225.4(a)(6) to include both real and personal property leasing among the activities determined to be closely related to banking, the Board has determined to amend § 225.4(a)(6) to permit the leasing of both real and personal property. The Board has determined that separate regulations for real and personal property leasing would allow greater flexibility for innovation and the evolution of bank holding company leasing transactions. Accordingly, the Board is adopting separate regulations with substantially the same provisions which contain certain modifications from the proposal as published for comment.

The modification with respect to real property leasing is that the limitation on the estimated residual value in computing full-payout recovery has been changed from 10 percent of the acquisition cost of the property to 20 percent.

The text of the amendment to § 225.4(a)(6) which supersedes existing § 225.4(a)(6) and 12 CFR 225.123 reads as follows:

§ 225.4 Nonbanking activities.

(a) • • •

(6) • • •

(ii) Leasing real property or acting as agent, broker or adviser in leasing such property provided:

(*a*) the lease is to serve as the functional equivalent of an extension of credit to the lessee of the property;

(*b*) the property to be leased is acquired specifically for the leasing transaction under consideration or was acquired specifically for an earlier leasing transaction;

(*c*) the lease is on a nonoperating basis;

(*d*) at the inception of the initial lease the effect of the transaction (and, with respect to governmental entities only, reasonably anticipated future transactions[4]) will yield a return that will compensate the lessor for not less than the lessor's full investment in the property plus the estimated total cost of financing the property over the term of the lease,[5] from: (*1*) Rentals; (2) estimated tax benefits (investment tax credit, net economic gain from tax deferral from accelerated depreciation, and other tax benefits with a substantially similar effect); and (3) the estimated residual value of the property at the expiration of the initial term of the lease, which in no case shall exceed 20 percent of the acquisition cost of the property to the lessor.

(*e*) the maximum lease term during which the lessor must recover the lessor's full investment in the property plus the estimated total cost of financing the property shall be 40 years; and

(*f*) at the expiration of the lease (including any renewals or extensions with the same lessee), all interest in the property shall be either liquidated or released on a nonoperating basis as soon as practicable but in no event later than two years from the expiration of the lease,[6] however, in no case shall the lessor retain any interest in the property beyond 50 years after its acquisition of the property.

• • • • •

Effective date: April 17, 1974.

[4] The Board understands that some Federal, State and local governmental entities may not enter into a lease for a period in excess of one year. Such an impediment does not prohibit a company authorized under § 225.4(a) from entering into a lease with such governmental entities if the company reasonably anticipates that such governmental entities will renew the lease annually until such time as the company is fully compensated for its investment in the leased property plus its costs of financing the property. Further, a company authorized under § 225.4(a)(6) may also engage in so-called "bridge" lease financing of personal property, but not real property, where the lease is short term pending completion of long term financing, by the same or another lender.

[5] The estimate by the lessor of the total cost of financing the property over the term of the lease should reflect, among other factors, the term of the lease, the modes of financing available to the lessor, the credit rating of the lessor and/or the lessee, if a factor in the financing, and prevailing rates in the money and capital markets.

[6] In the event of a default on a lease agreement prior to the expiration of the lease term, the lessor shall either re-lease such property, subject to all the conditions of this subsection 6(b), or liquidate such property as soon as practicable but in no event later than two years from the date of default on a lease agreement.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 12, Amdt. 10]

PART 121—SMALL BUSINESS SIZE STANDARDS REGULATION

Energy Crisis Provisos for Use in Determining Size of Loan Applicant Adversely Affected by the Shortage of Energy or Materials

This amendment provides a special procedure for determining the "annual receipts" or "number of employees" of a concern for the purpose of qualifying for financial assistance under Small Business Administration programs in cases where such concern's business has suddenly and significantly decreased due to the shortage of energy or materials.

It has come to our attention that there are concerns that have suffered severe financial reverses due to loss of business caused by the energy and material shortage crises, but which are ineligible to receive financial assistance because their total annual receipts *during their most recently completed fiscal year*, or average number of employees *during the preceding four calendar quarters*, exceeded the applicable size standard. For example, a retail dealership in recreational vehicles or boats can qualify as small for the purpose of an SBA loan if its gross annual receipts *for its most recently completed fiscal year* do not exceed $1 million. If, during its most recently preceding fiscal year, a dealership had annual receipts exceeding $1 million, it would not qualify as small even though, as a result of the gasoline shortage, its average monthly receipts clearly indicate that its current year's receipts will be well within the $1 million standard. Similar situations occur where a concern's size is determined by its average employment during the preceding four calendar quarters, but where it has had to lay off a substantial number of employees due to the energy crisis or because of the shortage of materials.

In view of the above, it is deemed appropriate to amend the definition of the term "annual receipts" in § 121.3-2(b) of the size standards regulation to provide that if, for the purpose of receiving financial assistance, it is determined that (1) an applicant has completed at least 3 months of its current fiscal year, (2) its gross receipts during the completed months of its *current* fiscal year are at least 25 percent lower than its receipts during the corresponding months of its most recently completed fiscal year, and (3) the reduction in receipts was primarily due to the shortage of energy or materials, its "annual receipts" for size determination purposes would be determined by reducing the concern's annual receipts for its most recently completed fiscal year by the determined percentile.

EXAMPLE: Applicant's fiscal year ends December 31, 1973. Its annual receipts for such fiscal year were $1,200,000, which exceeds the applicable size standard. However, its total receipts for January, February, and March 1974 were only $150,000 as compared with $300,000 for January, February, and March 1973, a 50 percent reduction in receipts. This change would trigger the alternative method of computing the concern's "annual receipts" with the following result: The concern's annual receipts for its most recently completed fiscal year ($1.2 million) would be reduced by 50 percent. Thus, its "annual receipts" for the purpose of qualifying for financial assistance would be $600,000.

It is also deemed appropriate to amend the definition of the term "number of employees" in § 121.3-2(t) to provide that, if it is determined that a concern's employment in its most recent calendar quarter is at least 25 percent lower than its employment for the corresponding quarter in the preceding calendar year and such reduction in employment was primarily due to the shortage of energy or materials, its "number of employees" for size determination purposes would be determined by reducing its average employment for the preceding four calendar quarters by the determined percentile.

EXAMPLE: Applicant's employment for several months has averaged 600 persons, which exceeds the applicable 500 employment standard. However, its employment for the most recent quarter is only 300 persons, a reduction of 50 percent from its employment during the same quarter of the preceding year. This being more than 25 percent, the alternative method of computation is triggered with the following result: The concern's average employment for its preceding four quarters would be reduced by 50 percent. Thus, its "number of employees" for the purpose of qualifying for financial assistance would be 300 persons.

Accordingly, Part 121 of Chapter I of Title 13 of the Code of Federal Regulations is hereby amended by revising the first sentences of § 121.3-2 (b) and (t) to read as follows:

§ 121.3-2 Definition of terms used in this part.

* * * * *

(b) "Annual receipts" means the gross income (less returns and allowances, sales of fixed assets, and interaffiliate transactions) of a concern (and its domestic and foreign affiliates) from sales of products and services, interest, rents, fees, commissions, and/or from whatever other source derived, as entered on its regular books of account for its most recently completed fiscal year (whether on a cash, accrual, completed contracts, percentage of completion, or other acceptable accounting basis) and, in the case of a concern subject to U.S. Federal income taxation, reported or to be reported to the U.S. Treasury Department, Internal Revenue Service, for Federal income tax purposes *provided however*, if, for the purpose of receiving financial assistance under a Small Business Administration program, it is determined that (1) the applicant has completed at least 3 months of its current fiscal year, (2) its gross receipts for the completed months of its current fiscal year are at least 25 percent lower than its receipts during the corresponding months of its most recently completed fiscal year, and (3) the reduction in receipts was primarily due to the shortage of energy or materials, its "annual receipts" for size determination purposes shall be computed by reducing its annual receipts for its most recently completed fiscal year by the determined percentile. * * *

* * * * *

(t) "Number of employees" means the average employment of any concern, including the employees of its domestic and foreign affiliates, based on the number of persons employed on a full-time, part-time, temporary, or other basis during the pay period ending nearest the last day of the third month in each calendar quarter for the preceding four quarters: *Provided however*, If, for the purpose of determining a concern's eligibility for financial assistance under a Small Business Administration program, it is determined that a concern's employment in its most recently completed calendar quarter is at least 25 percent lower than its employment in the corresponding quarter in the preceding calendar year and that such reduction in employment was primarily due to the shortage of energy or materials, its "number of employees" for size determination purposes shall be determined by reducing its average employment for the preceding four calendar quarters by the determined percentile. * * *

* * * * *

Effective date. This amendment shall become effective on March 27, 1974. In view of the need for immediate assistance to many concerns adversely affected by the shortage of energy or materials, we have determined that notice and public procedure on this amendment are impracticable.

(All Catalog of Federal Domestic Assistance Program Numbers except 59.009, Procurement Assistance to Small Business.)

Dated: March 19, 1974.

THOMAS S. KLEPPE,
Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 73-WA-9]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Terminal Control Area at Cleveland, Ohio

On November 12, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 31182) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate a Group II Terminal Control Area (TCA) for Cleveland, Ohio.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. Seven comments were received.

The Air Transport Association endorsed the TCA as proposed, while six other commenters opposed it. The opposition was based primarily on the belief that the establishment of a TCA at Cleveland was not justified, especially in view of the energy crisis. Their contention is that air carrier schedule reductions will reduce the number of enplaned passengers and that additional fuel will be required for nontransponder-equipped aircraft to circumnavigate the TCA airspace.

The issue concerning the establishment of a Group II TCA at Cleveland was contained in Notice 69-41, published in the FEDERAL REGISTER on September 30, 1969 (34 FR 15252), and Notice 69-41B, published in the FEDERAL REGISTER on March 13, 1970 (35 FR 4519), which delineated the locations of the 22 hub areas where Group I and Group II TCAs were proposed.

The FAA has maintained a monitor of the activities at the proposed TCA areas and has determined that Cleveland still warrants the establishment of a Group II TCA. It may be noted, as an example, that as a result of monitoring the activity at the 22 hub locations, Cincinnati has been deleted as a proposed Group II TCA location.

A review of the enplaned passenger activity generated by communities in the Cleveland area for calendar years 1972, 1973 and the first part of January 1974, indicates that the number of enplaned passengers is increasing rather than decreasing even though some scheduled flights have been cancelled. This is attributed to the remaining flights operating at or near capacity and larger aircraft being utilized. Although, in view of the fuel shortage, it is desirable to conserve fuel, it is believed that this TCA represents the minimum amount of airspace necessary to accomplish the safety objectives for which this is action is taken.

Concern was expressed that transponder equipment costs would cause undue financial hardship for fixed base operators and owners of aircraft based at and desiring to use Cleveland-Hopkins Airport, including the surrounding airspace.

The requirements for the improved transponder equipment have been under development for many years. Regulatory proposals issued in 1965, 1969, and 1972 discussed the requirement for this equipment within the National Airspace System. Numerous members of the aviation community responded to these various proposals with constructive suggestions concerning the problem and many of their suggestions were reflected in the final regulation.

There are many reasons for requiring altitude reporting transponders. This equipment eliminates much of the conversation that would otherwise be required between pilot and controller on busy voice communication frequencies. It also furnishes vital altitude information to controllers in situations where the pilot is not in radio communication with the ground system. In effect, with the use of automatic altitude reporting transponder equipment the present two-dimensional radar becomes three-dimensional. The result of this is a more efficient and safer air traffic control system.

Comments about the TCA configuration included statements that a ceiling of 8,000 feet is unnecessary; Area B will interfere with aircraft using the south shore of Lake Erie as a VFR fly-away in that it will require aircraft to fly through Burke Lakefront traffic patterns or force them out over the lake a sufficient distance that they could not glide to shore in case of an emergency; raise the floor to but excluding 2,500 feet MSL in the southeast quadrant from Cleveland-Hopkins Airport because of the tall TV towers located in this area; and also, the northwest/southeast runway at Cleveland-Hopkins is closed.

TCA ceilings are normally designated at or near 7000 feet above the primary airport elevation. This altitude was selected as a result of the FAA 1968 Near Mid-Air Collision Study which found that most of the terminal area incidents occurred within this altitude range. The establishment of the Cleveland TCA will still allow aircraft to fly along the lakeshore at an altitude of approximately 1300 feet above the water which meets the requirements of Federal Regulations regarding VFR minimum altitudes. This altitude should also allow the aircraft to use the beaches for possible emergency landing areas. The Burke Lakefront Airport traffic area extends up to but not including 3584 feet MSL, however, this does not prohibit aircraft flying through this area at a lesser altitude provided they contact the Control Tower in accordance with existing regulations. This communications requirement is intended to increase safety while operating in an airport traffic area.

The TCA floors proposed in the NPRM are based on the airspace required to contain climb and descent profiles. The comment that the airspace in the southeast quadrant of Area "B" below 3,000 feet MSL is not needed since no aircraft are taking off in that direction does not allow for the maneuvering of aircraft close to the airport. Area "B" is designed to contain close-in vectoring of aircraft arriving and departing Cleveland-Hopkins Airport. In addition to sequencing arrivals in this area, aircraft taking off in a westerly direction use it for transitioning via V-297, V-30 and V-42 over Akron/Canton and via V-6 over Youngstown. Aircraft taking off in an easterly direction turn right and climb on course toward Mansfield. For these reasons Area "B" is adopted as proposed in the Notice.

Two commenters suggested a corridor plan aligned to each runway. A simulated test of the climb/descent corridor concept was conducted at Boston, Massachusetts, in June and July of 1971. Representatives of the major user organizations observed the simulation. One TCA and three corridor configurations were tested. It was concluded that any of the plans would provide the desired degree of safety; however, only the TCA would provide for efficient use of the airspace and air traffic control flexibility required in major terminal areas.

In consideration of the foregoing and for reasons stated in Docket No. 9880 (35 FR 7782), Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, May 23, 1974, by adding the following to § 71.401(b) (39 FR 636) Group II Terminal Control Areas.

§ 71-401 Designations.

(b) * * *

CLEVELAND, OHIO, TERMINAL CONTROL AREA

PRIMARY AIRPORT

Cleveland-Hopkins International Airport (Lat. 41°24'37'' N., Long. 81°50'56'' W.)

Cleveland-Hopkins distance measuring equipment (DME) antenna (Lat. 41°24'15'' N., Long. 81°51'44'' W.)

BOUNDARIES

Area A

That airspace extending upward from the surface to and including 8,000 feet MSL within a 5-mile radius of the Cleveland-Hopkins International Airport DME antenna, excluding that airspace within a 1-mile radius of the Strongsville Airpark (Lat. 41°19'25'' N., Long. 81°52'00'' W.) and Gilbert Airport (Lat. 41°22'00'' N., Long. 81°-58'00'' W.)

Area B

That airspace extending upward from 1900 feet MSL to and including 8,000 feet MSL within an 8.5-mile radius of the Cleveland-Hopkins International Airport DME antenna excluding Area A previously described, and that airspace within a 2-mile radius of Burke Lakefront Airport (Lat. 41°30'45'' N., Long. 81°41'15'' W.)

Area C

That airspace extending upward from 3,000 feet MSL to and including 8,000 feet MSL within a 15-mile radius of the Cleveland-Hopkins International Airport DME antenna excluding Areas A and B previously described.

Area D

That airspace extending upward from 4,000 feet MSL to and including 8,000 feet MSL within a 20-mile radius of the Cleveland-Hopkins International Airport DME antenna, excluding Areas A, B, and C previously described.

V 39 160 MAR 27 74 XUM

[Airspace Docket No. 73-NW-9]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Extension of VOR Federal Airway

On January 11, 1974, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (39 FR 1640) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would extend VOR Federal Airway No. 122 from Lakeview, Oreg., direct to Rome, Oreg.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. No comments were received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 23, 1974, as hereinafter set forth.

§ 71.123 (39 FR 307) is amended as follows:

In V-122—"Lakeview, Oreg." is deleted and "Lakeview, Oreg.; to Rome, Oreg." is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 21, 1974.

RAYMOND M. MCINNIS,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74-7056 Filed 3-26-74;8:45 am]

[Airspace Docket No. 73-SW-83]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area and Federal Airways

On January 31, 1974, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (39 FR 3967) stating that the Federal Aviation Administration (FAA) was considering amendments to Parts 71 and 73 of the Federal Aviation regulations that would alter the description of Restricted Area R-3801D, Camp Claiborne, La., to make its horizontal boundaries the same as those of Restricted Areas R-3801B and R-3801C. The description of V-114 would also be altered to exclude R-3801B and R-3801C.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. No comments were received.

In consideration of the foregoing, Parts 71 and 73 of the Federal Aviation regulations are amended, effective 0901 G.m.t., May 23, 1974, as hereinafter set forth.

In § 71.123 (39 FR 307) the description of V-114 is amended by deleting "within R-3801D." at the end of its description and substituting "within R-3801B, R-3801C and R-3801D." therefor.

2. In § 73.38 (39 FR 668) the description of Restricted Area R-3801D is amended to read as follows:

R-3801D CAMP CLAIBORNE, LA.

Boundaries. Beginning at latitude 31°-11'45" N., longitude 92°30'15" W.; to latitude 31°05'15" N., longitude 92°34'50" W.; to latitude 31°13'55" N., longitude 92°49'45" W.; to latitude 31°18'00" N., longitude 92°46'30" W.; to latitude 31°15'15" N., longitude 92°41'45" W.; to latitude 31°17'10" N., longitude 92°40'10" W.; to point of beginning.

Designated altitudes. 14,000 feet MSL to and including FL 200.

Time of designation. Continuous. R-3801D shall not be activated unless the Houston ARTC Center radar (Alexandria System) is operational.

Controlling agency. Federal Aviation Administration, Houston ARTC Center.

Using agency. Commander, England AFB, La.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 21, 1974.

RAYMOND M. MCINNIS,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74-7055 Filed 3-26-74;8:45 am]

[Airspace Docket No 73-NE-32]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Areas; Correction

On March 6, 1974, FR Doc. 74-5099 was published in the FEDERAL REGISTER (39 FR 8609) amending Part 73 of the Federal Aviation Regulations to change the using agency for Restricted Areas, R-4105 No Man's Land Island, Mass., and R-4106 North Eastham, Mass., effective 0901 GMT, May 23, 1974.

The using agency for R-4105 was then incorrectly identified as Commander, Partol Wing FIVE, NAS Brunswick, Maine. The correct using agency for R-4105 is the Commanding Officer, Naval Air Station, South Weymouth, Mass.

Since designation of a different using agency is a minor amendment upon which the public is not particularly interested, notice and public procedure thereon are unnecessary. However, as it is essential that the correct using agency of the restricted area be identified, good cause exists for making this amendment effective immediately.

In consideration of the foregoing, F.R. Doc. 74-5099 (39 FR 8609) is amended, effective upon publication of this amendment in the FEDERAL REGISTER, as hereinafter set forth.

In § 73.41 (39 FR 671), subparagraph a., "Commander, Patrol Wing FIVE NAS Brunswick, Maine" is deleted and "Commanding Officer, NAS South Weymouth, Mass." is substituted therefor.

(Sec. 307(a), (Federal Aviation Act of 1958 (49 U.S.C. 1348(a)), Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C. on March 21, 1974.

RAYMOND M. MCINNIS,
Acting Chief, Airspace and Air Traffic Rules Division.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 5-74-02 R]

PART 127—SECURITY ZONES

Hampton Roads—James River—Newport News, Va.

This amendment to the Coast Guard's Security Zone Regulations establishes the waters of the James River in the area of the Newport News Shipbuilding and Drydock Company, Newport News, Virginia as a Security Zone. This security zone is established to prevent interference with the launching of the submarine LOS ANGELES at the Newport News Shipbuilding and Drydock Company, Newport News, Virginia.

This amendment is issued without publication of a notice of proposed rule making; and this amendment is effective in less than 30 days from the date of publication, because this security zone involves a military function of the United States.

In consideration of the foregoing, Part 127 and Title 33 of the Code of Federal Regulations is amended by adding § 127.501 to read as follows:

§ 127-501 Hampton Roads—James River—Newport News, Virginia.

The waters within the following boundary is a security zone: A line beginning at position 36°58'48" N., 76°26'26" W. to James River Buoy No. 1 at 36°57'53" N., 76°26'42" W. thence to a point at position 36°59'07" N., 76°28'08" W. thence to a point on shore at position 36°59'35" N., 76°26'55" W. thence to the beginning point.

(46 Stat. 220, as amended (§ 1, 63 Stat. 503,) § 6(b), 80 Stat. 937; 50 U.S.C. § 191 (14 U.S.C. § 91,) 49 U.S.C. § 1655(b); E.O. 10173, E.O. 10277, E.O. 10352, E.O. 11249; 3 CFR, 1949-1953 Comp. 356, 778, 873, 3 CFR 1964-1965 Comp. 349, 33 CFR Part 6, 49 CFR 1.46(b)).

Effective date: This amendment is effective from 1015Q to 1230Q April 6, 1974.

G. N. WOOD,
Captain, U.S. Coast Guard, Captain of the Port, Hampton Roads Area.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-230]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
Illinois	Madison	Alton, city of				Mar. 25, 1971, Emergency.
Do.	McHenry	Lakewood, village of.				Do.
Do.	Winnebago	South Beloit, city of.				Do.
Do.	Adams	Quincy, city of				Do.
Missouri	Lewis	Canton, city of				Do.
Do.	Lincoln	Elsberry, city of				Do.
Do.	Platte	Unincorporated areas.				Do.
Oregon	Clatsop	Seaside, city of				Do.
Pennsylvania	Berks	Bern, township of				Do.
Virginia	Gloucester	Unincorporated areas.				Do.
Do.	Surry	do.				Do.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (secs. 408-410, Pub. L. 91-152, Dec. 24, 1969) (42 U.S.C. 4001-4127); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969)

Issued: March 18, 1974.

GEORGE K. BERNSTEIN,
Federal Insurance Administrator.

[Docket No. FI-229]

PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

The Federal Insurance Administrator finds that comment and public procedure and the use of delayed effective dates in identifying the areas of communities which have special flood or mudslide hazards, in accordance with 24 CFR Part 1915, would be contrary to the public interest. The purpose of such identifications is to guide new development away from areas threatened by flooding. Since this publication is merely for the purpose of informing the public of the location of areas of special flood hazard and has no binding effect on the sale of flood insurance or the commencement of construction, notice and public procedure are impracticable, unnecessary, and contrary to the public interest. Inasmuch as this publication is not a substantive rule, the identification of special hazard areas shall be effective on the date shown. Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas.

State	County	Location	Map No.	State map repository	Local map repository	Effective date of identification of areas which have special flood hazards

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Acetic and Propionic Acids

A petition (PP 3F1411) was filed by Celanese Chemical Co., New York, NY 10017, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of tolerances for residues of acetic acid at 5,000 parts per million and propionic acid at 20,000 parts per million in or on the raw agricultural commodities alfalfa, Bermuda grass, bluegrass, brome grass, clover, cowpea hay, fescue, lespedeza, lupines, orchard grass, peanut hay, pea vine hay, soybean hay, sudan grass, rye grass, timothy, and vetch from postharvest application.

Based on consideration given the data submitted in the petition and other relevant material, it is concluded that:

1. The pesticide chemicals are useful as fungicides when applied postharvest to the above raw agricultural commodities.

2. Exemption from tolerances rather than finite tolerances should be established.

3. The present restrictions in § 180.303 and § 180.1023 limiting use of acetic and propionic acids respectively to grains intended for use as animal feed are not necessary to protect the public health and should be deleted.

4. Established tolerances (§ 180.303) for residues of acetic acid in or on grains should be converted to an exemption from the requirement of tolerances.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), Part 180 is amended as follows:

§ 180.303 [Deleted]

1. Section 180.303 *Acetic acid; tolerances for residues* is deleted from Subpart C.

2. A new section is established in Subpart D to read as follows:

§ 180.1029 Acetic acid; exemption from the requirement of a tolerance.

Acetic acid, when used postharvest as a fungicide, is exempt from the requirement of a tolerance for residues in or on alfalfa, barley grain, Bermuda grass, bluegrass, brome grass, clover, corn grain, cowpea hay, fescue, lespedeza, lupines, oat grain, orchard grass, peanut hay, pea vine hay, sorghum grain, soybean hay, sudan grass, rye grass, timothy, vetch and wheat grain.

3. Section 180.1023 is revised to read as follows:

§ 180.1023 Propionic acid; exemption from the requirement of a tolerance.

Propionic acid, when used postharvest as a fungicide, is exempt from the requirement of a tolerance for residues in or on alfalfa, barley grain, Bermuda grass, bluegrass, brome grass, clover, corn grain, cowpea hay, fescue, lespedeza, lupines, oat grain, orchard grass, peanut hay, pea vine hay, sorghum grain, soybean hay, sudan grass, rye grass, timothy, vetch and wheat grain.

Any person who will be adversely affected by the foregoing order may at any time on or before April 26, 1974 file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th & M Streets, S.W., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective March 27, 1974.

(Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)))

Dated: March 18, 1974.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticide Programs.

Title 41—Public Contracts and Property Management

CHAPTER I—FEDERAL PROCUREMENT REGULATIONS

[FPR Amdt. 126]

PART 1-16—PROCUREMENT FORMS

New Edition of Standard Forms

This amendment of the Federal Procurement Regulations prescribes the use of the July 1973 edition of Standard Form 19, Invitation, Bid, and Award (Construction, Alteration or Repair), and the November 1972 edition of Standard Form 19-A, Labor Standards Provisions Applicable to Contracts in Excess of $2,000. The changes in the forms are limited to the addition of new and revised contract provisions which were previously approved for use in connection with the prior edition of these forms. Minor editorial changes are also included.

Subpart 1-16.4—Forms for Advertised Construction Contracts

Section 1-16.401 is amended as follows:

§ 1-16.401 Forms prescribed.

* * * * *

(a) Invitation, Bid, and Award (Construction, Alteration or Repair) (Standard Form 19, July 1973 edition).

(b) Labor Standards Provision Applicable to Contracts in Excess of $2,000 (Standard Form 19-A, November 1972 edition).

* * * * *

Subpart 1-16.9—Illustration of Forms

Sections 1-16.901-19 and 1-16.901-19-A are revised to illustrate the revised editions of Standard Forms 19 and 19-A.

§ 1-16.901-19 Standard Form 19, Invitation, Bid, and Award (Construction, Alteration or Repair).

(a) Page 1 of Standard Form 19. (Insert form, copy attached)

(b) Page 2 of Standard Form 19. (Insert form, copy attached)

§ 1-16.901-19-A Standard Form 19-A, Labor Standards Provisions Applicable to Contracts in Excess of $2,000.

(a) Page 1 of Standard Form 19-A. (Insert form, copy attached)

(b) Page 2 of Standard Form 19-A. (Insert form, copy attached)

Availability of forms. It is anticipated that copies of these forms will be available for use by April 29, 1974.

(Sec. 205(c) 63 Stat. 390 (40 U.S.C. 486(c)))

Effective date. This regulation is effective May 27, 1974, but may be observed as soon as copies of the new editions of the standard forms prescribed herein are available.

Dated: February 26, 1974.

ARTHUR F. SAMPSON,
Administrator of General Services.

V 39 160 MAR 27 74 XUM

GENERAL PROVISIONS

1. CHANGES AND CHANGED CONDITIONS

(a) The Contracting Officer may, in writing, order changes in the drawings and specifications within the general scope of the contract. (b) The Contractor shall promptly notify the Contracting Officer in writing of subsurface or latent physical conditions differing materially from those indicated in this contract or unknown unusual physical conditions at the site, before proceeding further with the work. (c) If changes under (a) or conditions under (b) increase or decrease the cost of, or time required for, performing the work, upon assertion of a claim by the Contractor before final payment under the contract, a written equitable adjustment shall be made; except that no adjustment under (b) shall be made unless the notice required therein was given or unless the Contracting Officer waives the requirement therefor. If the adjustment cannot be agreed upon, the dispute shall be decided pursuant to Clause 3.

2. TERMINATION FOR DEFAULT—DAMAGES FOR DELAY—TIME EXTENSIONS

(a) If the Contractor does not prosecute the work so as to insure completion, or fails to complete it, within the time specified, the Government may, by written notice to the Contractor, terminate his right to proceed. Thereafter, the Government may have the work completed and the Contractor shall be liable for any resulting excess cost to the Government. If the Government does not terminate the Contractor's right to proceed, he shall continue the work and shall be liable to the Government for any actual damages occasioned by such delay unless liquidated damages are stipulated. (b) The Contractor's right to proceed shall not be terminated nor the Contractor charged with actual or liquidated damages under (a) above because of any delays in completion of the work due to causes other than normal weather, beyond his control and without his fault or negligence, including but not restricted to, acts of God, acts of the public enemy, acts of the Government (in either its sovereign or contractual capacity), acts of another contractor in the performance of a contract with the Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather, or delays of subcontractors or suppliers due to causes beyond their control and without their fault or negligence: Provided, That the Contractor shall within 10 days from the beginning of any such delay, unless the Contracting Officer shall grant a further period of time prior to the date of final payment under the contract, notify the Contracting Officer in writing of the causes of delay and the facts relating thereto. The Contracting Officer shall consider the facts and ascertain the extent of the delay, and extend the time for completing the work when in his judgment the facts justify such an extension, and his decision shall be final and conclusive on the parties, subject only to appeal as provided in Clause 3. (c) As used in paragraph (b) of this clause, the term "subcontractors or suppliers" means subcontractors or suppliers at any tier.

3. DISPUTES

Any dispute concerning a question of fact arising under this contract, not disposed of by agreement, shall be decided by the Contracting Officer, who shall reduce his decision to writing and furnish a signed copy to the Contractor. Such decision shall be final and conclusive unless, within 30 days from the date of receipt thereof, the Contractor mails or otherwise furnishes to the Contracting Officer a written appeal, addressed to the head of the Federal agency. The Contractor shall be afforded an opportunity to be heard and to offer evidence. The decision of the head of the Federal agency or his authorized representative shall be final and conclusive unless fraudulent, or capricious or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

4. RESPONSIBILITY OF CONTRACTOR

At his own expense the Contractor shall: (a) obtain any necessary licenses and permits; (b) provide competent superintendence; (c) take precautions necessary to protect persons or property against injury or damage and be responsible for any such injury or damage that occurs as a result of his fault or negligence; (d) perform the work without unnecessarily interfering with other contractors' work or Government activities; (e) be responsible for all damage to work performed and materials delivered (including Government-furnished items), until completion and final acceptance.

5. MATERIAL AND WORKMANSHIP

All material incorporated in the work shall be new and the work shall be performed in a skillful and workmanlike manner. Both materials and workmanship shall be subject to the inspection of the Contracting Officer or his duly authorized representative who may require the Contractor to correct defective workmanship or materials without cost to the Government.

6. PAYMENTS TO CONTRACTOR

Progress payments equal to 90 percent of the value of work performed may be made monthly on estimates approved by the Contracting Officer. Upon payment therefor, title to the property shall vest in the Government. The Contractor will notify the Government when all work is complete. Final payment will be made after final acceptance.

7. OFFICIALS NOT TO BENEFIT

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

8. BUY AMERICAN.

The Contractor, subcontractors, material men, and suppliers must comply with the Buy American Act of March 3, 1933 (41 U.S.C. 10a–10d) and Executive Order 10582 of December 17, 1954 (19 Fed. Reg. 8723). (In substance the above requires use generally of domestic materials except as otherwise authorized by the Contracting Officer pursuant to the Act and Executive Order.)

9. ASSIGNMENT OF CLAIMS

If this contract provides for payments aggregating $1,000 or more, claims for moneys due or to become due hereunder may be assigned as provided in 31 U.S.C. 203 and 41 U.S.C. 15.

10. CONVICT LABOR

In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence of imprisonment at hard labor.

11. COVENANT AGAINST CONTINGENT FEES

The Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business. For breach or violation of this warranty the Government shall have the right to annul this contract without liability or in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

12. PAYMENT OF INTEREST ON CONTRACTORS' CLAIMS

(a) If an appeal is filed by the contractor from a final decision of the Contracting Officer under the Disputes clause of this contract, denying a claim arising under the contract, simple interest on the amount of the claim finally determined owed by the Government shall be payable to the Contractor. Such interest shall be at the rate determined by the Secretary of the Treasury pursuant to Public Law 92-41, 85 Stat. 97, from the time the Contractor furnishes to the Contracting Officer his written appeal under the Disputes clause of this contract, to the date of (1) a settlement by a court of competent jurisdiction, (2) mutual agreement by a contractor of a supplemental agreement for implementing conforming completed negotiations between the parties, or (3) a decision of a board of contract appeals. (b) Except as provided in (a), above, (1) interest shall be applied only for the period during which Government payment was due, if such date is later than the filing of the appeal, and (2) interest shall not be paid for any period of time that the Contracting Officer determines the Contractor has unduly delayed in pursuing his remedies before a board of contract appeals or a court of competent jurisdiction.

13. EXAMINATION OF RECORDS BY COMPTROLLER GENERAL

The clause entitled "Examination of Records by Comptroller General" prescribed by 41 CFR Subpart 1-7.1 is applicable if the amount of this contract exceeds $2,500 and was entered into by means of negotiation, including small business restricted advertising, but is not applicable if this contract was entered into by means of formal advertising.

14. UTILIZATION OF SMALL BUSINESS CONCERNS

(The following clause is applicable if this contract exceeds $5,000.)

(a) It is the policy of the Government as declared by the Congress that a fair proportion of the purchases and contracts for supplies and services for the Government be placed with small business concerns. (b) The Contractor agrees to accomplish the maximum amount of subcontracting to small business concerns that the Contractor finds to be consistent with the efficient performance of this contract.

15. UTILIZATION OF MINORITY BUSINESS ENTERPRISES

(The following clause is applicable if this contract exceeds $5,000.)

(a) It is the policy of the Government that minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government contracts. (b) The Contractor agrees to use his best efforts to carry out this policy in the award of his subcontracts to the fullest extent consistent with the efficient performance of this contract. As used in this contract, the term "minority business enterprise" means a business, at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of this definition, minority group members are Negroes, Spanish-speaking American persons, American Orientals, American Indians, American Eskimos, and American Aleuts. Contractors may rely on written representations by subcontractors regarding their status as minority business enterprises in lieu of an independent investigation.

LABOR STANDARDS PROVISIONS

APPLICABLE TO CONTRACTS IN EXCESS OF $2,000

1. DAVIS-BACON ACT (40 U.S.C. 276a–276a-7)

(a) All mechanics and laborers, including apprentices and trainees, employed or working directly upon the site of the work shall be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by the Copeland Regulations, 29 CFR Part 3), the full amounts due at time of payment computed at wage rates not less than the aggregate of the basic hourly rates and the rates of payments, contributions, or costs for any fringe benefits contained in the wage determination decision of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the Contractor or subcontractor and such laborers and mechanics. A copy of such wage determination decision shall be kept posted by the Contractor at the site of the work in a prominent place where it can be easily seen by the workers.

(b) The Contractor may discharge his obligation under this clause to workers in any classification for which the wage determination decision contains:

(1) Only a basic hourly rate of pay, by making payment at not less than such basic hourly rate, except as otherwise provided in the Copeland Regulations, (29 CFR Part 3); or

(2) Both a basic hourly rate of pay and fringe benefits payments, by making payment in cash, by irrevocably making contributions pursuant to a fund, plan, or program for, and/or by assuming an enforceable commitment to bear the cost of, bona fide fringe benefits contemplated by the Davis-Bacon Act, or by any combination thereof. Contributions made, or costs assumed, on other than a weekly basis shall be considered as having been effectively made or assumed during a weekly period to the extent that they apply to such period. Where a fringe benefit is expressed in a wage determination in any manner other than as an hourly rate and the Contractor pays a cash equivalent or provides an alternative fringe benefit, he shall furnish information with his payrolls showing how he determined that the cash equivalent or the alternative payment or to provide the alternative fringe benefit is equal to the cost of the wage determination fringe benefit. In any case where the Contractor provides a fringe benefit different from any contained in the wage determination, he shall similarly show how he arrived at the hourly rate shown therefor. In the event of disagreement between or among the interested parties as to an equivalent of any fringe benefit, the Contracting Officer shall submit the question, together with his recommendation, to the Secretary of Labor for final determination.

(c) The assumption of an enforceable commitment to bear the cost of fringe benefits, or the provision of any fringe benefits not expressly listed in section 1(b)(2) of the Davis-Bacon Act or in the wage determination decision forming a part of the contract, may be considered in payment of wages only with the approval of the Secretary of Labor pursuant to a written request by the Contractor. The Secretary of Labor may require the Contractor to set aside assets, in a separate account, to meet his obligations under any unfunded plan or program.

(d) The Contracting Officer shall require that any class of laborers or mechanics, including apprentices and trainees, which is not listed in the wage determination decision and which is to be employed under the contract shall be classified or reclassified conformably to such wage determination decision, and shall report the action taken to the Secretary of Labor. If the interested parties cannot agree on the proper classification or reclassification of a particular class of laborers or mechanics to be used, the Contracting Officer shall submit the question, together with his recommendation, to the Secretary of Labor for final determination. Apprentices and trainees may be added under this clause only where they are employed pursuant to an apprenticeship or trainee program meeting the requirements of the Apprentices and Trainees clause below.

(e) In the event it is found by the Contracting Officer that any laborer or mechanic, including apprentices and trainees, employed by the Contractor or any subcontractor directly on the site of the work covered by this contract has been or is being paid at a rate of wages less than the rate of wages required by paragraph (a) of this clause, the Contracting Officer may (1) by written notice to the Government Prime Contractor terminate his right to proceed with the work, or such part of the work as to which there has been a failure to pay said required wages, and (2) prosecute the work to completion by contract or otherwise, whereupon such Contractor and Subcontractor and his sureties shall be liable to the Government for any excess costs occasioned the Government thereby.

(f) Paragraphs (a) through (e) of the clause shall apply to this contract to the extent that it is (1) a prime contract with the Government subject to the Davis-Bacon Act, or (2) a subcontract also subject to the Davis-Bacon Act under such prime contract.

2. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT—OVERTIME COMPENSATION (40 U.S.C. 327–333).

This contract is subject to the Contract Work Hours and Safety Standards Act and to the applicable rules, regulations, and interpretations of the Secretary of Labor.

(a) The Contractor shall not require or permit any laborer or mechanic, including apprentices, trainees, watchmen, and guards, in any workweek in which he is employed on any work under this contract to work in excess of 8 hours in any calendar day or in excess of 40 hours in such workweek on work subject to the provisions of the Contract Work Hours and Safety Standards Act unless such laborer or mechanic, including apprentices, trainees, watchmen, and guards, receives compensation at a rate not less than 1½ times his basic rate of pay for all such hours worked in excess of 8 hours in any calendar day or in excess of 40 hours in such workweek, whichever is the greater number of overtime hours. The "basic rate of pay," as used in this clause, shall be the amount paid per hour exclusive of the Contractor's contribution or cost for fringe benefits, and any cash payment made in lieu of providing fringe benefits, or the basic hourly rate contained in the wage determination, whichever is greater.

(b) In the event of any violation of the provisions of paragraph (a), the Contractor shall be liable to any affected employee for any amounts due, and to the United States for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including an apprentice, trainee, watchman, or guard, employed in violation of the provisions of paragraph (a) in the sum of $10 for each calendar day on which such employee was required or permitted to be employed on such work in excess of 8 hours or in excess of the standard workweek of 40 hours without payment of the overtime wages required by paragraph (a).

3. APPRENTICES AND TRAINEES

(a) Apprentices shall be permitted to work as such only when they are registered, individually, under a bona fide apprenticeship program registered with a State apprenticeship agency which is recognized by the Bureau of Apprenticeship and Training, U.S. Department of Labor; or if no such recognized agency exists in a State, under a program registered with the aforesaid Bureau of Apprenticeship and Training. The allowable ratio of apprentices to journeymen in any craft classification shall not be greater than the ratio permitted to the Contractor as to his entire work force under the registered program. Any employer listed on a payroll at an apprentice wage rate who is not a trainee as defined in paragraph (b) of this clause, and who is not registered as above, shall be paid the wage rate determined by the Secretary of Labor for the classification of work he actually performed. The Contractor shall furnish to the Contracting Officer written evidence of the registration of his program and apprentices, as well as of the appropriate ratios and wage rates required to be paid thereunder for the area of construction, prior to using any apprentices in the contract work. The term "apprentice" means (1) a person employed and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Bureau of Apprenticeship and Training or with a State apprenticeship agency recognized by the Bureau, or (2) a person in his first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Bureau of Apprenticeship and Training, or a State Apprenticeship Council (where appropriate) to be eligible for probationary employment as an apprentice.

(b) Trainees shall be permitted to work as such when they are bona fide employees employed pursuant to a program approved by the U.S. Department of Labor, Manpower Administration, Bureau of Apprenticeship and Training. The term "trainee" means a person receiving on-the-job training in the construction occupation under a program which is not necessarily sponsored) by the U.S. Department of Labor, Manpower Administration, Bureau of Apprenticeship and Training and which is reviewed from time to time by the Manpower Administration to insure that the training meets adequate standards.

(c) In connection with contracts in excess of $10,000, the Contractor agrees as follows:

(1) The Contractor shall make a diligent effort to hire for performance of work under this contract a number of apprentices or trainees, or both, in each occupation, which bears to the average number of the journeymen in that occupation to be employed in the performance of the contract the applicable ratios as set forth in paragraph (c)(7) of this clause.

(2) The Contractor shall insure that 25 percent of such apprentices or trainees in each occupation are in their first year of training, where feasible. Feasibility here involves a consideration of (i) the availability of training opportunities for first year apprentices, (ii) the hazardous nature of the work for beginning workers, and (iii) excessive unemployment of apprentices in their second and subsequent years of training.

(3) The Contractor shall, during the performance of the contract, to the greatest extent possible, employ the number of apprentices or trainees necessary to meet currently the requirements of paragraph (c)(1) and (c)(2) of this clause.

(4) The Contractor shall maintain records of employment on this contract by trade of the number of apprentices and trainees, apprentices and trainees in first year of training, and of journeymen, and wages paid and hours of work of such apprentices, trainees, and journeymen. In addition, the Contractor who claims compliance based on the criterion set forth in paragraph (c)(1)(6)(iii) of this clause shall maintain such records of employment on all his construction work in the same labor market area, both public and private, during the performance of this contract. In each of the above cases the Contractor shall make such records available for inspection upon request of the Department of Labor or the Contracting Officer.

(5) The Contractor shall supply one copy of each of the written notices required in accordance with paragraph (c)(6)(iii) of this clause at the request of the Contracting Officer. The Contractor also agrees to supply at 3-month intervals during the performance of the contract and after completion of contract performance a statement describing steps taken toward making a diligent effort and containing a breakdown by craft, of hours worked and wages paid for first year apprentices and trainees, other apprentices and trainees, and journeymen. One copy of the statement will be sent to the Contracting Officer and one copy to the Secretary of Labor.

(6) The Contractor will be deemed to have made a "diligent effort" as required by paragraph (c)(1) if during the performance of this contract, he accomplishes at least one of the following three objectives: (i) The Contractor employs under this contract a number of apprentices and trainees by craft, at least equal to the ratios established in accordance with paragraph (c)(7) of this clause, or (ii) the Contractor employs, on all his construction work, both public and private, in the same labor

market area, an average number of apprentices and trainees by craft at least equal to the ratios established in accordance with paragraph (c)(7) of this clause, or (iii) the Contractor (A) if covered by a collective bargaining agreement, before commencement of any work on the project, has given written notice to all joint apprenticeship committees, the local U.S. Employment Security Office, local chapter of the Urban League, Workers Defense League, or other local organizations concerned with minority employment, and the Bureau of Apprenticeship and Training Representative, U.S. Department of Labor, for the locality of the work; (B) if not covered by a collective bargaining agreement, has given written notice to all of the groups stated above, except joint apprenticeship committees, and will in addition notify all non joint apprenticeship sponsors in the labor market area; (C) has employed all qualified applicants referred to him through normal channels (such as the Employment Service, the Joint Apprenticeship Committees and where applicable, minority organizations and apprentice outreach programs who have been delegated this function) at least up to the number of such apprentices and trainees required by paragraph (c)(7) of this clause. The notice, as referred to herein, will include at least the Contractor's name and address, the agency designation, the contract number, job site address, value of the contract, expected starting and completion dates, the estimated average number of employees in each occupation to be employed over the duration of the contract work, and a statement of his willingness to employ a number of apprentices and trainees at least equal to the ratios established in accordance with paragraph (c)(7) of this clause.

(2) The Contractor recognizes that the Secretary of Labor has determined that the applicable ratios of apprentices and trainees to journeymen in any occupation for the purpose of this clause shall be as follows: (i) In any occupation the applicable ratio of apprentices and trainees to journeymen shall be equal to the predominant ratio for the occupation in the area where the construction is being undertaken, set forth in collective bargaining agreements, or other employment agreements, and available through the Bureau of Apprenticeship and Training Representative, U.S. Department of Labor, for the applicable area, (ii) for any occupation for which no ratio is found, the ratio of apprentices and trainees to journeymen shall be determined by the Contractor in accordance with the recommendations set forth in the Standards of the National Joint Apprentice Committee for the occupation, which are on file at offices of the U.S. Department of Labor's Bureau of Apprenticeship and Training; and (iii) for any occupation for which no such recommendations are found, the ratio of apprentices and trainees to journeymen shall be at least one apprentice or trainee for every five journeymen.

4. PAYROLLS AND BASIC RECORDS

(a) The Contractor shall maintain payrolls and basic records relating thereto during the course of the work and shall preserve them for a period of 3 years thereafter for all laborers and mechanics, including apprentices, trainees, watchmen, and guards working at the site of the work. Such records shall contain the name and address of each such employee, his correct classification, rate of pay (including rates of contributions for, or costs assumed to provide, fringe benefits), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Contractor has obtained approval from the Secretary of Labor as provided in paragraph (c) the clause entitled "Davis-Bacon Act," he shall maintain records which show the commitment, its approval, written communication of the plan or program to the laborers or mechanics affected, and the costs anticipated or incurred under the plan or program.

(b) The Contractor shall submit weekly a copy of all payrolls to the Contracting Officer. The Government Prime Contractor shall be responsible for the submission of copies of payrolls of all subcontractors. The copy shall be accompanied by a statement signed by the Contractor indicating that the payrolls are correct and complete, that the wage rates contained therein are not less than those determined by the Secretary of Labor, and that the classifications set forth for each laborer or mechanic, including apprentices and trainees, conform with the work he performed. Submission of the "Weekly Statement of Compliance" required under this contract and the Copeland Regulations of the Secretary of Labor (29 CFR Part 3), shall satisfy the requirement for submission of the above statement. The Contractor shall submit also a copy of any approval by the Secretary of Labor with respect to fringe benefits which is required by paragraph (c) of the clause entitled "Davis Bacon Act."

(c) The Contractor shall make the records required under this clause available for inspection by authorized representatives of the Contracting Officer and the Department of Labor, and shall permit such representatives to interview employees during working hours on the job.

5. COMPLIANCE WITH COPELAND REGULATIONS

The Contractor shall comply with the Copeland Regulations of the Secretary of Labor (29 CFR Part 3) which are incorporated herein by reference.

6. WITHHOLDING OF FUNDS

(a) The Contracting Officer may withhold or cause to be withheld from the Government Prime Contractor so much of the accrued payments or advances as may be considered necessary (1) to pay laborers and mechanics, including apprentices, trainees, watchmen, and guards employed by the Contractor or any subcontractor on the work the full amount of wages required by the contract, and (2) to satisfy any liability of any Contractor and Subcontractor for liquidated damages under paragraph (b) of the clause entitled "Contract Work Hours and Safety Standards Act—Overtime Compensation."

(b) If any Contractor or subcontractor fails to pay any laborer, mechanic, apprentice, trainee, watchman, or guard employed or working on the site of work, all or part of the wages required by the contract, the Contracting Officer may, after written notice to the Government Prime Contractor, take such action as may be necessary to cause suspension of any further payments or advances until such violations have ceased.

7. SUBCONTRACTS

The Contractor agrees to insert the clauses hereof entitled "Davis-Bacon Act," "Contract Work Hours and Safety Standards Act—Overtime Compensation," "Apprentices and Trainees," "Payrolls and Basic Records," "Compliance with Copeland Regulations," "Withholding of Funds," "Subcontracts," and "Contract Termination—Debarment" in all subcontracts. The term "Contractor" as used in such clauses in any subcontract shall be deemed to refer to the subcontractor except in the phrase "Government Prime Contractor."

8. CONTRACT TERMINATION—DEBARMENT

A breach of the clauses hereof entitled "Davis-Bacon Act," "Contract Work Hours and Safety Standards Act—Overtime Compensation," "Apprentices and Trainees," "Payrolls and Basic Records," "Compliance with Copeland Regulations," "Withholding of Funds," and "Subcontracts" may be grounds for termination of the contract, and for debarment as provided in 29 CFR 5.6.

9. DISPUTES CONCERNING LABOR STANDARDS

Disputes arising out of the labor standards provisions of this contract shall not be subject to the Disputes clause except to the extent such disputes involve the making of classifications or wage rates contained in the wage determination decision of the Secretary of Labor or the applicability of the labor provisions of this contract which questions shall be referred to the Secretary of Labor in accordance with the procedures of the Department of Labor.

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER Q—SPECIFICATIONS

[CGD 73-103R]

PART 160—LIFESAVING EQUIPMENT

Safety Features for Handcranking Power-Driven Winches

The purpose of these amendments to the regulations governing lifeboat winches for merchant vessels is to eliminate a duplication presently existing in the requirements for power-driven winches and to relocate a pertinent sentence applicable to hand cranks.

In the August 21, 1973 issue of the FEDERAL REGISTER (38 FR 22492), the Coast Guard proposed revising the present requirements for lifeboat winches by eliminating a duplication affecting power-driven winches and relocating a provision pertaining to the requirements for handcranking.

No written comments were received on the proposal.

In consideration of the foregoing, the proposed amendments to the regulations published in the August 31, 1973 issue of the FEDERAL REGISTER (38 FR 22492) are adopted and set forth below. Compliance with these amendments prior to the effective date is considered by the Coast Guard as compliance with the existing regulations.

Part 160 of Title 46 of the Code of Federal Regulations is amended as follows:

1. By revoking § 160.015–3(j)(1).

2. By revising the last sentence of § 160.015–3(1) to read:

"Mechanical means for accomplishing the above, such as throw-out couplings on the sockets of the hand cranks, will be given special consideration."

(46 U.S.C. 391a, 404, 481, 489; 49 U.S.C. 1655 (b)(1), and 49 CFR 1.46(b) and (o)(4)).

Effective date. This amendment is effective March 27, 1974.

C. R. BENDER,
Admiral, U.S. Coast Guard,
Commandant.

Title 4—Accounts

CHAPTER I—GENERAL ACCOUNTING OFFICE

SUBCHAPTER D—TRANSPORTATION

PART 52—FREIGHT TRANSPORTATION SERVICES FURNISHED FOR THE ACCOUNT OF THE UNITED STATES

Acceptance and Use of Government Bill of Lading

Part 52 is amended by the addition of a new § 52.51 as follows:

52.51 General conditions governing acceptance and use of Government bill of lading.

(a) In no case shall prepayment of charges be demanded by the carrier nor collection be made from the consignee. The Government bill of lading, properly certified and attached to Public Voucher for Transportation Charges, will be presented to the paying office indicated in the "Charges To Be Billed To" box on the face of the bill of lading for payment to:

(1) The last carrier or forwarder in privity with the contract of carriage as evidenced by the covering bill of lading; or

(2) A participating carrier or forwarder in privity with the contract of carriage as evidenced by the covering bill of lading, when submitted with a waiver accomplished by the last carrier (as described in paragraph (a)(1) of this section) in favor of the billing carrier; or

(3) A carrier (as described in paragraph (a)(1) of this section) or its properly designated warehouse agent as authorized in the paragraph of title 5 of the General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies (GAO Manual) dealing with certification of shipments in storage; or

(4) An agent of the carrier or forwarder (as described in paragraph (a)(1) or (a)(2) of this section) so long as the bill is submitted in the name of the principal. The agent's mailing address may be shown in such bills and the checks drawn in the name of the principal may be mailed to the agent.

(b) The Government bill of lading is subject to the same rules and conditions as govern shipments made on the usual commercial forms, unless otherwise specifically provided or stated in title 5 of the GAO Manual.

((c) Shipments made upon the Government bill of lading shall take a rate no higher than that chargeable had the shipment been made upon the uniform straight bill of lading, uniform express receipt, or any other forms provided for commercial shipments.

(d) No charge shall be made by any carrier for the execution and presentation of Government bills of lading in manner and form as provided herein or in title 5 of the GAO Manual.

(e) The shipment is made at the restricted or limited valuation specified in pursuant to section 22 of the Interstate Commerce Act, as amended, or to other equivalent contract, arrangement, or exemption from regulation at or under which the lowest rate is available, unless otherwise indicated on the face of the Government bill of lading.

(f) Receipt for the shipment is subject to the annotation of loss, damage, or shrinkage made by the consignee on the delivering carrier's documents and the consignee's copy of the same documents. When loss or damage is not discovered until after delivery of shipment and receipt therefor, the consignee shall notify the nearest office of last delivering carrier immediately, by telephone if located within the vicinity, and extend privilege of examining the shipment.

(g) In case of loss, damage, or shrinkage in transit, the rules and conditions governing commercial shipments shall not apply as to period within which notice thereof shall be given the carrier or to period within which claim therefor shall be made or suit instituted. Deletion of this item will be considered valid only with the concurrence, in writing, of the Government official responsible for making shipment.

(h) Carrier's rights to shipping charges are not affected by facts set out in the

V 39 160 MAR 27 74 XUM

issuing office part of the Government bill of lading.

(i) The nondiscrimination clauses contained in section 202 of Executive Order 11246, as amended by Executive Order 11375, relative to equal employment opportunity for all persons without regard to race, creed, color, or national origin, and the implementing rules and regulations prescribed by the Secretary of Labor are incorporated in the Government bill of lading.

(Sec. 311, 42 Stat. 25, as amended (31 U.S.C. 52); Interpret or apply sec. 309, 42 Stat. 25 (31 U.S.C. 49); sec. 322, 54 Stat. 955, as amended; 86 Stat. 1163 (49 U.S.C. 66))

[SEAL] ELMER B. STAATS,
Comptroller General of the United States.

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

PART 150—PHASE IV PRICE REGULATIONS

Reporting by Retail Firms

Section 150.311 is amended by adding a new paragraph (c) to require continued quarterly reporting by price category I and II retail firms with sales that are exempt under § 150.54(ff). The purpose of this new paragraph (c) is to provide the Council with the means to monitor post-exemption pricing behavior in the retail trade sector generally and to monitor the extent to which the ten major retail firms which made pricing and profit commitments to the Council at the time of the retail exemption are abiding by those commitments.

The new § 150.311(c) requires submission of quarterly reports (not including the Schedule T) through the fiscal quarter which includes August 1, 1974. In addition, each of the ten firms which made commitments must attach to the quarterly report a statement which explains the extent to which the specific commitment made by the firm was observed during the quarter for which the report is submitted.

Because the purpose of this amendment is to grant immediate guidance under the Phase IV price regulations, the Council finds that publication in accordance with normal rulemaking procedure is impracticable and that good cause exists for making this amendment effective in less than 30 days. Interested persons may submit written comments regarding this amendment. Communications should be addressed to the Office of the General Counsel, Cost of Living Council, 2000 M Street, NW., Washington, D.C. 20508.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489.)

In consideration of the foregoing, Part 150 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective March 26, 1974.

Issued in Washington, D.C., on March 26, 1974.

JAMES W. MCLANE,
Deputy Director, Cost of Living Council.

In 6 CFR Part 150, § 150.311 is amended to read as follows:

§ 150.311 Reporting.

* * * * *

(c) Notwithstanding § 150.161(b)(1) of this title, each price category I or II firm with sales that are exempt under § 150.54(ff) remains subject to paragraphs (a) and (b) of this section with respect to all reports called for by those paragraphs through the fiscal quarter which includes August 1, 1974. Such a firm, however, may exclude the Schedule T from a report filed pursuant to this section. In addition, a firm which made a commitment to the Council in connection with the exemption in § 150.54(ff) shall attach to each report a statement explaining the extent to which the commitment was observed during the quarter that is the subject of the report.

[FR Doc.74-7235 Filed 3-26-74;9:41 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Parts 1126, 1121, 1127, 1128, 1129, 1130]

[Docket Nos. AO-231-A41, etc.]

MILK IN THE NORTH TEXAS AND CERTAIN OTHER MARKETING AREAS

Partial Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments and to Order

Notice is hereby given of the filing with the Hearing Clerk of this partial recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the South Texas marketing area.

7 CFR part	Marketing Area	Docket No.
1126	North Texas	AO-231-A41
1121	South Texas	AO-364-A8
1127	San Antonio, Texas	AO-232-A27
1128	Central West Texas	AO-238-A30
1129	Austin-Waco, Texas	AO-256-A23
1130	Corpus Christi, Texas	AO-259-A27

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, by April 8, 1974. Five copies of the exceptions should be filed. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Dallas, Texas, on December 3-7, 1973, and January 22-25, 1974, pursuant to notice thereof which was issued on November 9, 1973 (38 FR 31432).

The material issues on the record of the hearing relate to:

1. Whether the handling of milk produced for sale in the proposed merged and expanded marketing area is in the current of interstate commerce, or directly burdens, obstructs, or affects interstate commerce in milk or its products;

2. Whether the marketing areas of the present North Texas, South Texas, San Antonio, Central West Texas, Austin-Waco and Corpus Christi orders should be included under one order;

3. Whether the proposed merged marketing area should be expanded to include additional territory in the States of Texas and Arkansas;

4. If a single order is issued for the proposed merged and expanded marketing area, what its provisions should be with respect to:

(a) Milk to be priced and pooled;

(b) Classification of milk;

(c) Class prices, butterfat differentials, and location adjustments;

(d) Distribution of proceeds to producers; and

(e) Administrative provisions;

5. Need for amending the classification and pricing provisions of the South Texas order prior to any merger of orders; and

6. Whether an emergency exists to warrant the omission of a recommended decision with respect to Issue 5.

This partial decision deals only with Issues 5 and 6. The remaining issues are reserved for a later decision.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on Issues 5 and 6 are based on evidence presented at the hearing and the record thereof:

5. *Classification and pricing of milk under the South Texas order.* A new classification and pricing plan for milk should apply in the South Texas Market at such time as similar plans become effective in the other Texas Federal order markets.

As set forth in recent decisions of the Assistant Secretary, it has been determined that a uniform milk classification plan should be incorporated in 39 milk orders, including all orders in Texas except the South Texas order.[1] Upon producer approval and effectuation of the proposed amended orders, each of the 39 orders will provide for three classes of utilization, with the milk uses included in each class being the same for each order. The same basic procedure will be used for classifying milk transferred or diverted from pool plants to other plants, and for allocating a handler's receipts to his utilization to determine the classification of his producer milk. Each order will use the same Class II and Class IIII prices, as well as a single butterfat differential.

At the hearing to consider the merger of the aforesaid six Texas orders, it was proposed that the same general classification plan be adopted for the proposed merged order. It was generally recognized, however, that the merger action could not be completed by the time the classification changes in the individual orders presumably would become effective. Since the South Texas order would not be similarly changed at that time, certain producer groups and handlers proposed or supported the incorporation of the new classification plan in the South Texas order during the interim period preceding any merger.

Proponents claimed that the South Texas order was not included in the 39-market classification proceedings because of pending litigation on the possible termination of the order. They contended that with the recent resolution of the legal matter steps should be taken to effectuate in the South Texas market the same classification and pricing changes that are expected to be implemented in the other Texas markets. Proponents stressed that the intermarket competition now existing among handlers in the several Texas markets, including South Texas, makes it necessary that all of the Texas orders be amended in this respect at the same time. There was no opposition to the proposal.

As already noted, the changes in the other orders will provide for three classes of utilization. Only two classes are provided under the present South Texas order. Under the other Texas orders, such products as cream, cottage cheese and ice cream will be included in a "middle" class and priced at the Minnesota-Wisconsin price for the month plus 10 cents. Under the South Texas order, cream is a Class I product, with the Class I price being the Minnesota-Wisconsin price for the second preceding month plus $2.68. Producer milk used in cottage cheese and ice cream, on the other hand, is now classified as Class II milk under the South Texas order. The applicable class price is the lower of the Minnesota-Wisconsin price or a butter-nonfat dry milk formula price. In recent months, the latter price determinant has prevailed. The South Texas Class II price in December 1973, for example, was $1.23 under the price that would have applied to such milk uses under the new classification plan. Similarly, the South Texas Class II

[1] Official notice is taken of two decisions issued by the Assistant Secretary on February 19, 1974, concerning the classification and pricing of milk under 32 orders (Georgia, et al., 39 F.R. 8452, 8712, 9012) and under 7 orders (Chicago Regional, et al., 39 F.R. 8202).

V 39 160
MAR 27 74
XUM

price for milk used in butter, nonfat dry milk and hard cheese was $1.13 lower than the price that would have prevailed for such uses under the new pricing arrangement. Price differences would exist also for Class I products because of the use of different butterfat differentials.

There is substantial competition among handlers regulated by the North Texas and South Texas orders. In September 1973, for example, nearly 26.6 million pounds of fluid milk products were distributed in the South Texas marketing area from 11 North Texas pool plants. In this circumstance, the differences in the present classification and pricing of milk under the South Texas order relative to the new classification plan for the North Texas order would be disruptive to the competitive relationships of handlers and to the orderly marketing of producer milk. This would be particularly so for the handler who is now regulated under the South Texas order because the majority of his Class I sales are in that market but whose distributing plant, nevertheless, is located in the center of the North Texas market where he also has sales. This handler stressed that his competitive situation makes it particularly necessary that the new classification plan be adopted in the South Texas market concurrently with the implementation of similar plans for the other Texas markets.

For these reasons, classification and pricing changes similar to those determined appropriate for the other Texas orders should be made in the South Texas order. Such changes should be effectuated concurrently with the changes in the other orders. Although the cooperative association proposing the six-order merger urged that the plan be modified in several respects for the merged order, it indicated that the South Texas classification plan should coincide with the classification provisions of the other Texas orders during any interim period preceding a merger.

In view of the broad industry participation in the development of a uniform classification plan for the 39 markets, and because of the comprehensive review of this issue at two regional hearings, proponents of the South Texas order changes did not present extensive testimony at the Texas hearing concerning the details of the new plan. Proponents contended that the uniform plan developed for the other markets was equally appropriate for the South Texas market and that a full reconsideration at this hearing of all the order changes encompassed by the new plan, and the supporting reasons for such changes, was unnecessary.

The new classification plan that evolved from the 39-market proceedings reflects the combined efforts of both producers and handlers throughout much of the milk industry to develop a uniform plan for classifying milk for pricing purposes. Prior to the first of two regional hearings on uniform classification provisions, the National Milk Producers Federation, an organization of cooperative associations of dairy farmers and federations of such cooperative associations, undertook the development of a uniform milk classification plan for use under milk orders generally. Guidelines were formulated for use by member organizations in the drafting of specific classification proposals for consideration at public hearings. Using these guidelines as a basis for their proposals, several cooperative associations petitioned the Department for hearings on proposals relating to the classification and pricing of milk under 39 present orders, including all orders in Texas except the South Texas order. While differing on some of the provisions proposed by producers, a uniform classification plan for the 39 orders was advocated also by the Milk Industry Foundation and the International Association of Ice Cream Manufacturers, national trade associations of fluid milk and ice cream processors whose members were operating in each of the markets under consideration.

Following extensive hearings for 7 markets and then 32 markets and subsequent recommended decisions, revised recommended decisions were issued for both proceedings on the basis of industry exceptions to the initial recommendations. The industry was then provided a further opportunity to participate in these rule-making proceedings through the filing of exceptions to the revised recommendations concerning a new classification plan. Moreover, many of the parties that have a direct interest in the marketing of milk in the South Texas area participated in the development of the new classification plan for the 39 markets, and particularly with respect to the application of the new plan to the Texas orders that were under consideration.

Accordingly, the description and justification set forth herein concerning the detailed provisions of the proposed South Texas classification plan are patterned on the findings and conclusions of the 32-market decision applicable to the other Texas orders.

In conjunction with the development of uniform provisions pertaining to the classification and pricing of milk under the 39 orders, a uniform format of order provisions also was developed. Orders contain essentially the same categories of provisions, such as those relating to the definition of a pool plant or other source milk, those setting forth the class price formulas, or those describing how the uniform price is to be computed. However, many orders are structured in such a way that provisions serving essentially the same purpose under all orders do not appear in each order in the same place or under the same section title.

It has been determined that coordination of the 39 orders in this respect would be helpful to those in the industry who must work with several orders, a situation that is becoming increasingly common as cooperatives and handlers continue to expand their marketing activities into more and more regulated markets. Moreover, the opportunity to effect changes in a relatively large number of orders at the same time made the adoption of a uniform order format a particularly desirable step at this juncture of the order program.

For these same reasons, the new format of order provisions adopted for the other orders likewise should be adopted for the South Texas order.

The South Texas order is set forth in its entirety at the end of this document. The order reflects the revised order format as well as the classification and pricing amendments adopted herein. In adapting the order to the new format, no substantive changes have been made in those provisions not closely related to the classification issue. Since the classification and pricing amendments may be less discernable to the reader with the reprinting of the complete order, the sections in the order that encompass the basic changes in classification and pricing are listed below:

Sections 12–16, 30, 40–44, 50, 52–54, 60, 62, 74–76, and 85.

Some of the amendments adopted herein would change certain procedures under the order that are carried out after the end of the month to which they apply. These include the submission of reports, the classification of milk, and the computation and announcement of certain class prices, butterfat differentials, and producer prices. It is intended, however, that the amendments apply only to that milk handled after the effective date of the changes. Such amendments are not intended to affect the completion of previously existing procedures with respect to milk handled prior to the effectuation of the amendments.

(a) *Revision of the present Class I classification.* With certain exceptions noted below, Class I milk under the South Texas order should include all skim milk and butterfat disposed of in the form of milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milk shake and ice milk mixes containing less than 20 percent total solids. Skim milk and butterfat disposed of in any such product that is flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted likewise should be classified as Class I milk. Such classification should apply whether the products are disposed of in fluid or frozen form.

In addition, Class I milk should include all skim milk and butterfat disposed of in the form of any other fluid or frozen milk product (if not specifically designated as a Class II or Class III use) that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids.

Skim milk disposed of in any product described above that is modified by the addition of nonfat milk solids should be Class I milk only to the extent of the weight of the skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

Class I milk should not include, however, skim milk or butterfat disposed of in the form of such fluid products as evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, those containing by weight less than 6.5 percent nonfat milk solids, or whey.

As a convenience in drafting order provisions, each product designated herein as a Class I product would be defined in the order as a "fluid milk product."[3]

Class I milk also should include any skim milk and butterfat not specifically accounted for in Class II or Class III, other than shrinkage permitted a Class III classification.

Most of the products listed above for inclusion in Class I are now included in this class. When packaged as sterilized products in hermetically sealed metal or glass containers, however, such products are treated as Class II products. The present order also does not differentiate milkshake mixes for classification purposes on the basis of solids content.

The adopted Class I classification would not include several products now classified in the highest class. These include cream, sour cream, sour cream products and half and half. Since June 1973, sour cream and sour cream products have been treated as Class II products on the basis of orders suspending certain provisions of the South Texas order. The classification of the several cream products is discussed under Issue 5(b).

The order also now includes in Class I packaged fluid milk products in inventory at the end of the month. As discussed under Issue 5(f), such inventories would be classified in a lower class under the revised order.

As indicated, milkshake and ice milk mixes containing less than 20 percent total solids should be included in Class I. Such mixes containing a greater percentage of solids should be Class II products.

Milkshake and ice milk mixes are generally marketed through two channels. Limited quantities of such mixes are processed for home consumption, with such mixes being distributed to consumers through food stores and on home delivery routes. The major outlet for milkshake and ice milk mixes, though, is the so-called "soft-serve" trade. Mixes processed for this use are sold to commercial establishments where the product is run through a special freezer and dispensed to the public in a semisoft form.

Milkshake and ice milk mixes are basically similar in composition and purpose to what might be considered as traditional frozen desserts, such as ice cream. Although such shake mixes are intended to be consumed in a semisoft form, or even in a very thick fluid form, they are marketed for essentially the same use as the traditional frozen desserts. This is the case whether such mixes are sold through the "soft-serve" trade or for home use. With minor exception, as noted below, milk used in milkshake and ice milk mixes thus should be classified in the same class as milk used in the traditional frozen desserts. As discussed later in this decision, the classification plan adopted herein includes frozen desserts in Class II.

It is possible that a product very similar in composition and form to chocolate milk could be marketed under the label of a milkshake mix for the purpose of having a lower classification apply to the product. Since such a product actually would have the same general form and purpose as other fluid milk products now classified as Class I under this order, it should be included in the Class I classification. It is necessary, though, to provide some means of distinguishing between such a product and the general category of milkshake mixes that are sold in competition with frozen desserts. For this purpose, the total solids content of the product should be used.

A standard of 20 percent or more total solids should encompass those milkshake and ice milk mixes intended for use as a type of frozen dessert. Mixes with less solids are similar in composition to chocolate milk and other flavored fluid milk products and should be a Class I product.

No exception to the Class I classification of milk should be made for fluid milk products in sterilized form. The sterilization of fluid milk products does not change the form or purpose of such products. As in the case of the unsterilized fluid milk products which they resemble, such sterilized products ars disposed of in fluid form for consumption as a beverage. They are generally intended for use in place of their unsterilized counterparts and are thus competing for the same customers.

Returns to producers for milk disposed of in the form of fluid milk products should be the same whether such products are sterilized or unsterilized. Such products in either form may be marketed for the same beverage use. Classifying all such products in Class I will assure that the returns from producer milk used in sterilized fluid milk products will contribute on the same basis as returns from producer milk used in unsterilized fluid milk products toward inducing an adeqate supply of milk for beverage use.

With the removal of any exception to the Class I classification of milk because of sterilization, specific reference must be made in the "fluid milk product" definition to the exclusion of certain products that otherwise could be construed to fall within such definition. Such products are evaporated or condensed milk or skim milk, formulas in hermetically sealed glass or all-metal containers that are especially prepared for infant feeding or dietary use, and products (such as flavored drinks in "pop" bottles) containing by weight less than 6.5 percent nonfat milk solids. These products are now excluded from the Class I classification and such exclusion should be continued, notwithstanding the fact that they are sold to the public in fluid form. Evaporated milk and condensed milk sold for home use are intended primarily for cooking purposes. They are not consumed normally as a beverage. Infant and dietary formulas, which are being sold in hermetically sealed glass or all-metal containers, are specialized food products prepared for a limited use. Such formulas do not compete with other milk beverages consumed by the general public. Similarly, fluid products containing only a minimal amount of nonfat milk solids are not considered as being in the competitive sphere of the traditional milk beverages.

The present basis for defining a "fluid milk product" should be modified. The primary concern with any fluid milk product definition is that it clearly define the products or types of products that are intended to be included in the definition. The fluid milk product definition adopted herein, which incorporates both the listing of specified products and the use of composition percentages, should meet this requirement.

For simplicity, the fluid milk product definition should continue to list the generic names of those products commonly sold for consumption as beverages. The products listed in the adopted definition encompass most of the forms in which milk for fluid uses is sold. Anyone referring to this fluid milk product definition may easily ascertain in the case of most milk products whether or not a particular product is included in the definition.

A listing of products alone in the fluid milk product definition may not clearly indicate the classification of new milk products developed for fluid consumption. With certain limited exceptions noted, the fluid milk product definition is intended to include all milk products that are distributed for use as beverages. Although a new milk beverage introduced on the market might not be encompassed within the list of named products, it should be treated as a fluid milk product, nevertheless, if its composition is similar to that of the listed products. This will be the result of the standards of product composition for fluid milk products herein adopted.

As indicated, the adopted composition standards would embrace any fluid or frozen milk product not specified as a Class II or Class III product that contains by weight at least 80 percent water and 6.5 percent nonfat milk solids, and less than 9 percent butterfat and 20 percent total solids, including both milk solids and non-milk solids. The 9 percent butterfat standard coincides with the butterfat percentage adopted herein to delineate the mixtures of cream and milk or skim milk to be included in Class II. The total solids and water percentages

[3] The reader should keep in mind that the order does not classify products per se but rather the skim milk and butterfat disposed of in the form of a particular product or used to produce a particular product. To simplify the presentation of the findings and conclusions, however, reference is made in this decision to Class I products, Class II products and Class III products, or to certain products included in a particular class.

V 39 160 MAR 27 74 XUM

represent a reasonable measure of the fluidity of those products that normally are consumed as beverages. The 6.5 percent nonfat milk solids standard is used to exclude from the fluid milk product definition those products which contain some milk solids but which are not closely identified with the dairy industry, such as chocolate flavored drinks in "pop" bottles.

These composition standards are chosen so as to conform as closely as possible to the water, solids and butterfat content of those products specifically listed in the fluid milk product definition, i.e., the traditional milk beverages. It is intended that these standards apply only to milk products, and only to such products that are being marketed for consumption in fluid form. Such standards would not be applied to products such as soups, which are not customarily thought of as milk products, or to products that would be a type of frozen dessert marketed for consumption in frozen form.

In determining whether or not a milk product in fluid form falls within the composition standards of the fluid milk product definition, such standards should be applied to the composition of the product in its finished form, not to the composition of the product on a skim equivalent basis. A new product not intended for beverage use might contain in its finished form somewhat more than the maximum total solids specified for a fluid milk product under the adopted composition standards. On this basis, the product would not fall within the fluid milk product definition. Application of the composition standards to this product on a skim equivalent basis, however, could result in the product meeting such standards and thus being defined as a fluid milk product.

Applying the composition standards to products in the form in which marketed could exclude from the fluid milk product definition a new concentrated fluid product that is intended to be consumed as a beverage only after reconstitution. For the present time, however, the composition standards should be applied to a product in its finished form. A refinement of such standards may be appropriate once there has been an opportunity to evaluate their applicability under actual market conditions.

It should be noted that under the adopted classification provisions accounting for a new product on other than a skim equivalent basis would be limited solely to determining whether or not the product meets the composition standards of the fluid milk product definition. For all other purposes under the order, the product would be accounted for on a skim equivalent basis.

In applying the 6.5 percent nonfat milk solids standard, it is intended that this standard apply to such solids in any form except sodium caseinate. As set forth in the "filled milk" decision applicable to this and other orders, sodium caseinate in any product is treated under the orders as a nonmilk ingredient.[1] There is no basis for changing the procedure.

The use of composition standards as a means of defining fluid milk products should not deter the development of new milk products, as might be contended. Should the Class I classification of a new product appear to be incongruous with the intended use of the product, the hearing process remains as an avenue through which a different classification may be considered.

(b) *Classification and pricing of milk not needed for Class I use.* Two use classes, Class II and Class III, should be provided for skim milk and butterfat utilized for other than Class I purposes. The Class II price should be the basic formula price (Minnesota-Wisconsin manufacturing milk price) for the month plus 10 cents. The price for Class III milk should be the basic formula price for the month.

Class II milk should include skim milk and butterfat disposed of in the form of eggnog, yogurt or a "fluid cream product", i.e., cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients. Any product containing 6 percent or more nonmilk fat (or oil) that resembles any of these products likewise should be in this class. Also, eggnog, yogurt and fluid cream products that are in inventory at the end of the month in packaged form should be in Class II.

Included also in this classification should be skim milk and butterfat used to produce cottage cheese, low fat cottage cheese, dry curd cottage cheese, milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, frozen dessert mixes, any concentrated milk product in bulk fluid form (unless used in a Class III product), plastic cream, frozen cream, anhydrous milkfat, custards, puddings, pancake mixes, and formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

A Class II classification should apply also to bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages.

Class III milk should include skim milk and butterfat used to produce cheese (other than cottage cheese, low fat cottage cheese and dry curd cottage cheese), butter, any milk product in dry form, any concentrated milk product in bulk fluid form that is used to produce a Class III product, evaporated or condensed milk (plain or sweetened) in a consumer-type package, evaporated or condensed skim milk (plain or sweetened) in a consumer-type package, and any product not otherwise specified as a Class I, Class II or Class III product.

Other Class III uses should include bulk and packaged fluid milk products and bulk fluid cream products in inventory at the end of the month, and that portion of modified (by the addition of nonfat milk solids) fluid milk products not included in Class I. Class III should include any fluid milk product or Class II product accounted for on a "disposed of" basis that is used for animal feed, or is dumped if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition. Also, shrinkage within certain limits should be classified as Class III milk.

Under the present South Texas order, skim milk and butterfat utilized for other than Class I purposes is classified in a single class, Class II. The Class II price is the Minnesota-Wisconsin manufacturing milk price (basic formula price) for the month, but not to exceed by more than 10 cents a butter-nonfat dry milk formula price. The product formula price is computed by adding together the values determined by (1) multiplying the average monthly price of Grade A bulk butter at Chicago, less 3 cents, by 4.2 and (2) multiplying the average monthly price of spray process nonfat dry milk in the Chicago area, less 5.5 cents, by 8.5 and then by 0.965.

Before discussing the basis for establishing a new intermediate price class, consideration should be given to the appropriate Class III price under the revised classification plan. This is necessary since the price level for Class III milk bears on what the Class II price should be.

The purpose of adopting a revised classification plan for the South Texas order strongly suggests that the Class III price should be the same as that determined appropriate for the other Texas orders. In developing a uniform classification plan for use among orders generally, producers and handlers alike urged that a particular product be classified in each market in the same class. Although the various parties were not in agreement on the classification scheme that should be adopted, the common purpose of their proposals was the resolution of the many differences among orders in the classification of milk. It was the general consensus that with the burgeoning intermarket sales of various milk products over increasingly wider areas, these differences in classification have been causing undue competitive inequities among handlers in various markets seeking the same outlets for milk.

Any attempt to resolve these competitive inequities through the adoption of a uniform classification plan cannot be

[1] Official notice is taken of the Assistant Secretary's decision issued on October 13, 1969 (34 F.R. 16881), with respect to the Memphis, Tenn., and certain other marketing areas.

divorced from consideration of the prices to be applicable to each class. The classification of milk does nothing more than determine what uses of milk are to be subject to different levels of price. The equity benefits to handlers of using the same classification plan in all markets can be fully realized only if the price for each class is uniform (except for appropriate location adjustments) in all markets.

On the basis of the classification proceedings for 39 markets, including most of the Texas markets, it has been determined that the Minnesota-Wisconsin price should be the Class III price in these markets. Thus, the continued use of the present South Texas Class III price formula, which includes the butter-nonfat dry milk formula price as a Class III price determinant, would nullify much of the intended effectiveness of classifying a particular product in the same class in each market.

In considering the appropriate mechanism for determining the Class III price, it is consistent with the purposes of the statute authorizing milk orders that reserve milk supplies be priced at the highest practicable level compatible with orderly disposal of the milk. Excess market supplies normally must be channeled into manufactured products that compete on a national basis with similar products made from ungraded milk. It is important, therefore, that the price for surplus milk in the regulated market be in close alignment with prices being paid by processors of manufacturing grade milk.

The Minnesota-Wisconsin price is a representative pay price for about half of the manufacturing grade milk in the United States. This price reflects a farm price level determined by competitive conditions that are affected by the demand for all major manufactured dairy products, it also reflects the supply and demand of such products within a highly coordinated marketing system, which is national in scope. Use of the Minnesota-Wisconsin price as the Class III price will result in order prices for surplus milk that are in close alignment with the dominant price structure for raw milk within the manufacturing milk segment of the dairy industry.

Certain uses of producer milk not needed for Class I purposes should be priced at a somewhat higher level than that applicable to milk in the adopted Class III uses. These higher-valued uses, to be included in the Class II classification, were set forth at the beginning of this discussion on pricing surplus milk. The Class II price should be the Minnesota-Wisconsin price plus 10 cents, the same price determined to be appropriate for Class II milk under the 39 orders mentioned earlier.

Of the products adopted herein for inclusion in Class II, the two usually of principal importance on a volume basis are frozen desserts and cottage cheese. For this discussion the term "cottage cheese" encompasses cottage cheese (i.e., creamed cottage cheese), lowfat cottage cheese, and dry curd cottage cheese.

There are several distinguishing production characteristics for cottage cheese and frozen desserts that support a higher price for milk in these proposed Class II uses than for milk channeled into the residual surplus uses. There is little, if any, relationship between the quantity of Class II products made and the amount of reserve milk in a market, as is the case with respect to butter and nonfat dry milk, for instance. The demand for these "soft" products is related closely to the current consumer demand for such products. Unlike the "hard" manufactured products, cottage cheese and frozen desserts have a more limited storage life and must be processed on a regular basis. Thus, as in the case of fluid milk products, handlers normally want adequate supplies of fresh, high-quality producer milk to be made available at their plants at all times for these Class II uses.

Frozen dessert and cottage cheese production is commonly an integral part of the processing operations of fluid milk distributing plants. Such plants are usually located in or near the populated centers of the market. This entails a greater hauling expense for producers than when the reserve milk is processed in the production area, as is generally the case with respect to butter, nonfat dry milk and hard cheese manufacture.

The marketing situation for other proposed Class II uses, such as eggnog, yogurt, custards, puddings, pancake mixes, dietary and infant formulas, and sales of bulk milk and cream to commercial food processors, is essentially the same as for cottage cheese and frozen desserts.

The adopted Class II price (the Minnesota-Wisconsin price plus 10 cents) is a reflection of some of the additional value which producer milk used in these several proposed Class II uses has to regulated handlers. Although local producers represent the regular source of milk for such uses, a handler may choose to use milk from some other source. Such milk could not be obtained on a regular basis, however, at less than the cost of producer milk under the adopted pricing scheme.

It is recognized that an individual handler may find at times that producer milk does not represent the cheapest source of milk for his Class II uses. Presumably the alternative source would be concentrated forms of milk since health regulations would not permit the receipt of ungraded supplies of whole milk at a pool distributing plant, and graded supplies would not be available on a regular basis at less than the Class II price.

Under the revised allocation provisions adopted herein, receipts of nonfluid other source milk such as condensed skim milk or nonfat dry milk that are used in a Class II product would be allocated directly to the handler's Class II uses, with no obligation applying under the order to such milk. Under this arrangement, the handler could choose to use the other source milk without the cost impact of down-allocation should the cost of such milk become less than the cost of producer milk. The handler thus could rely upon whichever source of milk best fits his competitive and operational circumstances.

Rather than produce his own Class II products a handler might choose to purchase the products from some other source. There is no indication, however, that under the adopted pricing, and with similar pricing in nearby regulated markets, such a handler could enhance his competitive position relative to handlers using producer milk. Moreover, the cost of transporting the proposed Class II products from some distant area where a lower product cost might prevail to outlets in the South Texas market would generally negate any seeming price advantage attributable to differences in applicable prices.

Classifying in Class II the several types of cream items, some of which are now in Class I while others are in Class II, will accommodate the industry's desire for a lower price for milk used in cream products and at the same time price at the same level a variety of products that compete with each other. Half and half, whether sterilized or unsterilized, and light cream are used principally by consumers in coffee. Aerated cream and sterilized and unsterilized whipping cream are used as dessert toppings. Both graded and ungraded sour cream and sour mixtures are used by consumers for similar purposes. The same classification for these cream products will result in uniform pricing to handlers for milk used in products competing in the same trade channels for essentially similar uses.

Although the present Class I cream products sold in the South Texas market must be made from inspected milk, which is delivered regularly by producers to distributing plants, it is the position of producers that milk sold in the form of such products should no longer be subject to the Class I price. Relative to the total Class I sales of producer milk, cream products generally represent only a very small percentage of the Class I market. Thus, this classification change will have relatively little effect in total on the returns to producers.

In connection with the reclassification of cream products, it is desirable to define a new term—"fluid cream product". "Fluid cream product" would mean cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

With the reclassification of cream, movements of cream to or from a plant no longer should be considered in determining whether a plant meets the pooling requirements of the order.

The order now provides that any "filled" product containing 6 percent or more nonmilk fat (or oil) shall be in the surplus price class. With the establishment of an intermediate price class, it is appropriate that any such filled products that resemble the proposed Class II products made with milk fat likewise be included in this class. The substitution of nonmilk fat for milk fat in a product

V 39 160 MAR 27 74 XUM

merely changes the composition of the product and not its use. For competitive reasons, a comparable classification of products made with milk fat and their filled counterparts is necessary.

Condensed milk or skim milk in bulk, plastic cream, frozen cream and anhydrous milk fat are "intermediate" products that also should be included in Class II. These products are not end uses in themselves but instead are used in making other products, including frozen desserts and food products such as candy and soup. Under the classification adopted herein, frozen desserts and food products are Class II uses for milk. Accordingly, producer milk used in the several intermediate products likewise should be priced at the Class II level.

Recognition should be given, however, to the possible use of condensed milk or skim milk in making a Class III product. Such products may be processed at times into dried products, which would be a Class III use under the revised classification plan. In this case, the milk used to produce the condensed product should be classified as Class III milk.

Such classification requires, of course, that the condensed product be followed to its ultimate use. Presumably, the final disposition of the condensed product can be easily ascertained when it is moved to a plant containing only drying facilities. Should the condensed product be moved to a plant having mixed processing operations and receipts of condensed milk from different sources, ascertainment of the ultimate use of the condensed product in question may be difficult, if not impossible. To the extent that it can be satisfactorily determined that the ultimate use of the "intermediate" condensed product was in a Class III product, the lowest classification should apply to the producer milk used in the condensed product.

(c) *Other source milk definition.* Because of the revised classification plan, certain changes in the present other source milk definition are necessary. This definition would continue to serve, however, the present function of implementing the identification of various categories of receipts at a regulated plant.

At present, fluid milk products from any source other than producers, cooperatives acting as a handler for farm bulk tank milk, pool plants, and plant inventory at the beginning of the month are considered as other source milk. Under the revised classification plan, however, cream no longer would be defined as a fluid milk product. To facilitate the application of other provisions of the order, it is desirable, nevertheless, that fluid cream products, when in bulk form, continue to be treated in the same manner as fluid milk products for purposes of applying the other source milk definition.

Other source milk also should include any receipts in packaged form of fluid cream products, eggnog or yogurt (or any filled product resembling such products). These are Class II products under the revised classification plan. As provided herein, such receipts of other source milk would be allocated directly to the handler's Class II utilization, rather than being allocated to the extent possible to the handler's lowest utilization as is provided in some cases for other types of other source milk. Thus, no handler obligation would apply under the provisions adopted herein to these receipts of packaged Class II products.

The order should provide that products manufactured in a pool plant during the month and then reprocessed, converted into, or combined with another product in the same plant during the same month not be defined as other source milk. A typical processing operation would be for a handler to make condensed skim milk from producer milk and then use the condensed product in making ice cream. It is intended under this situation that the producer milk be considered as having been used to produce ice cream. The condensing operation is merely one of the steps performed by the handler in processing ice cream from raw milk.

It is recognized that there might be some difficulty in determining the source of the condensed skim milk that is reprocessed in the plant should a handler use during the month condensed skim milk not only from his current condensing operation but perhaps from inventory held over from the previous month or purchases from another plant. If this situation arises, the condensed skim milk produced in the plant during the current month should be considered as having been reprocessed first before any condensed skim milk from other sources.

(d) *Accounting for nonfat milk solids added to milk and milk products.* Certain changes should be made in the present method of classifying the skim milk equivalent of nonfat milk solids added to certain products.

Currently, the order provides that a modified fluid milk product shall be classified as Class I in the amount of the weight of an equal volume of an unmodified product of the same nature and butterfat content. The remaining skim milk equivalent of the nonfat milk solids in such product is classified in the lowest class. This procedure should be continued in the case of those products that would be defined as fluid milk products.

Under the new classification plan, cream products now defined as fluid milk products would be included instead in Class II. Because it is not intended that Class II outlets be protected in any way for producers, there is not the same economic basis for classifying modified Class II products in the manner just described. Accordingly, the order should provide in the case of modified Class II products, such as half and half and light cream, that the entire weight of the skim milk equivalent of the solids added be classified in Class II. This procedure would differ from that applicable to modified fluid milk products in that no part of the skim milk equivalent of the added solids would be classified in the lowest class. As described in detail later, nonfat dry milk or condensed milk that is added to a Class II product would be allocated directly to the handler's Class II use. Thus, classification of the entire skim milk equivalent in Class II would not affect adversely the handler's pool obligation under the allocation procedure.

(e) *Classification of milk transferred or diverted to other plants.* Certain changes should be made in the provisions of the order that prescribe the classification of fluid milk products transferred or diverted from a pool plant to another plant. Several of the changes become necessary with the adoption of three classes of utilization in place of the present two classes. Other changes are appropriate for purposes of uniformity among orders and clarity in the classification of milk.

Under the adopted classification plan, fluid cream products would be classified as Class II products. If such products are transferred to another plant in packaged form, the skim milk and butterfat contained therein should be classified as Class II milk since these items are moved in final form. The classification of fluid cream products when disposed of in bulk form, however, is determinable only by following the movement of the bulk product to its subsequent use. Thus, it is necessary that fluid cream products that are transferred in bulk form from a pool plant to another plant be classified in a manner similar to that now used in classifying transfers of bulk fluid milk products.

The order now prescribes a procedure for classifying transfers of bulk fluid milk products from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant or an exempt governmental agency plant. To determine such classification, the nonpool plants' utilization must be assigned to its receipts of milk from each source. Some amplification of this procedure is appropriate to set forth clearly the priority for assigning the different types of plant use to the different sources of fluid milk products and bulk fluid cream products received at the nonpool plant.

Under the adopted assignment priorities, the first step is to assign the nonpool plant's Class I utilization to its receipts of packaged fluid milk products from all federally regulated plants. Such receipts should receive first priority on the nonpool plant's Class I use since all orders provide that such packaged transfers from a pool plant to an unregulated nonpool plant shall be classified as Class I milk. Thus, any Class I route disposition of the nonpool plant in the marketing area of a Federal order, and any transfers of packaged fluid milk products from the nonpool plant to plants fully regulated under such order, would be assigned, first, to the nonpool plant's receipts of packaged fluid milk products from plants fully regulated under such order and, second, to any such remaining packaged receipts from plants fully regulated under other Federal orders.

A similar assignment of any such remaining disposition (i.e., the aforesaid Class I route disposition and transfers of packaged fluid milk products) then would be made to the nonpool plant's receipts of bulk fluid milk products from

pool plants and other order plants. Any other Class I disposition of packaged fluid milk products from the nonpool plant, such as route disposition in unregulated areas, would be assigned to any remaining unassigned receipts of packaged fluid milk products at the nonpool plan from plants fully regulated under any Federal order.

After these assignments, any Class I use at the nonpool plant that is attributable to the Class I allocation at a Federal order plant of fluid milk products transferred in bulk from the nonpool plant to the regulated plant would be assigned next. Such use would be assigned, first, to the nonpool plant's remaining unassigned receipts of fluid milk products from plants fully regulated under that order and, second, to any such remaining receipts from plants fully regulated under other orders.

Additional unassigned Class I utilization at the nonpool plant then would be assigned to the plant's receipts of Grade A milk from dairy farmers and unregulated nonpool plants that are determined to be regular sources of Grade A milk for the nonpool plant. Any remaining unassigned receipts of fluid milk products at the nonpool plant from plants fully regulated under any order would be assigned to any of the nonpool plant's remaining Class I utilization, then to its Class II utilization, and then to its Class II utilization.

Following these assignments, any receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants would be assigned to the nonpool plant's remaining unassigned utilization in each class. Such assignment would be made in sequence beginning with the lowest class.

In determining the classification of any transfers or diversions from a pool plant to a nonpool plant, the utilization of any transfers from the nonpool plant to another unregulated nonpool plant also must be established. In this case, the same assignment priorities just outlined should apply also at the second nonpool plant.

Certain changes should be made in the order concerning the classification of products transferred from a pool plant to a producer-handler. Under the revised classification plan, bulk fluid cream products transferred from a pool plant to a producer-handler should be assigned to the extent possible to the latter's Class III use, and then Class II use. If the producer-handler does not have enough utilization in these classes to cover such transfers, any remaining transfers should be classified as Class I milk.

As in the case of all other fluid milk products, such transfers of cream are now classified as Class I milk. Such classification tends to assure that producers do not carry for producer-handlers the burden of maintaining reserve supplies for the Class I sales of producer-handlers. With the removal of cream from the Class I classification, as adopted herein, a mandatory Class I classification of cream transfers to producer-handlers would not be necessary for this purpose.

The order also should provide that fluid milk products transferred from a pool plant to a producer-handler under another order be classified as Class I milk. This classification now applies only with respect to such transfers made on an intramarket basis.

Under orders generally, producer-handlers, in their capacity as handlers, have been exempt from the pricing and pooling provisions of the various orders. In consideration of this exemption, each order requires a Class I classification of all fluid milk products that are transferred from a pool plant to a producer-handler as defined under that particular order. Inasmuch as the producer-handler exemption under each order is predicated on essentially the same basis, a Class I classification of milk transferred from a pool plant regulated under the South Texas order to a producer-handler as defined under another order would be in keeping with the general basis for producer-handler exemption.

In addition to the Class I classification of all fluid milk products transferred from a pool plant to a producer-handler, the South Texas order provides for a similar classification of all fluid milk products transferred to a governmental agency plant. Such plants are exempt from the pooling and pricing provisions of the order in much the same manner as producer-handlers. It is appropriate, therefore, that the adopted method for classifying bulk fluid cream products transferred to a producer-handler likewise apply to transfers of bulk fluid cream products to government-operated plants.

(f) *Classification of end-of-month inventory.* Under the revised classification plan, fluid milk products in either packaged or bulk form that are in a handler's end-of-month inventory should be classified as Class III milk. Such inventory should be subject in the following month to reclassification in a higher class. Ending inventory of fluid cream products, eggnog and yogurt, when held in bulk form, likewise should be classified in Class III and subject to reclassification. Such products held in packaged form at the end of the month should be classified as Class II milk.

Presently, the South Texas order classifies all ending inventories of fluid milk products in bulk form in the lowest class. A Class I classification applies to such inventories in packaged form. In the latter case, a handler's obligation for the Class I inventory is adjusted in the following month by whatever amount the Class I price in such month changes from the Class I price level initially applicable to the inventory. This assures that such inventory is priced on a current basis when disposed of on routes.

In the interest of establishing uniform classification provisions among the Texas orders, the present procedure for classifying end-of-month inventory should be changed to conform with that determined appropriate for the other orders. This will have no consequential impact on the market since either type of inventory classification procedure results over the long run in essentially the same pool obligation for handlers and the same returns to producers. Under the adopted procedure, ending inventories of fluid milk products would be subject in the following month to reclassification in a higher class, as determined through the allocation of a handler's receipts to his utilization. A charge to the handler at the difference between the Class III price for the preceding month and the Class I or Class II price, as applicable, for the current month would apply to any reclassified inventory. This is the same reclassification procedure that now applies under the order to inventories of fluid milk products in bulk form.

Fluid cream products in bulk form that are on hand at the end of the month likewise should be classified in Class III. As in the case of bulk milk, the final use of cream being held in bulk form is not necessarily apparent from that form. The cream must be followed to its ultimate use, which may be in any class. Accordingly, it is reasonable to classify any closing inventory of bulk cream in Class III and then apply a reclassification charge should the cream, as beginning inventory the following month, be allocated to a higher class.

Fluid cream products, yogurt, and eggnog that are on hand in packaged form at the end of the month should be classified in Class II, the class of expected ultimate use, rather than in Class III as would be the case for ending inventories of such products in bulk form. The higher classification will accommodate the treatment adopted herein whereby such products that are received at a pool plant in packaged form and disposed of in the same packages would be permitted to "pass through" the plant without any pool obligation or downallocation. In this connection, the ending Class II inventory, as Class II inventory on hand at the beginning of the following month, would be allocated in the following month directly to the handler's Class II utilization.

For the first month that the revised classification plan is effective, certain transitional provisions relating to inventory should apply. This is necessary since the classification of ending inventory in the month preceding the order changes would differ from the classification of inventory under the new plan.

Under the new plan, beginning inventories of fluid milk products and, for the first month, all fluid cream products would be allocated to the extent possible to Class III. This allocation assumes that such inventories were priced at the lowest class price in the preceding month. Since such inventories in packaged form will have been classified as Class I milk and priced at the preceding month's Class I price, however, handlers should receive a credit on such packaged inventories equal to the difference between the Class I and Class II prices for

V 39 160 MAR 27 74 XUM

the preceding month. If a higher classification results through the allocation procedure, the appropriate reclassification charge would apply.

Also under the new plan, beginning inventories of fluid cream products in packaged form normally would be allocated directly to a handler's Class II utilization. Such allocation assumes that the products were priced at the Class II price in the preceding month. As just described, an adjustment would be made in the first month under the new plan which would result in such inventories, in effect, having been priced in the preceding month at the Class III price. Therefore, such inventories should be allocated in the first month to the extent possible to Class III, as in the case of inventories of fluid milk products and bulk fluid cream products. A reclassification charge should apply if a higher classification results.

(g) *Classification of shrinkage, milk dumped, and milk disposed of for animal feed.* For purposes of uniformity among orders, the South Texas order provisions for classifying skim milk and butterfat dumped, disposed of for animal feed, or in shrinkage should conform to those determined appropriate for the other Texas orders. This will not result in any significant classification changes.

As at present, shrinkage would continue to be classified under the new three-class system in the lowest class (subject as now to certain limitations). Also, dumpage and animal feed dispositions would continue to be included in the lowest class. The products covered by the dumpage and animal feed provisions would be limited to fluid milk products, fluid cream products, eggnog, yogurt and similar filled products. Because of their relatively limited shelf life, it is these products that are commonly found in route returns and for which handlers realize little, if any, monetary value. Such provisions also would apply to skim milk being used in the manufacture of cottage cheese but which must be dumped because of a failure in the culturing process.

(h) *Allocation of receipts to utilization.* In adopting a revised classification plan for the South Texas order, conforming changes must be made in the provisions that prescribe ho wa handler's provisions that prescribe how a handler's allocated to his utilization for the purpose of classifying producer milk. Since the order now provides for only two classes of utilization, changes are necessary to provide for the allocation of receipts to three classes. Also, the order must be changed with respect to the allocation of beginning inventories, as previously described.

The adoption of three use classes requires a new consideration of how other source milk shall be allocated to a handler's utilization of milk. Under the present order, other source milk is allocated in most cases to a handler's surplus uses to the extent possible, regardless of how it actually may have been used. The producers who are relied upon for a regular supply of milk for the local fluid market thus receive the highest possible classification of their milk. Depending on the supply conditions, milk from unregulated supply plants and other Federal order plants is permitted to share in varying degrees with local producer milk in the higher value of the handlers' Class I sales.

In conjunction with the revised classification plan, however handlers using certain types of other source milk (whether in the form received or in reconstituted form) in the processing of Class II products should be permitted to have such other source milk allocated directly to their Class II uses. Under the plan adopted herein, such other source milk to which direct allocation could apply would be limited to milk products (such as nonfat dry milk and condensed milk or skim milk) that are not fluid milk products or fluid cream products.

In establishing a new intermediate price class, it is not intended that this outlet for producer milk necessarily be reserved for local producers. This new use class merely recognizes that some additional value attaches to producer milk used by regulated handlers in the Class II products. Pricing this milk at a level above the Class III price serves also to reduce the burden on the Class I price of attracting a supply of producer milk for the Class I market. It is not intended that producer returns be enhanced for the purpose of also attracting a full supply of producer milk for handlers' Class II uses. Accordingly, no obligation to the pool (commonly known as a compensatory payment) would be imposed under the revised classification plan on any other source milk which regulated handlers may use in Class II or on any Class II product that may be distributed in the market by nonpool plants, either directly on routes or through pool plants.

As long as the Class II price for producer milk remains in proper relationship with the cost of alternative supplies, it is not expected that this direct allocation of nonfluid other source milk to Class II will induce handlers to use other source milk in preference to producer milk to any greater extent than presently for processing Class II products. Under the adopted Class II price, producers would represent in most circumstances the most economical source of milk for Class II use.

No provision should be made for the direct allocation to a handler's Class II utilization of other source milk received in fluid form. Unlike the handling of nonfat dry milk, it would not be unusual for a handler to commingle in his plant receipts of fluid other source milk with his receipts of producer milk. In this circumstance, it would not be possible to know just how much of the other source milk may have been used in the processing of a Class II product. The difficulty which a handler would have in demonstrating that he actually used fluid other source milk in a Class II product, and the administrative difficulty in verifying such claimed use, warrants the allocation of such milk in essentially the same manner as now provided by the order.

In this connection, it should be noted that under the revised classification plan the order would provide for the specific allocation to a handler's Class II and Class III utilization of any receipts of bulk fluid milk products from an other order plant or an unregulated supply plant for which the handler requests a Class II or Class III classification. Such receipts would be allocated to the extent possible first to the handler's Class III utilization and then to his Class II utilization. This would be the case even if a Class II classification were requested by the handler.

The allocation procedure now used for handlers who operate two or more pool plants regulated under the South Texas order should be modified somewhat to conform with the procedure determined appropriate for other orders. The order should provide that for purposes of allocating a multiple-plant handler's receipts to his utilization, the operations at each of his pool plants shall be considered separately. As is the case now, however, those receipts of other source milk from unregulated supply plants and other Federal order plants eligible to share with producer milk in a handler's Class I utilization should be allocated on the basis of the handler's total plant system. This procedure is quite similar to that used under the present order. The order now requires, however, that if there are receipts of other source milk at any one of the plants that are to be prorated with producer milk to the plant's Class I utilization, all allocations of the handler's receipts to his utilization shall be done on the basis of his total system.

Conditions in the South Texas market do not require the use of an allocation procedure that differs from the procedure used in other Texas markets. Handlers may be subject at different times to the regulatory provisions of different orders. Applying the allocation provisions uniformly among all orders will reduce unnecessary regulatory differences that may be experienced by these handlers. There would be little, if any, change in a handler's total obligation under the order, or in producer returns, from applying the adopted allocation procedure in this market.

As indicated, the order now provides that certain receipts of milk from unregulated supply plants and other Federal order plants shall share in varying degrees with local producer milk in the receiving handler's Class I utilization at all of his pool plants combined. This procedure, which resulted from the so-called "compensatory payment" decisions issued in 1964 and which was included in the South Texas order when it was later promulgated, should be continued.[5] To implement this procedure, several additional allocation steps must be provided in this order.

The additional allocation steps establish a procedure whereby the milk from unregulated supply plants and other order plants will continue to be classified on the basis of the handler's total system, but will be assigned to classes at the pool plant of actual receipt. Under this procedure, the situation may arise where there is not enough utilization in a specific class at the plant of actual receipt to which such other source milk must be assigned (as determined from receipts and utilization of his entire system). In this case, an accounting technique is used for increasing the utilization in such class at the plant of actual receipt and making a corresponding reduction in the same class at one or more of the other pool plants in this system. This technique does not result, however, in changing the amount of milk to be accounted for at each plant, or the classification of milk within the handler's entire system.

(i) *Reports.* The proposed changes in the classification of milk are not expected to require any major change in the amount of information to be submitted by handlers in their monthly reports of receipts and utilization. The reporting provisions should be changed, however, to reflect the new categories of information that the market administrator will need in administering the order. These changes stem largely from the proposed reclassification of cream and the revised accounting methods necessary for implementing a three-class classification scheme.

As proposed herein, the reporting provisions would be stated in slightly less detail than is now the case. The market administrator would have, nevertheless, no less authority than at present to obtain through handler reports, in the detail and on forms prescribed by the market administrator, any information the latter believes is necessary for administration of the order.

(j) *Changing the butterfat differentials.* A single butterfat differential should apply under the order for adjusting prices to the actual butterfat content of the milk being priced. This differential should be the Chicago butter price multiplied by 0.115, rounded to the nearest one-tenth cent. The Chicago butter price, now used under the order, is the simple average of the wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade A (92-score) bulk butter at Chicago as reported for the month by the U.S. Department of Agriculture.

Various butterfat differentials are now provided by the South Texas order for adjusting Class I, Class II and uniform prices. The Class I butterfat differential is computed by multiplying the Chicago butter price for the preceding month by 0.125. The Class II differential is based on the butter price for the current month times a factor of 0.115. The butterfat differential used in adjusting the uniform price to producers is the average of the butterfat differentials for each class weighted by the proportion of producer butterfat in each class.

[5] Official notice is taken of the Assistant Secretary's decisions issued on June 19, 1964 (29 F.R. 9002, 9110, and 9213) with respect to all milk orders then in effect.

Use of the single butterfat differential adopted herein will coordinate the pricing of milk under the South Texas order with such pricing under the other Texas orders. Unless a common butterfat differential is used, there would not be the complete uniformity in pricing among orders that is intended under a uniform classification plan.

Under the concept that all class prices should be adjusted by the same butterfat differential, it is necessary that the order provide only for a producer butterfat differential. No handler butterfat differentials for adjusting class prices need be set forth as such in the order, nor is there any need to pool the value of butterfat in each class. All producer "differential" butterfat received by handlers would be priced the same to all handlers regardless of the class in which the butterfat is used. There is no reason for handlers to be less aware under this procedure of what the cost of milk is in each class than under the present order provisions. Any adjustment of class prices that a handler may wish to make to reflect a certain butterfat content can be done merely by using the butterfat differential used to adjust pay prices to producers.

(k) *Uniform equivalent price provisions.* The "equivalent price" provision of the order should be changed to conform with the equivalent price provision determined appropriate for the other Texas orders. This will further assure uniformity of prices among the several orders.

An equivalent price provision is necessary to provide a price, or price constituent, in cases where published prices, quotations or other pricing constituents as may be prescribed by the order are not available.

If there were insufficient trading during the month in butter, for example, or if the specific butter price quotations were discontinued, the prescribed butterfat differential could not be computed without an equivalent price provision. By providing for the determination of an equivalent price as needed, the Department is in a position to draw on comprehensive resource data to assure that the computation of the butterfat differential, as well as the basic formula price and class prices, is not interrupted by the contingencies cited.

In providing for a determination of equivalent price, the same objective is sought for each order. It is appropriate, therefore, to provide for identical provisions in each order. Then, if a determination has to be made for more than one order simultaneously, there would be no question as to the applicability of the determination to each order.

Accordingly, the equivalent price provision in the order should be stated as follows:

"If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required."

6. *Need for omitting the recommended decision.* The timely execution of the function of the Secretary concerning Issue 5 does not require the omission of a recommended decision and opportunity for exceptions thereto.

Proponents of the revised classification plan for the South Texas order urged that the recommended decision be omitted to assure that such plan could be made effective concurrently with the effectuation of similar plans for the other Texas markets. Final action on the proposed amendments for the other Texas orders, however, has not yet been taken, and no date when such amendments, if issued, would become effective has been announced. It is concluded that the issuance of a recommended decision on the South Texas classification issue will not prevent the amendment of all the Texas orders at the same time.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling

V 39 160 MAR 27 74 XUM

of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

RECOMMENDED MARKETING AGREEMENT AND ORDER AMENDING THE ORDER

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the South Texas marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

PART 1121—MILK IN SOUTH TEXAS MARKETING AREA

Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1121.1 General provisions.

DEFINITIONS

1121.2 South Texas marketing area.
1121.3 Route disposition.
1121.4 Plant.
1121.5 Distributing plant.
1121.6 Supply plant.
1121.7 Pool plant.
1121.8 Nonpool plant.
1121.9 Handler.
1121.10 Producer-handler.
1121.11 [Reserved]
1121.12 Producer.
1121.13 Producer milk.
1121.14 Other source milk.
1121.15 Fluid milk product.
1121.16 Fluid cream product.
1121.17 Filled milk.
1121.18 Cooperative association.

HANDLER REPORTS

1121.30 Reports of receipts and utilization.
1121.31 Payroll reports.
1121.32 Other reports.

CLASSIFICATION OF MILK

1121.40 Classes of utilization.
1121.41 Shrinkage.
1121.42 Classification of transfers and diversions.
1121.43 General classification rules.
1121.44 Classification of producer milk.
1121.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1121.50 Class prices.
1121.51 Basic formula price.
1121.52 Plant location adjustments for handlers.
1121.53 Announcement of class prices.
1121.54 Equivalent price.

UNIFORM PRICE

Sec.
1121.60 Handler's value of milk for computing uniform price.
1121.61 Computation of uniform price.
1121.62 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1121.70 Producer-settlement fund.
1121.71 Payments to the producer-settlement fund.
1121.72 Payments from the producer-settlement fund.
1121.73 Payments to producers and to cooperative associations.
1121.74 Butterfat differential.
1121.75 Plant location adjustments for producers and on nonpool milk.
1121.76 Payments by handler operating a partially regulated distributing plant.
1121.77 Adjustment of accounts.
1121.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1121.85 Assessment for order administration.
1121.86 Deduction for marketing services.

ADVERTISING AND PROMOTION PROGRAM

1121.110 Agency.
1121.111 Composition of Agency.
1121.112 Term of office.
1121.113 Selection of Agency members.
1121.114 Agency operating procedure.
1121.115 Powers of the Agency.
1121.116 Duties of the Agency.
1121.117 Advertising, Research, Education and Promotion Program.
1121.118 Limitation of expenditures by the Agency.
1121.119 Personal liability.
1121.120 Procedure for requesting refunds.
1121.121 Duties of the market administrator.
1121.122 Liquidation.

AUTHORITY: Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

GENERAL PROVISIONS

§ 1121.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

§ 1121.2 South Texas marketing area.

"South Texas marketing area", hereinafter called the "marketing area", means all territory, including all piers, docks, and wharves connected therewith, and all craft moored thereat, and territory occupied by Government (municipal, State or Federal) reservations, installations, institutions, or other similar establishments, within the boundaries of the following counties, all in the State of Texas:

Angelina.	Liberty.
Austin.	Madison.
Brazoria.	Matagorda.
Brazos.	Montgomery.
Chambers.	Nacogdoches.
Colorado.	Newton.
Fort Bend.	Orange.
Galveston.	Polk.
Grimes.	San Jacinto.
Hardin.	Trinity.
Harris.	Tyler.
Houston.	Walker.
Jackson.	Waller.
Jasper.	Washington.
Jefferson.	Wharton.

§ 1121.3 Route disposition.

"Route disposition" means any delivery (including any delivery by a vendor or disposition at a plant store) of fluid milk products classified as Class I milk, other than a delivery to a plant.

§ 1121.4 Plant.

"Plant" means the land, buildings, facilities, and equipment constituting a single operating unit or establishment at which milk or milk products (including filled milk) are received, processed and/or packaged. Separate facilities used only as a reload point for transferring bulk milk from one tank truck to another shall not be a plant under this definition if the milk transferred at such facilities can be identified as receipts from specific farmers until the milk is received at a plant. Facilities used only as a distribution point for storing fluid milk products in transit for route disposition shall not be a plant under this definition.

§ 1121.5 Distributing plant.

"Distributing plant" means a plant approved by any duly constituted State or municipal health authority, or acceptable to any agency of the State or Federal Government for the disposition of Grade A fluid milk products in the marketing area, at which milk products are received, processed and/or packaged, and from which there is route disposition of fluid milk products in the marketing area.

§ 1121.6 Supply plant.

"Supply plant" means any plant approved by an appropriate health authority to supply fluid milk for distribution as Grade A milk in the marketing area and from which fluid milk products are moved to a distributing plant.

§ 1121.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) Any distributing plant from which during the month there is:

(1) Route disposition, except filled milk, in the marketing area equal to 10 percent or more of the receipts of Grade A milk at such plant; and

(2) Total route disposition, except filled milk, equal to 50 percent or more of the receipts of Grade A milk at such plant.

(b) A supply plant:

(1) During any month in which 50 percent or more of the receipts of Grade A milk from dairy farmers and handlers pursuant to § 1121.9(c) at such plant is moved as fluid milk products, except filled milk, in bulk to pool distributing plants; or

(2) During each of the months of January through August, if such plant was a pool plant pursuant to paragraph (b)(1) of this section during each of the immediately preceding months of September through December, unless the operator of such plant had filed with the market administrator before the first day of any month a written request that such plant not be a pool plant for each month through August during which it does not otherwise qualify as a pool plant.

(c) Any plant operated by a cooperative association which has been approved by any duly constituted State or municipal health authority and at which milk is received from dairy farmers

holding permits or authorization from such health authority, and at least 50 percent or more of the producer milk of members of such cooperative association is physically received during the month at pool plants of other handlers described in paragraph (a) of this section or is transferred to such pool plants from a plant of the cooperative association.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A governmental agency plant;

(3) A plant meeting the requirements of paragraph (a) of this section which also meets the pooling requirements of another Federal order and from which, the Secretary determines, there is a greater quantity of route disposition, except filled milk, during the month in such other Federal order marketing area than in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month, it shall continue to be subject to all the provisions of this part until the third consecutive month in which a greater proportion of its route disposition is made in such other marketing area unless, notwithstanding the provisions of this subparagraph, it is regulated under such other order;

(4) A plant meeting the requirements of paragraph (a) of this section which also meets the pooling requirements of another Federal order on the basis of route disposition in such other marketing area and from which, the Secretary determines, there is a greater quantity of route disposition, except filled milk, during the month in this marketing area than in such other marketing area but which plant is, nevertheless, fully regulated under such other Federal order; and

(5) A plant meeting the requirements of paragraph (b) of this section which also meets the pooling requirements of another Federal order, and either qualifies as a fully regulated distributing plant under such other Federal order subject to paragraph (d) (3) and (4) of this section, or from such plant greater qualifying shipments are made as a supply plant during the month to plants regulated under such other order than are made to plants regulated under this part, except that this subparagraph shall not apply during the months of January through August if such plant retains automatic pooling status under this part pursuant to paragraph (b) (2) of this section.

§ 1121.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another Federal order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Unregulated supply plant" means a nonpool plant from which fluid milk products are moved to a pool plant during the month but which is neither an other order plant, a governmental agency plant, nor a producer-handler plant.

(d) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant, a governmental agency plant, nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units (other than to pool plants) in the marketing area during the month.

(e) "Governmental agency plant" means a plant owned and operated by a governmental agency or establishment which processes or packages milk or filled milk that is distributed in the marketing area. Such plant shall be exempt from all provisions of this part.

§ 1121.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to producer milk which it causes to be diverted pursuant to § 1121.13 for the account of such cooperative association;

(c) Any cooperative association with respect to milk of its producer members which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by or under contract to, such cooperative association;

(d) Any person in his capacity as the operator of a partially regulated distributing plant;

(e) A producer-handler; or

(f) Any person in his capacity as the operator of an other order plant from which there is route disposition in the marketing area.

§ 1121.10 Producer-handler.

"Producer-handler" means any person who:

(a) Produces milk and operates a distributing plant;

(b) Receives no milk from other dairy farmers;

(c) Disposes of no other source milk (except that represented by nonfat solids used in the fortification of fluid milk products) as Class I milk;

(d) Receives from pool plants not more than a total of 5,000 pounds of fluid milk products during the month or 5 percent of his Class I disposition, whichever is less; and

(e) Furnishes satisfactory proof to the market administrator that the maintenance, care and management of all dairy animals and other resources necessary to produce the entire amount of fluid milk handled (excluding transfers from pool plants) and the operation of the plant are each the personal enterprise of and at the personal risk of such person.

§ 1121.11 [Reserved]

§ 1121.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk approved for consumption as Grade A milk by any duly constituted State or municipal health authority which is:

(1) Received at a pool plant; or

(2) Diverted by a handler for his account pursuant to the provisions of § 1121.13.

(b) "Producer" shall not include:

(1) A governmental agency which operates a plant exempt pursuant to § 1121.8(e);

(2) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(3) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1121.44(a)(8)(iii) and the corresponding step of § 1121.44(b); and

(4) Any person with respect to milk produced by him which is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order.

§ 1121.13 Producer milk.

"Producer milk" means skim milk and butterfat for each handler's account in milk from producers as follows:

(a) With respect to operations of a pool plant:

(1) Received directly from such producers;

(2) Received from a handler described in § 1121.9(c); and

(3) Diverted by the operator of such pool plant to a nonpool plant that is not a producer-handler plant nor a governmental agency plant for his account, subject to the conditions of paragraph (c) of this section.

(b) With respect to additional receipts by a cooperative association handler:

(1) Diverted by such cooperative association from the pool plant of another handler to a nonpool plant that is not a producer-handler plant nor a governmental agency plant for the account of such cooperative association, subject to the conditions of paragraph (c) of this section; and

(2) Received by such cooperative association from producers' farms as a handler described in § 1121.9(c) in excess of the quantity delivered to pool plants pursuant to paragraph (a)(2) of this section.

(c) With respect to diversions to nonpool plants:

(1) A cooperative association may divert for its account a total quantity of milk not in excess of one-third of the total producer milk of its members received at all pool plants during the month. Diversions in excess of such

V 39 160 MAR 27 74 XUM

quantity shall not be producer milk and the diverting cooperative shall specify the dairy farmers whose diverted milk is ineligible as producer milk. If the cooperative association fails to designate such producers, producer milk status shall be forfeited with respect to all milk diverted by such cooperative association;

(2) A handler operating a pool plant may divert for his account milk of producers other than members of a cooperative association diverting milk pursuant to paragraph (c)(1) of this section, in a total quantity not in excess of one-third of the milk at such pool plant during the month from producers who are not members of such a cooperative association. Milk diverted in excess of such quantity shall not be producer milk and the diverting handler shall specify the dairy farmers whose diverted milk is ineligible as producer milk. If a handler fails to designate such producers, producer milk status shall be forfeited with respect to all milk diverted by such handler and;

(3) For the purposes of location adjustments pursuant to §§ 1121.52 and 1121.75, diverted milk shall be priced at the location of the nonpool plant to which diverted.

§ 1121.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1121.40(b)(1) from any source other than producers, handlers described in § 1121.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1121.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1121.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1121.40(b)(1)) for which the handler fails to establish a disposition.

§ 1121.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form:

(1) Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package) or reconstituted; and

(2) Any milk product not specified in paragraph (a)(1) of this section or in § 1121.40 (b) or (c)(1) (i) through (v) if it contains by weight at least 80 percent water and 6.5 percent nonfat milk solids and less than 9 percent butterfat and 20 percent total solids.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1121.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

§ 1121.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1121.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales or marketing milk or its products for its members.

HANDLER REPORTS

§ 1121.30 Reports of receipts and utilization.

On or before the seventh day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1121.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1121.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1121.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1121.31 Payroll reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1121.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1121.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1121.32 Other reports.

(a) Each handler who causes milk to be diverted for his account directly from producers' farms to a nonpool plant shall, prior to such diversion, report to the market administrator and to the cooperative association of which such producer is a member his intention to divert such milk, the proposed date or dates of such diversion, and the plant to which such milk is to be diverted.

(b) In addition to the reports required pursuant to paragraph (a) of this section §§ 1121.30 and 1121.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

§ 1121.40 Classes of utilization.

Except as provided in § 1121.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1121.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraph (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form other than that specified in paragraph (c)(1)(iv) of this section;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk, fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1121.15; and

(6) In shrinkage assigned pursuant to § 1121.41(a) to the receipts specified in § 1121.41(a)(2) and in shrinkage specified in § 1121.41 (b) and (c).

§ 1121.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1121.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant and milk received from a handler described in § 1121.9(c));

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1121.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1121.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1121.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless both handlers request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1121.44(a)(12) and the corresponding step of § 1121.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1121.44(a)(7) or the corresponding step of § 1121.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1121.44(a)(11) or (12) or the corresponding steps of § 1121.44(b), the skim milk or butterfat so transferred, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream

V 39 160
MAR 27 74
XUM

product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1121.40.

(c) *Transfers to producer-handlers and governmental agency plants.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order or a governmental agency plant shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to its receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a governmental agency plant, or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1121.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for vertification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plan and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(c) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this subparagraph.

§ 1121.43 General classification rules.

In determining the classification of producer milk pursuant to § 1121.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1121.30 and shall compute separately for each pool plant and for each cooperative association with respect to milk for which it is the handler pursuant to § 1121.9 (b) or (c) the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1121.40, 1121.41, and 1121.42;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1121.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1121.44 Classification of producer milk.

For each month the market administrator shall determine the classification of producer milk of each handler described in § 1121.9(a) for each of his pool plants separately and of each handler described in § 1121.9 (b) and (c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1121.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1121.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1121.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This subparagraph shall apply only if the pool plant was subject to the provisions of this subparagraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1121.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1121.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from a governmental agency plant;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (c) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(c) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1121.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11) (i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this subparagraph exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the

V 39 60 MAR 27 74 XUM

handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be substracted from Class I pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1121.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceeds the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1121.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1121.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1121.44(a)(12) and the corresponding step of § 1121.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1121.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report the milk so received shall be prorated to each class in the proportion that the total receipts of milk from producers by such handler were used in each class.

Class Prices

§ 1121.50 Class prices.

Subject to the provisions of § 1121.52, the class prices for the month per hundredweight of milk containing 3.5 percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $2.68.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1121.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1121.52 Plant location adjustments for handlers.

(a) For that milk which is received from producers at a pool plant located (1) in Fayette County, Tex., or (2) north of U.S. Highway 90 and 60 miles or more from the nearer of the city halls in Beaumont and Houston, Tex., by the shortest hard-surfaced highway distance, as determined by the market administrator, and which is classified as Class I milk subject to the limitations of paragraph (c) of this section, the price specified in § 1121.50(a) shall be reduced 1.5 cents per 10 miles of distance or fraction thereof that such plant is located from the Houston city hall by shortest hard-surfaced highway distance as determined by the market administrator: *Provided*, That the location adjustment at a plant located in Gregg, Harrison, or Smith Counties, Tex., shall be minus 30 cents and that the location adjustment pursuant to this paragraph for any plant located in Zone I as defined in the North Texas order, Part 1126, shall not result in a price less than the applicable Class I price at such plant location pursuant to the North Texas order.

(b) For that milk which is received from producers at a pool plant which is beyond 60 miles from the nearer of the city halls in Beaumont and Houston, Tex., by the shortest hard-surfaced highway distance, as determined by the market administrator, and south of the northern boundaries of the Texas counties of Matagorda, Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, La Salle, and Dimmit and which is classified as Class I milk subject to the limitations of paragraph (c) of this section, the price specified in § 1121.50(a) shall be increased by any amount by which such price is less than the applicable Class I price at the same location pursuant to Part 1130 regulating the handling of milk in the Corpus Christi marketing area.

(c) For purposes of calculating such location adjustments, transfers between pool plants shall be assigned Class I disposition at the transferee-plant, in excess of the sum of 95 percent of receipts at such plant from producers and handlers described in § 1121.9(c), plus the pounds assigned as Class I to receipts from other order plants and unregulated supply plants, such assignment to be made first to transferor-plants having the same Class I price, next to transferor-plants having a higher Class I price, and then in sequence to plants having a lower Class I price beginning with the plant at which the highest Class I price would apply.

(d) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraphs (a) and (b) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1121.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and Class III prices for the preceding month.

§ 1121.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

Uniform Price

§ 1121.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1121.9 (b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1121.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1121.44(a)(14) and the corresponding step of § 1121.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1121.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundred-weight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1121.44(a)(9) and the corresponding step of § 1121.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1121.44(a)(7)(i) through (iv) and the corresponding step of § 1121.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1121.44(a)(7)(v) and (vi) and the corresponding step of § 1121.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1121.44(a)(11) and the corresponding step of § 1121.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class II price, both for the preceding month, by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1121.40(b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

§ 1121.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight for milk of 3.5 percent butterfat content at pool plants at which no location adjustment applies as follows:

(a) Combine into one total the values computed pursuant to § 1121.60 for all handlers who have made the reports prescribed in § 1121.30 for the month and who have made the payments required pursuant to § 1121.71 for the preceding month;

(b) Add not less than one-fourth of the unobligated cash balance on hand in the producer-settlement fund;

(c) Add the aggregate of the values of the minus location adjustments pursuant to § 1121.75, and subtract the aggregate of the values of the plus location adjustments pursuant to § 1121.75;

(d) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

(e) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1121.60(f); and

(f) Subtract not less than 4 cents nor more than 5 cents.

§ 1121.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1121.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into

V 39160
MAR 27 74
XUM

which he shall deposit all payments made by handlers pursuant to §§ 1121.71, 1121.76, and 1121.77, subject to the provisions of § 1121.78, and from which he shall make all payments to handlers pursuant to §§ 1121.72 and 1121.77.

§ 1121.71 Payments to the producer-settlement fund.

(a) On or before the 13th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1121.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1121.75, of such handler's receipts of producer milk; and

(ii) The value at the uniform price applicable at the location of the plant from which received plus 5 cents of other source milk for which a value is computed pursuant to § 1121.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1121.72 Payments from the producer-settlement fund.

On or before the 14th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1121.71(a)(2) exceeds the amount computed pursuant to § 1121.71(a)(1). If the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available. Any amount due to a handler pursuant to this section may be reduced by the amount of any unpaid balances due the market administrator from such handler pursuant to §§ 1121.71, 1121.77, 1121.78, 1121.85, and 1121.86.

§ 1121.73 Payments to producers and to cooperative associations.

Each handler shall make payment as follows:

(a) On or before the 15th day after the end of the month during which the milk was received, to each producer for whom payment is not made pursuant to paragraph (c) of this section, at not less than the uniform price for such month computed pursuant to § 1121.61, as adjusted pursuant to §§ 1121.74 and 1121.75, and less the amount of payment made pursuant to paragraph (b) of this section. If by such date such handler has not received full payment for such month pursuant to § 1121.72, he may reduce his total payments to all producers uniformly by not more than the amount of reduction in payments from the market administrator. He shall, however, complete such payments pursuant to this paragraph not later than the date for making such payments next following receipt of the balance from the market administrator.

(b) On or before the 25th day of each month, to each producer (1) for whom payment is not made pursuant to paragraph (c) of this section, and (2) who has not discontinued delivery of milk to such handler, a partial payment for milk received from such producer during the first 15 days of such month computed at not less than the Class III price for 3.5 percent milk of the preceding month, without deduction for hauling.

(c) On or before the 13th and 23d days of each month, in lieu of payments pursuant to paragraphs (a) and (b) of this section respectively, to a cooperative association which so requests, with respect to producers for whose milk such cooperative association is authorized to collect payments, an amount equal to the sum of the individual payments otherwise payable to such producers. Such payment shall be accompanied by a statement showing for each producer the items required to be reported pursuant to § 1121.31.

(d) As follows, to each cooperative association for milk for which it is the handler pursuant to § 1121.9(c):

(1) On or before the 23d day of the month, a partial payment for milk received during the first 15 days of such month, at not less than the amount specified in paragraph (b) of this section; and

(2) On or before the 13th day of the following month, in final settlement, the value of such milk received during the month, at the applicable uniform price, as adjusted pursuant to §§ 1121.74 and 1121.75, less the amount of payment made pursuant to paragraph (d)(1) of this section.

(e) On or before the 13th day after the end of the month, for milk received from the pool plant of a cooperative association, to such cooperative association not less than the value of such milk as classified pursuant to § 1121.42(a) at the respective class prices, as adjusted by the butterfat differential specified in § 1121.74, that are applicable at the location of the transferee-handler's pool plant.

§ 1121.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1121.75 Plant location adjustments for producers and on nonpool milk.

(a) In making payments pursuant to § 1121.73, the uniform price computed pursuant to § 1121.61 to be paid for such milk received at a pool plant at which a location adjustment pursuant to § 1121.52 (a) or (b) applies will be subject to a location adjustment (plus or minus) equal to that specified in such section.

(b) The uniform price applicable to other source milk shall be subject to the same adjustments applicable to the uniform price under paragraph (a) of this section, except that the adjusted uniform price plus 5 cents shall not be less than the Class III price.

§ 1121.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1121.30(b) and 1121.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant;

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price plus 5 cents, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the uniform price plus 5 cents shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1121.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1121.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1121.60 for such handler shall include, in lieu of the value of other source milk specified in § 1121.60(f) less the value of such other source milk specified in § 1121.71(a)(2)(ii), a value of milk determined pursuant to § 1121.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1121.7(b) subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1121.30(b) and 1121.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1121.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1121.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1121.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

§ 1121.77 Adjustment of accounts.

Whenever verification by the market administrator of any handler's reports, books, records, accounts, or payments discloses errors resulting in money due:

(a) From the market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 1121.78 Charges on overdue accounts.

The unpaid obligation of a handler pursuant to §§ 1121.71, 1121.76, 1121.77, 1121.85, or 1121.86 shall be increased three-fourths of 1 percent per month beginning on the first day after the due date, and on each date of subsequent months following the day on which such type of obligation is normally due: Provided, that—

(a) The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include any unpaid interest charges previously computed pursuant to this section; and

(b) For the purpose of this section any unpaid obligation that was determined at a date later than that previously prescribed by the order because of a handler's failure to submit a report to the market administrator when due shall be considered to have been payable by the date it would have been due if the report had been filed when due.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

§ 1121.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 13th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk (including that described in § 1121.13(a)(2) and such handler's own production);

(b) Other source milk allocated to Class I pursuant to § 1121.44(a)(7) and (11) and the corresponding steps of § 1121.44(b), except such other source milk that is excluded from the computations pursuant to § 1121.60 (d) and (f); and

(c) Route disposition from a partially regulated distributing plant in the marketing area that exceeds the skim milk and butterfat subtracted pursuant to § 1121.76(a)(2).

§ 1121.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than himself) pursuant to § 1121.73, shall deduct 5 cents per hundredweight or such amount not exceeding 5 cents per hundredweight as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 15th day after the end of each month. Such monies shall be used by the market administrator to sample, test, and check the weights of milk received and to provide producers with market information.

(b) In the case of producers for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such

V 39 160 MAR 27 74 XUM

producers and on or before the 15th day after the end of such month pay such deductions to the cooperative association rendering such services, accompanied by a statement showing the quantity of milk for which deduction was computed for each such producer.

ADVERTISING AND PROMOTION PROGRAM

§ 1121.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1121.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, and educational and other programs designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall sreve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1121.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1121.113(b), is authorized one Agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers which have elected not to combine pursuant to § 1121.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group, in total, one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent, it shall nevertheless be authorized to select from such group in total one Agency representative. For the purpose of the Agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1121.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the Agency representatives.

§ 1121.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1121.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative, who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1121.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order and annually thereafter the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more Agency representatives as the case may be and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual producers eligible to vote. The election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1121.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum and any action of the Agency shall require a majority of concurring votes of those present and voting.

§ 1121.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions within the scope of Agency authority pursuant to § 1121.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91-670;

(c) Recommend amendments to the Secretary; and

(d) With approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1121.110 and 1121.117.

§ 1121.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1121.110 and 1121.117;

(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(f) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings and pay the expenses of administering the Agency; and

(g) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1121.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1121.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1121.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milks and its products.

§ 1121.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of wilful misconduct, gross negligence, or those which are criminal in nature.

§ 1121.120 Procedure for requesting refunds.

Any producer may apply for refund under the procedure set forth under paragraphs (a) through (c) of this section.

(a) Refund shall be accomplished only through application filed with the market administrator in the form prescribed by the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the start of the next refund notification period as specified in paragraph (b) of this section, may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such period and including the remainder of the calendar quarter involved. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

§ 1121.121 Duties of the market administrator.

Except as specified in § 1121.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1121.113(c).

(b) Set aside the amounts subtracted under § 1121.61(d) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to paragraph (b) (2) and (3) of this section, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1121.61(d).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1121.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1121.61(d) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to paragraph (b)(2) of this section.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1121.110 through 1121.122).

(d) Make necessary audits to establish that all Agency funds are used only for authorized purposes.

§ 1121.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1121.70.

Signed at Washington, D.C. on: March 21, 1974.

JOHN C. BLUM,
Deputy Administrator,
Regulatory Programs.

Animal and Plant Health Inspection Service

[9 CFR Part 92]

IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Proposed Requirements for Use of Import Quarantine Facilities

Statement of considerations. The purpose of this proposed amendment is to include provisions in the regulations which will insure receipt of funds due the Department for services rendered while animals offered for entry are in quarantine.

The proposed amendment would require: (1) That the importer arrange for transportation of shipments from the port of arrival to the quarantine facility; (2) that the use of non-Federal quarantine facilities be approved by the Deputy Administrator prior to the issuance of the required import permit; (3) that requests for inspection and other services be made in writing, and that a waiver of all claims against the United States and Veterinary Services or any employee of Veterinary Services for damages which may arise be signed by the importer; (4) that payment for services received by the importer at rates prescribed by the Deputy Administrator be made by certified check or money order prior to release of the animals from quarantine; and (5) would provide that the Deputy Administrator may refuse entry or otherwise dispose of animals when the importer fails to pay for services received. Such animals may be sold at public sale after completion of the quarantine period to recover payment for services received while in quarantine, proceeds of sale in excess of funds due the Federal Government to be held in a special deposit account for a period of six months pending claim by the owner.

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to section 6 of the Act of August 30, 1890, as amended, section 2 of the Act of February 2, 1903, as amended, and sections 2, 3, 4, and 11 of the Act of July 2, 1962 (21 U.S.C. 104, 111, 134a, 134b, 134c, and 134f), the Animal and Plant Health Inspection Service is considering amending Part 92, Title 9, Code of Federal Regulations.

§ 92.12 would be amended to read:

§ 92.12 Feed and attendants for animals in quarantine.

(a) *Ports where quarantine facilities not maintained by veterinary services.* The importer, or his agent, of animals subject to quarantine under the regulations in this part shall arrange for acceptable transportation to the non-Governmental quarantine facility and for the care, feed, and handling of the animals from the time of unloading at the quarantine port to the time of release from quarantine. Such arrangements shall be agreed to in advance by the Deputy Administrator, Veterinary Services. All expenses resulting therefrom or incident thereto shall be the responsibility of the importer; Veterinary Services assumes no responsibility with respect thereto. The quarantine facility must be suitable for the quarantine of such animals and must be approved by the Deputy Administrator, Veterinary Services prior to the issuance of any import permit. The facilities occupied by animals should be kept clean and sanitary to the satisfaction of the inspector assigned to supervise the quarantine. If for any cause the care, feed, or handling of animals, or the

V 39 60 MAR 27 74 XUM

sanitation of the facilities, is neglected, in the opinion of the inspector assigned to supervise the quarantine, such services may be furnished by Veterinary Services in the same manner as though arrangements had been made for such services as provided by paragraph (b) of this section, and/or the animals may be disposed of as the Deputy Administrator, Veterinary Services, may direct, including sale in accordance with the procedure described in paragraph (b) of this section. The importer, or his agent, shall request in writing such inspection and other services as may be required, and shall waive all claim against the United States and Veterinary Services or any employee of Veterinary Services for damages which may arise from such services. The Deputy Administrator, Veterinary Services, may prescribe reasonable rates for the services provided under this paragraph. When it is found necessary to extend the usual minimum quarantine period; the importer, or his agent, shall be so advised in writing and shall pay for such additional quarantine and other services required. Payment for all services received by the importer, or his agent, in connection with each separate lot of animals shall be made by certified check or U.S. money order prior to release of the animals. If such payment is not made, the animals may be sold in accordance with the procedure described in this paragraph or otherwise disposed of as directed by the Deputy Administrator, Veterinary Services.

(b) *Ports where quarantine facilities maintained by veterinary services.* The importer, or his agent, of animals subject to quarantine under the regulations in this part shall arrange for acceptable transportation to the quarantine facility, and for the care, feed, and handling of the animals from the time they arrive at the quarantine port to the time of release from quarantine. Such arrangements shall be agreed to in advance by the Deputy Administrator, Veterinary Services. The importer or his agent shall request in writing such inspection and other services as may be required, and shall waive all claim against the United States and Veterinary Services or any employee of Veterinary Services, for damages which may arise from such services. All expenses resulting therefrom or incident thereto shall be the responsibility of the importer; Veterinary Services assumes no responsibility with respect thereto. The Deputy Administrator, Veterinary Services may prescribe reasonable rates for the services provided under this paragraph. When it is found necessary to extend the usual minimum quarantine period, the importer, or his agent, shall be so advised in writing and shall pay for such additional quarantine and other services required. Payment for services received by the importer, or his agent, in connection with each separate lot of animals shall be made by certified check or U.S. money order prior to release of the animals. If such payment is not made, the animals may be sold in accordance with the procedure described in this paragraph or otherwise disposed of as directed by the Deputy Administrator, Veterinary Services. When payment is not made and the animals are to be sold to recover payment for services received, the importer, or his agent, will be notified by the inspector that if said charges are not immediately paid or satisfactory arrangements made for payment, the animals will be sold at public sale to pay the expense of care, feed, and handling during that period. The sale will be held after the expiration of the quarantine period, at such time and place as may be designated by the General Services Administration or other designated selling agent. The proceeds of the sale, after deducting the charges for care, feed, and handling of the animals and other expenses, including the expense of the sale, shall be held in a Special Deposit Account in the United States Treasury for 6 months from the date of sale. If not claimed by the importer, or his agent, within 6 months from the date of sale, the amount so held shall be transferred from the Special Deposit Account to the General Fund Account in the United States Treasury.

(c) Amounts collected from the importer, or his agent, for service rendered shall be deposited so as to be available for defraying the expenses involved in this service.

Any person who wishes to submit written data, views or arguments concerning this proposed amendment may do so by filing them with the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, Maryland 20782 before April 29, 1974.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 870, Hyattsville, Maryland 20782, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 22d day of March 1974.

J. K. ATWELL,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc.74-7106 Filed 3-26-74;8:45 am]

Food and Nutrition Service

[7 CFR Parts 210 and 225]

NATIONAL SCHOOL LUNCH PROGRAM; SPECIAL FOOD SERVICE PROGRAM FOR CHILDREN

Requirements for Meals

On April 12, 1973, there was published in the FEDERAL REGISTER (38 FR 9234), a notice of proposed rulemaking to amend the regulations governing the operations of the National School Lunch Program (7 CFR Part 210), and the Special Food Service Program for Children (7 CFR Part 225) to authorize use of alternate food components. Included in the notice was an apendix "A" to each regulation part in which the authorized alternates were specified. Three alternate food components were proposed.

Specifications for two of the components, "enriched macaroni products with fortified protein" and "formulated grain-fruit products," are being published in the appendices of the three regulations in final form with minor changes. Specifications for the third alternate food component, "textured vegetable protein products," proposed for use in the National School Lunch Program and Special Food Service Program for Children, are being reissued in proposed form because of substantial specification changes made as a result of public comments received.

These changes to the "textured vegetable protein products" are briefly presented, as follows: the required level of the various nutrients is listed on a per one gram of protein basis; the requirements for folic acid, phosphorous, calcium, zinc, and vitamin A have been included in the nutritional specifications; a minimum protein level of 18 percent has been established for the hydrated products; proteins other than those derived from plants are authorized as ingredients; and a more precise definition of physical structure has been included. Finally, the name of this group of products has been changed from "textured vegetable protein products" to "textured meat alternates."

Comments, suggestions, or objections are invited. In order to be assured of consideration, such comments, suggestions, or objections must be delivered or mailed, postmarked no later than April 26, 1974 to Herbert D. Rorex, Director, Child Nutrition Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Communications should identify the section and paragraph on which comments, etc., are offered. All written submissions received pursuant to this notice will be made available for public inspection at the Office of the Director, Child Nutrition Division, during the regular business hours 8:30 a.m. to 5 p.m. (7 CFR 1.27(b)).

The following alternate food component is proposed to be authorized under the appendices for the National School Lunch Program and the Special Food Service Program for Children:

APPENDIX A—ALTERNATE FOODS FOR MEALS

TEXTURED MEAT ALTERNATES

1. Schools and service institutions may utilize the textured meat alternates, defined in paragraph 3, as food components in meeting the meal requirements of § 210.10 of the National School Lunch Program regulations, and § 225.9 of the Special Food Service Program for Children regulations, under the following terms and conditions:

(a) A two ounce equivalent combination of hydrated textured meat alternate and meat, poultry or fish may be used to meet the meat or meat alternate requirements specified in § 210.10 or § 225.9. The size of servings of the cooked combination may be adjusted for various age groups.

(b) Textured meat alternates shall be prepared and served only in combination with meat, poultry or fish.

(c) Combinations of hydrated textured meat alternate, with hydration levels specified in 3(e) with uncooked meat, poultry or fish shall contain at least 70 percent uncooked meat, by weight, and not more than 30 percent, by weight, of hydrated textured meat alternate.

(d) The meat, poultry or fish with which the textured meat alternate is mixed shall be ground and served as meat patties, meat loaves, lasagna, pizza, etc. Meat is defined in USDA Meat Inspection Regulations (9 CFR Part 301.2). Poultry is defined in USDA Poultry Inspection Regulations (9 CFR Part 381.1). Fish is defined as the edible flesh portions of fresh and salt water species of fish.

(e) All textured meat alternates shall bear a label identifying the product as being acceptable to the Department. Labels for the several forms of products that have met the structural integrity test of Category 1 shall conform to the following legend appropriate to their use:

(1) Label for Textured Meat Alternate packaged in dry form. "This is to certify that this product meets USDA–FNS specifications for dry textured meat alternate."

(2) Label for Textured Meat Alternate packaged in hydrated form. "This is to certify that this product meets USDA–FNS specifications for hydrated textured meat alternate."

(3) Label for Textured Meat Alternate products combined with meat. "This ----------[1] product contains ----------[2] percent meat, ----------[1] percent added fat, ----------[2] percent added water, and ----------[2] percent dry ----------[2], that meets USDA–FNS specifications for Textured Meat Alternate." In the blank marked "1," insert the name of the meat-combination product in accordance with USDA–APHIS regulations governing labelling of such meat products. In those blanks marked "2" list the actual percentages of the several ingredients in descending order of importance, by weight. In the blank marked "3," insert the common or usual name of the textured meat alternate products, as "soy flour," "cottonseed flour," etc.

The products that have met the structural integrity test of Category 2 shall be labeled in a similar manner, except that the word "granular" shall be substituted for the word "textured."

(f) Textured meat alternates with tracer materials, such as titanium dioxide, must be labeled to show inclusion of such tracer materials.

(g) Commercially prepared meat/textured meat alternates used in child nutrition programs must meet the requirements set forth in this appendix.

2. Only textured meat alternates which have been accepted by the Food and Nutrition Service (FNS) for use in the USDA child nutrition programs may be labeled as provided in paragraph 1(e) above. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, protein efficiency ratio analysis, and such other pertinent data as may be requested by FNS. This information shall be forwarded to: Director, Nutrition and Technical Services Staff, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory.) All laboratories shall retain the "raw" laboratory data for a period of one year. Such information shall be made available to FNS upon request.

3. Textured meat alternates are foods produced from protein products obtained from plant sources such as food grade oilseeds, or they may be derived from animal protein sources such as dairy products. Protein products from several sources may be mixed in combination to yield an acceptable product. When in dry form, textured meat alternates are to have a minimum of 50 percent protein (Nx6.25) by weight ("as-is" basis). When prepared in hydrated form, they are to have a minimum of 18 percent protein, by weight ("as-is" basis). Textured meat alternates must be mixed with water according to the instruction given in 3(e) and served with ground meat, poultry, or fish. Dry textured meat alternates must have the following characteristics:

(a) *Categories.* Textured meat alternates are classified in two categories according to protein levels. Category 1 products shall contain a minimum of 50 percent protein ("as-is" basis) and include extruded flours and isolate formulations. Category 2 products contain a minimum of 69 percent protein (moisture-free basis) and include granular concentrates and fabricated products. All products may be flavored or unflavored, colored or uncolored, dry or hydrated. The hydrated products may be frozen or unfrozen.

(b) *Physical characteristics.* Textured meat alternates may be in the form of granules, extruded particles, spun fibers, other processed forms, or their mixtures. Textured products of Category 1 are characterized by having structural integrity such that formed units will withstand hydration, retorting, mixing, cooling and other procedures used in preparing the food for consumption. Granular products are characterized by having structural integrity such that they will meet the screen test described for Category 2 products. Structural integrity for the two categories is defined as being able to meet one of the following tests appropriate for the category of products:

Category "1" products

(1) Completely hydrate the dry textured products by adding an excess amount of cold water. Allow to hydrate for one hour during which time there should be a visible layer of water.

(2) Place in a retort, cover particles with water, and cook at 250° F for 30 minutes.

(3) Drain off excess liquid.

(4) Grind the cooked materials in a meat grinder through a ⅛" plate.

(5) Weight out 100 grams of the ground material and spread evenly on an 8" diameter U.S. Std. No. 20 mesh screen.

(6) Spray rinse the material on the screen with cold water for one minute.

(7) Shake off excess water. Calculate the weight of the material remaining on the screen as a percent of the 100 grams.

To qualify as having structural integrity the Category 1 products should have at least 35 percent (35 grams) of the material retained on the screen.

Category "2" products

(1) Place one sample of dry granular product on a U.S. Std. No. 10 mesh screen and shake continuously for one minute. No more than 10 percent, by weight, of the dry product shall be retained.

(2) Place a second sample of dry granular product on a U.S. Std. No. 50 mesh screen and shake continuously for one minute. No more than 5 percent, by weight, of the dry product shall pass through.

(c) *Ingredients.* Textured meat alternates of both categories may be made from protein products derived from a single raw material source or from a mixture of protein products obtained from several different raw material sources. Protein products include both plant-derived flours, protein concentrates or isolates, or animal-derived protein products. Soybeans, cottonseed, peanuts, corn, and wheat are examples of raw material sources of plant-derived proteins. Whey protein concentrates, non-fat dry milk, egg albumin and fish protein concentrates are examples of raw material sources of animal-derived proteins. Acceptable products may contain the following optional ingredients: edible fat or oils, carbohydrates, binders, stabilizers, natural or artificial flavors, colors, and amino acids or their salts, vitamins and minerals. The ingredients deemed suitable for use under this paragraph are added in amounts that are not in excess of those reasonably required to achieve their intended purposes. All ingredients shall be in conformity with the Federal Food, Drug, and Cosmetic Act, as amended, and all regulations issued thereunder. All ingredients covered by USDA or FDA standards shall comply with requirements of those standards. Labeling of the product shall comply with applicable regulations prescribed by FDA, USDA, or other government agencies. Each product shall be labeled with the common or usual name, or as Textured Meat Alternate, qualified with the common or usual name of the product. The product should not be formulated in such a manner that would require it to be classified as a Dietary Supplement as described by FDA in 21 CFR 80.1.

(d) *Nutritional specifications.* Textured meat alternates shall have a PER of 1.8 (Casein=2.5) and shall meet the compositional requirements set forth in the following table. The requirements as specified will be deemed to have been met if moisture and ash contents do not exceed the values listed and if reasonable overages of the vitamins and minerals, within the limits of good manufacturing practice, are present to insure that the required levels are maintained throughout the expected shelf life under customary conditions of distribution and storage. An exception will be made for vitamins or minerals which occur naturally in an ingredient of the textured meat alternates at such concentration that the level specified in the following table will be substantially exceeded in the final product. Such excess will be permitted but no label claim of nutritional advantage can be made for any such overage. Analytical methods employed should be according to the standard procedures defined in the Association of Official Analytical Chemists, 1970, "Official Methods of Analysis," 11th edition, Washington, D.C. or by appropriate analytical procedures FNS considers reliable.

Nutritional specifications for textured meat alternates[1]

Nutrients	Unit	Required levels for all products	
		Units per gram of protein	Maximum
Moisture	Percent weight.		8
Ash, unflavored product.	do		6
Ash, flavored product.	do		8
Magnesium	Milligram	1.14	
Iron	do	.13	
Zinc	do	.23	
Calcium	do	10.0	
Phosphorous	do	10.0	
Thiamin	do	.014	
Riboflavin	do	.010	
Niacin	do	.30	
Vitamin B_6	do	.020	
Pantothenic acid	do	.040	
Folic acid	Microgram	.40	
Vitamin B_{12}	do	.000	
Vitamin A	International unit.	15.0	

[1] All specifications are expressed on a moisture-free basis except for moisture and ash which are expressed on "as-is" basis.

(e) *Hydration specifications.* The moisture content of hydrated textured meat alternates

V 39160 MAR 27 74 XUM

shall be such that, when hydrated, the mixture will have a minimum of 18 precent protein, by weight.

To determine the ratio of water to be mixed with textured meat alternates the following equation may be used:

$$\frac{\text{Percent dry matter in dry product}}{\text{Percent protein in dry product ("as-is" basis)} \times \text{0.18 (Percent protein in hydrated product)}} - 1 = \text{Pounds water required to add to each pound of dry product}$$

Since most dry products contain 2 to 8 percent moisture, the "percent dry matter" is 92 to 98 percent:

Following are given some water-to-dry product hydration ratios that may be used for commonly used products: (1) Extruded and some isolate formulations contain about 50 to 59 percent protein, in dry form. For these products, addition of 1.5 pounds water (about 2.8 cups) to 1 pound dry product is adequate hydration for most applications. One hundred pounds of hydrated product would require 40 pounds of dry product, plus 7 gallons of water. (2) Concentrates, which generally contain 69 to 72 percent protein, require about 2.5 pounds of water (about 4.2 cups) for each pound of dry product. One hundred pounds of hydrated product would require 28.5 pounds of dry product, plus 8 gallons of water. The Department will issue guidance materials for the use of the State Agencies and FNS Regional Offices on the hydration and use of the various textured meat alternates in child nutrition programs.

(f) Meat and hydrated textured meat alternate combination. The PER of the meat-hydrated textured meat alternate combination shall be not less than 2.5. The fat content of meat-hydrated textured meat alternate combination shall not exceed 30 percent, by weight.

When computing the cooking yield of a product containing a meat and textured meat alternate combination, the hydrated textured meat alternate is evaluated as having the same cooking yield as the uncooked meat, poultry, or fish it replaces.

Effective date. This appendix is proposed to be effective August 31, 1974, except that those sections pertaining to commercially prepared Textured Meat Alternate combination containing meat are proposed to be effective December 31, 1974.

Dated: March 22, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 1]

LABELING OR MISBRANDING OF DRUGS

Misleading Proprietary or Trade Names

Section 502(l)(3) of the Federal Food, Drug, and Cosmetic Act states that a drug is misbranded if it is offered for sale under the name of another drug, and section 502(a) states generally that a drug is misbranded if its labeling is misleading in any particular. Biological products are also subject to these provisions as well as similar provisions under section 351(b) of the Public Health Service Act. Pursuant to the drug efficacy review currently being implemented for human prescription drugs, animal drugs and for human biologics and the comprehensive review of safety and effectiveness undertaken for human OTC drugs, numerous drug products require changes in their formulation and/or labeling to bring them within the requirements of the two acts. It is the policy of the Food and Drug Administration to encourage such reformulation and/or relabeling promptly. It is the responsibility of the manufacturer or distributor of a drug to assure that the labeling is not in violation of the law because of use of a misleading brand name. Numerous questions have arisen as to the circumstances under which changes in formulation and/or labeling may bring drug products within these prohibitions. The Commissioner of Food and Drugs has therefore concluded that regulations should be promulgated to clarify these provisions of the law.

Formulation changes to eliminate or substitute an active ingredient are frequently made. Similarly, changes in labeling to eliminate or substitute an indication or other claim or to add or substitute a warning have also frequently occurred. In the case of an animal drug a change in the species of animal for which it is intended may occur. In general, these changes may be broken down into three general categories:

(1) Those that do not significantly change the use or expected composition of the drug and thus need not be reflected other than by changing the statement of active ingredients, the indications, the warnings, or the other applicable elements of the drug labeling;

(2) Those that significantly change the use or expected composition of the drug and which thus require prominent public notice of the change in addition to the changes made in the drug labeling; and

(3) Those that so fundamentally alter the nature or use of the drug that its brand name must be qualified or changed in addition to the drug labeling changes.

It is the policy of the Food and Drug Administration, in accordance with principles laid down in the courts, to require excision of a brand name only where nothing short of excision would eliminate the possibility of deception, and to permit retention of a brand name where either permanent qualification of the name or prominent public disclosure of the change in the product for a significant period of time is sufficient to inform the public of the change in the product or its use, e.g., *Jacob Siegal Co.* v. *Federal Trade Commission*, 327 U.S. 608 (1946); *Federal Trade Commission* v. *Algoma Lumber Co.*, 291 U.S. 67 (1934); *Magnaflow Co., Inc.* v. *Federal Trade Commission*, 343 F. 2d 318 (D.C. Cir. 1965); *Continental Wax Corp.* v. *Federal Trade Commission*, 330 F. 2d 475 (2d Cir. 1964); *Carter Products, Inc.* v. *Federal Trade Commission*, 268 F. 2d 461 (9th Cir. 1959); *Arrow Metal Products Corp.* v. *Federal Trade Commission*, 249 F. 2d 83 (3d Cir. 1957); *Federal Trade Commission* v. *Army and Navy Trading Co.*, 88 F. 2d 776 (D.C. Cir. 1937).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 501, 502, 505, 507, 512, 701(a), 52 Stat. 1049–1055, 59 Stat. 463, 82 Stat. 343–351; 21 U.S.C. 351, 352, 355, 357, 360b, 371(a)), the Public Health Service Act (sec. 351, 58 Stat. 702 as amended by 84 Stat. 1308; 42 U.S.C. 262), and under authority delegated to him (21 CFR 2.120), the Commissioner of Food and Drugs proposes to revise § 1.101 in 21 CFR Part 1 to read as follows:

§ 1.101 Drugs and devices; labeling, misbranding.

(a) Among representations in the labeling of a drug or device which render such drug or device misbranded is a false or misleading representation with respect to another drug or device or a food or cosmetic.

(b) A drug product shall be deemed misbranded by reason (among other reasons) of the use of a proprietary or trade name if:

(1) The name includes or suggests the name of one or more but not all of the active ingredients, even though the names of all active ingredients are stated elsewhere in the labeling.

(2) The name includes or suggests an active ingredient which is not contained in the drug, even though the names of all active ingredients are stated elsewhere in the labeling.

(3) The name includes or suggests an indication for use of the drug (including a symptom, disease, pharmacological action or in the case of an animal drug where the name includes or suggests use in a species of animal) which is not contained in the drug labeling, even though the indications for use of the drug are stated elsewhere in the labeling.

(4) The name includes or suggests an indication for use of the drug (including a symptom, disease, pharmacological action or in the case of a new-animal drug where the name includes or suggests use in a species of animal) which is not included in an applicable approved new drug application (NDA), new animal drug application (NADA), human biological license, or Antibiotic Form 5 or 6 or, if the drug is not a new drug, a new animal drug, a certifiable or released antibiotic, or a biologic, the indication for use is not based on substantial evidence of the drug's safety and effectiveness .

(5) The name is otherwise false or misleading in any particular. In determining whether use of a brand name is misleading the following factors shall be considered:

(i) The nature and medical significance of the formulation and claims.

(ii) The condition(s) for which the drug has been and will be represented or suggested for use.

(iii) Any functional implication(s) which may be raised by the brand name.

(iv) The target population(s) to which the drug is promoted (professionals or consumers).

(v) The extent to which the target population(s) has been informed of salient facts relating to the drug through labeling and advertising (including direct mailing and educational media such as prescription drug detailing programs) and reports in newspapers, television, and the news media, and the effectiveness of such efforts.

(c) Reformulation to remove or substitute an active ingredient, or relabeling to remove or substitute an indication, or in the case of an animal drug the use in a particular species of animal, or to add or substitute an indication or to add or substitute a warning:

(1) Does not require excision or qualification of the proprietary or trade name, or a prominent notice to the public of the change in the product, if the change in the formulation or labeling does not significantly alter the use or active ingredients of the drug product.

(2) Requires a prominent notice to the public of the change in the product, through conspicuous statements in advertising and labeling for a continuous period of not less than 6 months, if the change significantly alters the use or active ingredients of the drug product or their bioavailability.

(3) Requires qualification of the proprietary or trade name (e.g., through the addition of a prefix or suffix or an explanatory phrase to correct and prevent ambiguity, confusion, or deception) if there has been a fundamental change in the indications for use or active ingredients of the drug product and the name includes or suggests (e.g., through long or close association) a use or composition that is no longer applicable.

(4) Requires excision of the proprietary or trade name if there has been a fundamental change in the indications for use or active ingredients of the drug product; the name includes or suggests (e.g., through long or close association) a use or composition that is no longer applicable or is otherwise misbranded under paragraph (b) of this section; and qualification of the name is inappropriate or inadequate to correct and prevent ambiguity, confusion, or misbranding.

Interested persons may, on or before May 28, 1974, file with the Hearing Clerk, Food and Drug Administration, Room 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: March 16, 1974.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.74-7073 Filed 3-26-74;8:45 am]

Food and Drug Administration

[21 CFR Parts 121, 135g]

DIETHYLSTILBESTROL (DES) IN EDIBLE TISSUES OF CATTLE AND SHEEP

Proposal To Revoke Test Methods for Determination of Residue Levels

On August 4, 1972 (37 FR 15747) the Commissioner of Food and Drugs published an order withdrawing approval of all new animal drug applications (NADA's) for diethylstilbestrol (DES) in animal feeds for use as a growth promotant in sheep and cattle. On December 9, 1972 (37 FR 26307), the Commissioner revoked regulations pertaining to the use of DES in feeds pursuant to section 512(i) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 360b(i).

Orders withdrawing approval of NADA's for DES in implant form and revoking regulations for use of DES in implant form were published in the FEDERAL REGISTER of April 27, 1973 (38 FR 10485) and in the FEDERAL REGISTER of May 3, 1973 (38 FR 10926), respectively.

On January 24, 1974, the United States Court of Appeals for the District of Columbia Circuit vacated all of the above orders. *Chemetron Corporation et al.* v. *United States Dept. of Health, Education, and Welfare*, No. 72–1864 (D.C. Cir., January 24, 1974); *Hess & Clark, Division of Rhodia, Inc.* v. *Food and Drug Administration*, No. 73–1581 (D.C. Cir., January 24, 1974). These decisions have the effect of reinstating the regulations and the approvals of the NADA's.

Since DES is a cancer-causing substance, its approval for use as a growth-promotant in cattle and sheep raised for human food is contingent upon the exemption from the anticancer clause of the new animal drug provision of the act, 21 U.S.C. 360b(d)(1)(H). That exemption is applicable only if the Commissioner of Food and Drugs "• • • finds that, under the conditions of use specified in proposed labeling and reasonably certain to be followed in practice • • • (ii) no residue of such drug will be found (by methods of examination prescribed or approved by the Secretary by regulations • • •), in any edible portion of such animals after slaughter or in any food yielded by or derived from the living animals • • •" This notice proposes to revoke the presently approved qualitative and quantitative methods for identification and measurement of DES residues in edible tissue, under §§ 135g.26 (b) and (c) and 121.241(e) and (f) (21 CFR § 135g.26(b) and (c) and § 121.241 (e) and (f)), for the reasons stated below, and offers all interested persons opportunity to comment on or before April 26, 1974.

Following action on this proposal, the Commissioner intends to issue a notice of opportunity for hearing proposing to withdraw approval of the new animal drug applications (NADA's) for use of DES in feed and implants for cattle and sheep. If the currently approved methods for detection of DES residues in edible tissues are revoked, the notice of opportunity for hearing will include the issue whether the NADA's should be withdrawn on the ground that section 512(d)(1)(H) of the act is applicable, as well as on any other grounds that may be applicable. Whether or not the methods are revoked, the Commissioner intends to hold a public hearing on the withdrawal of the NADA's, pursuant to section 512(e) of the act, and such hearing shall include the issue of whether DES has been shown to be safe within the meaning of section 512(e)(1)(B) of the act.

The original anticancer clause, section 409(c)(3)(A) of the act (72 Stat. 1786; 21 U.S.C. 348(c)(3)(A)), enacted as part of the Food Additives Amendment of 1958, Public Law 85–929, prohibited the use in food-producing animals of any carcinogenic substance. This prohibition forbade use of a carcinogenic substance in food-producing animals even if there was a total absence of residue of the substance in the edible tissues of the animal after slaughter. The anticancer clause was amended by section 104(f)(1) of the Drug Amendments of 1962, Public Law 87–781 (76 Stat. 784), to exempt from the prohibition of the anticancer clause such carcinogenic substances if the Secretary affirmatively finds, among other things, that no residues of such substance will be found, by methods of examination prescribed or approved by the Secretary by regulation, in the edible tissue of the animal after slaughter. The purpose of this amendment was to allow use of carcinogens in those situations where no residues occurred in the edible tissue of the animal after slaughter. Section 409(c)(3)(A) of the act, as amended, was essentially incorporated into section 512(d)(1)(H) upon enactment of the Animal Drug Amendments of 1968, Public Law 90–399.

DES is a known carcinogen. *Hess & Clark, Division of Rhodia, Inc.* v. *Food and Drug Administration*, No. 73–1581 (D.C. Cir., Jan. 24, 1974); *Bell* v. *Goddard*, 366 F2d 177 (C.A. 7, 1966). Experimental research has shown that DES has caused breast cancer in mice at a level of 6.25 parts per billion (ppb) (Gass, Coats, & Graham, "Carcinogenic Dose-Response Curve to Oral Diethylstilbestrol", *Journal of the National Cancer Institute* (Washington, DC) 33:971–977, 1964).

Methods of examination for DES, pursuant to the amendment to the anticancer clause, were published by the Commissioner in the FEDERAL REGISTER of February 16, 1963 (28 FR § 1507) and have not since been modified. They are now under §§ 135g.26 (b) and (c) and 121.241 (e) and (f). The Commissioner has concluded that the presently approved methods are not adequate to comply with the intent of section 512(d)(1)(H) of the act that no residue of a carcinogenic drug be present in edible tissue after slaughter. As pointed out below, the so-called "mouse uterine" method is not specific for DES; rather, it measures only total estrogenic activity.

V 39 160 MAR 27 74 XUM

Further, the method, as explained below, is of questionable accuracy because of the problems concerning the control tissue to which the test tissue is compared. Finally, the method is not sensitive, i.e., will not dependably detect residues known to exist at levels lower than 2 parts per billion (ppb).

The currently approved qualitative method, the so-called "paper chromatography" method, also fails to meet the necessary requirements of accuracy and sensitivity. The sensitivity of this method is unknown, although the Commissioner has information that based on past use, it is incapable of detecting residues of DES in edible tissues of sheep or cattle at levels below 10 ppb.

The lack of sensitivity alone renders these methods unsuitable for use to permit the continued application to DES of the exemption from the anticancer clause of section 512(d)(1)(H) of the act. Since the reliable sensitivity of the mouse uterine method to measure estrogenic material is 2 ppb, and since the paper chromatography method (used to identify a residue as DES) is not capable of identifying a residue as DES unless the residue in 10 ppb or more, these methods are incapable of confirming a given residue as DES at a level below 10 ppb. This level of sensitivity is in excess of the 6.25 ppb level that has produced cancer in test animals. Residues of DES, when used as directed in both feed premix and implant form have been found in edible tissues at levels below 2 ppb. (Studies of United States Department of Agriculture and Worcester Foundation, originally published in the FEDERAL REGISTER of August 4, 1972 (37 FR 15747) regarding liquid and dry premixes, and published in the FEDERAL REGISTER of April 27, 1973 (38 FR 10485) regarding implants; laboratory reports upon which these results were based are on file with the Hearing Clerk, Food and Drug Administration, Rm. 6-86 5600 Fishers Lane, Rockville, MD 20852.

Specific findings with respect to each of the currently approved methods are set forth below.

I. *The quantitative method.* The quantitative method presently designated for DES in edible tissue of cattle and sheep under §§ 135g.26(b) and 121.241(e) is a bio-assay method, the so-called mouse uterine method. It measures estrogenic response of mice to test tissue by comparing average uterine weight in two groups of laboratory mice. One group is fed tissue which initially contains no estrogenic material, and a second group is fed the tissue being assayed. Known equal quantities of DES must be added to both the control and assay tissue prior to feeding. After 7 days, the mice are sacrificed, and the uteri are surgically extracted and weighed. The difference in uterine weight of controls and unknowns is mathematically related to the estrogenic activity of the assayed tissue. With respect to this method, the Commissioner finds:

1. Although it has on occasion been able to detect residues in the range of .5 ppb, the mouse uterine method is reliable to detect residues of estrogenic material only at quantities of 2 ppb or more. (Umberger, Gass, and Curtis, "Design of a Biological Assay Method for the Detection and Estimation of Estrogenic Residues in the Edible Tissues of Domestic Animals Treated with Estrogens" *Endocrinology* 63:806–815 (1958); Umberger, Curtis and Gass, "Failure to Detect Residual Estrogenic Activity in the Edible Tissues of Steers Fed Stilbestrol"; *Journal of Animal Science* (Albany, NY), 18: 221–226, 1959.)

2. This method is known to be nonspecific. It compares total estrogenic activity of control to assayed tissue, and does not measure the quantity of any particular estrogen. (Umberger, et al., *ibid, Endocrinology* 63:806–815; affidavit of Ernest J. Umberger, March 8, 1974.)

3. Because of the nonspecificity of this method, were quantitations produced, how much of the observed estrogenic activity was due to DES, and how much was due to other natural or added estrogens in the food animal would still be unknown.

4. Often the test must contain a second cycle, and in such circumstances completion of the analysis would take 16 days for the laboratory work (not including necessary dissection, calculation, and reporting time). (Umberger affidavit, *supra.*)

5. The accuracy of the method is questionable because the method requires control tissue of the same type analyzed, but known to be initially free of estrogenic material. If the control tissue contains any estrogenic material, an equal amount of DES in the assayed tissue would be undetected. (Umberger, *ibid, Endocrinology* 63:806–815; Umberger affidavit, *supra.*) This is a serious problem, since there are at the present time no developed, proven methods by which the control tissue can be confirmed to be free of estrogenic material.

6. Quantitations indicated by this method are also noted by two of its originators to be affected by the relative fat content of the assay and control tissues. (Umberger and Gass, "The Effect Of Dietary Fat On The Uterine Weight Response Of Immature Mice To Orola Stilbestrol" *Endocrinology* 63:801–805, 1958.) This poses an additional difficulty in selection of adequate control tissue, since its fat content would therefore have to be matched to that of any assay sample.

7. The United States Department of Agriculture has declined to use this method in the only nationwide slaughterhouse sampling program for beef cattle and sheep. (Letter from Harry C. Mussman, Deputy Administrator, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, United States Department of Agriculture, to Dr. C. D. Van Houweling, Director, Bureau of Veterinary Medicine, Food and Drug Administration, February 13, 1974.)

II. *The qualitative method.* The presently designated qualitative method under §§ 135g.26(c) and 121.241(f) is a paper chromatography method. This method is solely a qualitative method and is not designed nor intended to quantify any DES residue identified by it. With respect to this method, the Commissioner finds:

1. The United States Department of Agriculture is unable to use this method in the only nationwide slaughterhouse sampling program for beef cattle and sheep (letter from Harry C. Mussman, Deputy Administrator, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, United States Department of Agriculture, to Dr. C. D. Van Houweling, Director, Bureau of Veterinary Medicine, Food and Drug Administration, March 8, 1974).

2. The sensitivity of this method in sheep and cattle tissue is not established in published scientific literature. The Commissioner is aware of trials of this method which indicate it will not dependably detect DES residues below 10 ppb in sheep and cattle tissue. (Umberger affidavit, *supra.*) Levels below 10 ppb have been shown to cause breast cancer in test animals. (Gass, Coats, & Graham, "Carcinogenic Dose - Response Curve to Oral Diethylstilbestrol," *Journal of the National Cancer Institute* (Washington, DC) 33:971–977, 1964.)

3. The method was approved without laboratory collaboration for use in sheep and cattle tissue and no collaboration of the method has been submitted since this method was first published in the FEDERAL REGISTER.

For the foregoing reasons, the Commissioner concludes that the methods for detection and quantitation of DES presently under §§ 135g.26(b) and (c) and § 121.241(e) and (f) are not suitable methods by which DES may qualify for an exemption from the anticancer clause of section 512(d)(1)(H) of the act.

Data and information available to the Commissioner concerning the methods upon which this proposal is based are on file and may be seen and/or copied during regular business hours at the office of the Hearing Clerk.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 409(c)(3)(A), 512(d)(1)(H), 701(a), 52 Stat. 1049 as amended, 1053 as amended, 1055; 21 U.S.C. 348(c)(A), 360b(d)(1)(H), 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner of Food and Drugs proposes to amend Part 121 and 135g as follows:

1. In Part 121 by deleting paragraphs (e) and (f) from § 121.241.

2. In Part 135g by deleting paragraphs (b) and (c) from § 135g.26.

Interested persons may, on or before April 26, 1974, file with the Hearing Clerk, Food and Drug Administration, Room 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Received comments may be seen in the above office during regular business hours, Monday through Friday.

Dated: March 25, 1974.

SHERWIN GARDNER,
Deputy Commissioner of Food and Drugs.

[FR Doc.74-7168 Filed 3-26-74;8:45 am]

[21 CFR Parts 610, 620]

BIOLOGICAL PRODUCTS

Proposed Revision of General Safety Test

The Public Health Service Act requires that all biological products to be offered for sale in interstate commerce must be licensed to insure their continued safety, purity and potency. Nearly all licensed products must comply with the requirements of the general safety test (21 CFR 610.11), which has been part of the biologics regulations since thier original adoption. The general safety test is intended to be a final check when each filling of each lot of product has been completed. The purpose of the test is to detect the presence of any toxic contaminant that may have resulted from the manufacturing process. Failure to perform a final safety test creates the risk of death to the recipient of the biological product.

The Commissioner of Food and Drugs is presently conducting a review of existing standards of safety, purity and potency of biological products so that these standards will reflect the best current testing procedures established by the scientific community. The existing safety test for biological products is stated in very general terms. As a result, specific test procedures developed during recent years have been incorporated into the license requirements of each manufacturer on an ad hoc basis. To promote uniformity and specificity in safety testing of licensed products, the Commissioner has determined that these improvements should be set forth in the general safety test regulation.

The principal goal of the Commissioner's proposal is to increase the sensitivity of the test. Therefore, the proposed regulation permits only the intraperitoneal route of administration of the product sample into the test animal, requires higher standards for test animals, and establishes greater specificity in test procedures and interpretation. In addition, the proposed regulation will provide an opportunity for a limited number of repeat tests to establish the safety of a product since test animals often reveal abnormalities which result from natural factors not caused by the test product.

As the safety test prescribed in the additional standards for licensed Pertussis Vaccine (21 CFR 620.6(a)) is patterned after and relates to the general safety test regulation, it is proposed that this regulation also be revised and clarified to be consistent with the proposed amendments to the general regulation.

Therefore, pursuant to provisions of the Public Health Service Act (sec. 351, 58 Stat. 702, as amended, 42 U.S.C. 262), and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Parts 610 and 620 of Subchapter F of Title 21 of the Code of Federal Regulations (formerly Part 273 recodified in the FEDERAL REGISTER of November 20, 1973 (38 FR 32048)) be amended as follows:

1. In Part 610, by revising § 610.11 to read as follows:

§ 610.11 General safety.

In addition to specific safety tests prescribed in this subchapter for individual products, a general safety test to insure freedom from extraneous toxic contaminants in biological products intended for administration to humans shall be performed in accordance with the following conditions:

(a) *Product to be tested.* The general safety test shall be conducted upon a representative sample of the product in the final container from every final filling of each lot of the product. If any product is to be processed further after filling, such as by freeze-drying or pasteurization, the test shall be conducted upon a sample from each filling of each drying chamber run or pasteurization bath. Nonliquid products shall be dissolved or ground and suspended in an appropriate diluent in a concentration of at least one human dose per five milliliters prior to testing. Insoluble material shall be thoroughly mixed in a suspension.

(b) *Test animals.* Only overtly healthy guinea pigs weighing less than 400 grams and mice weighing less than 22 grams shall be used. The animals shall not have been used previously for any purpose.

(c) *Procedure.* Inject intraperitoneally 0.5 milliliter of product into each of at least 2 mice and 5.0 milliliters of product into each of at least 2 guinea pigs. The duration of the test shall be not less than 7 days nor more than 12 days; the exact time shall be established by the manufacturer and not varied subsequently. Guinea pigs shall be observed and weighed individually on the first and last days of the test period and on 3 to 5 of the intervening days depending on the length of the observation period. Mice shall be observed and weighed individually on at least the first and last day of the test period. At the time of each observation, the weight of each animal and any abnormal signs shall be recorded.

(d) *Test requirements.* A safety test is satisfactory if all animals (1) survive the test period, (2) do not exhibit any abnormal signs during the test period, and (3) weigh no less at the end of the test period than at the time of injection.

(e) *Repeat tests*—(1) *First repeat test.* If a filling fails to meet the requirements of paragraph (d) of this section on the initial test, a repeat test may be conducted as prescribed in paragraph (c) of this section. The filling is satisfactory only if each retest animal meets the requirements prescribed in paragraph (d) of this section and at least 50 percent of all of the test animals used in the initial and first repeat tests survive, a second repeat test may be conducted. The second repeat test shall be conducted as prescribed in paragraph (c) of this section, except that at least 4 guinea pigs and 4 mice shall be used. The filling is satisfactory only if each second repeat test animal meets the requirements prescribed in paragraph (d) of this section.

(f) *Test variations.* Variations in the general safety test may be offered as an amendment to the product license and must be approved by the Director, Bureau of Biologics, Food and Drug Administration. Approval will be given only if the licensee provides substantial evidence demonstrating that the proposed test variation will assure safey equal to or greater than the test prescribed in this section.

(g) *Exceptions.* The test prescribed in this section need not be performed for Whole Blood (Human), Red Blood Cells (Human), Cryoprecipitated Antihemophilic Factor (Human), or Single Donor Plasma (Human).

2. In Part 620, by revising § 620.6(a) to read as follows:

§ 620.6 General requirements.

(a) *Safety.* Each lot of Pertussis Vaccine shall be tested for safety by the procedures prescribed in § 610.11 of this chapter except that the test shall consist of the intraperitoneal injection of no less than one-half of the recommended largest human dose into each of the mice, and either the intraperitoneal injection of no less than three times the recommended largest individual human dose, or the subcutaneous injection of 5.0 milliliters into each of the guinea pigs.

* * * * *

Interested persons may, on or before April 26, 1974, file with the Hearing Clerk, Food and Drug Administration, Room 6–86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: March 21, 1974.

SAM D. FINE,
Associate Commissioner for Compliance.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 1, 91]

[Docket No. 13581; Notice No. 74-13]

AIRPORTS WITH OPERATING CONTROL TOWERS

Operation of Aircraft

The Federal Aviation Administration is considering amendments to § 1.1 and

V 39 160 MAR 27 74 XUM

§ 91.87 of the Federal Aviation regulations relating to the operation of aircraft at airports having operating control towers. The proposed amendments would add a definition of "movement area" and more clearly describe when a clearance is required from Air Traffic Control before a pilot may taxi an aircraft.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before June 10, 1974, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Section 91.87 of the Federal Aviation regulations prescribes the rules that each person operating an aircraft to, from, or on an airport with an operating control tower must comply with. Paragraph (h) of that section provides that no pilot may, at an airport with an operating control tower, taxi an aircraft "on" a runway, or takeoff or land an aircraft, unless he has received an appropriate clearance from ATC. The rule, as currently worded, is silent with respect to the need to receive an Air Traffic Control clearance in order to operate elsewhere than "on" a runway. Therefore, it is proposed to add to Part 1 of the Federal Aviation Regulations a definition of the "movement area" of an airport. "Movement area" would be defined as consisting of all areas of an airport used for the taxiing, takeoff, and landing of aircraft, except loading ramps and parking areas. The term "movement area" would also be used in § 91.87(h) instead of "runway."

It appears that a revision of paragraph (h) of § 91.87 will clarify the ambiguity as to the areas of an airport on which a clearance from Air Traffic Control is required.

(Section 307(c), Federal Aviation Act of 1958 (49 U.S.C. 1348(c)); section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Parts 1 and 91 of the Federal Aviation Regulations as hereinafter set forth:

1. By adding a definition of "Movement Area" in § 1.1 to read as follows:

§ 1.1 General definitions.

• • • • •

"Movement Area" means, with respect to an airport, the runways, taxiways, and other areas of the airport that are used for the taxiing, takeoff, and landing of aircraft, except loading ramps and parking areas.

• • • • •

2. By amending paragraph (h) of § 91.87 to read as follows:

§ 91.87 Operations at airports with operating control towers.

• • • • •

(h) *Clearances required.* No pilot may, at an airport with an operating control tower, taxi, takeoff, or land an aircraft on a movement area, unless he has received an appropriate clearance from ATC. A clearance to "taxi to" a runway is a clearance to cross all intersecting runways but is not a clearance to "taxi on" the assigned runway.

Issued in Washington, D.C., on March 15, 1974.

RAYMOND G. BELANGER,
Director,
Air Traffic Service, AAT-1.

[FR Doc.74-7053; Filed 3-26-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-SO-26]

FEDERAL AIRWAYS

Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation regulations that would alter V-159 from Palm Beach, Fla., to Vero Beach, Fla., and V-267 east alternate from Palm Beach, Fla., to Orlando, Fla.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 26, 1974 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would realign V-159 in part from Palm Beach via the Palm Beach 326° T/M radial and the Vero Beach 178° T/M radial to Vero Beach. V-267E would be realigned in part from Palm Beach via the INT Palm Beach 326° T/M radial and the Orlando 162° T/M radial to Orlando. The realigned V-267E would conform to revised terminal procedures at Palm Beach and would reduce the airway distance from Orlando to Palm Beach. V-159 would be adjusted slightly to coincide with V-267E as realigned northwest of Palm Beach.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 21, 1974.

RAYMOND M. MCINNIS,
Acting Chief, Airspace and
Air Traffic Rules Division.

[FR Doc.74-7058 Filed 3-26-74;8:45 am]

[14 CFR Part 91]

[Docket No. 13582; Notice No. 74-14]

CIVIL AIRCRAFT FLEET NOISE REQUIREMENTS

Notice of Proposed Rulemaking

The Federal Aviation Administration is considering amending the Federal Aviation Regulations to establish additional civil aircraft noise requirements. The proposed amendments would require that subsonic turbojet engine-powered airplanes with maximum weights of 75,000 pounds or more, and that are operated under Parts 91, 121, 123, 129, and 135 of the Federal Aviation Regulations, conform to Part 36—"Noise Standards: Aircraft Type and Airworthiness Certification."

Interested persons are invited to participate in the subject rulemaking process by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Ave. SW., Washington, D.C. 20591. All communications received on or before June 28, 1974, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments, in the rule docket for examination by interested persons. Comments are specifically requested on the overall environmental aspects of this proposal.

This Notice is published after consideration of the comments received in response to Advance Notice of Proposed Rule Making, Notice 73-3, "Civil Airplane Fleet Noise Requirements" (Docket No. 12534), published in the FEDERAL REGISTER (38 FR 2769) on January 30, 1973 (hereinafter referred to as Notice 73-3).

Notice 73-3 proposed to control and reduce airplane noise emissions by establishing a limit on the fleet noise levels of each air carrier operating under Part 121 of the Federal Aviation Regulations. Three phases of noise limits were proposed to be effective in a progressive reduction manner. The first and second phases of fleet noise levels were to be determined in 1973 and 1976, respectively, through the application of a logarithmic equation using the individual noise levels and operations of each airplane within the carrier's fleet. The third and final phase in establishing fleet noise level limits would have required that by July 1, 1978, all airplanes in the carrier's fleet not exceed the Appendix C levels of Part 36 of the Federal Aviation Regulations.

The comments received in response to Notice 73-3 were almost unanimously opposed to the use, implementation, structure, mathematical relationship and general concept of the logarithmic equation for determining fleet noise levels. The comments suggested that the equation proposed mathematical manipulation of noise; that it did not give the desired credit for quieter aircraft; that it should be a linear relationship rather than logarithmic; that it did not include weight factors for day-night operations; that it did not credit a factor for community annoyance; and that it did not account for effective noise levels at different airports. While it is true that the proposed mathematical equation would not have satisfied many of the objections raised by the commentators, the primary objective of that equation was to assist the fleet operator in evaluating his fleet noise levels in relation to the noise limits proposed. The proposal would have accomplished that objective. However, upon review of all the comments received, including an analysis of alternative equations submitted in response to Notice 73-3, the FAA has determined that the objective of the fleet noise rule can be attained without the use of any mathematical equation.

In addition, a large number of comments expressed strong opposition to the proposed exclusion from the noise requirements in Notice 73-3 of airplanes used in overseas, foreign and intrastate operations by Part 121 operators. The commentators pointed out that such exclusion would deprive many of the major airports in the more noise sensitive areas of the benefits of the noise reduction provided by that Notice. In view of the foregoing, and after further consideration, the FAA now considers it appropriate to cover subsonic turbojet airplanes of U.S. registry weighing 75,000 pounds or more operated under Part 121, including those in overseas and foreign air commerce. Moreover, this proposal would cover all subsonic turbojet engine-powered airplanes of U.S. registry weighing 75,000 pounds or more operated under Parts 91, 123, and 135. As such, it would apply to corporate and other general aviation operators as well as air carriers, certain air taxi and commercial operators, and air travel clubs. However, so far as U.S. aircraft are concerned, it is proposed to limit the applicability under this Notice to airplanes having standard airworthiness certificates. The FAA has not determined that a retrofit to Part 36 noise levels for experimentally and provisionally certificated airplanes or airplanes having a restricted category certificate would be technologically practicable. It should be noted that there are a number of U.S. registered civil airplanes that are of the type covered by this proposal but that are operated entirely outside the United States. This proposal would not apply to those airplanes.

The FAA has given particular attention to the matter of including foreign civil turbojet engine powered airplanes weighing 75,000 pounds or more. On the one hand, it is preferable that environmental problems affecting international civil aviation, like other aviation problems affecting more than one nation, be resolved by the International Civil Aviation Organization (ICAO). The United States strongly supports the effort being made in ICAO to achieve uniformity in the noise reduction area. Uniform international noise standards are viewed as the best ultimate solution to the international aspects of the aircraft noise problem. The United States will thus continue to work through ICAO to establish appropriate international noise standards.

On the other hand, the FAA does not believe that foreign registered aircraft should be excluded from application of Fleet Noise Level regulations pending the development of appropriate international standards. The regulations that would be issued following this Notice must, under the Noise Control Act of 1972, be economically reasonable, technologically practicable, and appropriate to the type of aircraft to which they apply. To withhold applicability of reasonable standards to foreign aircraft would not be an appropriate response to the FAA's duty, under that Act, to protect the public from aircraft noise. In addition, excluding foreign aircraft could be unfair to U.S. operators of similar aircraft who would be forced to operate (in the same markets as foreign aircraft) with an economic burden of noise compliance that is not borne by the foreign operators. On balance, the FAA believes that equal and nondiscriminatory application of economically reasonable noise standards, to all operators, is an appropriate noise regulatory policy. Detailed comments from foreign operators (as well as U.S. operators) are invited with respect to the technological and economic aspects of this proposal. Such comments will be carefully reviewed prior to taking any action.

Since the U.S. aircraft covered by this proposal are limited to those that have U.S. Standard Airworthiness Certificates, the only foreign aircraft that would be covered are those that, if registered in the U.S., would be required by applicable Federal Aviation Regulations to have a U.S. Standard Airworthiness Certificate in order to conduct their intended operation in the United States. Finally, since the purpose of this proposal is to ensure that the takeoff, sideline, and approach noise levels of Part 36 are complied with, it would serve no useful purpose to apply those standards to foreign aircraft that merely overfly the United States (and thus do not expose airport environments to their noise levels). This proposal, therefore, would only cover foreign aircraft that land or take off in the United States.

A number of commentators recommended that compliance times earlier than those proposed in Notice 73-3 be established. The FAA does not agree. The compliance dates proposed were based primarily on the time requirements associated with the implementation of retrofit modifications to the forecast fleet of pre-Part 36 aircraft. Consideration was given to tooling for retrofit hardware production, the time required in obtaining airworthiness certification for engine nacelle-airframe combinations, material procurement lead time, and projected installation time. For these reasons, earlier compliance dates are not considered reasonable.

Several commentators indicated concern regarding the availability of retrofit hardware, and doubt that the rule would be economically reasonable. FAA's investigation shows that retrofit designs are either available or are being flight tested for many types of airplanes covered by this proposal and that these types constitute most of the fleet. FAA is aware that this proposal includes the relatively few pure turbojet engine-powered airplanes currently in service. No acoustic modification exists for these aircraft and expensive reengining could be required to achieve conformance with our standards. However, based on the rate at which these airplanes are being retired from service by U.S. operators, it appears that few, if any, would be in operation by 1978. As previously stated, the expected retrofit configurations are definable, and from these definitions, retrofit cost and impact on performance and weight can be estimated so one can assess whether retrofit is economically reasonable. Economic analysis of the cost impact of retrofit on the collective operators indicates that the proposed program of retrofit is economically reasonable, though individual operators may consider the costs to be a financial burden. The FAA notes that the Civil Aeronautics Board generally allows fare adjustments in the domestic air carrier industry to reflect increases in operating costs. However, the impact of retrofit will vary among individual carriers, and fare adjustment approvals retain uniformity of fares among competing carriers. In addition, the rates for flag carriers are established by the International Air Transport Association, which has stated that it favors retrofit by means of public funding rather than fare adjustments.

In the light of the comments received and after further review within the FAA, it is believed that a phased compliance with Part 36 of the Federal Aviation Regulations, including Appendix C, is the appropriate means of implementing fleet noise requirements. While this proposal retains many of the proposed requirements of Notice 73-3, it is substantially different in many respects. The significant comparisons are discussed in some detail hereinafter.

As proposed in Notice 73-3, this notice applies to turbojet engine-powered airplanes with maximum weights of 75,000

V 39 160 MAR 27 74 XUM

pounds or more. Contrary to numerous comments received in response to Notice 73-3, the FAA does not now consider it appropriate to propose these noise requirements for airplanes weighing less than 75,000 pounds. While it has been demonstrated that the manufacturers of some jets of less than 75,000 pounds maximum weight can, on a new design production basis, meet or better the noise levels prescribed in Part 36, this in itself does not justify a retrofit requirement for operators of jets in this weight category. The feasibility of potential application of these advances in small jet engine technology and the related costs in in-service retrofit are currently being evaluated. Therefore, jet airplanes with maximum weights of less than 75,000 pounds are not being included at this time.

All of the airplanes covered by the proposal, including those airplanes operated by air taxi operations, air travel clubs and those airplanes operated under Part 91, as well as the flag, domestic and supplemental air carriers and commercial operators operating under Part 121, would have to be in compliance with Part 36 by not later than July 1, 1978 Most of the Part 91 operators, the air taxi operators and the air travel clubs who have an airplane covered by this proposal in their fleet of airplanes generally have only one such airplane. Since the domestic, flag, supplemental air carriers and commercial operators operating under Part 121 and foreign air carriers operating under Part 129 have most of these airplanes, the impact of the operations of these operators far exceeds that of the other classes of users in terms of community noise exposure nationwide. For this reason it might be considered appropriate in the public interest to propose that the Part 121 and Part 129 operators have a significant portion of their airplanes meet the Part 36 requirements at an intermediate date. But as a consequence of engine/nacelle intermix problems prior to complete compliance of a total fleet and considerations of alternate retrofit cost for different compliance options, such a scheme, is impractical. To assure progress, though, it is now proposed that all domestic, flag, and supplemental air carriers and foreign air carriers, and commercial operators holding certificates under Part 121, cannot operate their subsonic turbojet engine-powered airplanes with maximum weights of 75,000 pounds or more after July 1, 1976, unless they can submit evidence that half of their inventory of engine/nacelles for these airplanes are of a type that has been demonstrated to permit these aircraft types to meet the requirements of Part 36 if the engine/nacelles were deployed in a full set.

Under this proposal, the operators would have the alternative of modifying existing airplanes, replacing them with other airplanes meeting the Part 36 requirements, or a combination of these actions.

None of the persons covered by this proposal should have any difficulty in determining whether an airplane has been shown to meet the Part 36 requirements since Part 36 requires that an entry to that affect be placed in the Airplane Flight Manual for the airplane.

As many commentators recommended with respect to Notice 73-3, this proposal provides for individual aircraft meeting the prescribed noise levels. However, this proposal does not, as suggested by some commentators, reduce the ultimate noise level for all airplanes to a minus (−) 10dB from the current Part 36, Appendix C. The FAA is addressing that matter in a separate rule-making action.

(Secs. 313(a), 601, 603, 604, and 611, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423, 1424, and 1431 as amended by the Noise Control Act of 1972 (P.L. 92-574)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Title I, National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.); Executive Order 11514, March 5, 1970).

In consideration of the foregoing, it is proposed to amend Part 91 of the Federal Aviation Regulations by adding a new Subpart E to read as follows:

Subpart E—Noise Requirements

Sec.
91.301 Applicability.
91.303 Relation to Part 36.
91.305 Interim noise requirements for air carriers.
91.307 Noise requirements for all airplanes.

Subpart E—Noise Requirements

§ 91.301 Applicability.

This subpart prescribes noise requirements for the operation, in the United States, of—

(a) U.S. registered civil subsonic turbojet engine-powered airplanes with maximum weights of 75,000 pounds or more and having standard airworthiness certificates; and

(b) foreign civil subsonic turbojet engine-powered airplanes with maximum weights of 75,000 pounds or more that land or take off in the United States and that, if registered in the United States, would be required by applicable Federal Aviation Regulations to have U.S. standard airworthiness certificates in order to conduct the operations intended for the airplane.

§ 91.303 Relation to Part 36.

Unless otherwise specified, all references in this subpart to the requirements of Part 36 of this chapter, include the noise levels of Appendix C of that Part, as effective on December 1, 1969, notwithstanding the provisions of that part excepting certain aircraft from those noise levels and notwithstanding the tradeoff provisions of that part.

§ 91.305 Interim noise requirements for air carriers.

After June 30, 1976, no domestic, flag, or supplemental air carrier or commercial operator holding a certificate under Part 121, of this chapter, or foreign air carrier holding a certificate under Part 129 of this chapter may operate, under that certificate, any airplane covered by this subpart and listed on the aircraft record required for domestic and flag air carriers or on the operations specifications required for the supplemental air carriers, commercial operators, and foreign air carriers, that is not shown to meet the requirements of Part 36 of this chapter unless at least one-half of the engine/nacelles for the airplanes covered by this subpart and listed for the certificate holder are of a design that has been shown to permit those aircraft types to meet the requirements of Part 36 if the engine/nacelles were deployed in a full set.

§ 91.307 Noise requirements for all airplanes.

After June 30, 1978, no person may operate any airplane covered by this subpart unless that airplane is shown to meet the requirements of Part 36 of this chapter.

Issued in Washington, D.C., on March 22, 1974.

R. P. SKULLY,
Director, Office of Environmental Quality.

[FR Doc. 74-7083 Filed 3-26-74; 8:45 am]

CIVIL SERVICE COMMISSION

[5 CFR Part 900]

ADMINISTRATION OF STANDARDS FOR MERIT SYSTEM OF PERSONNEL ADMINISTRATION

Notice of Proposed Rulemaking

Notice is hereby given that pursuant to authority of section 503 of the Intergovernmental Personnel Act of 1970 (42 U.S.C. section 4728), the Civil Service Commission proposes to add subpart G to Part 900 of Title 5 of the Code of Federal Regulations to implement section 208 of the Intergovernmental Personnel Act of 1970.

Interested persons may submit written comments, objections, or suggestions to the Bureau of Intergovernmental Personnel Programs, U.S. Civil Service Commission, Washington, D.C. 20415, on or before April 26, 1974. Written comments, objections, and suggestions submitted will be available for public inspection at the address given in this notice during the Commission's regular business hours (8:15 a.m. to 4:45 p.m., Monday through Friday). The proposed subpart G reads as follows:

Subpart G—Administration of the Standards for a Merit System of Personnel Administration

Sec.
900.701 Purpose.
900.702 Applicability.
900.703 Definitions.
900.704 Review of merit system plans.
900.705 Review of personnel operations.
900.706 Reports and records.
900.707 Compliance.

AUTHORITY: The provisions of this subpart G issued under 42 U.S.C.A. § 4728, section 4763; and E.O. 11589, 3 CFR, 1971 Comp., p. 162.

§ 900.701 Purpose.

(a) This subpart effectuates the administration of the Standards for a Merit System of Personnel Administration (hereinafter the "Merit System Standards") as set out in 45 CFR 70, or as may be modified or superseded, for which the U.S. Civil Service Commission (hereinafter referred to as the "Commission") was given the responsibility by section 208 of the Intergovernmental Personnel Act of 1970 (91 Stat. 648).

(b) This subpart provides regulations under which the Commission will (1) determine whether plans for merit system administration conform to the requirements of the Merit System Standards; (2) evaluate personnel operations for compliance with the approved plans; and (3) provide a procedure for resolving issues of conformity or compliance.

§ 900.702 Applicability.

This subpart applies to each program or activity receiving a grant-in-aid subject to the Merit System Standards.

§ 900.703 Definitions.

In this subpart:

(a) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and a territory or possession of the United States.

(b) "Approved State plan" means a merit system plan found by the Commission to conform substantially with the Merit System Standards.

(c) "Federal agency" means the Federal agency providing financial or other assistance.

(d) "Federally aided State agency" means any State government agency administering a grant-in-aid or other Federally assisted program that under a law or regulation specifically requires the establishment and maintenance of personnel standards on a merit basis with respect to an aided program or activity.

(e) "Local agency" means an agency of a county or municipal government or like jurisdiction administering grant-aided programs or activities under the supervision of a federally aided State agency.

(f) "Merit System Plan" means the laws, rules, regulations, and policy statements of a State or local government under which a merit system is required as a condition for receiving a Federal grant or other assistance.

(g) "State merit system agency" means a State Civil Service Commission, Personnel Department, Merit System Council or other similar personnel agency providing services to State and/or local agencies.

(h) "Local merit system agency" means a Civil Service Commission, Personnel Department, Merit System Council or other similar personnel agency providing services to local agencies.

§ 900.704 Review of merit system plans.

(a) All federally aided State and local agencies shall maintain a merit system plan which shall be subject to review by the Commission.

(b) The regional office of the Commission having jurisdiction over the area where the federally aided State agency is located is responsible for reviewing the State's merit system plan.

(c) The State merit system agency shall be designated as a central submittal agency by the federally aided State agencies and shall submit for review the State's merit system plan and amendments thereto to the Commission's regional office.

(d) The federally aided State agency shall review the merit system plan and amendments thereto of each local agency, except that under a prior agreement this review may be conducted by a State merit system agency or other appropriate organization on behalf of the federally aided State agency.

(e) A Federally aided State agency or other organization conducting a review as provided in paragraph (d) of this section shall consult, as necessary, with the appropriate regional office of the Commission on questions of interpretation of the Merit System Standards.

(f) A review under paragraph (d) of this section shall include negotiations with the local agency to correct any deviations, and if required, shall include a recommendation for technical assistance by the State government or the Commission.

§ 900.705 Review of personnel operations.

(a) The Commission, in cooperation with the appropriate Federal agency, shall make or arrange for onsite reviews of each State merit system agency and each Federally aided State agency to determine compliance with the approved State plan, except that reviews of the latter agencies by the State merit system agency may be accepted in lieu of Commission reviews.

(b) Federally aided State agencies, in consultation with the appropriate regional office of the Commission, shall make or arrange for onsite reviews of the operations of the merit system in each local agency to determine compliance with the approved plan.

§ 900.706 Reports and records.

(a) Each Federally aided State or local agency and each State or local merit system agency shall maintain personnel records necessary for the proper administration of a merit system. The records shall consist of, but are not limited to: (1) Classification plans, (2) compensation plans, (3) examination announcements, and (4) affirmative action plans for equal employment opportunity.

(b) Each Federally aided State or local agency and each State or local merit system agency shall permit the Commission during normal business hours to review its books, records, and other sources of information as may be required to ascertain compliance with this subpart.

(c) Each Federally aided State or local agency shall furnish annually to the Commission completed report CSC Form 1129, Review of Personnel Operations—Grant-Aided Agency, and other reports as may be required to show compliance with the Merit System Standards.

(d) Each State and local merit system agency shall furnish annually to the Commission completed report CSC Form 1128, Review of Personnel Operations—Merit System Agency.

§ 900.707 Compliance.

(a) The Commission, when corrective action is required, will negotiate with the appropriate State merit system agency to achieve compliance and will coordinate its activities with the appropriate Federal agency.

(b) The Commission shall request the appropriate Federal agency to assist in rendering technical assistance when required to achieve compliance.

(c) The Commission, when compliance with the Merit System Standards is not achieved after negotiation or the rendering of necessary technical assistance, shall make a finding of lack of substantial conformity and forward this finding to the Federal agency, recommending that grant termination procedures or other appropriate action be initiated.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

CERTIFICATION OF PESTICIDE APPLICATORS

Extension of Comment Period

This notice extends the period for filing comments related to the proposed rule published February 22, 1974 (39 FR 6730); this proposed rule would establish standards of competence under section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973) for applicators using pesticides pursuant to section 3 of FIFRA. The comment period provided for in the February 22, 1974 publication was to end on March 25, 1974.

Because of the interest generated by the proposed regulations, the time for filing comments is hereby extended for an additional 30 days. There is, however, considerable urgency in promulgating these regulations in final form as soon as possible in order to provide the States the maximum amount of time to implement this section of the Act. The Agency hopes that this extension of the comment period will not result in a delay in the final promulgation of the regulation. To avoid this delay, the Agency would urge that all comments be forwarded as close to the original March 25 date as is possible or practical. Early submission will ensure that the comments receive the most complete review and consideration prior to promulgation of the final rule.

All persons who desire to submit written information or views in connection

V 39 160 MAR 27 74 XUM

with this matter may file as late as April 25, 1974. Such comments should be filed in duplicate and addressed to Mrs. Betty J. Billings, Hearing Clerk, Environmental Protection Agency, Room E–1019, Waterside Mall, Washington, D.C. 20460. All written comments filed pursuant to this notice will be available for public inspection at the Office of the Hearing Clerk during regular business hours, 8 a.m. to 4:30 p.m. daily.

Dated: March 21, 1974.

CHARLES L. ELKINS,
Acting Assistant Administrator for Hazardous Materials Control.

[FR Doc.74–7065 Filed 3–26–74:8:45 am]

[40 CFR Part 172]

SHIPMENTS OF PESTICIDES FOR EXPERIMENTAL USE

Issuance of Permits

Notice is hereby given that, pursuant to the authority of Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 983), the Administrator of the Environmental Protection Agency (EPA) proposes to establish a new Part 172 of Chapter I of Title 40 of the Code of Federal Regulations and revoke § 162.17. The proposed regulations shall read as set forth below. The intent of this proposed rulemaking is to revise present procedures with respect to the use of pesticides for experimental purposes so as to conform to the provisions of FIFRA, as amended.

Background. The issuance of experimental use permits, as proposed in these regulations, does not represent a new pesticide regulatory activity. For more than twenty years, pesticide experimentation has been regulated by EPA and its predecessor agencies. Although the 1947 FIFRA provided no explicit authorization to regulate experimental uses of pesticides, Section 7(a)(4) of the 1947 Act has been the statutory basis for this regulatory activity. This section exempted from the penalty provisions of the Act experimental pesticide use "by or under the supervision of any Federal or State agency authorized by law to conduct research in the field of economic poisons; or by others if a permit has been obtained before shipment in accordance with regulations promulgated by the Secretary."

The current regulations for this regulatory program (referred to as the temporary permit program) appear at 40 CFR § 162.17. Basically, these regulations (as amended in 1964) state that temporary permits "will only be issued for bona fide experimental programs under the supervision of qualified persons." The regulations detail the information which must be submitted for the issuance of a permit and the requirements for data reporting during an experimental program.

In contrast to the 1947 FIFRA, FIFRA, as amended, specifically authorizes the issuance of experimental use permits and can best be interpreted as a codification of the experimental permit program existing under the 1947 FIFRA. Section 5 (a) states:

> Any person may apply to the Administrator for an experimental use permit for a pesticide. The Administrator may issue an experimental use permit if he determines that the applicant needs such permit in order to accumulate information necessary to register a pesticide under Section 3.

The purpose behind Section 5 is to facilitate the generation of data necessary to support an application for registration under Section 3 and yet provide sufficient regulatory control to prevent adverse environmental effects.

Section 5(c) provides that the "use of a pesticide under an experimental permit shall be under the supervision of the Administrator, and shall be subject to such terms and conditions and be for such period of time as the Administrator may prescribe in the permit." Thus, EPA is specifically authorized to regulate all use aspects of a testing program. Although these authorities were not specified in the 1947 FIFRA, again they were interpreted as part of EPA's regulatory authority under the Act and were reflected in the regulations.

The other provisions of Section 5 authorize the Administrator to:

(1) Establish a temporary tolerance for a pesticide prior to issuing an experimental use permit,

(2) Specify that, for a pesticide containing any chemical or combination of chemicals which has not been included in any previously registered pesticide, studies be conducted to detect whether the use of the pesticide under the permit may cause unreasonable adverse effects on the environment, and

(3) Authorize States to issue experimental use permits.

Environmental Explanation. The development of an effective pesticide is a multi-stage process often requiring substantial expenditures of time and finances. Typically, a commercial developer, college research department, or governmental agency initiates the process by applying a test substance in its own laboratories or test fields. The objective at this point is to determine whether the substance has sufficient pesticidal potential to warrant further formulation and research development. Also, it is at this stage that basic data on toxicity and environmental effects are obtained. The process then moves into a stage where the pesticide generally is tested on a larger scale, primarily to determine the effects of factors such as climatic conditions, soil composition, severity of pest problems, and application rates, as they relate to efficacy. When the developer has accumulated sufficient data, he seeks registration under Section 3.

Between October 1, 1972 and September 20, 1973 the Registration Division received 132 applications for experimental use permits and issued 96 permits. These permits authorized the use of approximately 1.5 million pounds of pesticides. Total experimental use actually was larger by an unknown quantity, since Federal and State agencies were not required to obtain permits for their own experimental programs. While total experimental use under these proposed regulations cannot be predicted, it is not likely to be quantitatively large in comparison to total annual use of pesticides in the U.S., which is more than one billion pounds. On the other hand, while it is not anticipated that pesticide research and development will increase greatly, the number of permit applications received by EPA will increase significantly under the provisions of FIFRA, as amended, since permits are required for Federal and State programs.

Under the 1947 FIFRA, any Federal or State agency authorized to conduct pesticide research did not need an experimental permit and was exempt from the provisions of the Act. Thus, several Federal agencies, particularly the Departments of Agriculture and Interior and State agricultural colleges, have conducted extensive pesticide research programs without being subject to FIFRA regulation. FIFRA, as amended, however, does not grant a blanket exemption to Federal and State agencies. While the legislative history is silent on this question, it is EPA's position that no exemption, such as that granted by the 1947 FIFRA, was intended under the 1972 amendments or can be allowed. Section 5(f) of the Act does authorize "any State to issue an experimental use permit for a pesticide" if a State plan for the issuance of such permits has been approved by the Administrator. This section has been interpreted as granting States with approved plans the authority to issue experimental permits only for pesticides designed to meet "special local needs" for eventual registration under Section 24. Again, the legislative history does not discuss this situation, but EPA has interpreted Section 5(f) as being limited by Section 24. Since experimental use permits are issued to gather data to support registration, States can be authorized to issue experimental use permits only for pesticides they could ultimately register for a "special local need," i.e., a permit authorizing distribution and use within that State to gather data necessary to support State registration.

The most important environmental consideration in the development of these proposed regulations is the necessity of striking a balance between facilitating—or, as a minimum, not unduly impeding—pesticide research and development and protecting against human and environmental injury. Experimental use of pesticides can, of course, pose both human and environmental hazards; it should be noted, however, that basic data on toxicity are required before an experimental use permit can be issued. On the other hand, experimental use and testing are essential to the development of new, less hazardous, more effective pesticides, including both chemical and biological agents. In short, there are both risks and

benefits associated with experimental use of pesticides. Given these considerations, EPA has designed the proposed regulations in such a way as to place experimental programs under reasonable constraints without imposing burdens unrelated to needed protection of human health and the environment. The remainder of this section on environmental considerations deals with the principal issues bearing on the question of what constraints are reasonable and necessary.

1. Among the research and development steps involved in accumulating data for registration, for which ones should experimental use permits be required? As indicated above, the first stages of development are designed simply to determine whether or not a substance has any pesticidal value. Testing is typically done on a wide range of substances in highly controlled laboratory settings. If a substance shows promise, various formulations are usually evaluated in small plot tests. Again, these are highly controlled and represent minimal hazards because of the small quantities applied and the highly trained personnel conducting such tests. Once a broad outline of a pesticide's character has been developed, it becomes necessary to test the pesticide under field conditions. At this point, larger quantities of the pesticide are used, often in several different locations. Thus, the potential hazards can be greater. EPA has determined that it is at this stage that an experimental use permit should be required to protect the environment. With basic data obtained from laboratory and small plot testing on efficacy, toxicity, and environmental effects, a reasonably good prediction on the pesticide's effects can be made; if a permit is granted, conditions can be imposed to protect applicators and other persons and the environment. The requirement to obtain a permit at this stage should be no real burden, since pesticides reaching this level of development are likely to become candidates for registration and the data accumulated in the experimental program will be required for registration. Finally, the decision to exempt the initial stages of experimentation from the requirements of these proposed regulations is consistent with Section 12(b)(5), which exempts from the penalty provisions of the Act the shipping of "a substance or mixture of substances being put through tests in which the purpose is only to determine its value for pesticide purposes or to determine its toxicity or other properties and from which the user does not expect to receive any benefit in pest control from its use." This language incorporates into the statute the existing regulatory policy, under which permits are not required for experimental use of substances not yet determined to have pesticidal value.

2. Should the sale of experimental pesticides be prohibited? Regulations under the 1947 FIFRA provided that material covered by a temporary permit shall not be offered for general retail sale. That terminology has been questioned many times and interpreted a number of different ways. It has been found to be ambiguous and unenforceable. This has made it difficult to prevent the introduction of experimental pesticides into unregulated and unmonitored use situations.

While the alternative of prohibiting the sale of experimental pesticides was considered, EPA has determined that such a provision would needlessly add to the cost of pesticide development. There is no environmental or human health reason why a participant in an experimental program should not compensate the developer for any benefit received. The cost to participants generally will be minimal, and sale itself has not caused problems. Rather, the problem has centered on the imprecise sale limitations of the current regulations. To solve this problem without imposing an unnecessary burden on research programs, the proposed regulations would limit sale or distribution to participants in experimental programs and prohibit resale or other retail sale or other distribution. Such a restriction should provide an adequate safeguard to prevent a manufacturer from trying to market an experimental pesticide. Further, permits will only authorize the use of enough experimental pesticide to gather data to support registration.

3. To what extent should permittees be required to make reports on their programs? EPA has a responsibility to monitor experimental programs to detect any unforeseen effects and failures by program participants to adhere to permit conditions. The current regulations require the submission of periodic reports every three months during an experimental program and a final report at its conclusion. The major shortcoming of this is that it frequently deprives EPA of the opportunity to observe experimental pesticide applications. With reports received only at three month intervals, notification of shipment often is received by EPA long after the experimental pesticide has been shipped and applied.

EPA is proposing to modify the reporting requirements applicable to the permittee in order to facilitate EPA monitoring of experimental permit programs. Under the proposed regulations, permittees would be required to notify EPA at the time of shipment *unless otherwise specified* in a permit. Although this imposes an additional administrative burden on the permittee, the requirement clearly is necessary to allow EPA to undertake any monitoring deemed necessary in particular cases. Where such monitoring is deemed unnecessary, this requirement can be waived.

4. To what extent should permittees be required to supervise experimental programs? It has been EPA's policy that permittees are expected to exercise close supervision. There is, however, some ambiguity on this point in the current regulations. The proposed regulations would specifically provide that permittees must supervise the testing activities of participants, evaluate the results of testing from each site of application, and report immediately to EPA any adverse effects from use of, or exposure to, the pesticide.

Effective Date. These regulations will be effective immediately upon final promulgation, with the following exceptions:

1. Temporary permits issued under 40 CFR § 162.17 prior to the date of final promulgation of these regulations will remain in effect until their expiration date. Extensions or renewals requested after the date of publication of these proposed regulations will be granted if they are consistent with the new requirements proposed herein.

2. Experimental testing of pesticides actually being conducted by Federal and State agencies on the date of final promulgation of these regulations will be allowed to continue for the period necessary to complete such testing, e.g., remainder of the growing season or comcomparable period. Federal and State agencies planning to initiate new testing activities after the date of final promulgation of these regulation will be required to obtain experimental use permits for such activities.

3. Permit applications received after the date of publication of these proposed regulations will be processed in accordance with the new requirements proposed herein. To the extent that additional information is needed with respect to any such application, the applicant will be promptly notified. EPA will attempt to minimize the delays involved in this transition from the existing to the new regulations.

4. Section 172.10 will not be effective until regulations under Section 24(c) of FIFRA are promulgated since the scope of State Experimental Permit Programs will be determined by the definition of "special local needs" as used under Section 24(c). Further, EPA will publish in the future more specific guidance on the requirements for approval of State Experimental Permit Plans. EPA particularly solicits comments from the States indicating which States are interested in establishing a State Experimental Permit Program under Section 172.10.

Public Comment. EPA will welcome public comments on all provisions of these proposed regulations, including, in particular, the proposed requirements for submittal of information in support of applications for experimental use permits and the proposed reporting requirements, including reporting on pesticide shipments and on progress of experimental programs.

Public comment also is invited on the question of whether special procedures and/or informational requirements should be established to simplify and expedite the issuance of experimental use permits for innovative pest control methods. EPA has received suggestions that such steps be taken in order to promote innovations in pest management.

V 39 160 MAR 27 74 XUM

Any person may file comments on this proposal on or before April 26, 1974. Such comments should be filed in duplicate and addressed to Mrs. Betty J. Billings, Hearing Clerk, Environmental Protection Agency, Room No. 1019E, Waterside Mall, Washington, D.C. 20460. All written comments filed pursuant to this notice will be available for public inspection at the Office of the Hearing Clerk during regular business hours, 8 a.m. to 4:30 p.m. daily.

Dated: March 23, 1974.

RUSSELL E. TRAIN,
Administrator.

A new Part 172 is proposed to read as follows:

PART 172—EXPERIMENTAL USE PERMITS

§ 172.1 Definitions.

For the purposes of this part, the following terms shall be defined as listed below:

(a) The term "applicant" means any person who applies for an experimental use permit, pursuant to section 5 of the act.

(b) The term "permittee" means any applicant to whom an experimental use permit has been granted.

(c) The term "participant" means any person who supervises the use of an experimental use pesticide at the application site and any person upon whose property an experimental use pesticide is used.

(d) The term "experimental laboratory animals" means individual animals or groups of animals intended for use and used solely for laboratory research purposes, regardless of species, and does not include animals intended to be used for any food purposes, or animals intended to be kept as livestock.

(e) The term "act" means the Federal Insecticide, Fungicide and Rodenticide Act, as amended (86 Stat. 973), and other legislation supplementary thereto and amendatory thereof.

The terms defined in the act and not explicitly defined herein, are used herein with the meanings given in the act.

§ 172.2 General.

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 983), and except as herein provided by § 172.3, any person wishing to accumulate information necessary to register under section 3 and the regulations thereunder (a) for a pesticide product not registered with this Agency or (b) for a registered pesticide product for use not approved in connection with its registration under the act, may apply to the Administrator at any time for an Experimental Use Permit. Such pesticides may be sold or distributed only to the participants involved in an experimental program and are not for resale or other retail sale or other distribution.

§ 172.3 Exceptions.

No experimental use permit is required for:

(a) A substance or mixture of substances being put through screening tests in which the only purpose is to determine if it has value for specific pesticide purposes and from which the user does not intend to receive any direct benefit from pest control from its use. Such tests will be limited to laboratory and/or small plot replicated field tests less than 10 acres conducted by Federal or State agencies, colleges or universities, or commercial pesticide developers on areas leased or owned by them and continually operated as an experimental farm on a long-term basis (or, in the case of Federal agencies, used for experimental programs under written agreement with the property owner), where the crop or other test subject is destroyed or consumed only by laboratory or experimental animals or otherwise disposed of in a manner which will not endanger man or the environment.

(b) A substance or mixture of substances which under the Federal Food, Drug, and Cosmetic Act is defined as:

(1) A "new drug" (21 U.S.C. sec. 321(p) and sec. 355)

(2) A "new animal drug" (21 U.S.C. sec. 321(w) and sec. 360(b)) or

(3) An "animal feed" (21 U.S.C. sec. 321(x)) containing a "new animal drug" (21 U.S.C. sec. 360(b)).

These exemptions shall apply only insofar as the experimental uses are for drug and new animal drug purposes within the meaning of the Federal Food, Drug, and Cosmetic Act and shall not apply to pesticide experimental uses.

§ 172.4 Applications.

(a) *Time for Submission.* An application shall be submitted in triplicate to the Administrator, or his designee, as far as possible in advance of the intended date of shipment or use. Normally, processing of applications will require at least 90 days but may require a longer period, depending on the nature of the experimental program. In any event, applications will be processed as expeditiously as possible.

(b) *Contents of Application.* Each application for an experimental use permit must include the following information:

(1) *General.* (i) The purpose of the proposed testing; a description in detail of the proposed testing program; a designation of the pest organism(s) involved; the amount of pesticide product proposed for use; the crops, fauna, flora, sites, modes, and situation of application on or in which the pesticide is to be used; the States in which the proposed program will be conducted; the number of acres to be treated or included in the area of experimental use; and the proposed dates or period(s) during which the testing program is to be conducted.

(ii) The name and address of the applicant;

(iii) The name, address and telephone number of the individual(s) in the employ of the applicant who will be responsible for the day-to-day administration of the experimental use program for which a permit is being requested; and

(iv) The name, address and telephone number of any participant in the program (whether or not in the employ of the applicant), if available at the time an application is submitted or as soon thereafter as available. Any additions, deletions, or changes must be supplied promptly as they occur.

(2) *Chemical Information Required.* (i) A complete statement of composition for the formulation of the product to be tested giving the name and percentage by weight of each ingredient, active and inert.

(ii) Chemical and physical properties for each ingredient and for the formulation to be tested, including but not limited to the manufacturing processes and analytical methods suitable for the formulation.

(iii) Appropriate data on rate of decline of residues on the treated crop or environmental site.

(3) *Biological Information Required.* (i) A description and the specific results of any known prior testing of the product conducted to:

(A) Determine toxicity and effects in plants, animals, insects and other organisms at the site of application.

(B) Determine phytotoxicity, and other forms of toxicity or known adverse effects on nontarget plants, animals and insects surrounding the site of application and to determine adverse effects on the environment.

(ii) Results of toxicity tests and other data relevant to the product's potential for causing injury to the users or other persons who may be exposed, including any available epidemiological information as to man.

(4) If the experimental use pesticide is to be used in such a manner that any residue can reasonably be expected to result on or in food or feed, the applicant must:

(i) Submit evidence that a tolerance has been established for residues of the pesticide on or in any such food or feed, or

(ii) Submit a petition proposing establishment of a tolerance or exemption from the requirement of a tolerance, or

(iii) Certify that the food or feed derived from the experimental program will be destroyed or fed only to experimental laboratory animals for testing purposes, or otherwise disposed of in a manner which will not endanger man or the environment.

(5) *Other Information.* (i) The proposed method of storage and disposition of any unused experimental use pesticide and its containers.

(ii) A statement that the applicant and any participant in the experimental use program will permit, at any reasonable time, any authorized representative of the Agency, upon presentation of

official identification, entry to any premises involved in the testing program to inspect and to determine whether the provisions of the permit are being complied with as herein indicated.

(iii) Such other additional pertinent information as the Administrator may require.

§ 172.5 The Permit.

(a) *Issuance.* The Experimental Use Permit shall be issued when the Administrator determines that the conditions of section 5 of the act, and the regulations thereunder, have been met subject to such terms and conditions as the Administrator determines are warranted.

(b) *Duration.* Permits will be effective for a specified period of time, normally one year, depending upon the crop or site to be treated and the requirements of the testing program submitted. Permits and associated temporary tolerances may be renewed or extended upon request if circumstances warrant.

(c) *Limitations.* The quantity of a pesticide allowed by a permit may be less than requested if it is determined that the available information on efficacy, toxicity or other hazards, the need for data, or the adequacy of program supervision does not justify the quantity of the pesticide requested. Other limitations may also be placed in the permit if necessary for the protection of the public health and the environment.

(d) *Additions.* With respect to an experimental use pesticide containing any chemical or combination of chemicals not included in any previously registered pesticide, the Administrator may require that additional studies be conducted during the permit period to gather data to support the establishment of tolerances and/or registration. To the extent practicable, the applicant will be notified of any such requirements before or at the time an experimental use permit is issued.

§ 172.6 Labeling.

All pesticides shipped or used under an experimental use permit must be labeled with directions and conditions for use to be set by the Administrator. These labeling directions and conditions shall include:

(a) All information prescribed in 40 CFR 162.6 (Labeling) except that a registration number and previously registered use patterns shall not appear.

(b) The registration number of the establishment.

(c) Any limitations on entry of persons into treated areas.

(d) The prominent statement "For experimental use only."

(e) The Experimental Use Permit number.

(f) The statement "Not for resale."

§ 172.7 Program Surveillance and Reporting of Data.

(a) The permittee shall supervise the test program among the participants and evaluate the results of testing from each site of application. It will further be the responsibility of the permittee to report immediately to the Administrator, or to any person designated by him, any adverse effects from use of, or exposure to, the pesticide.

(b) A permittee shall submit the following reports during the experimental program.

(1) The following information must be submitted to the Administrator or his designee at the time of shipment, unless otherwise specified.

(i) Name and address of the shipper and place or places from which shipped.

(ii) Name and address of consignee.

(iii) Amount of each shipment.

(2) Reports will be required every three months, unless otherwise directed, which shall include the following:

(i) Quantity of the pesticide shipped and used during the reporting period;

(ii) List of States into which shipments were made;

(iii) A summary of the progress made and data obtained during the report period.

(3) A final report shall be submitted within 90 days after the expiration of the permit and shall include:

(i) All data gathered during the testing program,

(ii) Disposition of any unused pesticide,

(iii) Disposition of food or feed.

(4) In the case of any animals or birds that receive a direct treatment or application of any experimental use pesticide, the name and location of the packing plant where the animals will be processed shall be sent to Animal & Plant Health Inspection Service, USDA, Washington, D.C. 20250, at least ten days before the animals are to be shipped for slaughter. This requirement may be waived, on request, by USDA. These provisions do not exempt treated food-producing animals and their products from compliance with other applicable inspection requirements.

(5) Failure to submit required reports will be considered just cause for revocation of the permit.

§ 172.8 Renewals.

Application for renewal of experimental use permits and temporary tolerances, to provide for additional testing, should be submitted prior to expiration of the permit. Requirements for renewals are the same as for applications under § 172.4, except that information previously submitted may be incorporated by reference.

§ 172.9 Refusals to Issue and Revocation.

(a) At any time that the Administrator determines that an experimental use permit is not justified, or that the issuance of such a permit would cause unreasonable adverse effects on the environment, or for any other reason, he shall notify the applicant in writing.

(b) The Administrator may revoke an experimental use permit if he finds that its terms or conditions are being violated or that continued use under a permit could cause unreasonable adverse effects on the environment, or if new evidence is obtained which demonstrates that a revision of the temporary tolerance is needed. The Administrator will notify the permittee in writing. The permittee must notify all participants. The revocation of a permit for violative cause shall not preclude the Administrator from initiating civil or criminal sanctions for the violations of the permit conditions as authorized.

(c) *Hearing.* In the event that an applicant wishes to contest the refusal to issue an experimental use permit or a permittee wishes to contest the revocation of any such permit, he shall, within ten days after notification of such refusal or revocation, file a written response with the Administrator and a request for an opportunity to confer with the Administrator or his designee. Within 10 days after such conference, the applicant or permittee will be notified as to whether the Administrator's initial decision will be reconsidered.

§ 172.10 State Issuance of Permits.

(a) A State may issue an experimental use permit, pursuant to section 5 of the act, for the use of a pesticide for the purpose of accumulating information necessary to register a pesticide formulated solely for the distribution and use within that State to meet special local needs of that State if:

(1) The substance or mixture of substances has not been cancelled, suspended, or denied registration or the subject of a Federal experimental use permit.

(2) A State plan for issuing such permits has been submitted and approved in accordance with regulations to be prescribed by the Administrator.

§ 172.11 Publication.

At any time an experimental use permit is granted by the Administrator, he shall give prompt notice in the Federal Register. The Administrator, in his discretion, may publish notice of an application for an experimental use permit in the Federal Register prior to the granting or denying of the permit, with opportunity for comment by interested persons.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 19816, RM-1851, RM-1874]

EDUCATIONAL BROADCASTING

Order Extending Time for Filing Reply Comments

In the matter of ascertainment of community problems by educational broadcast applicants; amendment of Section IV (Statement of Program Service of FCC Broadcast Application Forms 340 and 342 (noncommercial Educational Broadcast Applications)); and Formulation of rules and policies relating to the renewal of educational broadcasting licenses

1. On September 6, 1973, the Commission adopted a notice of proposed rulemaking in the above-entitled proceeding.

V 39 160 MAR 27 74 XUM

Publication was given in the FEDERAL REGISTER on September 19, 1973, 38 FR 26212 (Sept. 19, 1973). The date for filing comments has expired and the date for filing reply comments is presently March 22, 1974.

2. On March 19, 1974, the Public Broadcasting Service (PBS) requested that the time for filing reply comments be extended to and including April 1, 1974. It states that the comments cover a broad range of views and positions which must be reviewed and analyzed in order for it to prepare responsive reply comments. It therefore states a short extension is needed in order to complete this task and to coordinate the reply comments between counsel and PBS.

3. It appears that the requested extension is warranted. Accordingly, *It is ordered*, That the date for filing reply comments is extended to and including April 1, 1974.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

Adopted: March 20, 1974.

Released: March 21, 1974.

[SEAL] MARTIN I. LEVY,
Acting Chief,
Broadcast Bureau.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 563]

[No. 74-202]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Proposal on Loans in Excess of 90 Percent of Value

MARCH 19, 1974.

The Federal Home Loan Bank Board considers it advisable to propose to amend Part 563 of the rules and regulations for insurance of accounts (12 CFR Part 563) by adding a new section, § 563.9-7, which would require insured institutions making single-family-dwelling loans exceeding 90 percent of value either to establish a special reserve or to secure private mortgage insurance of a specified amount from an insurer approved by the Federal Home Loan Mortgage Corporation.

At present, only Federally-chartered associations are required by the Board to have the protection of a special reserve or approved private mortgage insurance for single-family-dwelling loans in excess of 90 percent of value, as provided by § 545.6-1(a)(5)(iv) of the rules and regulations for the Federal Savings and Loan System. The purpose of the proposed amendment is to extend this protection to such loans made by State-chartered, Federally-insured institutions. Section 403(b) of the National Housing Act of 1934, as amended, states that insured institutions "will provide adequate reserves satisfactory to the Corporation, to be established in accordance with regulations made by the Corporation * * *" Under this statutory authority, the Board is empowered to determine that investments by insured institutions in the higher-risk, low-equity single-family-dwelling-loan category should be protected by means of a special reserve or approved insurance coverage which in the Board's view will serve as an adequate substitute for such a reserve. The Board therefore proposes to incorporate the provisions of § 545.6-1(a)(5)(iv) for Federal associations into the regulations for insured institutions in Part 563.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Part 563 by adding a new § 563.9-7 to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, D.C. 20552, by April 30, 1974, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

§ 563.9-7 Loans in excess of 90 percent of value.

(a) An insured institution which is authorized to make loans on the security of "single-family dwellings" (as defined in § 541.10 of this chapter) in excess of 90 percent of value of such real estate may do so only if:

(1) The association establishes and maintains a specific reserve with respect to such loan equal to one percent of the unpaid principal balance thereof until the unpaid principal balance has been reduced to an amount not in excess of 90 percent of the value or purchase price of the real estate security, whichever is less, determined at the time the loan was made; or

(2) That as long as the unpaid balance of such a loan is in excess of an amount equal to 90 percent of the value or purchase price of the real estate security, whichever is less, determined at the time the loan was made, that portion of the unpaid balance of such loan which is in excess of an amount equal to 80 percent of such value or purchase price of the real estate security is guaranteed or insured by a mortgage insurance company which has been determined to be a "qualified private insurer" by the Federal Home Loan Mortgage Corporation.

(b) This section does not apply to single-family dwelling loans to facilitate the sale of real estate owned described in § 561.15(d) of this subchapter.

(Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

FEDERAL POWER COMMISSION

[18 CFR Parts 2, 154, 157]

[Docket No. R-389-B]

JUST AND REASONABLE NATIONAL RATES FOR FUTURE SALES OF NATURAL GAS FROM WELLS COMMENCED ON OR AFTER JANUARY 1, 1973

Issuance of Revised Staff Nationwide Cost Study and Staff Study of American Gas Association Reserve Additions

MARCH 21, 1974.

Notice is hereby given, pursuant to the Administrative Procedure Act, 5 U.S.C. § 551, *et seq.* (1970),[1] and sections 4, 5, 7, 8, 14, 15, and 16 of the Natural Gas Act, 15 U.S.C. § 717, *et seq.* (1970),[2] that the Commission has determined that the attached Staff reports should be made a part of the record in this proceeding, and that all parties to this proceeding should be given an opportunity to comment upon these reports since information contained in the reports may be used by the Commission in arriving at its decision in this proceeding. The reports attached to this notice [3a] are a revision to Appendix B [3b] that was attached to the "Notice Of Proposed Rulemaking And Order Prescribing Procedures" which was issued in this proceeding on April 11, 1973,[4] and new Appendix B-1,[3b] which is a Staff study of the annual nonassociated natural gas reserve additions as reported by the American Gas Association (AGA) for 1971 and 1972.

Appendix B to the notice of proposed rulemaking has been revised to reflect 1972 drilling cost data as reported by the Joint Association Survey of the U.S. Oil and Gas Producing Industry (1972 JAS) and 1972 nonassociated natural gas reserve additions as reported by AGA. The original Appendix B has also been revised to reflect the utilization of a 10.5 year investment life for an updated test period of seven years (1966-1972) and a test period based upon the average of the 11, 16, and 26 year average productivities, and to set forth the estimated costs associated with a ten-year test period (1963-1972) and a four-year test period (1969-1972).[5] These cost studies were prepared by the Commission's Staff for comparative and illustrative purposes only; they do not necessarily represent a position of the Commission Staff in these proceedings.

Appendix B-1 attached to this notice is a Staff report prepared by the Bureau of Natural Gas and the Office of Economics entitled "Report On Indicated Disparity In Reporting Of Offshore Louisiana Non-Associated Natural Gas Reserves."

This report shows an indicated disparity between the nonassociated natural gas reserve additions reported by AGA for the years 1971 and 1972 and the reserve additions for selected producible gas leases in the Federal domain offshore of Southern Louisiana as determined by the Commission Staff. Because reserve additions are a critical element in the determination of productivity factors, and, in turn, the cost of new natural gas supplies, we are requesting all parties to this proceeding to comment upon the Staff Report and the utilization of reserve additions reported by AGA in the costing of new natural gas supplies and to respond to the following specific questions:

1. In view of the apparent disparity between the nonassociated natural gas reserves as reported by AGA and the volume of reserve additions determined in the Staff Report, should the reserve additions for the most recent years, *i.e.*, 1971 and 1972, be used in determining productivity factors to be considered in this proceeding?

2. By what methods, if any, can the reported reserve additions for 1971 and 1972 be appropriately adjusted in order to derive a reasonably reliable productivity factor for adoption in this proceeding?

3. Should the nonassociated natural gas reserve additions as reported by AGA be utilized in the calculation of a productivity factor for the costing of new natural gas supplies, and, if not, what alternative methods for calculating a productivity factor would offer greater reliability?

The Staff's current findings indicate that a disparity of approximately 1.7 trillion cubic feet (Tcf) may be due to a reporting lag which will be corrected in future years. The following statement of reporting procedures utilized by AGA for determining and reporting annual reserve additions underscores the fact that full reporting of reserve additions is deferred until the base information for determining the volume of reserve additions is furnished to the relevant AGA subcommittee:

> Subcommittees (which are responsible for the determination of reserves) are not necessarily aware of or have access to the subsurface information for all new discoveries at the time reserve estimates are prepared. This is especially true if a discovery is made late in the year for which a report is being prepared or when competitive situations relating to open acreage dictate that the subsurface information be held proprietary. In such cases new proved reserves are reported * * * as revisions * * * for the year in which the subsurface information becomes available.

Reserve Of Crude Oil, Natural Gas Liquids, And Natural Gas In The United States And Canada And United States Productive Capacity As Of December 31, 1971, Volume 26, p. 103, published jointly by the American Gas Association, American Petroleum Institute, and the Canadian Petroleum Institute (May 1972). This same statement appeared in the AGA report for 1972 reserve additions, Volume 27, p. 103 (May 1973).[6]

These statements suggest that the reserve additions reported by AGA may not be all inclusive, but may, in fact, not include certain reserves actually discovered in a given reporting year when "subsurface information" relating to those discoveries is not disclosed to the appropriate AGA subcommittee. If, in fact, all reserve additions occurring with a given reporting year have not been reported to AGA, the productivity factor for that year may be understated. Thus, we find that it is essential that the parties and respondents to this proceeding be given an opportunity to comment upon the Staff Report pertaining to reserve additions are reported by AGA so that the Commission will have a complete record upon which to base its decision in this proceeding.

In addition to the issues raised by Appendix B-1 noted above, Revised Appendix B suggest other issues concerning which the Commission desires evidence be submitted, by way of comment and cross-comment, before reaching a decision herein. Although all issues are open to comment, specific comment is invited upon the following:

1. Should the rate of return utilized in the pricing of new gas supplies be determined on the basis of the marginal rate of return necessary to attract new venture capital? What is the marginal rate of return necessary to attract new venture capital to the development of new supplies of natural gas? What rates of return are currently realizable in alternate new venture capital investment opportunities?

2. Should the principles of full cost accounting be applied to producer ratemaking, thereby including dry hole costs, other exploration costs, and exploration overhead in the rate base, or should such expenditures still be classified as current expenses for ratemaking purposes? What rate of return should be utilized if full cost account is utilized to determine producer rates?

3. Should estimation of new gas costs be related to the recent cost experience of the industry, or should estimation be based upon all data, remote and recent? What time series is appropriate? Is current data reasonably reliable, or is adjustment necessary to render such data reasonably reliable? If adjustment is necessary, upon what basis should the adjustments be made?

4. Should estimation of new gas costs be based, in whole or in part, upon statistical trending of historical cost data, and specifically do any of the data series for drilling costs, dry hole costs, lease acquisition costs, cost of producing wells, exploratory overhead, other exploration costs, production operating expense, and liquid credits lend themselves to trending by statistical analysis? What time series should form the basis for statistical trending?

5. As a substantial portion of the new natural gas supplies for the United States in future years will come from wells drilled to depths of 15,000 feet or more below the surface in the onshore areas and from offshore areas where the water depths will be increasingly greater than those being explored today, should some additional cost allowance be made for these drilling efforts? If so, upon what factual basis can a reasonable allowance be based for these projected additional costs and what amount (cents per Mcf) should be provided as the allowances for deeper drilling (in both the onshore and offshore areas) and deeper water depths in the offshore areas?

6. If non-cost factors are to be considered, what factors should be considered and how should they be quantified in computing a rate for new natural gas supplies?

We have concluded that the information and data contained in the attached Staff reports (which are denoted as Revised Appendix B and Appendix B-1) and the data and information contained in the comments of the parties submitted in response to these Staff reports and the specific questions enumerated in this notice may be material to the Commission's resolution of the issues raised in this proceeding, and that the public interest requires that all parties and respondents to this proceeding be given an opportunity to comment upon the attached Staff reports and the specific questions enumerated in this notice. The public interest requires that any interested persons, not now a party or respondent to this proceeding, be given an opportunity to become a party to this proceeding and comment upon the attached Staff reports, the specific questions enumerated in this notice, and the comments of all other parties to this proceeding which are submitted in response to this notice. Those interested persons desiring to become a party to this proceeding, who are not already a party or respondent to this proceeding, shall be required to accept the record of this proceeding as it is presently constituted and to limit their comments and cross-comments to the matters set forth in this notice and the attached Staff reports and the comments submitted in response to this notice.

It is also in the public interest that expedited procedures for the filing comments and cross-comments be adopted in this notice. To that end, we shall require that all interested persons, who are not now either a party or respondent to this proceeding, to notify the Secretary of the Commission of their desire to become a party to this proceeding on or before March 26, 1974, and the Secretary shall serve a revised service list for this proceeding upon all parties of record as of March 27, 1974, on or before April 1, 1974. Initial written comments pertaining to

[5] The seven-year and the average of the 11, 16, and 26 year productivities correspond to the six-year and the average of the 10, 15, and 25 year productivities presented in the original Appendix B with the addition of productivity data for 1972.

[6] Prior to the AGA report for 1971 reserve additions, the following statement appeared in the annual AGA report on reserve additions:

> New discoveries seldom are delineated or fully developed during the year of discovery. Therefore, the year-end reserves estimates of discoveries generally represent only a part of reserves that ultimately will be assigned. *E.g.*, Volume 25, p. 103 (May 1971) (1970 AGA).

V 39160 MAR 27 74 XUM

this notice and the attached Staff reports are to be filed on or before April 22, 1974, and responses to the initial written comments are to be filed on or before May 13, 1974.

The Commission finds: (1) The public interest and the orderly and effective administration of the Natural Gas Act requires that all interested persons, who are not now either a party or respondent to this proceeding, be given an opportunity to became a party to this proceeding subject to the condition that they shall accept the record of the proceeding as such record is presently constituted and limit their comments to the matters raised in this notice, the attached Staff reports, and the comments submitted in response to this notice.

(2) The public interest requires that the attached Staff reports (which are denoted as Revised Appendix B and Appendix B–1) be made a part of the record to this proceeding and that all parties to this proceeding be given an opportunity to comment upon the contents of Revised Appendix B and Appendix B–1 and the specific questions enumerated in this notice.

(3) The public interest requires that the Commission provide for the filing of comments upon Revised Appendix B and Appendix B–1 and the specific questions enumerated in his notice on an expedited basis so that this proceeding will not be unduly delayed.

The Commission orders: (A) All persons, who are either a respondent to or a party to this proceeding, may file written comments pertaining to the attached Staff reports (which are denoted as Revised Appendix B and Appendix B–1) on or before April 22, 1974, with the Secretary of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Replies to the written comments may be filed with the Secretary of the Commission on or before May 13, 1974. The initial comments and replies thereto shall state the name, title, mailing address, and telephone number of the person or persons to whom communications concerning this matter should be addressed. An original and fourteen (14) conformed copies of such comments and replies to such initial comments shall be filed with the Commission, and copies of the initial comments and replies thereto shall be served upon all persons who are parties to or respondents to this proceeding.

(B) All comments and replies thereto filed in response to this notice shall be under oath, acknowledged by a notary public or comparable official, as follows:

---------- being duly
(Name)

sworn, deposes and says that he is (title and organization, if filing is in a representative capacity) that he is authorized to verify and file this document, that he has examined the statement contained in the initial comments or replies thereto, and that all such statements are true and correct to the best of his knowledge, information, and belief. The persons preparing the written comments and replies thereto shall submit such filings on letter-size paper (8" by 10½" or 8½" by 11") in accordance with the Rules of Practice and Procedure of the Federal Power Commission.

(C) All interested persons, who are not now either a party or respondent to this proceeding, may become a party to this proceeding by filing a notice of intention to respond to this notice with the Secretary of the Commission on or before March 26, 1974. Such persons shall accept the record of this proceeding as it is presently constituted and shall limit their comments and replies to the comments of the other parties and respondents to the matter raised in this notice, the attached Staff reports, and the comments submitted in response to this notice.

(D) The Secretary of the Commission shall serve a revised service list of all parties of record as of March 27, 1974, upon all such parties and respondents to this proceeding on or before April 1, 1974, by United States mail.

(E) The Secretary of the Commission shall cause prompt publication of this notice and the attached Staff reports in the FEDERAL REGISTER and shall serve this notice and the attached Staff reports upon all parties and respondents to this proceeding.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 270]

[Release No. IC–8273, File No. S7–518]

CERTAIN JOINT TRANSACTIONS INVOLVING REGISTERED INVESTMENT COMPANIES

Exemption From Application Requirements

Notice is hereby given that the Securities and Exchange Commission has under consideration the amendment of Rule 17d–1 [17 CFR 270.17d–1] under the Investment Company Act of 1940 ("Act") [15 U.S.C. 80a–1 et seq.]. The proposed revision would enable certain affiliated companies and certain persons affiliated with such companies to participate in joint transactions with registered investment companies and companies controlled by registered investment companies without an order of the Commission. It would also clarify the present rule to remove any doubt as to whether certain SBIC stock option plans may become operative without an order of the Commission. The proposed amendment would be adopted pursuant to the authority in sections 17(d), 6(c) and 38(a) of the Act [15 U.S.C. 80a–17(d), 80a–6(c), 80a–37(a)].

Section 17(d) of the Act makes it unlawful for any affiliated person of or principal underwriter for a registered investment company • • • or any affiliated person of such a person or principal underwriter, acting as principal to effect any transaction in which such registered company, or a company controlled by such registered company, is a joint or a joint and several participant with such person, principal underwriter, or affiliated person, in contravention of such rules and regulations as the Commission may prescribe for the purpose of limiting or preventing participation by such registered or controlled company on a basis different from or less advantageous than that of such other participant.

Rule 17d–1(a) prohibits all such affiliated persons, and principal underwriters, acting as principal, from participating in or effecting any—

Transaction in connection with, any joint enterprise or other joint arrangement or profit-sharing plan in which any such registered company, or a company controlled by such registered company, is a participant • • • unless an application regarding such joint enterprise, arrangement or profit-sharing plan has been filed with the Commission and has been granted • • •

Section 6(c) of the Act provides that the Commission, by rule, regulation or order, may exempt any person or transaction, or any class of persons or transactions, from any provision of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Section 38(a) of the Act authorizes the Commission to issue and amend such rules as are necessary or appropriate to the exercise of the powers conferred upon the Commission in the Act.

Proposed New Subparagraph (4) of Rule 17d–1(d)—SBIC Stock Option Plans. Paragraph (c) of Rule 17d–1 presently defines "joint enterprise or other joint arrangement or profit-sharing plan" for purposes of Rule 17d–1 as, *inter alia*, any "stock option or stock purchase plan." In *The National Association of Small Business Investment Companies* (Investment Company Act Release No. 6523, May 14, 1971) the Commission exempted from the provisions of Sections 18, 19, and 23 of the Act [15 U.S.C. 80a–18, 80a–19, 80a–23], subject to conditions for the protection of investors, the issuance by registered small business investment companies ("SBICs") of stock options which qualify under section 422 of the Internal Revenue Code and under appropriate SBA regulations to officers, directors and employees of SBICs. It appears, however, that a question remains as to whether or not an application is needed under Rule 17d–1 for an order of the Commission permitting the issuance of such qualified stock option plans. In order to remove any doubt in this regard, proposed new subparagraph (4) of Rule 17d–1(d) would permit registered SBICs to issue qualified stock options to their officers, directors and employees without a prior Commission order.

Proposed New Subparagraph (5) of Rule 17d–1(d)—Joint Transactions with Certain Affiliated Persons. Proposed new subparagraph (5) would provide an exemption from the application provisions of Rule 17d–1 for joint transactions or arrangements in which any registered investment company or a company controlled by such registered investment company is a participant, and in which a company affiliated with such registered investment company or an affiliated person of such affiliated company is also a participant, provided that neither certain affiliated persons nor the principal underwriter of the registered investment company participate or have a financial interest in the transaction. The proposed exemption would be available in the case of SBICs, venture capital and other registered investment companies in like manner.

In proposing new subparagraph (5) of Rule 17d–1 the Commission believes that when the persons designated do not participate or have a financial interest in a joint transaction, there is little likelihood that participation by registered investment companies, or controlled companies thereof, in joint transactions with other affiliated persons, or affiliated persons of such other affiliated persons, will result in unfair or disadvantageous treatment to the investment companies or their controlled companies.

Proposed new subparagraph (5) would not, however, exempt from the application requirements of the rule those joint transactions in which an investment company or a company controlled by such company commits in excess of 5 percent of its assets. This limitation should further protect against the possibility that exempted transactions would occur when a direct association with the investment company exists. The 5 percent limitation is consistent with the limitation already imposed by Section 5 of the Act [15 U.S.C. 80a–5] for diversified companies[1] and it is also consistent with the 5 percent limitation contained in Section 851 of the Internal Revenue Code [26 U.S.C. 851], as amended, under which the vast majority of investment companies qualify for "pass through" tax treatment.

Apart from the provisions of the proposed amendments, it should be noted that the anti-fraud provisions of the federal securities laws are also applicable to joint transactions in which registered investment companies or their controlled companies participate. In particular, Rule 10b–5 under the Securities Exchange Act of 1934 [17 CFR 240.10b–5] prohibits the employment of manipulative and deceptive devices in connection with the purchase or sale of any security. That prohibition would be applicable even where the exemption afforded by the proposed amendment would be available. Furthermore, the officers, directors and investment advisers of registered investment companies will remain subject to section 36(a) [15 U.S.C. 80a–35(a) Sec. 20, Pub. L. 91–547, 84 Stat. 1428] of the Act with respect to joint transactions exempted by the proposed subparagraph.

Proposed new subparagraph (5) of Rule 17d–1(d) also empowers the Commission to require the submission of reports of joint transactions effected pursuant to the proposed new subparagraph. The Commission intends shortly to publish a proposal for the implementation of this reporting requirement.

Illustrative of the type of joint transaction whtich would be exemp under proposed subparagraph (5), are the following:

1. Frequently, a company is an affiliated person of a registered investment company because 5 percent or more of the former's common stock is in the portfolio of the registered investment company. In addition, an officer or director of the affiliated portfolio company may own some of the affiliated portfolio company's common stock, or another individual may own 5 percent or more of the portfolio company's common stock. As a result, each of these individual owners of the portfolio company's common stock is an affiliated person of an affiliated person of the registered investment company. If the portfolio company reorganizes its capital structure, proposed subparagraph (5) would eliminate the need for an application under Rule 17d–1 if certain specified persons do not also participate or have a financial interest in the transaction. The exemption would be available even though such a reorganization would involve participation by an affiliated person of an affiliated person of the registered investment company in a joint enterprise (namely the exchange of securities of the portfolio company for new securities thereof) in which the registered investment company is also a participant.

2. A somewhat similar situation arises when an affiliated portfolio company of the registered investment company is to be merged with a company controlled by the registered investment company. Frequently, an affiliated person of the affiliated portfolio company (e.g., an officer, director or 5 percent stockholder) participates or has a financial interest in the joint transaction. Under proposed new subparagraph (5), an application for an order of the Commission to permit this transaction would not be required, provided that the persons specified in proposed subparagraph (5) do not participate or have a financial interest in the joint transaction.

3. Where two registered investment companies each own 5 percent or more of the common stock of the same portfolio company, each is an affiliated person of an affiliated person of the other. Under proposed new subparagraph (5) it would not be necessary to file an application under Rule 17d–1 where either or both of the investment companies desire to increase or decrease their holdings of such security or to exchange securities with the portfolio company, provided that the persons specified in proposed subparagraph (5) do not participate or have a financial interest in the joint transaction.

Accordingly, the Securities and Exchange Commission, pursuant to authority given it in Sections 6(c), 17(d), and 38(a) of the Investment Company Act of 1940, hereby proposes to amend Section 270.17d–1(d) of Chapter II of Title 17 of the Code of Federal Regulations by adding new subparagraphs (4) and (5). The amendment starts with (4) below; the preliminary language exists in Rule 17d–1 and has been included only for purposes of readability.

§ 270.17d–1 Applications Regarding Joint Enterprises or Arrangements and Certain Profit-Sharing Plans.

• • • • • •

(d) Notwithstanding the requirements of paragraph (a) of this section, no application need be filed pursuant to this section with respect to any of the following:

• • • • • •

(4) The issuance by a registered investment company which is licensed by the Small Business Administration ("SBA") pursuant to the Small Business Investment Act of 1958 of stock options which qualify under Section 422 of the Internal Revenue Code, as amended, and which conform to § 107.805(b) of Chapter I of Title 13 of the Code of Federal Regulations (revised as of January 1, 1972), as amended in 37 FR 3950 and 37 FR 8865, adopted by the SBA, effective August 1, 1972.

(5)(i) Any joint enterprise or other joint arrangement or profit-sharing plan other than a stock option or stock purchase plan (hereinafter referred to as a "joint enterprise") in which a registered investment company or a company controlled by such a company, is a participant, and in which a company which is an affiliated person of such registered investment company or an affiliated person of such a person is also a participant, provided that no person who is included in items (A) through (E) below is, was, or proposes to be, a participant in the joint enterprise in any manner, including participation through a financial interest, direct or indirect, in any person (except the registered investment company) who is, was or will be a participant in the joint enterprise, and further provided that in such joint enterprise neither the investment company nor a company controlled by such company commits in excess of 5 percent of its assets, and further provided that reports containing pertinent details of the joint enterprise shall be made at such time, on such forms and by such persons as the Commission may from time to time prescribe.

(A) An officer, director, employee, investment adviser, member of an advisory board, depositor, promoter of or principal underwriter for the registered investment company,

(B) A person directly or indirectly controlling the registered investment company,

(C) A person directly or indirectly owning, controlling, or holding with power to vote, 5 per centum or more of the outstanding voting securities of the registered investment company,

(D) A person directly or indirectly under common control with the registered

[1] Section 5(b)(1) of the Act in effect requires a diversified management company to invest at least 75 percent of the value of its total assets in cash and cash items, government securities, securities of other investment companies and other securities "limited in respect of any one issuer to an amount not greater in value than 5 per centum of the value of the total assets" of such company.

V 39 60 MAR 27 74 XUM

investment company, except a person who, if it were not directly or indirectly controlled by the registered investment company, would not be directly or indirectly under the control of a person who controls the registered investment company, or

(E) An affiliated person of any of the foregoing, except (*1*) the registered investment company, or (*2*) a person who (*i*) if it were not directly or indirectly controlled by the registered investment company, or (*ii*) if 5 per centum or more of its outstanding voting securities were not directly or indirectly owned, controlled, or held with power to vote by the registered investment company, would not be an affiliated person of a person described in item (B) or (C) hereinabove.

(ii) For the purpose of determining whether, pursuant to this subparagraph (5), an application need be filed pursuant to this section, the term "financial interest" as used herein shall not include (A) any interest through ownership of securities issued by the registered investment company; (B) any interest of a wholly-owned subsidiary of the registered investment company; (C) usual and ordinary fees for services as a director; (D) an interest of a nonexecutive employee; (E) an interest of an insurance company arising from a loan or policy made or issued by it in the ordinary course of business to a natural person; (F) an interest of a bank arising from a loan or account made or maintained by it in the ordinary course of business to or with a natural person, unless it arises from a loan to a person who is an officer, director or executive of a company which is a participant in the joint transaction or from a loan to a person who directly or indirectly owns, controls, or holds with power to vote, 5 per centum or more of the outstanding voting securities of a company which is a participant in the joint transaction; or (G) an interest acquired in a transaction described in paragraph (d)(3) hereof.

(Sec. 8(c), 17(d), 38(a); 54 Stat. 800, 815, 841; 15 U.S.C. 80a-6(c), 80a-17(d), 80a-37(a)).

All interested persons are invited to submit their written views and comments on the proposed amendment to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, on or before May 10, 1974. All communications in this regard should refer to File No. S7-518, and will be available for public inspection.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

MARCH 14, 1974.

[FR Doc.74-7042 Filed 3-26-74;8:45 am]

FEDERAL ENERGY OFFICE

[10 CFR Part 212]

PUERTO RICO

Further Notice of Proposed Price Regulations and Public Hearing

Notice is hereby given that the public hearing in this proceeding, announced by the Federal Energy Office on March 18, 1974 (39 FR 10454, March 20, 1974) will be held beginning at 10:00 a.m., on Monday, April 8, 1974 and Tuesday, April 9, 1974, at the Governmental Building-Las Minnellas, Santurce, Puerto Rico, in the Public Hearing Room, eighth floor, to receive comments from interested persons on the matters set forth in the initial notice of this proceeding.

Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to the Executive Secretariat of the Federal Energy Office, and must be received before 5:30 p.m., e.d.s.t., Monday, April 1, 1974. Such a request may be delivered by hand to Room 3309, New Post Office Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:30 a.m. and 5:30 p.m., Monday through Friday, or may be submitted by Telex, 710-822-0155. The request should identify the individual who would testify, describe the interest concerned, state, if appropriate, why the individual is a proper representative of a group or class of persons which has an interest, and provide a telephone number where the individual may be contacted through April 2, 1974.

Each person selected to be heard will be so notified by the Federal Energy Office before 5:30 p.m., e.d.s.t., April 2, 1974.

The Federal Energy Office reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

A Federal Energy Office official will preside at the hearing. It will not be a judicial or evidentiary type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the Federal Energy Office with respect to the subject matter of the hearing will be based on all information available to the Federal Energy Office, from whatever source received. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to the Executive Secretariat before 5:30 p.m., e.d.s.t., April 4, 1974. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The presiding officer will determine whether a question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be made available for inspection at the Public Reference Facility of the Federal Energy Office, Room 3130, New Post Office Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:30 a.m. and 5:30 p.m. Monday through Friday. Anyone may buy a copy of the transcript from the reporter.

This public hearing will be conducted under the authority of § 5 of the Emergency Petroleum Allocation Act and Section 207(c) of the Economic Stabilization Act of 1970, as amended.

The Federal Energy Office is inviting public participation in the form of written submissions as well as oral presentations. All written submissions received by the Federal Energy Office not later than 5:30 p.m., e.d.s.t., Thursday, April 4, 1974, will be considered by the Federal Energy Office before it makes its determination in this proceeding.

Fifteen copies of all written submissions should be sent to the Federal Energy Office in Washington, D.C. All submissions should be clearly identified on the outside of the envelope as "Puerto Rican Price Regulation Comments." If submitted by mail they should be addressed to the Federal Energy Office, Executive Secretariat, Box AC, Washington, D.C. 20461. If submitted by hand, they should be delivered to The Federal Energy Office, Executive Secretariat, Room 3309, The New Post Office Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. Fifteen copies of all written submissions should also be submitted to the Federal Energy Office in Puerto Rico.

They may be submitted by mail or delivered by hand to the Federal Energy Office, c/o Officina Sobre Asuntos de Combustibles Derivados del Petroleo, Room 804, Governmental Building-Las Minnellas, Santurce, Puerto Rico, 00910.

Any information or data considered by the person furnishing it to be confidential must be so indicated and submitted in writing, one copy only. The Federal Energy Office reserves the right to determine the confidential status of the information or data and to treat it accordingly.

Issued in Washington, D.C. March 26, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

DRAFT SUPPLEMENT TO THE FISCAL YEAR 1975 PROGRAM STATEMENT

Notice of Public Meeting

Notice of a public information meeting is hereby given by the Bonneville Power Administration to solicit public comments on a Draft Facility Location Supplement to BPA's Fiscal Year 1975 Program Statement. This Supplement describes the environmental impact of constructing a new substation near the town of Sappho located in Clallam County, Washington.

The purpose of this public information meeting is to present to the public alternative facility or site locations relative to the above proposal and to solicit comments from the public with respect to the environmental impact of the proposal.

The meeting on the proposed substation will be held on April 29, 1974, at 1 p.m., in the Clallam County PUD Office, Port Angeles, Washington.

Oral and written statements will be accepted at this meeting. Members of the public who wish to be given preference in the order of appearance should contact the Seattle Area Manager, 415—1st Avenue North, Room 250, Seattle, Washington 98109, Area Code (206) 284-6820. However, all those present wishing to comment will be allowed to do so in the time remaining. Those wishing to comment orally are encouraged but not required to submit a written copy of their statement. All comments, whether oral or written, will be given consideration. Because of the technical nature of the subject matter, members of the public and other reviewers are also encouraged to familiarize themselves with the Draft Facility Location Supplement on the proposed Sappho Substation before commenting.

Requests for copies of the draft supplement on the above proposal or any questions regarding this meeting should be forwarded to the Seattle Area Manager, 415—1st Avenue North, Room 250, Seattle, Washington 98109.

Written comments on the Draft Facility Location Supplements have been invited and will be accepted on or before Monday, April 29, 1974. Copies of the draft supplement are also available for inspection at the above Area Office or at the headquarters building, Bonneville Power Administration, 1002 NE. Holladay Street, Portland, Oregon 97232.

Additional or clarifying information may be obtained by writing or calling the Environmental Office, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208; Area Code (503) 234-3361, extension 5136.

WILLIAM H. CLAGETT,
Assistant Administrator.

Bureau of Land Management

[N-219]

NEVADA

Notice of Proposed Withdrawal and Reservation of Lands

MARCH 19, 1974.

The Bureau of Sport Fisheries and Wildlife have filed the above application for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the mining laws (30 U.S.C., Ch. 2), but not the mineral leasing laws.

The applicant desires the land as an addition to the existing Desert National Wildlife Range.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Room 3008 Federal Building, 300 Booth Street, Reno, Nevada 89502.

The Department's regulations (43 CFR § 2351.4(c)), provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, eliminate lands needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are:

NEW MEXICO

Transwestern Pipeline Company; Notice of Pipeline Application

MARCH 18, 1974.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Transwestern Pipeline Company has applied for a natural gas pipeline right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 27 E.,
Sec. 2, SW¼SW¼;
Sec. 10, E½NE¼, SW¼NE¼, NE¼SW¼, NW¼SE¼;
Sec. 11, NW¼NW¼.

The pipeline will convey natural gas crossing Federal lands in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analysis necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 1449, Santa Fe, NM 87501.

PRINEVILLE DISTRICT ADVISORY BOARD

Notice of Meeting

Notice is hereby given that the Prineville District Advisory Board will meet on May 3, 1974, commencing at 1 p.m., in the Prineville District Office, Bureau of Land Management, 185 E. Fourth Street, Prineville, Oregon. The agenda for the meeting will focus on the role, function and composition of the Advisory Board.

The meeting will be open to the public. It is to be held in a room accommodating 30 people. In addition to discussion of agenda topics by board members, there will be time for brief statements by nonmembers. Persons wishing to make oral statements should so advise the chairman or co-chairman prior to the meeting, to aid in scheduling the time available. Any interested person may file a written statement for consideration by the board by sending it to the chairman, in care of the co-chairman: Prineville District Manager, P.O. Box 550, Prineville, Oregon 97754.

PAUL W. ARRASMITH,

Farmers Home Administration

[A030]

SOUTH CAROLINA

Designation of Emergency Areas

The Secretary of Agriculture has found that a general need for agricultural credit exists in the following counties in South Carolina:

Dorchester
Sumter

The Secretary has found that this need exists as a result of a natural disaster consisting of excessive rainfall in June 1973 in Dorchester County and excessive rainfall June 8–15, 1973, in Sumter County.

Therefore, the Secretary has designated these areas as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 93–237, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor John C. West that such designation be made.

Applications for Emergency loans must be received by this Department prior to May 13, 1974, for physical losses and prior to December 16, 1974, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 20th day of March 1974.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

ELECTRONIC INSTRUMENTATION TECHNICAL ADVISORY COMMITTEE

Notice of Meeting

The Electronic Instrumentation Technical Advisory Committee of the U.S. Department of Commerce will meet April 9, 1974 at 9:30 a.m. in Room 3817 of the Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

Members advise the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to electronic instrumentation, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

Agenda items are as follows:

1. Opening remarks by the Director, Office of Export Administration, Rauer H. Meyer.
2. Election of Chairman.
3. Presentation of papers or comments by the public.
4. Review of current controls on electronic instrumentation, including report on any decontrol action effected since August 29, 1972.
5. Technical problems relating to export control coverage of electronic instrumentation and related technology.
6. Licensing procedures relating to electronic instrumentation and technology.
7. Foreign availability of electronic instrumentation currently under licensing control, including extent of U.S. participation and use of U.S. technology.
8. Executive session.
a. Background of U.S. and COCOM control program and strategic criteria.
b. Technical problems:
(1) Military and military support uses of electronic instrumentation.
(2) Significant parameters from the strategic standpoint, including adequacy of present control definition or coverage.
c. Foreign availability, including state of the art in the USSR, Eastern Europe, and People's Republic of China.
d. Licensing control over technology related to electronic instrumentation.

This will be the first meeting of the Electronic Instrumentation Technical Advisory Committee. It was established October 23, 1973, and consists of technical experts from a representative cross section of the electronic industry in the United States and officials representing various agencies of the U.S. Government. The industry members are appointed by the Assistant Secretary for Domestic and International Business to serve a 2-year term.

The public will be permitted to attend the discussion of agenda items 1–7, and a limited number of seats—approximately 15—will be available to the public for these agenda items. To the extent time permits, members of the public may present oral statements to the committee. Interested persons are also invited to file written statements with the committee.

With respect to agenda item (8), "Executive session," the Assistant Secretary of Commerce for Administration, on March 12, 1974, determined, pursuant to section 10(d) of Public Law 92–463, that this agenda item should be exempt from the provision of sections 10(a)(1) and (a)(3), relating to open meetings and public participation therein, because the meeting will be concerned with matters listed in 5 U.S.C. 552(b)(1).

Further information may be obtained from Charles C. Swanson, Director, Operations Division, Office of Export Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230 (A/C 202–967–4196).

Minutes of those portions of the meeting which are open to the public will be available 30 days from the date of the meeting upon written request addressed to: Central Reference and Records Facility, U.S. Department of Commerce, Washington, D.C. 20230.

Dated: March 22, 1974.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

**Ships appearing on the list which have made no trips to Cuba under their present registry.

SEC. 2. In accordance with approved procedures, the following vessels listed in this section which called at Cuba after January 1, 1963, have reacquired eligibility to carry U.S. Government-financed cargoes from the United States by virtue of the persons who control the vessels having given satisfactory certification and assurance;

(a) That such vessels will not, thenceforth, be employed in the Cuban trade so long as it remains the policy of the U.S. Government to discourage such trade; and

(b) That no other vessels under their control will thenceforth be employed in the Cuban trade, except as provided in paragraph (c); and

(c) That vessels under their control which are covered by contractual obligations, including charters, entered into prior to December 16, 1963, requiring their employment in the Cuban trade shall be withdrawn from such trade at the earliest opportunity consistent with such contractual obligations.

NOTE.—Trip totals in section 4 exceed ship totals in sections 1 and 2 because some of the ships made more than one trip to Cuba. Monthly totals subject to revision as additional data becomes available.

By order of the Assistant Secretary of Commerce for Maritime Affairs.

Dated March 20, 1974.

JAMES S. DAWSON, JR.,
Secretary.

[FR Doc.74-6954 Filed 3-26-74;8:45 am]

National Bureau of Standards

COMMERCIAL STANDARDS

Notice of Intent To Withdraw

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the intent to withdraw the following Commercial Standards:

CS 120-58, "Ponderosa Pine Doors"
CS 163-64, "Ponderosa Pine Windows, Sash and Screens (Using Single Glass and Insulating Glass)"
CS 171-58, "Hardwood Veneered Doors (Solid-Core, Hollow-Core, and Panel and Sash)"
CS 190-54, "Wood Double-Hung Window Units"
CS 204-64, "Wood Awning Window Units"
CS 205-64, "Wood Casement Window Units"
CS 208-57, "Standard Stock Exterior Wood Window and Door Frames"
CS 262-63, "Water-Repellent Preservative Non-Pressure Treatment for Millwork"
CS 264-64, "Wood Horizontal-Sliding Window Units (All Sash Operating)"
CS 265-64, "Wood Horizontal-Sliding Window Units (One or More Non-Operating Sash)"
CS 266-64, "Wood Single-Hung Window Units"

It has been tentatively determined that each of these standards has become technically inadequate, and in view of the existence of up-to-date National Woodwork Manufacturers Association standards for the products covered, revision of the Commercial Standards would serve no useful purpose.

Any comments or objections concerning the intended withdrawal of these standards should be made in writing and directed to the Office of Engineering Standards Services, National Bureau of Standards, Washington, D.C. 20234, by April 26, 1974. The effective date of withdrawal, if appropriate, will be not less than 60 days after the final notice of withdrawal. Withdrawal action will terminate the authority to refer to these standards as voluntary standards developed under the Department of Commerce procedures from the effective date of the withdrawal.

Dated: March 21, 1974.

RICHARD W. ROBERTS,
Director.

National Oceanic and Atmospheric Administration

CORONADO PRODUCTIONS, INC.

Notice of Permit Application

On December 5, 1973, notice was published in the FEDERAL REGISTER (38 FR 33509) that an application had been filed with the National Marine Fisheries Service by Coronado Productions, Incorporated, Burbank, California 91505, for a scientific research permit to film documentary footage of migrating California gray whales (*Eschrichtius robustus*).

After reviewing the application, it was determined that the proposed filming was of sufficient merit to warrant granting a permit, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407). However, the Endangered Species Act of 1973 (P.L. 93-205), which became effective December 28, 1973, prohibits such activities without an endangered species permit. Applications for endangered species permits will be considered following the formulation of regulations under the Endangered Species Act. Notice is hereby given that

V 39160 MAR 27 74 XUM

Coronado Productions, Incorporated, was not allowed to proceed with the proposed filming of gray whales.

Dated: March 20, 1974.

JACKIE GEHRINGER,
Acting Director,
National Marine Fisheries Service.

HOWARD E. WINN

Issuance of Permit for Marine Mammals

On December 10, 1973, notice was published in the FEDERAL REGISTER (38 FR 34004) that an application had been filed with the National Marine Fisheries Service by Dr. Howard E. Winn, Professor of Oceanography and Zoology, University of Rhode Island, Kingston, Rhode Island 02881, for a permit to conduct scientific research on certain marine mammals.

Notice is hereby given that, on March 15, 1974, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit to Howard E. Winn, authorizing him to: (1) Conduct whale census; (2) conduct an aerial and hydrophone census on Silver Navidad Banks; (3) photograph humpback whales and record the sounds of humpback whales on the Virgin Banks; (4) study the underwater behavior of the minke whale and record its sounds; (5) study the behavior, record the sounds, and play back sounds of pilot whales; (6) collect skin samples from dead humpback whales from the whale fisheries at Bequia West Indies; (7) record sounds, photograph, and study the behavior of any cetacean encountered. The Holder shall not conduct any research on marine mammals that could be considered as undue harassment. The activities authorized by this Permit are subject to certain conditions set forth therein. The Permit is available for review by interested parties in the Office of the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, and the office of the Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

Dated: March 15, 1974.

ROBERT W. SCHONING,
Director, National Marine
Fisheries Service.

[FR Doc.74-7040 Filed 3-26-74;8:45 am]

LAFAYETTE PARK ZOO AND ST. PAUL COMO ZOO

Notice of Receipt of Application for Public Display Permits

Notice is hereby given that the following applicants have applied in due form for permits to take marine mammals for public display as authorized by section 101(a)(1) of the Marine Mammal Protection Act of 1972 and the Regulations Governing the Taking and Importing of Marine Mammals.

1. Lafayette Park Zoo, 3500 Granby Street, Norfolk, Virginia 23508, to take three California sea lions (*Zalophus californianus*) for public display:

a. The animals will be captured by professional sea lion capturers along the coast of California and transported to the Applicant's facility by air freight in appropriate containers.

b. The animals will be held in a facility with a pool 4½ feet deep, 41 feet wide, 55 feet long and with a 65,000 gallon capacity.

c. James L. Bousquet, the superintendent of the Zoo, has had considerable experience with marine mammals. He has worked with seals at Lodi, California; Fresno, California; San Francisco, California; and Providence, Rhode Island. The Zoo also has a full-time zoologist on the staff, and a veterinarian who is on call.

d. The estimated attendance will be 330,000 to 350,000 persons annually. Lafayette Park Zoo plans to initiate an educational program in the near future.

e. The Applicant's facilities and arrangement for transporting and maintaining the animals have been personally inspected and reviewed by a licensed veterinarian, who has certified that such arrangements are adequate for the well-being of the animals.

2. Saint Paul Como Zoo, Saint Paul, Minnesota 55103, to take six California sea lions (*Zalophus californianus*) for public display:

a. The animals will be captured by professional sea lion capturers along the coast of California and transported to the Applicant's facility by air freight in appropriate containers;

b. In winter quarters the California sea lions will be held on the main floor zoological building in a pen 10 feet by 23 feet, containing a pool 9 feet by 6 feet, depth 4½ feet. Additional winter quarters are located in basement of the zoological building, cage size 10 feet by 15 feet, pool size 10 feet by 15 feet, depth 3 feet. Summer display is a circular moated area, external diameter 100 feet, internal diameter 85 feet, water depth 3 feet.

c. John Fletcher, Director of Saint Paul Como Zoo, has been at the Zoo since 1957. He is a graduate of the University of Washington in Biological Sciences and had 10 years prior experience as keeper and supervisor at the Woodland Park Zoo in Seattle, Washington.

d. Saint Paul Como Zoo has about a million visitors annually. Como Zoo Docents, a trained volunteer service group, conducts educational programs for Como Zoo throughout the year. All exhibits and displays are used in this educational effort.

e. The Applicant's facilities and arrangements for transporting and maintaining the animals have been personally inspected and reviewed by a licensed veterinarian who has certified that such arrangements are adequate for the well-being of the animals.

Documents submitted in connection with these applications are available as follows:

Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, telephone 202-343-4543;

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester Massachusetts 01930, telephone 617-281-0640;

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731, telephone 213-548-2575.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Director, National Marine Fisheries Service, is sending copies of the applications to the Marine Mammal Commission and the Committee of Scientific Advisors.

Interested parties may submit written data or views on these applications on or before April 26, 1974, to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235.

All statements and opinions contained in this notice in support of these applications are those of the Applicants and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: March 21, 1974.

JACKIE GEHRINGER,
Acting Director, National
Marine Fisheries Service.

[FR Doc.74-7037 Filed 3-26-74;8:45 am]

THOMAS R. LOUGHLIN

Notice of Receipt of Application for Scientific Research Permit

Notice is hereby given that the following applicant has applied in due form for a permit to take, tag and release marine mammals for scientific research as authorized by the Marine Mammal Protection Act of 1972 and the Regulations Governing the Taking and Importing of Marine Mammals.

Thomas R. Loughlin, Department of Biology, Humboldt State University, Arcata, California 95521, to take, tag and release 60 harbor seals (*Phoca vitulina richardii*) in south Humboldt Bay, California.

The seals will be taken during the months of April, May and June, 1974. Several seals will be driven into a large seine net which has been extended across a narrow blind channel. As many as 15 seals may be taken at one time. The seals are driven into the net by a slow moving motor boat. The netted seals will then be hauled onto a mud-bank where each seal will be individually handled using a small hand net, marked and released. Each seal will be marked by using one or more colored plastic ear tags in the web of the hind flipper. A few selected animals (5-10) will be fitted with harnesses that strap around the back and contain telemetry devices. The straps are designed to disintegrate after a maximum time of four months in sea water.

The Applicant is a graduate student at Humboldt State University, working under the direct supervision of Dr. Warren J. Houck, Professor of Zoology at Humboldt. Five harbor seals were successfully taken using this technique as authorized by an economic hardship exemption issued under the provisions of the Marine Mammal Protection Act of 1972.

The capture, marking and subsequent observation of harbor seals in Humboldt Bay will furnish valuable information on the behavior, movements and ecology of this population of seals. The results of the proposed study will aid in understanding the influence of biological and environmental factors on age structure, longevity, social structure, reproductive ages, fecundity, and selection of haulingout areas and pupping grounds.

Documents submitted in connection with this application are available as follows:

Office of the Director, National Marine Fisheries Service, Washington, D.C. 20235, telephone 202-343-4543;

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731, telephone 213-548-2575.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Director, National Marine Fisheries Service, is sending copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Interested parties may submit written data or views on this application on or before April 26, 1974, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235.

All statement and opinions contained in this notice in support of this application are those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: March 15, 1974.

JOSEPH W. SLAVIN,
Acting Director, National
Marine Fisheries Service.

National Technical Information Services

GOVERNMENT-OWNED INVENTIONS

Notice of Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for licensing in accordance with the licensing policy of each Agency-sponsor.

Copies of Patent applications, either paper copy (PC) or microfiche (MF), can be purchased from the National Technical Information Service (NTIS), Springfield, Virginia 22151, at the prices cited. Requests for copies of patent applications must include the PAT-APPL number and the title.

Paper copies of patents cannot be purchased from NTIS but are available from the Commissioner of Patents, Washington, D.C. 20231, at $0.50 each.

Requests for licensing information should be directed to the address cited below for each agency.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. ATOMIC ENERGY COMMISSION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent 3,751,295: Plasma ARC Sprayed Modified Alumina High Emittance Coatings for Noble Metals; filed 5 November 1970, patented 7 August 1973; not available NTIS.

Patent 3,752,872: Method of Preparing Uniform Size Powders; filed 26 August 1971, patented 14 August 1973; not available NTIS.

Patent 3,753,666: Noble Metals Having a High Emittance Coating of Iron Titanate; filed 4 December 1967, patented 21 August 1973; not available NTIS.

Patent 3,753,763: Coatings for Columbium and Columbium Base Alloys; filed 24 January 1964, patented 21 August 1973; not available NTIS.

Patent 3,753,883: Process for Providing a Hydride-Free and Oxide-Free Surface on Zirconium and Zirconium-Alloy Bodies; filed 26 June 1972, patented 21 August 1973; not available NTIS.

Patent 3,754,506: Spark Gap Detonator; filed 7 May 1971, patented 28 August 1973; not available NTIS.

Patent 3,755,675: Nondestructive Analysis of Fuel Pins; filed 3 November 1972, patented 28 August 1973; not available NTIS.

Patent 3,757,249: Q-Switched-Mode-Locked Laser Oscillator; filed 15 February 1972, patented 4 September 1973; not available NTIS.

Patent 3,758,670: Production of Predominantly Crystalline Sols; filed 1 August 1969, patented 11 September 1973; not available NTIS.

Patent 3,759,709: Method for Producting Porous Metal Products; filed 28 April 1970, patented 18 September 1973; not available NTIS.

Patent 3,761,546: Method of Making Uranium Dioxide Bodies; filed 22 May 1972, patented 25 September 1973; not available NTIS.

DEPARTMENT OF THE AIR FORCE, AF/JACP, Washington, D.C. 20314.

Patent 3,690,953: Vertical Junction Hardened Solar Cell; filed 10 September 1970, patented 12 September 1972; not available NTIS.

Patent 3,691,848: Fluid Rotary Speed Sensor; filed 10 July 1970, patented 19 September 1972; not available NTIS.

Patent 3,692,082: Jointed Door Assembly; filed 28 July 1971, patented 19 September 1972; not available NTIS.

Patent 3,693,265: Pilot Armreach and Cockpit Control Locator Machine; filed 7 July 1971, patented 26 September 1972; not available NTIS.

Patent 3,693,419: Compression Test; filed 30 December 1970, patented 26 September 1972; not available NTIS.

Patent 3,693,423: Natural Circulation Liquid Pumping System in Plume Pumping System for Test Engines; filed 6 October 1971, patented 26 September 1972; not available NTIS.

Patent 3,694,883: Method of Mounting a Nozzle Insert; filed 20 May 1970, patented 3 October 1972; not available NTIS.

Patent 3,731,106: Beam Scanner for High Power Laser; filed 16 November 1971, patented 1 May 1973; not available NTIS.

Patent 3,731,221: Tunable Optical Cavity for Chemical Laser; filed 10 August 1971, patented 1 May 1973; not available NTIS.

COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Notice of Meeting

The meeting of the Computer Systems Technical Advisory Committee, scheduled for Thursday, March 28, 1974, has been cancelled and rescheduled for Wednesday, April 10, 1974, at 9:30 a.m. in Room 3817 of the Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. The agenda and other information relating to the committee, as published in the FEDERAL REGISTER, 39 FR 9683, on Wednesday, March 13, 1974, remains unchanged.

Dated: March 26, 1974.

RAVER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.74-7251 Filed 3-26-74;11:38 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Center for Disease Control

SAFETY AND OCCUPATIONAL HEALTH STUDY SECTION

Notice of Meeting

Pursuant to Public Law 92-463, the Director, Center for Disease Control, announces the meeting dates and other required information for the following National Advisory body of the National Institute for Occupational Safety and Health which is scheduled to assemble during the month of April 1974.

Committee name	Date, time, and place	Type of meeting and/or contact person
Safety and Occupational Health Study Section.	Apr. 18-19, 1974, 9 a.m., conference room F, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md.	Open Apr. 18, 1974, 9 a.m.-12 noon, closed remainder of meeting. Contact: Dr. John F. Rester, Parklawn Bldg., 5600 Fishers Lane, room 3-44, Rockville, Md. Code: 301-443-4493.

Purpose. The committee is charged with the initial review of research, training, demonstration, and fellowship grant applications for Federal assistance in program areas administered by the National Institute for Occupational Safety and Health, and with advising the Institute staff on training and research needs.

Agenda. From 9 a.m. to 12 noon on April 18, the Study Section will be open for administrative and staff reports, presentation of certificates to retiring members, and the Committee report on training. From 1:20 p.m. on April 18 through the end of the meeting, the Study Section will be reviewing research and demonstration grant applications and will not be open to the public, in accordance with the determination by the Director, Center for Disease Control, pursuant to the provisions of Public Law 92-463, section 10(d).

Agenda items are subject to change as priorities dictate.

A roster of members and other relevant information regarding the meeting may be obtained from the contract person listed above.

Dated: March 19, 1974.

DAVID J. SENCER,
Director, Center for Disease Control.

Food and Drug Administration

[DESI 7937; Docket No. FDC-D-683; NDA 7-937, etc.]

CERTAIN ANTIHISTAMINIC DRUGS USED IN ALLERGY

Drug Efficacy Study Implementation; Follow-up Notice; Reevaluation

Correction

In FR Doc. 74-2973, appearing at page 4679 in the issue for Wednesday, February 6, 1974, in paragraph "5." in the first column on page 4680, the designation "NDA-937" should be changed to read "NDA 7-937".

DIETHYLSTILBESTROL FOR USE IN CATTLE AND SHEEP

Notice to Holders of New Animal Drug Applications

On January 24, 1974, the United States Court of Appeals for the District of Columbia Circuit handed down its decisions holding that the action of the Food and Drug Administration in withdrawing approval of the new animal drug applications (NADA's) for diethylstilbestrol (DES) for use in feed and implants in cattle and sheep was unlawful. *Chemetron Corporation et al.* v. *United States Department of Health, Education, and Welfare*, No. 72-1864 (D.C. Cir. January 24, 1974); *Hess & Clark, Division of Rhodia, Inc.* v. *Food and Drug Administration*, No. 73-1581 (D.C. Cir. January 24, 1974). These decisions have the effect of reinstating the regulations and the previously approved NADA's for such uses.

Elsewhere in this issue of the FEDERAL REGISTER (pg. 11299), the Commissioner of Food and Drugs is proposing to revoke approval of the methods of analysis for DES in edible animal tissue currently specified in 21 CFR 121.241 and 135g.26, which were approved in 1963. Using these methods, the Commissioner of Food and Drugs had concluded that the exemption to the anticancer provisions in section 512(d)(1)(H) of the Federal Food, Drug, and Cosmetic Act was applicable. After a decision is made on that proposal, the Commissioner intends to issue a notice of opportunity for hearing proposing withdrawal of approval of the NADA's for DES for all animal drug use. A hearing will be held if one is requested.

The Commissioner has considered whether interim action is warranted to reduce the potential for residues from use of DES, pending resolution of this matter.

The Commissioner has concluded that there is presently available insufficient data and information upon which any change in the existing DES NADA's could be approved. The Commissioner has also concluded that the level of sensitivity of the present methods used for approval under section 512(d)(1)(H) of the act and for regulatory detection of illegal residues under section 512(b)(7) of the act is inadequate, in view of the demonstrated carcinogenic effect of the drug in animals and humans and the fact that a more sensitive method of analysis has detected residues of DES in edible tissue at levels below the known sensitivity of the currently approved methods. The Commissioner has further concluded that approval of any alternative controls for use of DES must be supported by proof that such controls would be reasonably expected to be followed in practice. On the basis of the existing information available to the Commissioner, there is no basis for determining that DES has been proved to be safe.

The Commissioner recognizes that new controls for the use of DES in cattle and sheep, as have been suggested by some manufacturers, may reduce the potential for residues from use of DES. The Commissioner urges the filing of supplemental NADA's for this purpose, and particularly to extend from 7 to 14 days the withdrawal period after the use of DES in feed. Supplemental NADA's proposing such changes may be submitted in the following two ways:

1. Any holder of an NADA for DES may submit a supplemental NADA proposing changes in the NADA pursuant to § 135.13a (21 CFR 135.13a). To be approved, such supplemental NADA's must contain the information required by section 512(b), (d)(1)(H), and (d)(2) of the act, including specifically (a) a suitable method(s) of analysis for detection of residues of DES as required by section 512(b)(7) and (d)(1)(H) of the act; (b) data demonstrating that, using such a suitable method, no residues of DES will occur in edible tissue after slaughter when the drug is used as directed in the labeling; and (c) information upon which the Commissioner can conclude that any proposed changes in conditions of use are reasonably certain to be followed in practice. In particular, the Commissioner believes that it is essential to approval of any supplemental NADA for DES that a suitable method(s) of analysis for detection of residues of DES be developed and validated with a greater sensitivity than is presently available, and that additional studies be conducted using such a method(s) to show the depletion curve of DES from muscle tissue, liver, kidneys, blood, urine, and feces, on a statistically significant number of test animals after use of DES in feed and in implants. If any such supplemental NADA's are submitted, the Commissioner will review the data, and the application will be approved unless any of the reasons for refusing or withdrawing approval as stated in section 512(d) and (e) of the act, or 21 CFR 135.12 and 135.28 apply, or if the application fails to meet the requirements of 21 CFR 135.7.

2. Any holder of an NADA for DES may also submit a supplemental NADA proposing changes in the NADA pursuant to § 135.13a (d) through (k) (21 CFR 135.13a (d) through (k)). Under these provisions, a supplemental NADA which provides additional precautionary or warning information in labeling may be immediately implemented, prior to review by the Food and Drug Administration. This permits, and the Commissioner urges, an NADA holder immediately to adopt whatever additional restrictions

V 39 160 MAR 27 74 XUM

designed to reduce the likelihood of residues he may conclude to be appropriate, even if he is unable at this time to submit the data required for a supplemental NADA as specified in paragraph 1 above. If, however, such a supplemental NADA is not accompanied by the supporting data specified in paragraph 1 above, the Commissioner will, pursuant to § 135.13a(f), defer review of the submission until all of the issues surrounding the currently approved NADAs are finally resolved. Appropriate action will then be taken on any such supplemental NADA's.

Although no supplemental NADA's for DES may be approved in the absence of supporting data, the statute provides that applications with respect to animal feeds containing a new animal drug (Form FD–1800) submitted pursuant to section 512(m) of the act may be approved so long as a regulation promulgated under section 512(i) permitting use of the drug is in existence. Accordingly, a Form FD–1800 and a supplement to a Form FD–1800 for DES will be approved regardless of pending questions with respect to the safety or effectiveness of the drug, if no grounds for refusing approval under section 512(m) are applicable. Approval of a Form FD–1800 or a supplement to a Form FD–1800 in no way constitutes approval of the safety of the drug itself.

Dated: March 25, 1974.

SHERWIN GARDNER,
Deputy Commissioner of Food and Drugs.

[FR Doc.74–7169 Filed 3–26–74;8:45 am]

[FAP 4H2929]

VINELAND CHEMICAL CO.

Notice of Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 4H2929) has been filed by Vineland Chemical Co., P.O. Box 745, Vineland, NJ 08360 proposing that § 121.2505 *Slimicides* (21 CFR 121.2505) be amended to provide for the safe use of 2,3-dibromopropionaldehyde as a slimicide in the manufacture of paper and paperboard intended to contact food.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Assistant Commissioner for Public Affairs, Rm. 15B–42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 6–86, 5600 Fishers Lane, Rockville, MD 20852, during working hours, Monday through Friday.

Dated: March 20, 1974.

VIRGIL O. WODICKA,
Director, Bureau of Foods.

Office of Education

DRUG ABUSE PREVENTION AND EARLY INTERVENTION PROJECTS

Notice for Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 3 of the Drug Abuse Education Act of 1970 (84 Stat. 1386, 21 U.S.C. 1002), applications are being accepted from local educational agencies for the training of school leadership teams to establish drug abuse prevention and early intervention projects in schools within the school district of the applicant local educational agency. Criteria for selection of applications and other relevant program standards have been published in the FEDERAL REGISTER in proposed form on March 15, 1974.

Applications must be received by the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. 20202 (mailing address: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.420), on or before May 1, 1974.

An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than the fifth calendar day prior to the closing date (or if such fifth calendar day is a Saturday, Sunday, or Federal holiday, not later than the next following business day), as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

A separate set of selection criteria and a notice of closing date are being published in final form for community based drug abuse education projects to be carried out by community based public and private nonprofit agencies, institutions, and organizations.

(21 U.S.C. 1002)

Dated: March 21, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

(Catalog of Federal Domestic Assistance Number 13.420, Drug Abuse Education Program)

[FR Doc.74–6962 Filed 3–26–74;8:45 am]

INDIAN ELEMENTARY AND SECONDARY SCHOOL ASSISTANCE

Notice of Closing Date for Receipt of Applications

The Commissioner of Education hereby gives notice that, pursuant to the Indian Elementary and Secondary School Assistance Act, Title III of P.L. 81–874, as added by Title IV, Part A of Public Law 92–318 (20 U.S.C. 241aa–241ff), applications for assistance are being accepted from schools (located on or near a reservation) which are nonlocal educational agencies and local educational agencies which have been local educational agencies for less than three years, for grants pursuant to section 303(b) of the Act (20 U.S.C. 241bb(b)). Section 303(b) enables the Commissioner to provide financial assistance to eligible local and nonlocal educational agencies for programs that meet the purpose of the Act. Such assistance is to be provided in any fiscal year from sums not to exceed five percent of the amount appropriated for that fiscal year for grants under section 303(a) of the Act.

Assistance under section 303(b) of the Act may be used for the purpose of developing and carrying out elementary and secondary school programs specially designed to meet the special educational needs of Indian students, and for meeting costs incurred in connection with the establishment of eligible local and nonlocal educational agencies. A Notice of Proposed Rulemaking adding a new Subpart D to 45 CFR Part 186, and containing eligibility factors and criteria for the selection of applications under section 303(b) of the Act, was published at 39 FR 9842, March 14, 1974. These regulations will become effective 30 days after publication in the FEDERAL REGISTER in final form.

Awards under section 303(b) of the Act will be subject to the requirements of the Act and to appropriate provisions of 45 CFR Part 186, as indicated in § 186.33(b) of the Proposed Rule. Assistance under this program also is subject to applicable provisions in 45 CFR Part 100a (38 FR 30662, November 6, 1973). Criteria for the selection of applications are contained in 45 CFR 100a.26(b) (38 FR 30664, November 6, 1973) and in § 186.33 of the Proposed Rule.

Applications may be obtained from: Program Manager, Part A, U.S. Office of Education, Office of Indian Education, Room 426, Reporters Building, 7th and D Streets SW., Washington, D.C. 20202.

Completed applications for assistance pursuant to this notice should be submitted to: U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets SW., Washington, D.C. 20202 (mailing address: U.S. Office of Education, Application Control Center, 400 Maryland Avenue SW., Washington, D.C.)

In order to allow sufficient time for review by the Office of Education and the National Advisory Council on Indian Education as provided for under the Act, applications under section 303(b) must be received by the Application Control Center on or before April 29, 1974.

An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than the fifth calendar day prior to the closing date (or if such fifth calendar day is a Saturday, Sunday, or Federal Holiday not later than the next following business day), as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mailrooms in Washington, D.C. (In establishing the date of receipt the Commissioner will rely on the time-date stamp of such mailrooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

(20 U.S.C. 241aa–241ff)

Dated: March 21, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

NATIONAL ADVISORY COUNCIL ON EDUCATION PROFESSIONS DEVELOPMENT

Notice of Meeting

Notice is hereby given, pursuant to Section 10(a)(2), Public Law 92–463, that the next meeting of the National Advisory Council on Education Professions Development will be held on Friday, April 19, 1974, 8:30 a.m. to 3:00 p.m. local time, in the Executive Suite of the Statler Hilton Hotel, Sixteenth Street, between K and L Streets, NW., Washington, D.C.

The National Advisory Council on Education Professions Development is established under Section 502 of the Education Professions Development Act (Public Law 90–35). The Council is charged with the review of the Education Professions Development Act and of all other Federal programs for the training and development of educational personnel.

The meeting will be held for the purpose of appointing an Executive Director. The proposed agenda includes review of applications and references, discussion of applicants' qualifications, and the interviewing of candidates nominated by a committee of the Council.

Because of the nature of the agenda, the meeting will be closed to the public. Approval for closing the meeting has been granted by the U.S. Commissioner of Education under the authority of section 10(d) of the Federal Advisory Committee Act (P.L. 92–463) and section 552(b)(6) of Title 5 of the United States Code.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Council office, located at 1111 20th Street, NW., Room 308, Washington, D.C. 20036.

Signed at Washington, D.C., on March 21, 1974.

JOSEPH YOUNG,
Executive Director.

Office of the Secretary

OFFICE FOR CIVIL RIGHTS

Statement of Organization, Functions, and Delegations of Authority

The Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare has been amended to reflect certain changes in the Statement of the Office for Civil Rights (38 FR 29103) 10/15/73, as follows:

Section 1D.10, the Statement of Organization is amended to include an Office of Governmental Relations in the Office of the Director, and to change the title "Assistant Director (Policy, Planning, and Program Development)" to "Assistant Director (Planning and Program Coordination)."

Section 1D.20, the Statement of Functions is amended to include the functional statement for the new Office of Governmental Relations and the revised functional statement of the Assistant Director (Planning and Program Coordination).

The revised sections read as follows:

SEC. 1D.10 *Organization.* The Office for Civil Rights is under the supervision of the Director, Office for Civil Rights, who reports directly to the Secretary. He also serves as Special Assistant to the Secretary for Civil Rights. The Office for Civil Rights consists of:

Office of the Director:
- Director
- Deputy Directory
- Office of Policy Communication
- Office of Public Affairs
- Office of Governmental Relations
- Assistant Director (Planning and Program Coordination)
- Assistant Director (Administration and Management)

Contract Compliance Division
Elementary and Secondary Education Division
Higher Education Division
Health and Social Services Division

The statement for the Office of Governmental Relations in *Sec.1D.20 Functions* will be inserted after the statement for the Office of Public Affairs. The statement for the Office of Governmental Relations will be numbered (5). As a consequence, the numbers of the remaining functional statements which follow will change accordingly.

The added and amended statements read as follows:

(5) *Office of Governmental Relations.* The Office of Governmental Relations is responsible for facilitating coordination between the Office for Civil Rights and other Executive Branch Departments and agencies, as well as other Department of Health, Education, and Welfare agencies and offices. It reviews policies and regulations which are circulated to the Office for Civil Rights by other agencies; identifies and coordinates inter-Office comments on new Departmental policies and regulations of potential interest to Department of Health, Education, and Welfare civil rights programs; ensures that final policy comments and determinations proceed according to schedule.

(6) *Assistant Director Planning and Program Coordination.* The Assistant Director (Planning and Program Coordination) is responsible for advising, coordinating and assisting the operating Divisions and the Directors, Office for Civil Rights in the various HEW Regional Offices in determining priorities, the development of long range planning, and the determination of program requirements. He coordinates the development of the annual enforcement plan and he provides overall guidance to the training and technical assistance functions carried out by each of the Divisions. He is responsible for initiating appropriate planning activities and for ensuring that new programs are coordinated at the National and Regional levels.

Dated: March 18, 1974.

THOMAS S. MCFEE,
Acting Assistant Secretary for Administration and Management.

INTERNATIONAL VOYAGE LOAD LINES

Implementation of New Provisions

The purpose of this notice is to inform the public of the implementation of the International Voyage Load Line Act of 1973 (Pub. L. 93–115, 87 Stat. 418 (Oct. 1, 1973)).

The International Voyage Load Line Act of 1973 replaces the Foreign Load Lines Act (46 U.S.C. 85–85g), which has been repealed. The purpose of the new Act is to implement the provisions of the International Convention on Load Lines, 1966 (18 U.S.T. 1857; TIAS 6331), to which the United States is a party and which came into force on July 21, 1968.

To implement the Convention, and new Act substantially re-enacted the repealed Act, except for the following changes:

1. Application has been modified as follows:

a. In lieu of the 150-gross ton limit formerly used, the Convention and the Act apply to vessels of more than 79 feet in length, the keel of which is laid (or which is at a similar stage of construction) on or after July 21, 1968; and

b. The former exemption allowed for a ship that is being towed and not carrying cargo or passengers has been discontinued.

2. The sanction of imprisonment is increased:

a. From three months to one year for the intentional violation of a detention order; and

b. From one year to two years for the alteration, defacement, or obliteration of the prescribed load line.

V 39 160
MAR 27 74
XUM

Since Congress has affirmed and continued the original statute and, in effect, has validated the regulations issued thereunder, the regulations promulgated in 46 CFR Part 42, continue in effect under the authority of the International Voyage Load Line Act of 1973, until expressly abrogated, modified, or amended as published in the FEDERAL REGISTER.

C. R. BENDER,
Admiral, U.S. Coast Guard,
Commandant.

TOWING INDUSTRY ADVISORY COMMITTEE

Notice of Open Meeting

This is to give Notice pursuant to Public Law 92-463, Sec. 19(a), approved October 6, 1972, that the Towing Industry Advisory Committee will conduct open meetings on Wednesday, April 17, 1974, and Thursday, April 18, 1974, in Meeting Room No. 2 of The Rivergate, 4 Canal Street, New Orleans, Louisiana. The first day's session will begin at 9:00 a.m. and will last all day. The meeting on April 18, 1974, will begin at 9:00 a.m. and will adjourn at noon.

Discussion items on the agenda are the following:

1. Marine Sanitation Devices
2. Shipboard Radiotelephones
3. Safety and Qualifications Personnel
4. Personnel Education
5. Ports and Waterways Safety
6. Oil Pollution Prevention
7. Bridges
8. Rules of the Road
9. Coast Guard Work with the Occupational Safety and Health Act
10. Regulations on Tank Vessels and Hazardous Cargoes
11. Barge Repairs

The Towing Industry Advisory Committee was chartered by the Commandant of the Coast Guard on August 3, 1973 to advise the Marine Safety Council on matters regarding safe towing operations. Public members of the Committee serve voluntarily without compensation from the Federal Government, either travel or per diem.

Interested persons may seek additional information by writing:

Commandant (G-CMC/82)
U.S. Coast Guard
Washington, D.C. 20590

or by calling the Executive Director, Towing Industry Advisory Committee at 202-426-1477.

Dated: March 21, 1974.

W. F. REA III,
Rear Admiral, U.S. Coast Guard,
Chief, Office of Merchant
Marine Safety.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON AGENCY ORGANIZATION AND PERSONNEL

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Agency Organization and Personnel of the Administrative Conference of the United States, to be held at 1:30 p.m. on April 3, 1974 in the Library, Suite 500, 2120 L Street, NW., Washington, D.C. 20037.

The Committee will meet to discuss two pending studies, the role of the chairman in independent regulatory agencies and the use of administrative law judges.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least a day in advance. To the extent that time permits the Committee Chairman may allow public presentation of oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting. For further information concerning this committee meeting contact Richard K. Berg, Suite 500, 2120 L Street, NW., Washington, D.C. 20037 or phone 202-254-7065. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

MARCH 20, 1974.

ATOMIC ENERGY COMMISSION

[Docket Nos. 50-450, 50-451]

DELMARVA POWER & LIGHT CO. AND PHILADELPHIA ELECTRIC CO.

Notice of Prehearing Conference

In the matter of Delmarva Power & Light Co., and Philadelphia Electric Co. (Summit Power Station, Units 1 & 2).

Take notice, that pursuant to the Atomic Energy Commission's "Notice of Hearing on Application for Construction Permits," dated August 24, 1973, and in accordance with Section 2.752 of the Commission's Rules of Practice, the Atomic Safety and Licensing Board will conduct a prehearing conference for the proceeding on April 25, 1974 at 9:30 a.m. local time, in the U.S. District Court, Courtroom No. 2, 844 King Street, Wilmington, Delaware 19801.

This conference is in connection with the application of the Delmarva Power & Light Co. and the Philadelphia Electric Co. for construction permits to build two high temperature gas-cooled nuclear reactors in New Castle County, Delaware, five miles northeast of Middletown, Delaware, to be known as the Summit Power Station, Units 1 and 2. Each of the units is designed for initial operation at 2,000 megawatts thermal with a net electrical output of approximately 785 megawatts.

The prehearing conference will deal with the following matters:

(1) Simplification, clarification, and specification of the issues;

(2) The necessity or desirability of amending the pleadings;

(3) The obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof;

(4) Identification of witnesses and the limitation of the number of expert witnesses, and other steps to expedite the presentation of evidence;

(5) The setting of a hearing schedule; and

(6) Such other matters as may aid in the orderly disposition of the proceeding.

The Board will be concerned with the radiological health and safety issues and environmental issues set forth in the Commission's August 24, 1973 Notice of Hearing, 38 FR 23547, Aug. 31, 1973. All interested members of the public are invited to attend this conference, as well as the public evidentiary hearing, to be scheduled later. No limited appearance statements will be heard at this conference; however, they will be heard on the first day of the later-scheduled evidentiary hearing.

It is so ordered.

Issued at Washington, D.C., this 22d day of March 1974.

For the Atomic Safety and Licensing Board.

THOMAS W. REILLY,
Chairman.

LMFBR BASE PROGRAM

Determination in Regard to Pending Preparation of NEPA Impact Statement

On June 12, 1973, the U.S. Court of Appeals for the District of Columbia Circuit held in *Scientists' Institute for Public Information, Inc.* v. *AEC* that present preparation of an environmental impact statement on the Liquid Metal Fast Breeder Reactor (LMFBR) program is required by section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA). The Commission, on June 14, 1973, determined that preparation of an environmental impact statement on the LMFBR program would immediately be initiated pursuant to the Court's decision. A subsequent declaratory order of the U.S. District Court for the District of Columbia provided for completion of this statement by June 14, 1974.

The Commission has already prepared the issued section 102(2)(C) impact statements on a conceptual LMFBR demonstration plant and on the Fast Flux Test Facility. In addition to these statements and the overall statement called for by the Court's decision, the Commission will issue further environmental impact statements in connection with licensing of construction and operation of the first LMFBR Demonstration Plant as well as any other future LMFBR power plants, as provided for in AEC Regulations (10 CFR Part 50, Appendix D).

The Commission has determined that an examination should be made as to whether proceeding with the LMFBR program during the period of preparation of the referenced NEPA impact statement would be consistent with its NEPA responsibilities in regard to environmental protection, or would prejudice its ability to make the required NEPA review and take whatever action may be appropriate in light thereof.

In undertaking this interim NEPA examination, the Commission has utilized factors analogous to those developed for determinations as to whether to suspend certain reactor construction permits and operating licenses pending completion of the section 102(2)(C) reviews. These determinations were required as a result of the decision of the Court of Appeals for the District of Columbia Circuit in the *Calvert Cliffs'* litigation.[1] The factors utilized are set forth in 10 CFR Part 50, Appendix D, section E.2. An additional factor has been added to recognize the subsequent decision of the Court of Appeals for the District of Columbia Circuit in *Coalition For Safe Nuclear Power* v. *AEC, et al.* (463 F. 2d 954), which involved judicial review of the interim NEPA review approach.

On July 20, 1973, the AEC issued its determination and findings, based on an interim environmental review, concerning the execution and implementation of the LMFBR Demonstration Plant contracts. This determination was made after review of comments received on a proposed determination published in the FEDERAL REGISTER on June 29, 1973. AEC determined, after considering the aforementioned factors, that the contracts could be executed and thereafter implemented during the limited period of the ongoing NEPA review of the entire LMFBR program (38 FR 19853).

The review encompassed in the present documents relates to the LMFBR base technology program. This program entails analytical, experimental and prooftesting activities and encompasses the construction and operation of experimental testing facilities to provide information on breeder plant design, plant systems and components, instrumentation and control, sodium technology, fuels and materials, fuel cycle, physics, and safety under operating conditions simulating those that will be encountered when LMFBR plants are in service. With limited exception, all contract work to be performed in connection with the LMFBR base program during the review period is a continuation of prior work.

[1] *Calvert Cliffs' Coordinating Committee, Inc.* v *Atomic Energy Commission*, 449 F. 2d 1109 (DC Cir 1971).

As applied to continuation of the LMFBR base program, the Commission, in making the determination at hand, has considered and balanced the following factors:

1. Whether it is likely that the continuation of LMFBR base program activities during the prospective review period will give rise to a significant adverse impact on the environment; the nature and extent of this impact, if any; and whether redress of any adverse environmental impact can reasonably be effected should modification, suspension or termination of program activities result from the NEPA environmental review.

2. Whether continuation of the LMFBR base program activities during the prospective review period would foreclose subsequent adoption of alternatives.

3. The effect of any delay in the LMFBR base program upon the public interest.

4. Whether the additional irretrievable commitment of resources to the LMFBR base program during the prospective review period might affect the eventual decision reached on the NEPA review.

To assist the Commission in its consideration of the foregoing factors, the Commission published in the FEDERAL REGISTER on October 26, 1973 (38 FR 29635) its proposed determination with a request that interested persons who desire to submit written comments or suggestions for Commission consideration do so on or before November 17, 1973.

Comments were received from two of the participants in the LMFBR Demonstration Plant Project, namely Commonwealth Edison Company and Project Management Corporation, and from J. G. Speth, Esquire, on behalf of the Natural Resources Defense Council and the Scientists' Institute for Public Information. The comments of Commonwealth Edison and the Project Management Corporation support AEC's Proposed Determination that continuation of the LMFBR base program during the NEPA review period is in the public interest. Mr. Speth contended that continuation of the base program with the ensuing expenditure of funds during the period of NEPA program review would effectively prevent AEC from making a determination other than to proceed with LMFBR program implementation at the conclusion of the review period, thereby foreclosing consideration of other energy options.
